

Jeremy J. Ramsden

APPLIED NANOTECHNOLOGY

The Conversion of Research Results
to Products

Micro & Nano Technologies Series

Contents

SERIES EDITOR'S PREFACE	xi
PREFACE	xiii

Part 1 Technology Basics

CHAPTER 1	What is Nanotechnology?	3
1.1	Nanotechnology as Process	4
1.2	Nanotechnology as Materials	7
1.3	Nanotechnology as Materials, Devices and Systems	8
1.4	Direct, Indirect and Conceptual Nanotechnology	9
1.5	Nanobiotechnology and Bionanotechnology	10
1.6	Nanotechnology—Toward a Definition	10
1.7	The Nanoscale	11
1.8	Nanoscience	11
	Further Reading	12
CHAPTER 2	Science, Technology and Wealth	13
2.1	Nanotechnology is Different	18
2.2	The Evolution of Technology	20
2.3	The Nature of Wealth and Value	22
2.4	The Social Value of Science	24
	Further Reading	26
CHAPTER 3	Innovation	27
3.1	The Time Course of Innovation	31
3.2	Creative Destruction	34
3.3	What Drives Development?	37
3.4	Can Innovation be Managed?	37
3.5	The Effect of Maturity	38
	Further Reading	39
CHAPTER 4	Why Nanotechnology?	41
4.1	Fabrication	44
4.2	Performance	45
4.3	Agile Manufacturing	45
	Further Reading	46

Part 2 Nanotechnology Products

CHAPTER 5	The Nanotechnology Business	49
5.1	Nanotechnology Statistics	50
5.2	The Total Market	51
5.3	The Current Situation	53
5.4	Consumer Products	55
5.5	The Safety of Nanoproducts	58
5.6	Geographical Distribution	60
5.6.1	The fiscal environment for nanotechnology	61
5.6.2	Nanotechnology in the developing world	63
CHAPTER 6	Miscellaneous Applications	65
6.1	Noncarbon Materials	66
6.1.1	Composites	66
6.1.2	Coatings	67
6.2	Carbon-Based Materials	68
6.3	Ultraprecision Engineering	69
6.4	Aerospace and Automotive Industries	70
6.5	Catalysis	70
6.6	Construction	70
6.7	Energy	71
6.7.1	Production	71
6.7.2	Storage	72
6.7.3	Lighting	72
6.8	Environment	72
6.9	Food	73
6.10	Metrology	80
6.11	Paper	81
6.12	Security	81
6.13	Textiles	82
CHAPTER 7	Information Technologies	83
7.1	Silicon Microelectronics	84
7.2	Data Storage Technologies	85
7.3	Display Technologies	86
7.4	Sensing Technologies	86
CHAPTER 8	Applications to Health	89
8.1	Principal Applications	90
8.2	Implanted Devices	91
8.3	Nanoparticle Applications	92
8.4	Tissue Scaffolds	93
8.5	Paramedicine	94

8.6	Nanobots	94
8.7	Toxicology Aspects.....	95
	Further Reading	95

Part 3 Organizing Nanotechnology Business

CHAPTER 9	The Business Environment	99
9.1	The Universality of Nanotechnology	100
9.2	The Radical Nature of Nanotechnology.....	103
9.3	Financing Nanotechnology	104
9.4	Government Funding	108
9.5	Intellectual Needs	110
	9.5.1 Company–University Collaboration	113
	9.5.2 Clusters.....	114
9.6	The Cost of Nanotechnology	114
9.7	Companies.....	114
	9.7.1 Hyperion	114
	9.7.2 CDT.....	116
	9.7.3 Q-Flo	116
	9.7.4 Owlstone.....	117
	9.7.5 Analysis.....	117
9.8	Temporal Evolution	119
9.9	Patents and Standards	120
CHAPTER 10	Assessing Demand for Nanotechnology.....	121
10.1	Products of Substitution.....	122
10.2	Incrementally Improved Products	123
10.3	Radically New Products	123
10.4	Modeling	123
10.5	Judging Innovation Value	124
10.6	Anticipating Benefit	124
CHAPTER 11	Design of Nanotechnology Products.....	127
11.1	The Challenge of Vastification	127
11.2	Enhancing Traditional Design Routes.....	128
11.3	Materials Selection	130
	Further Reading	130

Part 4 Wider and Long-Term Issues

CHAPTER 12	The Future of Nanotechnology	133
12.1	Productive Nanosystems.....	135
12.2	Social Impacts.....	136
12.3	Timescales.....	138

12.4 Self-Assembly	139
12.5 Molecular Electronics	140
12.6 Quantum Computing	141
Further Reading	141
CHAPTER 13 Grand Challenges	143
13.1 Material Crises.....	144
13.2 Social Crises.....	146
13.3 Is Science Itself in Crisis?	146
13.4 Nanotechnology-Specific Challenges	148
13.5 Globalization	149
13.6 An Integrated Approach	149
CHAPTER 14 Ethics and Nanotechnology	151
14.1 Risk, Hazard and Uncertainty	152
14.2 Regulation	154
14.3 A Rational Basis for Safety Measures	155
14.4 Should We Proceed?	156
14.5 What About Nanoethics?	157
Further Reading	159
INDEX	161
