

Integral Equation Techniques in Transient Electromagnetics

D. Poljak and C.Y. Tham

 **WIT**_{PRESS}

Contents

Preface.....	ix
--------------	----

Chapter 1

Introduction.....	1
1.1 Introduction	1
1.2 Time domain and frequency domain methods.....	4
1.3 Survey of electromagnetics analysis methods	6
1.4 Finite Element Integral Equation Method (FEIEM).....	12
1.5 The Method of Moments	14

Chapter 2

The frequency domain: Method of Moments.....	21
2.1 Introduction	21
2.2 The Method of Moments for EM field	21
2.3 Frequency-time domain transformation	34
2.4 Application examples	47
2.5 Frequency sampling.....	55
2.6 Frequency sampling using adaptive integration	66
2.7 Application example.....	73
2.8 Frequency data from time domain waveform.....	75
2.9 Chapter summary	80

Chapter 3

Time domain Finite Element Integral Equation Method.....	85
3.1 Time domain Hall n integral equation.....	85
3.2 Finite Element Integral Equation Method	86

Chapter 4

Transient analysis of wire antennas	91
4.1 Introduction	91
4.2 Time domain approach	91
4.3 Wire transient numerical examples	121

Chapter 5	
Transient analysis of transmission lines.....	163
5.1 Time domain analysis.....	163
5.2 Frequency domain analysis	174
Chapter 6	
Transient analysis of lightning electromagnetics.....	193
6.1 Time domain model of the lightning channel.....	194
6.2 Lightning induced overvoltage along the line	199
6.3 Numerical results.....	200
6.4 Closure	203
Chapter 7	
Transients on printed circuit boards (PCBs)	205
7.1 Introduction	205
7.2 Problems in PCB modelling	205
7.3 Summary	225
Chapter 8	
Interaction of the human body with electromagnetic fields.....	227
8.1 Introduction	227
8.2 Equivalent antenna model of the human body.....	228
8.3 Frequency domain modelling of the human body	229
8.4 The boundary element solution of the Pocklington equation	230
8.5 Time domain modelling of the human body.....	231
8.6 Solution of the time domain Hall n integral equation.....	232
8.7 Frequency domain examples	237
8.8 Time domain examples.....	244
Appendix	
Interpolation schemes for evaluation of Fourier integrals.....	249
