Research Methods

A concise introduction to research in management and business consultancy

Second Edition

B/H

Contents

About the Authors ix
Acknowledgements xi

1 Introduction 1
1.1 Background and major themes 1
1.2 Using this book 4
1.3 Chapter structure/studying each chapter 6
1.4 The research/consultancy project 7
1.5 Concluding comments 8

2 Managing Your Development as a Manager 10
Learning outcomes 10
2.1 The importance of continued professional development for the manager 11
2.2 Approaches to professional development: self-development 12
2.3 Action learning: process and principles 14
2.4 Working with and learning from others 15
2.5 Planning a self-development program 16
2.6 Concluding comments 20
2.7 References 20
2.8 Glossary 20

3 Introduction to Research in Management 21
Learning outcomes 21
3.1 The theoretical antecedents to management research: epistemological versus ontological orientations 22
3.2 Deductive versus inductive research 23
3.3 Nomothetic versus ideographic research 32

3.4 *Problems and issues in management consultancy-type research* 36
3.5 Concluding comments 39
3.6 References 39
3.7 Glossary 40

4 Management Consultancy and Research 42
Learning outcomes 42
4.1 The consultant and consultancy: development and meaning 43
4.2 Why organizations use consultants: advantages and contributions 44
4.3 Disadvantages and limitations of management consultants 46
4.4 Management consultancy: types, roles, and activities 48
4.5 Internal versus external consultants 53
4.6 Developments in management consultancy approaches and techniques 54
4.7 *Professional and ethical issues in management consultancy and research* 55
4.8 Concluding comments 56
4.9 References 56
4.10 Glossary 57

5 The Consultancy Research Process 58
Learning outcomes 58
5.1 Management consultancy and research: an overview 59
5.2 *Initiating the consultancy/research process:* meeting/identifying the client 59
5.3 The consultancy research project/topic 63
5.4 Planning and agreeing the consultancy/research brief 67
5.5 Designing and agreeing the research plan 68
5.6 Completing the consultancy cycle 69
5.7 Concluding comments 70
5.8 References 70
5.9 Glossary 71

6 An Overview of Data Collection: Approaches, Methods, and Techniques 72
Learning outcomes 72
6.1 Data, information, and decisions 73
6.2 Types of data 74
6.3 Methods of data collection 77
6.4 Issues in data collection 78
6.5 Choosing between data collection methods 82
6.6 Concluding comments 85

6.7 References 86
6.8 Glossary 87

7 **Data Collection: Secondary Data** 88
Learning outcomes 88
7.1 Secondary data: meaning and scope 89
7.2 Planning secondary data collection 91
7.3 Internal secondary data 95
7.4 External secondary data 97
7.5 Criteria for evaluating secondary data 102
7.6 Concluding comments 104
7.7 References 104
7.8 Glossary 105

8 **Data Collection: Observational Research** 107
Learning outcomes 107
8.1 The nature and purpose of observational research 108
8.2 Observation approaches and techniques 110
8.3 Planning and implementing observational research 116
8.4 Other issues in observational research 119
8.5 Concluding comments 121
8.6 References 121
8.7 Glossary 122

9 **Data Collection: Experimental, Quasi-experimental, and Action Research** 123
Learning outcomes 123
9.1 The nature and purpose of experimentation: classical experimentation 124
9.2 Structuring experimental research design: key steps 128
9.3 Quasi-experimentation 132
9.4 Action research 134
9.5 Concluding comments 137
9.6 References 138
9.7 Glossary 139

10 **Data Collection: Asking Questions** 140
Learning outcomes 140
10.1 Ethics in research 141
10.2 Questioning as a means of data collection 143
10.3 Interviews 146
10.4 Questionnaires, surveys, and samples 151
10.5 Surveys 160
10.6 Concluding comments 165
10.7 References 166
10.8 Glossary 167

11 Analyzing Data: Nature and Purpose 168
Learning outcomes 168
11.1 Using and building models 169
11.2 Modeling through equations 170
11.3 Building models 172
11.4 Analysis: nature and roles 173
11.5 The purpose of analysis 176
11.6 Quantitative versus qualitative data analysis 177
11.7 Concluding comments 180
11.8 References 181
11.9 Glossary 181

12 Analyzing Qualitative Data 182
Learning outcomes 182
12.1 Qualitative analysis 183
12.2 Semiotics 188
12.3 Dialectics: an alternative form of argument 192
12.4 Steps in analyzing qualitative data 194
12.5 Issues in and approaches to analyzing qualitative data 196
12.6 Concluding comments 197
12.7 References 198
12.8 Glossary 199

13 Actioning Research 200
Learning outcomes 200
13.1 Interpreting and diagnosing research findings, making recommendations and taking decisions 201
13.2 Designing the implementation and action plans 204
13.3 Implementation and follow up 204
13.4 Control and evaluation: disengagement 206
13.5 Concluding Comments 208
13.6 References 209
13.7 Glossary 210

Appendix I: Activity Solutions 211
Appendix II: Bibliography 219
Appendix III: Introduction to Management Research 227
Appendix IV: Internet Gateways, Research and Databases, Search Engines and Directories for Social Science Researchers 234
Appendix V: Amalgamated Glossary 236
Appendix VI: Referencing and Advice on Presentation 241
Appendix VII: Resources for Methods in Evaluation and Social Research 287
