Design of Landfills and Integrated Solid Waste Management

AMALENDU BAGCHI

CONTENTS

PREFACE	xv
PART I INTEGRATED SOLID WASTE MANAGEMENT	1
1 Introduction	3
1.1 Basic Concepts of an Integrated Solid Waste Management Program, 6	
1.2 Scope and Organization of Book, 7	
2 Integrated Solid Waste Management	10
2.1 Planning, 15	
2.2 Benefits of ISWM, 18	
2.3 Regulatory Issues, 19	
2.4 Public Promotion of ISWM, 20	
2.5 Collection and Transportation of Waste, 24	
2.6 Transfer Stations, 30	
2.7 Waste Composition Study, 31	
3 Source Reduction	39
3.1 Role of Governmental Bodies, 39	
3.2 Planning, 40	
3.3 Source Reduction Ideas, 41	
3.4 Reducing Toxicity, 41	

4	Medical Waste Management	45
	4.1 Definition of Infectious Waste, 46	
	4.2 Source Separation and Management, 46	
	4.3 Storage, 50	
	4.4 Transportation, 51	
	4.5 Treatment, 52	
	4.6 Tracking, 58	
	4.7 Collection of Infectious Waste Generated from Homes, 59	
	4.8 Waste Reduction, 60	
5	Incineration	64
	5.1 Incinerable Waste, 65	
	5.2 Waste Load Estimate, 66	
	5.3 Types of Incinerator, 67	
	5.4 Environmental Issues, 81	
	5.5 Incineration of Various Nonhazardous Waste Types, 84	
	5.6 Site Selection, Installation, and Financing, 85	
6	Composting	90
	6.1 Fundamentals of Composting, 90	
	6.2 Influence of Various Parameters on Composting, 91	
	6.3 Facility Design, 97	
	6.4 Environmental Issues, 106	
	6.5 Health and Safety, 117	
	6.6 Marketing, 117	
	6.7 Economics, 118	
7	Reuse and Recycling	119
	7.1 Planning, 120	
	7.2 Marketing, 121	
	7.3 Information on Recyclable Materials Recovered from Municipal Solid Waste, 124	
	7.4 Material Recovery Facilities, 131	
	7.5 Refuse-Derived Fuel Processing Plants, 133	
	7.6 Quality Control and Data Collection, 133	
	7.7 Land Spreading, 136	
8	Reuse of Industrial By-Products	142
	8.1 Comments on Engineering Characteristics and Testing Protocols, 142	

8.2	Reuse of Industrial By-Products in Civil Engineering Projects, 144	
8.3	Environmental Issues, 145	
9	Contaminated Soil Remediation	149
9.1	Soil Contamination Process, 150	
9.2	Factors Affecting Remedial Processes, 155	
9.3	Contaminant Transport, 157	
9.4	Maintenance of Wells, 164	
9.5	Site Investigation, 170	
9.6	<i>In Situ</i> Remediation Methods, 173	
9.7	<i>Ex Situ</i> Remediation Methods, 212	
9.8	Project Life Estimation, 217	
9.9	Project Cost Estimation, 219	
9.10	Comments on Remediation Method Selection, 221	
10	Redevelopment of Contaminated Land	225
10.1	Risk Assessment, 225	
10.2	Risk-Based Corrective Action for Redevelopment of Contaminated Land, 235	
10.3	Legal Issues, 235	
10.4	Funding, 236	
PART II	LANDFILL DESIGN	237
11	Introduction	239
11.1	Comments on Regulatory Requirements, 240	
11.2	Scope and Organization of Part II, 242	
12	Site Selection	246
12.1	Data Collection, 247	
12.2	Locational Criteria, 251	
12.3	Preliminary Assessment of Public Reactions, 254	
12.4	Development of a List of Potential Sites, 254	
12.5	Final Site Selection, 256	
12.6	Preparation of Feasibility Report, 261	
13	Leachate and Gas Generation	263
13.1	Factors That Influence Leachate Quality, 265	
13.2	Factors That Influence Leachate Quantity, 266	

13.3	Assessing Probable Quality of Leachate, 267	
13.4	Estimation of Leachate Quantity, 274	
13.5	Typical Leachate Quality of Various Nonhazardous Wastes, 289	
13.6	Leachate Treatment, 290	
13.7	Gas Generation, 297	
14	Waste Characterization	302
14.1	General Guidelines for Waste Characterization, 303	
14.2	Identification of Hazardous Waste, 312	
14.3	Restriction on Land Disposal of Hazardous Waste, 313	
14.4	Identification of Nonhazardous Waste, 315	
15	Natural Attenuation Landfills	317
15.1	Natural Attenuation Process, 320	
15.2	Mechanisms of Attenuation, 320	
15.3	Effects of Various Factors of Attenuation Mechanisms, 326	
15.4	Attenuation Mechanisms of Specific Pollutants, 328	
15.5	Design Approach, 342	
15.6	Summary and Comments, 349	
16	Containment Landfills	352
16.1	Single-Lined Landfills, 353	
16.2	Double- or Multiple-Lined Landfills, 354	
16.3	Liner Material Selection Criteria, 358	
16.4	Comments on Liner Thickness, 358	
16.5	Comments on Final Cover Design, 360	
16.6	Leachate Apportionment Models, 363	
16.7	Comments on Designing the Landfill Base below the Groundwater Table, 372	
16.8	Check for Liner Blowout, 376	
16.9	Natural Attenuation versus Containment Landfill, 380	
17	Bioreactor Landfills	383
17.1	Microbiology of Landfills, 385	
17.2	Potential Advantages of Bioreactor Landfills, 386	
17.3	Bioreactor Landfill Design, 387	
17.4	Slope Stability, 394	
17.5	Potential Obstacles to Bioreactor Landfill Development, 395	

18	Liner Materials	397
	18.1 Clay, 398	
	18.2 Synthetic Membrane, 425	
	18.3 Geosynthetic Clay Liner, 434	
	18.4 Amended Soil and Other Admixtures, 436	
	18.5 Composite Liner, 439	
19	Design of Landfill Elements	443
	19.1 Leachate Collection System, 443	
	19.2 Stormwater Routing, 465	
	19.3 Geosynthetic Membrane, 471	
	19.4 Berm Design, 476	
	19.5 Landfill Stability, 478	
	19.6 Comments on Seismic Design of Landfills, 481	
	19.7 Access Road Design, 483	
	19.8 Landfill Cover Design, 486	
	19.9 Gas Venting System Design, 492	
	19.10 Converting Existing Natural Attenuation Landfills to Containment Landfills, 504	
20	Landfill Construction	509
	20.1 Subbase Construction, 509	
	20.2 Liner Construction, 510	
	20.3 Berm Construction, 525	
	20.4 Sand Drainage Blanket Construction, 527	
	20.5 Leachate Collection Trench Construction, 527	
	20.6 Double- or Multiple-Liner Construction, 528	
	20.7 Groundwater Dewatering System Construction, 529	
	20.8 Lysimeter Construction, 529	
	20.9 Landfill Cover Construction, 530	
	20.10 Material Procurement, Construction Scheduling, and So On, 531	
	20.11 Erosion Control during Landfill Construction, 531	
	20.12 Construction on Landfills, 532	
21	Landfill Remediation	541
	21.1 Site Investigation, 542	
	21.2 Developing a Priority List, 543	
	21.3 Selection of Remedial Methods and Related Issues, 549	

22	Performance Monitoring	552
22.1	Leachate Head Monitoring, 553	
22.2	Monitoring Head in the Groundwater Dewatering System, 555	
22.3	Leakage Monitoring, 555	
22.4	Groundwater Monitoring, 562	
22.5	Gas Monitoring, 571	
22.6	Leachate Tank Monitoring, 573	
22.7	Final Cover Stability Monitoring, 574	
22.8	Groundwater Data Analysis, 575	
23	Landfill Operation	579
23.1	Equipment Used for Compaction, 580	
23.2	Phasing Plan, 582	
23.3	Covering Waste, 584	
23.4	Co-disposal of Nonhazardous Sludge in Municipal Landfills, 584	
23.5	Fire Protection, 585	
23.6	Litter Control, 585	
23.7	Dust Control, 586	
23.8	Access Road Maintenance, 586	
23.9	Leachate Collection System Maintenance, 586	
23.10	Final Cover Maintenance, 587	
23.11	Comments on Enforcement-Related Issues, 587	
23.12	Landfill Mining, 588	
24	Compensatory Wetland Development	589
24.1	Wetland Identification, 590	
24.2	Wetland Determination and Delineation, 593	
24.3	Wetland Functions and Values, 594	
24.4	Wetland Protection, 595	
24.5	Wetland Restoration and Creation, 595	
24.6	Wetland Mitigation, 596	
24.7	Long-Term Evaluation, 597	
25	Health and Safety	599
25.1	Sources of Occupational Health Hazards, 600	
25.2	Personal Protective Equipment, 608	
25.3	Elements of a Health and Safety Program, 612	
26	Economic Analysis	616
26.1	Cost Estimates, 617	

- 26.2 Estimate for Proof of Financial Responsibility, 620
- 26.3 User Fee Estimate, 626
- 26.4 Cash Flow Estimate, 629

APPENDIX	CONVERSION OF U.S. CUSTOMARY UNITS TO INTERNATIONAL SYSTEM OF UNITS (SI)	631
