

APPLIED STATISTICS

for Engineers and Physical Scientists

THIRD EDITION

Johannes Ledolter | Robert V. Hogg

CONTENTS

Preface xiii

1 COLLECTION AND ANALYSIS OF INFORMATION 1

- 1.1 Introduction 1**
 - 1.1-1 Data Collection 1
 - 1.1-2 Types of Data 3
 - 1.1-3 The Study of Variability 4
 - 1.1-4 Distributions 7
 - 1.1-5 Importance of Variability (or Lack Thereof) for Quality and Productivity Improvement 9
 - Exercises 11
- 1.2 Measurements Collected over Time 12**
 - 1.2-1 Time-Sequence Plots 12
 - 1.2-2 Control Charts: A Special Case of Time-Sequence Plots 15
 - Exercises 17
- 1.3 Data Display and Summary 18**
 - 1.3-1 Summary and Display of Measurement Data 18
 - 1.3-2 Measures of Location 22
 - 1.3-3 Measures of Variation 25
 - 1.3-4 Exploratory Data Analysis: Stem-and-Leaf Displays and Box-and-Whisker Plots 28
 - 1.3-5 Analysis of Categorical Data 32
 - Exercises 36
- 1.4 Comparisons of Samples: The Importance of Stratification 44**
 - 1.4-1 Comparing Two Types of Wires 44
 - 1.4-2 Comparing Lead Concentrations from Two Different Years 45
 - 1.4-3 Number of Flaws for Three Different Products 48
 - 1.4-4 Effects of Wind Direction on the Water Levels of Lake Neusiedl 48
 - Exercises 51
- 1.5 Graphical Techniques, Correlation, and an Introduction to Least Squares 53**
 - 1.5-1 The *Challenger* Disaster 53
 - 1.5-2 The Sample Correlation Coefficient as a Measure of Association in a Scatter Plot 55
 - 1.5-3 Introduction to Least Squares 59
 - Exercises 61

1.6	The Importance of Experimentation	65
1.6-1	Design of Experiments	66
1.6-2	Design of Experiments with Several Factors and the Determination of Optimum Conditions	70
	Exercises	72
1.7	Available Statistical Computer Software and the Visualization of Data	73
1.7-1	Computer Software	73
1.7-2	The Visualization of Data	75
	Exercises	76
	Chapter I Additional Remarks	77
	Projects	78

2 PROBABILITY MODELS AND DISCRETE DISTRIBUTIONS 87

2.1	Probability	87
2.1-1	The Laws of Probability	89
	Exercises	95
2.2	Conditional Probability and Independence	96
2.2-1	Conditional Probability	96
2.2-2	Independence	98
2.2-3	Bayes' Theorem	100
	Exercises	102
2.3	Random Variables and Expectations	106
2.3-1	Random Variables and Their Distributions	106
2.3-2	Expectations of Random Variables	109
	Exercises	112
2.4	The Binomial and Related Distributions	114
2.4-1	Bernoulli Trials	114
2.4-2	The Binomial Distribution	115
2.4-3	The Negative Binomial Distribution	119
2.4-4	The Hypergeometric Distribution	119
	Exercises	120
2.5	Poisson Distribution and Poisson Process	123
2.5-1	The Poisson Distribution	123
2.5-2	The Poisson Process	125
	Exercises	127

2.6	Multivariate Distributions	129
2.6-1	Joint, Marginal, and Conditional Distributions	129
2.6-2	Independence and Dependence of Random Variables	133
2.6-3	Expectations of Functions of Several Random Variables	134
2.6-4	Means and Variances of Linear Combinations of Random Variables	138
	Exercises	139
2.7	The Estimation of Parameters from Random Samples	142
2.7-1	Maximum Likelihood Estimation	142
2.7-2	Examples	143
2.7-3	Properties of Estimators	145
	Exercises	147
	Chapter 2 Additional Remarks	148
	Projects	150

3 CONTINUOUS PROBABILITY MODELS 153

3.1	Continuous Random Variables	153
3.1-1	Empirical Distributions	153
3.1-2	Distributions of Continuous Random Variables	156
	Exercises	161
3.2	The Normal Distribution	163
	Exercises	168
3.3	Other Useful Distributions	170
3.3-1	Weibull Distribution	171
3.3-2	Gompertz Distribution	172
3.3-3	Extreme Value Distribution	174
3.3-4	Gamma Distribution	174
3.3-5	Chi-Square Distribution	175
3.3-6	Lognormal Distribution	175
	Exercises	179
3.4	Simulation: Generating Random Variables	181
3.4-1	Motivation	181
3.4-2	Generating Discrete Random Variables	182
3.4-3	Generating Continuous Random Variables	184
	Exercises	185
3.5	Distributions of Two or More Continuous Random Variables	187
3.5-1	Joint, Marginal, and Conditional Distributions, and Mathematical Expectations	187

3.5-2	Propagation of Errors	188
	Exercises	191
3.6	Fitting and Checking Models	194
3.6-1	Estimation of Parameters	194
3.6-2	Checking for Normality	196
3.6-3	Checking Other Models through Quantile–Quantile Plots	200
	Exercises	204
3.7	Introduction to Reliability	208
	Exercises	211
	Chapter 3 Additional Remarks	212
	Projects	214

4 STATISTICAL INFERENCE: SAMPLING DISTRIBUTIONS, CONFIDENCE INTERVALS, AND TESTS OF HYPOTHESES 217

4.1	Sampling Distributions	217
4.1-1	Introduction and Motivation	217
4.1-2	Distribution of the Sample Mean \bar{X}	219
4.1-3	The Central Limit Theorem	221
4.1-4	Normal Approximation of the Binomial Distribution	223
	Exercises	225
4.2	Confidence Intervals for Means	226
4.2-1	Determination of the Sample Size	229
4.2-2	Confidence Intervals for $\mu_1 - \mu_2$	230
	Exercises	231
4.3	Inferences from Small Samples and with Unknown Variances	232
4.3-1	Tolerance Limits	236
4.3-2	Confidence Intervals for $\mu_1 - \mu_2$	239
	Exercises	240
4.4	Other Confidence Intervals	242
4.4-1	Confidence Intervals for Variances	242
4.4-2	Confidence Intervals for Proportions	245
	Exercises	247
4.5	Tests of Characteristics of a Single Distribution	248
4.5-1	Introduction	248
4.5-2	Possible Errors and Operating Characteristic Curves	250

4.5-3 Tests of Hypotheses When the Sample Size Can Be Selected	252
4.5-4 Tests of Hypotheses When the Sample Size Is Fixed	254
Exercises	260
4.6 Tests of Characteristics of Two Distributions	262
4.6-1 Comparing Two Independent Samples	263
4.6-2 Paired-Sample t -Test	265
4.6-3 Test of $p_1 = p_2$	268
4.6-4 Test of $\sigma_1^2 = \sigma_2^2$	269
Exercises	270
4.7 Certain Chi-Square Tests	272
4.7-1. Testing Hypotheses about Parameters in a Multinomial Distribution	273
4.7-2 Contingency Tables and Tests of Independence	276
4.7-3 Goodness-of-Fit Tests	278
Exercises	279
Chapter 4 Additional Remarks	281
Projects	283

5 STATISTICAL PROCESS CONTROL 293

5.1 Shewhart Control Charts	293
5.1-1 \bar{x} -Charts and R -charts	294
5.1-2 p -Charts and c -Charts	298
5.1-3 Other Control Charts	302
Exercises	302
5.2 Process Capability Indices	305
5.2-1 Introduction	305
5.2-2 Process Capability Indices	308
5.2-3 Discussion of Process Capability Indices	313
Exercises	315
5.3 Acceptance Sampling	316
Exercises	321
5.4 Problem Solving	322
5.4-1 Introduction	322
5.4-2 Pareto Diagram	323
5.4-3 Diagnosis of Causes of Defects	325
5.4-4 Six Sigma Initiatives	327
Exercises	330

6 EXPERIMENTS WITH ONE FACTOR 336

- 6.1 Completely Randomized One-Factor Experiments 337**
 - 6.1-1 Analysis-of-Variance Table 342
 - 6.1-2 F -Test for Treatment Effects 344
 - 6.1-3 Graphical Comparison of k Samples 345
 - Exercises 345
- 6.2 Other Inferences in One-Factor Experiments 349**
 - 6.2-1 Reference Distribution for Treatment Averages 349
 - 6.2-2 Confidence Intervals for a Particular Difference 350
 - 6.2-3 Tukey's Multiple-Comparison Procedure 351
 - 6.2-4 Model Checking 352
 - 6.2-5 The Random-Effects Model 352
 - 6.2-6 Computer Software 356
 - Exercises 357
- 6.3 Randomized Complete Block Designs 363**
 - 6.3-1 Estimation of Parameters and ANOVA 365
 - 6.3-2 Expected Mean Squares and Tests of Hypotheses 367
 - 6.3-3 Increased Efficiency by Blocking 369
 - 6.3-4 Follow-Up Tests 369
 - 6.3-5 Diagnostic Checking 370
 - 6.3-6 Computer Software 372
 - Exercises 372
- 6.4 Designs with Two Blocking Variables: Latin Squares 375**
 - 6.4-1 Construction and Randomization of Latin Squares 376
 - 6.4-2 Analysis of Data from a Latin Square 378
 - Exercises 379

7 EXPERIMENTS WITH TWO OR MORE FACTORS 381

- 7.1 Two-Factor Factorial Designs 381**
 - 7.1-1 Graphics in the Analysis of Two-Factor Experiments 390
 - 7.1-2 Special Case: $n = 1$ 391
 - 7.1-3 Random Effects 391
 - 7.1-4 Computer Software 392
 - Exercises 392

7.2	Nested Factors and Hierarchical Designs	395
	Exercises	400
7.3	General Factorial and 2^k Factorial Experiments	404
	7.3-1 2^k Factorial Experiments	405
	7.3-2 Significance of Estimated Effects	412
	Exercises	414
7.4	2^{k-p} Fractional Factorial Experiments	420
	7.4-1 Half Fractions of 2^k Factorial Experiments	421
	7.4-2 Higher Fractions of 2^k Factorial Experiments	424
	7.4-3 Computer Software	427
	Exercises	429
	Chapters 6 and 7 Additional Remarks	433
	Chapters 6 and 7 Projects	434

8 REGRESSION ANALYSIS 437

8.1	The Simple Linear Regression Model	438
	8.1-1 Estimation of Parameters	440
	8.1-2 Residuals and Fitted Values	443
	8.1-3 Sampling Distribution of $\hat{\beta}_0$ and $\hat{\beta}_1$	444
	Exercises	445
8.2	Inferences in the Regression Model	448
	8.2-1 Coefficient of Determination	449
	8.2-2 Analysis-of-Variance Table and F -Test	450
	8.2-3 Confidence Intervals and Tests of Hypotheses for Regression Coefficients	452
	Exercises	455
8.3	The Adequacy of the Fitted Model	457
	8.3-1 Residual Checks	457
	8.3-2 Output from Computer Programs	463
	8.3-3 The Importance of Scatter Plots in Regression	468
	Exercises	470
8.4	The Multiple Linear Regression Model	477
	8.4-1 Estimation of the Regression Coefficients	478
	8.4-2 Residuals, Fitted Values, and the Sum-of-Squares Decomposition	480
	8.4-3 Inference in the Multiple Linear Regression Model	481
	8.4-4 A Further Example: Formaldehyde Concentrations	482
	Exercises	486

8.5	More on Multiple Regression	492
8.5-1	Multicollinearity among the Explanatory Variables	492
8.5-2	Another Example of Multiple Regression	498
8.5-3	A Note on Computer Software	504
8.5-4	Nonlinear Regression	505
	Exercises	505
8.6	Response Surface Methods	515
8.6-1	The “Change One Variable at a Time” Approach	516
8.6-2	Method of Steepest Ascent	517
8.6-3	Designs for Fitting Second-Order Models: The 3^k Factorial and the Central Composite Design	519
8.6-4	Interpretation of the Second-Order Model	521
8.6-5	An Illustration	523
	Exercises	526
	Chapter 8 Additional Remarks	529
	Projects	530

Appendix A: References	540
-------------------------------	------------

Appendix B: Answers to Selected Exercises	546
--	------------

Appendix C: Statistical Tables	558
---------------------------------------	------------

Appendix D: List of Files (Minitab and Text Files)	577
