

Juan Domínguez-Bendala

# PANCREATIC STEM CELLS

 Humana Press

# Contents

<b>The Pancreas</b> .....	1
1 Introduction.....	1
2 The Ductal System.....	1
3 Vasculature.....	3
4 Innervation.....	3
5 Exocrine Pancreas.....	3
6 Endocrine Pancreas.....	5
7 Glucose Metabolism .....	6
<b>Pancreatic Development</b> .....	11
1 Introduction.....	12
2 Generation of Endoderm/Gut Epithelium.....	12
3 Pancreatic Differentiation .....	13
4 Ductal and Exocrine Specification.....	19
5 Endocrine Specification .....	21
6 Beta Cell Differentiation.....	24
7 The Secondary Transition.....	27
8 Do Physical Factors Play a Role in Pancreatic Development?.....	29
9 Correspondence Between Mouse and Human Pancreatic Development .....	31
<b>Pancreatic Regeneration</b> .....	35
1 Introduction.....	35
2 Models of Regeneration.....	36
2.1 Pregnancy.....	36
2.2 Blood Glucose Levels.....	37
2.3 Obesity.....	37
2.4 Partial Pancreatectomy.....	37
2.5 Duct Ligation .....	38

2.6	Cellophane Wrapping .....	38
2.7	Streptozotocin Treatment .....	39
3	Where Do New Islets Come from? .....	39
3.1	Do New Beta Cells Arise from the Duct/Acinar Tissue? .....	41
3.2	Do New Beta Cells Arise from the Islet? .....	42
3.3	Do New Islets Arise from the Bone Marrow? .....	42
4	Molecular Mechanisms of Islet Regeneration .....	44
4.1	Reversible Epithelial-to-Mesenchymal Transition .....	44
4.2	Self-Duplication .....	46
4.3	Re-ignition of the Embryonic Developmental Program .....	48
<b>Stem Cell Differentiation: General Approaches .....</b>		<b>51</b>
1	Introduction .....	51
1.1	In Vitro .....	52
1.2	In Vivo .....	60
<b>Embryonic Stem Cells and Pancreatic Differentiation .....</b>		<b>63</b>
1	Introduction .....	63
2	Mouse ES Cell Experiments .....	68
2.1	Signal-Driven Approaches .....	68
2.2	Genetic Manipulation .....	71
3	Human ES Cell Differentiation .....	72
3.1	Signal-Driven Approaches .....	72
3.2	Genetic Manipulation .....	75
3.3	Protein Transduction .....	76
<b>Adult Stem Cells and Pancreatic Differentiation .....</b>		<b>81</b>
1	Introduction .....	81
2	Mesenchymal Stem Cells .....	82
2.1	Introduction .....	82
2.2	Signal-Driven Approaches .....	84
2.3	Genetic Manipulation .....	85
2.4	Protein Transduction .....	86
2.5	In Vivo Transplantation of Undifferentiated MSCs .....	86
3	Other Stem Cells .....	87
3.1	Hematopoietic Bone Marrow and Cord Blood Stem Cells .....	87
<b>Transdifferentiation .....</b>		<b>91</b>
1	Introduction .....	91
2	Directed Liver Transdifferentiation .....	92

<b>Remaining Challenges and Clinical Perspectives .....</b>	<b>99</b>
1 Introduction.....	99
2 Diabetes and Islet Transplantation.....	100
3 Limitations of Islet Transplantation: Engraftment and Long-Term Function .....	102
4 Limitations of Islet Transplantation: Immunosuppression and Tolerance.....	103
4.1 General Considerations About Islet Rejection.....	103
4.2 Immunology of Stem Cells .....	106
5 Conclusions.....	108
<b>References.....</b>	<b>111</b>
<b>Index.....</b>	<b>151</b>
