I COMBUSTION AND FUEL-INJECTION PROCESSES IN THE DIESEL ENGINE 1

1.1 Diesel-Engine Fuel Injection and Spray Combustion	2
1.1.1 Kinetically and Diffusion-Controlled Combustion Phenomena in the Diesel Engine	2
1.1.2 Diesel-Engine Fuel-Injection Process	3
1.1.3 Spray Combustion in the Diesel Engine	6
1.2 DI Diesel-Engine Combustion Process	7
1.2.1 General Combustion Process	7
1.2.2 Ignition Delay Period	8
1.2.3 Kinetic or Premixed Burning Period	9
1.2.4 Diffusion Burning Period	9
1.2.5 After Burning Period	10
References	10

II HEAT RELEASE AND ITS EFFECT ON ENGINE PERFORMANCE 13

2.1 Calculating Heat Release	13
2.1.1 Heat-Release Calculation Basics	15
2.1.2 Cylinder-Charge Molar Change during Combustion	17
2.1.3 Cylinder-Pressure Data Smoothing and Calculation Interval	19

2.2	Heat Release, Relative Cycle Efficiency, and Peak Cylinder Pressure	21
2.2.1	Air-Cycle Analysis	21
2.2.2	Case of Combustion before Top Dead Center (TDC)	22
2.2.3	Case of Combustion after TDC	24
2.2.4	Relative Cycle Efficiency and Peak Cylinder-Firing Pressure	26
2.3	Pressure Data Collection for Heat-Release Calculation	30
2.3.1	Synchronization of Cylinder Pressure and Volume (TDC Correction).	30
2.3.2	Flush-Mounting the Pressure Transducer	33
2.3.3	Some Other Aspects Associated with Cylinder-Pressure Measurements	35
	References	37

III COMBUSTION ANALYSIS ASSOCIATED WITH FUEL EFFICIENCY AND SMOKE. 39

3.1	Fuel-Injection Related	39
3.1.1	Injector Hole Length versus Diameter (L/D) Ratio	39
3.1.2	Fuel-Injection Pressure.	42
3.1.3	Injector-Flow Rate	45
3.1.4	Secondary Injection	47
3.1.5	Injector-Sac Volume.	50
3.2	Combustion-Chamber Related	53
3.2.1	Combustion-Chamber Bowl Shape.	53
3.2.2	Injector-Spray Position.	56
3.2.3	Combustion-Chamber Insulation	58
	References.	60

IV COMBUSTION ANALYSIS ASSOCIATED WITH NO_x AND ROUGHNESS 61

4.1	NO _x Emissions	61
4.1.1	NO _x Formation	61
4.1.2	Injection-Timing Retard	64
4.1.3	Lower Inlet Air Temperature	69

4.1.4	Higher Compression Ratio, Lower Inlet Air Temperature, and Injection-Timing Retard	73
4.1.5	Water-Emulsified Diesel-Fuel Combustion	77
4.1.6	Higher Fuel-Injection Pressure	80
4.2	Combustion Roughness (Noise Emissions)	85
4.2.1	Origin of Combustion Roughness	85
4.2.2	Measurement of Combustion Roughness	86
4.2.3	Sample of Combustion Roughness Comparison	88
	References	91
V	COMBUSTION ANALYSIS OF VARIOUS OPERATION CONDITIONS	93
5.1	Effects of Fuel	93
5.1.1	Fuel Temperature Effect	93
5.1.2	Fuel Composition Effect	98
5.2	Effects of Inlet Air Manifold Condition	105
5.2.1	Inlet Manifold Air Temperature (MAT) Effect	105
5.2.2	Inlet Manifold Air Pressure (MAP) Effect	108
	References	110
VI	ALTERNATE FUELS COMBUSTION ANALYSIS	113
6.1	The High-Pressure-Injection Natural-Gas-Fueled Diesel Engine	113
6.2	"H-Process" Natural-Gas Dual-Fueled Diesel-Engine Combustion	116
6.3	Coal-Water-Slurry-Fueled Diesel-Engine Combustion	123
6.3.1	CWS Ignition	125
6.3.2	CWS Combustion	127
6.3.3	Emissions of Coal-Fueled Engine Combustion	129
6.3.4	CWS Fuel Spray and Wall Impingement	129
6.3.5	Conclusions	130
	References	131
	Index	135
