

FOURTH EDITION

# Epidemiology for Public Health Practice

Robert H. Friis  
Thomas A. Sellers

# Contents

New to This Edition .....	ix
Introduction.....	xi
Preface.....	xv
Acknowledgments .....	xvii
About the Authors.....	xxi
<b>Chapter 1 History and Scope of Epidemiology.....</b>	<b>1</b>
Introduction.....	2
Epidemiology Defined .....	6
Foundations of Epidemiology .....	13
Historical Antecedents of Epidemiology.....	20
Recent Applications of Epidemiology .....	37
Conclusion.....	43
<b>Chapter 2 Practical Applications of Epidemiology .....</b>	<b>49</b>
Introduction.....	50
Applications for the Assessment of the Health Status of Populations and Delivery of Health Services.....	52
Applications Relevant to Disease Etiology .....	71
Conclusion.....	87
Appendix 2—Leading Causes of Death and Rates for Those Causes in 1900 and 2003.....	92
<b>Chapter 3 Measures of Morbidity and Mortality         Used in Epidemiology.....</b>	<b>93</b>
Introduction.....	94
Definitions of Count, Ratio, Proportion, and Rate.....	94

Risk Versus Rate.....	104
Interrelationship Between Prevalence and Incidence.....	106
Applications of Incidence Data.....	108
Crude Rates .....	108
Specific Rates .....	118
Adjusted Rates .....	123
Conclusion.....	133
Appendix 3—Data for Study Questions 2 Through 4 .....	138
<b>Chapter 4 Descriptive Epidemiology: Person, Place, Time .....</b>	<b>141</b>
Introduction.....	142
Characteristics of Persons .....	146
Characteristics of Place.....	175
Characteristics of Time.....	187
Conclusion.....	193
Appendix 4—Project: Descriptive Epidemiology of a Selected Health Problem.....	201
<b>Chapter 5 Sources of Data for Use in Epidemiology.....</b>	<b>203</b>
Introduction.....	204
Criteria for the Quality and Utility of Epidemiologic Data .....	205
Computerized Bibliographic Databases .....	206
Confidentiality, Sharing of Data, and Record Linkage.....	207
Statistics Derived from the Vital Registration System .....	215
Reportable Disease Statistics.....	216
Screening Surveys.....	223
Disease Registries .....	223
Morbidity Surveys of the General Population.....	225
Insurance Data .....	229
Hospital Data.....	230
Diseases Treated in Special Clinics and Hospitals .....	231
Data from Physicians' Practices .....	232
Absenteeism Data.....	233
School Health Programs.....	233
Morbidity in the Armed Forces: Data on Active Personnel and Veterans .....	234
Other Sources of Data Relevant to Epidemiologic Studies .....	235
Conclusion.....	236

<b>Chapter 6</b>	<b>Study Designs: Ecologic, Cross-Sectional, Case-Control</b>	<b>241</b>
	Introduction.....	242
	Observational Versus Experimental Approaches in Epidemiology .....	243
	Overview of Study Designs Used in Epidemiology .....	244
	Ecologic Studies .....	249
	Cross-Sectional Studies .....	256
	Case-Control Studies.....	262
	Conclusion.....	276
<b>Chapter 7</b>	<b>Study Designs: Cohort Studies</b>	<b>283</b>
	Introduction.....	284
	Cohort Studies Defined .....	284
	Sampling and Cohort Formation Options.....	295
	Temporal Differences in Cohort Designs.....	301
	Practical Considerations .....	303
	Measures of Interpretation and Examples .....	307
	Summary of Cohort Studies .....	318
	Comparisons of Observational Designs.....	319
	Conclusion.....	319
<b>Chapter 8</b>	<b>Experimental Study Designs</b>	<b>327</b>
	Introduction.....	328
	Hierarchy of Study Designs.....	328
	Intervention Studies .....	330
	Clinical Trials .....	331
	Community Trials .....	344
	Conclusion.....	356
<b>Chapter 9</b>	<b>Measures of Effect</b>	<b>361</b>
	Introduction.....	362
	Absolute Effects.....	362
	Relative Effects.....	365
	Statistical Measures of Effect .....	371
	Evaluating Epidemiologic Associations.....	374
	Models of Causal Relationships.....	376
	Conclusion.....	381
	Appendix 9—Cohort Study Data for Coffee Use and Anxiety .....	384

<b>Chapter 10</b>	<b>Data Interpretation Issues .....</b>	<b>385</b>
	Introduction.....	386
	Validity of Study Designs .....	386
	Sources of Error in Epidemiologic Research .....	390
	Techniques to Reduce Bias .....	396
	Methods to Control Confounding .....	399
	Bias in Analysis and Publication.....	403
	Conclusion.....	404
<b>Chapter 11</b>	<b>Screening for Disease in the Community.....</b>	<b>409</b>
	Introduction.....	410
	Screening for Disease .....	410
	Appropriate Situations for Screening Tests and Programs.....	414
	Characteristics of a Good Screening Test .....	417
	Evaluation of Screening Tests .....	418
	Sources of Unreliability and Invalidity.....	421
	Measures of the Validity of Screening Tests.....	422
	Effects of Prevalence of Disease on Screening Test Results.....	424
	Relationship Between Sensitivity and Specificity .....	426
	Evaluation of Screening Programs .....	428
	Issues in the Classification of Morbidity and Mortality .....	429
	Conclusion.....	432
	Appendix 11—Data for Problem 6 .....	436
<b>Chapter 12</b>	<b>Epidemiology of Infectious Diseases .....</b>	<b>437</b>
	Introduction.....	438
	Agents of Infectious Disease .....	439
	Characteristics of Infectious Disease Agents .....	441
	Host.....	442
	The Environment.....	445
	Means of Transmission: Directly or Indirectly from Reservoir.....	446
	Measures of Disease Outbreaks .....	451
	Procedures Used in the Investigation of Infectious Disease Outbreaks .....	456
	Epidemiologically Significant Infectious Diseases in the Community.....	457
	Conclusion.....	482

Appendix 12—Data from a Foodborne Illness Outbreak in a College Cafeteria.....	488
<b>Chapter 13 Epidemiologic Aspects of Work and the Environment.....</b>	<b>489</b>
Introduction.....	490
Health Effects Associated with Environmental Hazards .....	491
Study Designs Used in Environmental Epidemiology .....	491
Toxicologic Concepts Related to Environmental Epidemiology .....	495
Types of Agents.....	497
Environmental Hazards Found in the Work Setting .....	506
Noteworthy Community Environmental Health Hazards.....	509
Conclusion.....	519
<b>Chapter 14 Molecular and Genetic Epidemiology .....</b>	<b>529</b>
Introduction.....	530
Definitions and Distinctions: Molecular Versus Genetic Epidemiology .....	531
Epidemiologic Evidence for Genetic Factors.....	539
Causes of Familial Aggregation.....	540
Shared Family Environment and Familial Aggregation .....	542
Gene Mapping: Segregation and Linkage Analysis.....	545
Genome-Wide Association Studies (GWAS) .....	553
Linkage Disequilibrium Revisited: Haplotypes.....	556
Application of Genes in Epidemiologic Designs .....	558
Genetics and Public Health.....	565
Conclusion.....	568
<b>Chapter 15 Psychologic, Behavioral, and Social Epidemiology.....</b>	<b>575</b>
Introduction.....	576
Research Designs Used in Psychologic, Behavioral, and Social Epidemiology .....	580
The Social Context of Health.....	581
Independent Variables .....	582
Moderating Factors in the Stress-Illness Relationship .....	588

Outcome Variables: Physical Health, Mental Health, Affective States.....	600
Conclusion.....	605
<b>Chapter 16   Epidemiology as a Profession .....</b>	<b>613</b>
Introduction.....	614
Specializations Within Epidemiology .....	615
Career Roles for Epidemiologists.....	617
Epidemiology Associations and Journals.....	620
Competencies Required of Epidemiologists.....	624
Resources for Education and Employment.....	625
Professional Ethics in Epidemiology .....	627
Conclusion.....	632
<b>Appendix A—Guide to the Critical Appraisal of an Epidemiologic/Public Health Research Article .....</b>	<b>635</b>
<b>Appendix B—Answers to Selected Study Questions....</b>	<b>641</b>
<b>Glossary .....</b>	<b>651</b>
<b>Index .....</b>	<b>668</b>
