Sports Management series preface	xv
Preface to Sports Economics	xvi
List of figures	xix
List of tables	xxi

Chapter 1	The Economics of Sport	
1.1	Introduction	1
1.2	What is Economics?	2
1.3	Economic Methodology	3
1.4	A Core Economic Model: Perfect Competition and Efficient Resource Allocation	4
	1.4.1 Positive economics	4
	1.4.2 Normative economics	10
1.5	Market Failure and the Rationale for Policy Intervention	14
	1.5.1 Monopoly	14
	1.5.2 Equity	18
	1.5.3 Externalities	19
	1.5.4 Public goods	21
	1.5.5 Imperfect information	22
1.6.	Limitations to Policy Maker Intervention.	24
	1.6.1 The Coase theorem	24
	1.6.2 Government failure.	24
1.7	Expenditure-Based Rationale for Policy	25
1.8	An Empirical Framework	26
1.9	Conclusion	31
Appendix 1.1	The relationship between average and marginal revenue in monopoly	31
Appendix 1.2	The derivation of the Keynesian Expenditure Multiplier	32

Chapter 2	The Nature, Organization and Economic Significance of Sport	
2.1	Introduction	35
2.2	What is Sport?	36
2.3	Economic Organization	38
2.4	Some International Evidence on the Sports Environment	40
2.4.1	Public policy	40
2.4.2	Sports policy bodies	42
2.4.3	Governing bodies and professional team sports	43
2.4.4	Summary	49
2.5	Events and Mass Participation	53
2.5.1	Events	53
2.5.2	Mass Participation	55
2.6	Historic and Current Policy in Sport: Changing Emphases and Values	59
2.7	Conclusion	62
Chapter 3	The Economics of Sports Participation	
3.1	Introduction	65
3.2	A General Economic Model of Sports Consumption	65
3.2.1	The dual decision hypothesis	66
3.2.2	The income–leisure trade-off	69
3.2.3	The derived demand for sports	76
3.3	An Integrating Framework for Consumer Choice	82
3.4	Policy Implications	86
3.5	Conclusion	88
Appendix 3.1	Utility-maximizing behaviour	89
Appendix 3.2	Durable goods, the time value of money and investment demand	92
Chapter 4	The Economics of Sports Participation: Evidence	
4.1	Introduction	97
4.2	Empirical Evidence on Participation and Expenditure in Sports	97
4.2.1	Mass sports participation: Sources of official and unofficial data	97
4.2.2	Mass sports participation: Descriptive evidence	101
4.2.3	Expenditure on mass sports participation	104

4.3	Mass Sports Participation: Theoretical and Empirical	
	Analysis	106
	4.3.1 Leisure time	107
	4.3.2 Participation in sport.	110
	4.3.3 Expenditure.	114
	4.3.4 Summary.	115
4.4	Conclusion	116

Chapter 5 The Supply of Participant Sport: The Public and Private Sector

5.1	Introduction	117
5.2	The Structure of Supply	118
5.3	The Public Sector	119
	5.3.1 UK sports policy and provision	120
	5.3.2 Other sports policy and provision.	121
5.4	The Economic Rationale for Public Policy	123
	5.4.1 Economic efficiency	124
	5.4.2 Equity	125
	5.4.3 UK policy revisited: Mechanisms to promote participation	127
5.5	The Private Sector.	133
	5.5.1 Market structure	135
	5.5.2 Pricing.	138
5.6	Informal Participation.	140
5.7	Sports Equipment	143
5.8	Conclusion	144
	Appendix 5.1 Some elements of game theory	145

Chapter 6 The Supply of Participant Sport: Volunteers and Sports Clubs

6.1	Introduction	147
6.2	The Sports Club Sector.	148
	6.2.1 European hierarchical sports organization	148
6.3	The Economic Foundation of Sports Club Systems.	151
	6.3.1 Club goods	151
	6.3.2 Provision of club goods	155
	6.3.3 Hierarchical form	157
	6.3.4 Economic evaluation	160
6.4	Volunteering in Sport	161
	6.4.1 Defining volunteering	161

6.4.2	Motivation and constraints on volunteering	163
6.4.3	The profile and scale of volunteering	165
6.5	An Economic Analysis of Volunteering	167
6.6	Policy Implications	173
6.7	Conclusion	174
Appendix 6.1	The general theory of second-best	174

Chapter 7 The Market for Professional Sports: General Themes

7.1	Introduction	177
7.2	The Transition to Professionalism	178
7.2.1	Sports clubs: Key concepts revisited	178
7.2.2	Formalization	179
7.2.3	Review	182
7.3	Sports Competitions as Economic Contests	184
7.3.1	Contest/tournament theory	184
7.4	Foundations of the Analysis of Professional Team Sports	192
7.4.1	The production of professional team sports	193
7.4.2	The peculiar economics of sport	193
7.4.3	The league as a natural monopoly or as a cartel	194
7.5	US and European Leagues	196
7.5.1	Club objectives	196
7.5.2	League characteristics	197
7.6	Conclusion	200
Appendix 7.1	Some properties of tournament discrimination	201
Appendix 7.2	The derivation of optimal tournament effort	202

Chapter 8 Uncertainty of Outcome, Competitive Balance and Bias in Sports Leagues

8.1	Introduction	205
8.2	The Time-Dependent Nature of Uncertainty of Outcome	206
8.3	Short-Run (Match) Uncertainty of Outcome	207
8.3.1	Relative league standings	207
8.3.2	Betting odds	211
8.3.3	Direct estimates	212
8.3.4	Summary	213
8.4	Medium-Term Uncertainty of Outcome	213
8.4.1	Within-season uncertainty of outcome	213

8.4.2	Seasonal (team-specific) uncertainty of outcome . . .	214
8.4.3	Summary	218
8.5	Long-Run Uncertainty of Outcome	219
8.5.1	Competitive balance	219
8.5.2	Evolution of competitive balance	224
8.5.3	Summary	226
8.6	Home Advantage	226
8.7	Conclusion	229
Appendix 8.1	Reconciliation of Jennett’s and Borland and Lye’s models of medium-term uncertainty of outcome	229
Appendix 8.2	Calculating the dispersion of sporting success in sports leagues using standard deviations	231

Chapter 9

Cross-Subsidization in Professional Sports Leagues

9.1	Introduction	233
9.2	The Rationale for Cross-Subsidization.	234
9.3	Methods of Cross-Subsidization.	235
9.3.1	Sporting labour markets	235
9.3.2	Revenue redistribution	237
9.4	An Economic Framework for Understanding Cross-Subsidization	239
9.4.1	Profit-maximizing competitive equilibrium	239
9.4.2	Cross-subsidization in a profit-maximizing league	244
9.4.3	Equilibrium in a win-maximizing league.	248
9.4.4	Cross-subsidization in a win-maximizing league. . .	249
9.5	Relaxation of Assumptions.	249
9.5.1	Introducing the effect of spectator preference for absolute quality	249
9.5.2	Market size diseconomies.	251
9.5.3	A variable supply of talent	253
9.6	When Does the “Invariance Proposition” Hold?	254
9.7	How Far Does Competitive Balance Matter? The European Champions’ and other Leagues.	254
9.8	Conclusion	257
Appendix 9.1	Why win percent and talent distribution are not formally equivalent	258
Appendix 9.2	The quadratic model under profit maximization	259

Chapter 10	The Demand for Professional Team Sports: Attendance and Broadcasting	
10.1.	Introduction	261
10.2.	The Demand for Professional Team Sports	262
10.3	Theoretical and Empirical Issues	262
10.3.1	Measuring quantity	262
10.3.2	Measuring price and income	263
10.3.3	Consumer preferences	264
10.3.4	Estimation issues	264
10.4	Evidence	267
10.4.1	Measuring quantity	268
10.4.2	Measuring price and income	283
10.4.3	Consumer preferences	288
10.4.4	Estimation issues	291
10.5	Broadcast Demand	292
10.5.1	A brief outline of sports and broadcasting history	292
10.5.2	The economics of broadcasting and sport	295
10.6	Conclusion	298
Appendix 10.1	Problems of measuring habit persistence	299

Chapter 11	The Labour Market in Professional Team Sports	
11.1	Introduction	301
11.2	Perfect Competition as a Benchmark Labour Market	302
11.3	Historic Evolution of the Labour Market in Sport	303
11.3.1	The United States	303
11.3.2	The UK and Europe	305
11.3.3	Player agents	308
11.3.4	Contract duration	309
11.4	Theorizing the Players' Labour Market	310
11.4.1	Monopsony	311
11.4.2	Monopoly	313
11.4.3	Bargaining	313
11.4.4	Non-profit-maximizing behaviour	314
11.5	The Players' Labour Market: Some Econometric Findings	315
11.5.1	The United States	315
11.5.2	Europe	321
11.6	Managerial Efficiency	323
11.7	Conclusion	329

Appendix 11.1	General conditions for the demand for factors of production	330
Appendix 11.2	Profit-maximizing monopsony	331
Appendix 11.3	The Nash bargaining model.	332
Appendix 11.4	A win-maximizing labour market	332
Chapter 12	The Economics of Sports Events and Infrastructure	
12.1	Introduction	335
12.2	Sports Events	336
12.3	Investment Decisions	343
12.3.1	Theoretical issues	343
12.3.2	Public sector rationale	345
12.3.3	The multiplier	348
12.4	Types of Sports Event and Impacts	354
12.4.1	Duration and scale of impacts	354
12.4.2	Theorizing economic activity as an impact	357
12.4.3	The practical measurement of economic activity as an impact	358
12.5	Empirical Evidence	364
12.5.1	<i>Ex ante</i> evidence.	364
12.5.2	Explaining the variance	365
12.5.3	<i>Ex post</i> evidence.	368
12.5.4	Non-market valued effects	376
12.6	Conclusion	379
Appendix 12.1	NPV, wealth and profit maximization	380
Appendix 12.2	A simple input–output analysis of multiplier effects given a simple economic system.	381
Appendix 12.3	Calculating welfare weights	382
Appendix 12.4	The determinants of medal success	383
References	389
List of abbreviations	409
Index	411
