# EXPOSURE

n  
total amount of light permitted  
to fall on film or sensor during  
the act of taking a photograph

**av**  
academia

How to get the most out of this book	6
Introduction	8

<b>Basic theory</b>	<b>10</b>
Light itself	12
What is a good exposure?	20
Histograms	22
Contrast	24
Stops	26
Reciprocity	28
Exposure Value (EV)	30
Subject Brightness Range (SBR)	34
Over- and underexposure	38
Clipping	44
Key	46
Speed and sensitivity	48
Exposure Index (EI)	52
Filters	54

<b>Shutter speed and time</b>	<b>56</b>
Motion and time	58
Neutral Density (ND) filters to extend time	60
Types of shutter	62
Creative use of shutter speed	68

<b>Aperture and depth of field</b>	<b>72</b>
f-numbers and stops	74
Depth of field	78
Creative use	84

## Meters and metering 88

Types of exposure meter	90
Reflected versus incident light meters	92
Exposure Value (EV) compensation	106
Other light meters	110
So why not do it in Photoshop?	120

## Dynamic range 122

Graduated Neutral Density (Grad ND) filters	124
RAW files	126
High Dynamic Range (HDR)	130
The Zone System	136
Pushing and pulling film	140
Local exposure control	142

## Special cases 146

Technical versus subjective exposure	148
Back and rim light	150
White balance	152
Winter weather	154
Flash	156
Close-up	160
Infrared	164
Open shutter	166
Multiple exposures	168
Extreme lighting	170

Conclusion	172
Contacts	173
Glossary	174
Acknowledgements and image credits	176
