## Preface

ix

<b>1. FORCE SYSTEM AND ANALYSIS .....</b>	<b>1–39</b>
Introduction .....	1
Fundamental Laws of Mechanics .....	1
Force System .....	4
<i>Solved Problems</i> .....	9
<i>Objective Type Questions</i> .....	31
<i>State True or False</i> .....	31
<i>Multiple Choice Questions</i> .....	32
<i>Fill in the Blanks</i> .....	36
<i>Answers</i> .....	38
<b>2. FRICTION .....</b>	<b>40–77</b>
Introduction .....	40
Coulomb's Law of Friction .....	41
The Angle of Repose and the Cone of Friction .....	42
Equilibrium: Block, Wedge and Ladder .....	43
Power Transmitted .....	44
Screw Jack .....	47
<i>Solved Problems</i> .....	49
<i>Objective Type Questions</i> .....	65
<i>State True or False</i> .....	65
<i>Multiple Choice Questions</i> .....	67
<i>Fill in the Blanks</i> .....	72
<i>Answers</i> .....	74
<b>3. ANALYSIS OF BEAMS .....</b>	<b>78–113</b>
Introduction .....	78
Types of Beams .....	78
Types of Supports .....	79

Types of Loads .....	79
<i>Relationship: Load Intensity, Shear Force and BM.....</i>	81
<i>Solved Problems .....</i>	88
<i>Objective Type Questions .....</i>	107
<i>State True or False .....</i>	107
<i>Multiple Choice Questions.....</i>	108
<i>Fill in the Blanks .....</i>	110
<i>Answers .....</i>	112

## **4. TRUSSES** ..... 114-148

<i>Introduction .....</i>	114
<i>Types of Plane Truss .....</i>	114
<i>Supports .....</i>	115
<i>Analysis of Plane Truss .....</i>	116
<i>Graphical Method .....</i>	117
<i>Method of Joints .....</i>	118
<i>Method of Section .....</i>	118
<i>Other Structures .....</i>	118
<i>Solved Problems .....</i>	119
<i>Objective Type Questions .....</i>	139
<i>State True or False .....</i>	139
<i>Multiple Choice Questions.....</i>	140
<i>Fill in the Blanks .....</i>	144
<i>Answers .....</i>	146

## **5. CENTROID AND MOMENT OF INERTIA** ..... 149-225

<i>Introduction .....</i>	149
<i>Centre of Mass .....</i>	149
<i>Centroid .....</i>	150
<i>Plane Area with an Axis of Symmetry .....</i>	153
<i>Area with Two Orthogonal Axes of Symmetry .....</i>	154
<i>Composite Areas .....</i>	154
<i>Moment of Volume .....</i>	157
<i>Composite Volumes .....</i>	159
<i>Centre of Mass .....</i>	160
<i>Moment of Inertia .....</i>	162
<i>Moment of Inertia of a Lamina .....</i>	164
<i>Parallel Axis Theorem.....</i>	165
<i>Theorem of the Perpendicular Axis .....</i>	165
<i>Radius of Gyration .....</i>	166
<i>Product of Area .....</i>	166

Moment of Inertia of a Rectangular Section .....	167
Moment of Inertia of a Circular Section.....	169
Moment of Inertia of a Hollow Rectangular Section.....	170
Moment of Inertia of a Hollow Circular Section .....	171
Moment of Inertia of a Triangular Section.....	172
Moment of Inertia of I-Section .....	174
Centre of Mass.....	174
Centre of Mass of a Uniform Straight Rod.....	175
Centre of Mass of a Uniform Semicircle Wire .....	176
Centre of Mass of a Uniform Semicircular Plate .....	177
Mass Moment of Inertia .....	178
Mass Moment of Inertia of Uniform Rod.....	179
Mass Moment of Inertia of a Rectangular Plate .....	180
Mass Moment of Inertia of a Uniform Circular Ring .....	181
Mass Moment of Inertia of a Uniform Circular Plate .....	182
Mass Moment of Inertia of a Uniform Solid Cylinder .....	183
Mass Moment of Inertia of a Uniform Hollow Sphere (Thin Thickness Sphere) .....	184
Mass Moment of Inertia of a Uniform Solid Sphere .....	185
Mass Moment of Inertia of a Uniform Solid Cone .....	186
Rotation of Axes.....	188
Principal Axes .....	189
<i>Solved Problems</i> .....	195
<i>Objective Type Questions</i> .....	220
State True or False .....	220
Multiple Choice Questions.....	221
Fill in the Blanks .....	222
<i>Answers</i> .....	224

## 6. KINEMATICS OF RIGID BODY ..... 226-281

Introduction .....	226
Motion and Frame of Reference .....	226
Motions Referred to Moving Frame of Reference .....	227
Translation Motion .....	233
Rotational Motion .....	234
Plane Motion .....	235
Chasles Theorem .....	237
Instantaneous Centre of Rotation .....	238
Relative Velocity and Acceleration for Points on a Rigid Body .....	242
The Velocity of Piston of Reciprocating Engine .....	246
Acceleration of Reciprocating Piston .....	249
Analysis of Four-bar Mechanism .....	252

<i>Solved Problems</i> .....	254
<i>Objective Type Questions</i> .....	276
<i>State True and False</i> .....	276
<i>Multiple Choice Questions</i> .....	277
<i>Fill in the Blanks</i> .....	279
<i>Answers</i> .....	280

## **7. KINETICS OF RIGID BODY.....282-360**

<i>Introduction</i> .....	282
<i>Force, Mass and Acceleration</i> .....	283
<i>Rotatory Motion of a Rigid Body</i> .....	283
<i>Relation between Torque and Moment of Inertia</i> .....	284
<i>Relation between Torque and Angular Momentum</i> .....	286
<i>Work-Energy Principle</i> .....	295
<i>Conservation of Mechanical Energy</i> .....	296
<i>Work Done Against Spring Force</i> .....	296
<i>Kinetic Energy-Based on Centre of Mass</i> .....	300
<i>Work-Energy Equations for a Rigid Body</i> .....	302
<i>Applications of Impulse-Momentum Equations on Plane Motion of Rigid Body</i> .....	306
<i>Linear Impulse-Momentum Principle</i> .....	310
<i>Impulse-Momentum Equation for a System of Particles</i> .....	314
<i>Angular Impulse-Momentum</i> .....	314
<i>D'Alembert's Principle</i> .....	318
<i>Rotary Motion and D'Alembert's Principle</i> .....	321
<i>Solved Problems</i> .....	327
<i>Objective Type Questions</i> .....	351
<i>State True or False</i> .....	351
<i>Multiple Choice Questions</i> .....	351
<i>Fill in the Blanks</i> .....	354
<i>Answers</i> .....	356

## **8. STRESS AND STRAIN ANALYSIS.....361-430**

<i>Introduction</i> .....	361
<i>Types of Materials</i> .....	361
<i>Types of Loads</i> .....	362
<i>Stress and Strain</i> .....	363
<i>Hooke's Law</i> .....	363
<i>Thermal Stresses</i> .....	366
<i>Deformation under Own Weight</i> .....	367
<i>Deformation under External Load</i> .....	368
<i>Shear Stress and Strain</i> .....	372

Volumetric Strain, Bulk Modulus and Elastic Constants .....	376
Strain Energy and Resilience .....	379
Compound stresses (2-D System) .....	381
Principal Planes and Principal Stresses .....	382
Mohr's Circle .....	383
Properties of Metal .....	385
<i>Solved Problems</i> .....	386
<i>Objective Type Questions</i> .....	414
<i>State True and False</i> .....	414
<i>Multiple Choice Questions</i> .....	417
<i>Fill in the Blanks</i> .....	422
<i>Answers</i> .....	425

## **9. BENDING STRESSES IN BEAMS ..... 431-472**

Introduction .....	431
Theory of Bending .....	432
Beams of Heterogeneous Materials (Flitched Beams) .....	434
Flexural Rigidity and Uniform Strength .....	435
Eccentric Loading .....	436
Strain Energy in Pure Bending .....	437
<i>Solved Problems</i> .....	438
<i>Objective Type Questions</i> .....	457
<i>State True or False</i> .....	457
<i>Multiple Choice Questions</i> .....	458
<i>Fill in the Blanks</i> .....	463
<i>Answers</i> .....	466

## **10. TORSION ..... 473-516**

Introduction .....	473
Theory of Pure Torsion .....	473
Polar Modulus of Section .....	476
Torsional Rigidity .....	476
Power Transmitted by a Shaft .....	477
Arrangement of Shafts .....	477
Shafts in Series .....	477
Shafts in Parallel .....	478
Comparison between Hollow and Solid Shafts .....	479
<i>Strain Energy</i> .....	481
Bending and Torsion .....	482
<i>Solved Problems</i> .....	484

<i>Objective Type Questions</i> .....	506
<i>State True or False</i> .....	506
<i>Multiple Choice Questions</i> .....	507
<i>Fill in the Blanks</i> .....	510
<i>Answers</i> .....	512

<b>BIBLIOGRAPHY</b> .....	517
---------------------------	-----

<b>INDEX</b> .....	519-522
--------------------	---------
