

# ARM Assembly Language

Fundamentals  
and Techniques

William Hohl

CRC Press  
Taylor & Francis Group

# Contents

Preface.....	xiii
Acknowledgments.....	xvii
Software Notice .....	xix
Author .....	xxi

<b>Chapter 1</b>	An Overview of Computing Systems.....	1
1.1	Introduction .....	1
1.2	History of RISC.....	2
1.2.1	ARM Begins .....	5
1.2.2	The Creation of ARM Ltd. ....	6
1.2.3	ARM Today.....	9
1.3	The Computing Device.....	10
1.4	Number Systems.....	11
1.5	Representations of Numbers and Characters .....	14
1.5.1	Integer Representations .....	15
1.5.2	Floating-Point Representations .....	18
1.5.3	Character Representations.....	20
1.6	Translating Bits to Commands .....	21
1.7	The Tools .....	22
1.8	Exercises.....	25
<b>Chapter 2</b>	The ARM7TDMI Programmer’s Model.....	29
2.1	Introduction .....	29
2.2	Data Types .....	29
2.3	Processor Modes.....	30
2.4	Registers .....	31
2.5	Program Status Registers .....	33
2.5.1	The Control Bits .....	34
2.5.2	The Mode Bits .....	34
2.6	The Vector Table .....	34
2.7	Exercises.....	35
<b>Chapter 3</b>	First Programs .....	37
3.1	Introduction .....	37
3.2	Program 1: Shifting Data.....	38
3.2.1	Running the Code.....	39
3.2.2	Examining Register and Memory Contents.....	40
3.3	Program 2: Factorial Calculation .....	41
3.4	Program 3: Swapping Register Contents .....	43

3.5	Programming Guidelines .....	44
3.6	Exercises .....	45
<b>Chapter 4</b>	<b>Assembler Rules and Directives.....</b>	<b>47</b>
4.1	Introduction .....	47
4.2	Structure of Assembly Language Modules .....	47
4.3	Predefined Register Names .....	50
4.4	Frequently Used Directives .....	51
4.4.1	AREA—Define a Block of Data or Code .....	51
4.4.2	RN—Register Name Definition .....	52
4.4.3	EQU—Equate a Symbol to a Numeric Constant .....	53
4.4.4	ENTRY—Declare an Entry Point .....	54
4.4.5	DCB, DCW, and DCD—Allocate Memory and Specify Contents .....	54
4.4.6	ALIGN—Align Data or Code to Appropriate Boundaries.....	55
4.4.7	SPACE—Reserve a Block of Memory.....	56
4.4.8	LTORG—Assign Literal Pool Origins.....	56
4.4.9	END—End of a Source File .....	57
4.5	Macros .....	57
4.6	Miscellaneous Assembler Features .....	59
4.6.1	Assembler Operators .....	59
4.6.2	Literals.....	61
4.7	Exercises.....	61
<b>Chapter 5</b>	<b>Loads, Stores, and Addressing .....</b>	<b>63</b>
5.1	<i>Introduction</i> .....	63
5.2	Memory .....	63
5.3	Loads and Stores—The Instructions .....	66
5.4	Operand Addressing .....	69
5.4.1	Pre-Indexed Addressing .....	69
5.4.2	Post-Indexed Addressing .....	71
5.5	Endianness.....	72
5.5.1	Changing Endianness.....	74
5.5.2	Defining Memory Areas .....	75
5.6	Exercises.....	76
<b>Chapter 6</b>	<b>Constants and Literal Pools.....</b>	<b>79</b>
6.1	Introduction .....	79
6.2	The ARM Rotation Scheme .....	79
6.3	Loading Constants into Registers.....	82
6.4	Loading Addresses into Registers .....	86
6.5	Exercises.....	91

<b>Chapter 7</b>	Logic and Arithmetic .....	93
7.1	Introduction .....	93
7.2	Flags and Their Use.....	93
7.2.1	The N Flag.....	93
7.2.2	The V Flag.....	94
7.2.3	The Z Flag.....	95
7.2.4	The C Flag.....	95
7.3	Comparison Instructions .....	95
7.4	Data Processing Operations .....	97
7.4.1	Boolean Operations .....	97
7.4.2	Shifts and Rotates.....	98
7.4.3	Addition/Subtraction .....	104
7.4.4	Multiplication .....	106
7.4.5	Multiplication by a Constant .....	107
7.4.6	Division .....	108
7.5	Fractional Notation.....	111
7.6	Exercises.....	115
<b>Chapter 8</b>	Loops and Branches .....	119
8.1	Introduction .....	119
8.2	Branching .....	120
8.3	Looping.....	123
8.3.1	While Loops.....	124
8.3.2	For Loops .....	124
8.3.3	Do ... While Loops .....	128
8.4	More on Flags.....	128
8.5	Conditional Execution .....	128
8.6	Straight-Line Coding.....	131
8.7	Exercises.....	132
<b>Chapter 9</b>	Tables.....	135
9.1	Introduction .....	135
9.2	Lookup Tables .....	135
9.3	Jump Tables .....	139
9.4	Binary Searches.....	140
9.5	Exercises.....	143
<b>Chapter 10</b>	Subroutines and Stacks.....	147
10.1	Introduction .....	147
10.2	The Stack .....	147
10.2.1	LDM/STM Instructions .....	148
10.2.2	Full/Empty Ascending/Descending Stacks .....	150
10.3	Subroutines .....	152

10.4	Passing Parameters to Subroutines.....	153
10.4.1	Passing Parameters in Registers.....	154
10.4.2	Passing Parameters by Reference .....	156
10.4.3	Passing Parameters on the Stack.....	158
10.5	The ARM APCS .....	160
10.6	Exercises.....	161
<b>Chapter 11</b>	<b>Exception Handling.....</b>	<b>165</b>
11.1	Introduction .....	165
11.2	Interrupts .....	165
11.3	Error Conditions .....	166
11.4	Processor Exception Sequence .....	167
11.5	The Vector Table .....	169
11.6	Exception Handlers .....	171
11.7	Exception Priorities .....	172
11.8	Procedures for Handling Exceptions.....	173
11.8.1	Reset Exceptions .....	173
11.8.2	Undefined Instructions .....	174
11.8.3	Interrupts .....	178
11.8.4	Aborts.....	187
11.8.5	SWIs.....	190
11.9	Exercises.....	191
<b>Chapter 12</b>	<b>Memory-Mapped Peripherals.....</b>	<b>193</b>
12.1	Introduction .....	193
12.2	The LPC2104.....	194
12.2.1	The UART .....	195
12.2.2	The Memory Map .....	195
12.2.3	Configuring the UART.....	197
12.2.4	Writing the Data to the UART .....	199
12.2.5	Putting the Code Together.....	199
12.2.6	Running the Code.....	201
12.3	The LPC2132.....	202
12.3.1	The D/A Converter .....	203
12.3.2	The Memory Map .....	204
12.3.3	Configuring the D/A Converter .....	204
12.3.4	Generating a Sine Wave .....	205
12.3.5	Putting the Code Together.....	206
12.3.6	Running the Code.....	208
12.4	Exercises.....	209
<b>Chapter 13</b>	<b>THUMB .....</b>	<b>211</b>
13.1	Introduction .....	211
13.2	THUMB Instructions .....	212

13.3	Differences Between ARM and THUMB .....	213
13.4	THUMB Implementation and Use .....	215
13.4.1	Processor Hardware .....	215
13.4.2	Switching Between ARM and THUMB States .....	216
13.5	How to Compile for THUMB .....	218
13.6	Exercises .....	220
<b>Chapter 14</b>	<b>Mixing C and Assembly .....</b>	<b>223</b>
14.1	Introduction .....	223
14.2	Inline Assembler .....	223
14.2.1	Inline Assembly Syntax .....	226
14.2.2	Restrictions on Inline Assembly Operations .....	228
14.3	Embedded Assembler .....	228
14.3.1	Embedded Assembly Syntax .....	230
14.3.2	Restrictions on Embedded Assembly Operations .....	231
14.4	Calling Between C and Assembly .....	231
14.5	Exercises .....	233
<b>Appendix A</b>	<b>The ARM V4T Instruction Set .....</b>	<b>235</b>
<b>Appendix B</b>	<b>Running Keil Tools .....</b>	<b>333</b>
B.1	Introduction .....	333
B.2	Creating a Project and Selecting a Device .....	333
B.3	Creating Application Code .....	335
B.4	Building the Project and Running Code .....	336
<b>Appendix C</b>	<b>ASCII Character Codes .....</b>	<b>339</b>
<b>Glossary</b> .....		<b>341</b>
<b>References</b> .....		<b>343</b>
<b>Index</b> .....		<b>345</b>
