

Advanced Materials and Techniques for Reinforced Concrete Structures

Mohamed A. El-Reedy

CRC Press
Taylor & Francis Group

Contents

Preface.....	xv
The Author	xvii
Chapter 1 Introduction	1
References	3
Chapter 2 Reinforced Concrete Structures	5
2.1 Introduction	5
2.2 Feed (Preliminary) Engineering.....	5
2.3 Detailed Engineering.....	7
2.4 Different Structure Systems	7
2.4.1 Beam and Slab System.....	7
2.4.2 Hollow Block Slab.....	7
2.4.3 Pan Joist Floor.....	9
2.4.4 Flat Slab.....	10
2.4.5 Prestressed Concrete	12
2.4.5.1 Pre-tensioned Concrete.....	13
2.4.5.2 Bonded Post-tensioned Concrete	13
2.4.5.3 Unbonded Post-tensioned Concrete.....	16
2.4.6 Hollow Slab	17
2.4.7 Composite Section.....	19
2.5 High-Rise Building	23
2.5.1 Frames	24
2.5.2 Shear Wall	25
2.5.3 Shear Wall and Frame System	25
2.5.4 Framed Tube Structure.....	26
2.5.5 Cases of High-Rise Buildings	29
2.6 Foundations	33
2.6.1 Shallow Foundation.....	33
2.6.1.1 Isolated Footing	33
2.6.1.2 Combined Footing	33
2.6.1.3 Strap Footing	33
2.6.2 Raft Foundation.....	35
2.6.3 Deep Foundation	35
2.6.3.1 Timber Piles.....	38
2.6.3.2 Steel Piles.....	38
2.6.3.3 Concrete Piles	39
2.6.3.4 Pile Caps	41
References	43

Chapter 3	Loads in International Codes	45
3.1	Introduction	45
3.2	Loads	45
3.2.1	Dead Load	45
3.2.2	Live Load Characteristics	46
3.2.2.1	Stochastic Live Load Models	46
3.2.2.2	Poisson Square Wave Process	54
3.2.2.3	Filtered Poisson Process	54
3.2.2.4	Analysis of Suggested Model	55
3.2.2.5	Methodology and Calculation Procedure	59
3.2.2.6	Testing of Suggested Model	60
3.2.2.7	Verification of Suggested Model Using Monte-Carlo Simulation	61
3.2.2.8	Live Loads in Different Codes	62
3.2.3	Wind Load	67
3.2.3.1	ANSI Code	68
3.2.3.2	Wind Tunnel	68
3.2.3.3	Wind Load in British Specifications	70
3.2.3.4	Wind Load in Egyptian Code	76
3.2.4	Earthquake Loads	78
3.2.4.1	UBC 1997	79
3.2.4.2	Dynamic Analysis	82
3.2.4.3	Spectrum Analysis Method	82
3.2.4.4	Earthquake Calculation in ECP	82
3.3	Comparison of Calculations of Resistance for Different Codes	89
3.3.1	Capacity Reduction Factors	89
3.3.2	Probability of Structure Failure	91
3.3.3	Probability-Based Limit States Design	92
3.3.4	Reliability Analysis Procedure	92
3.3.5	Calculation of Reliability Index	94
3.3.6	Effect of C.O.V. of Resistance on Safety Index	97
	References	100

Chapter 4	Concrete Materials and Tests	103
4.1	Introduction	103
4.2	Concrete Materials Test	103
4.2.1	Cement	104
4.2.1.1	Cement Test by Sieve No. 170	105
4.2.1.2	Initial and Final Setting Times of Cement Paste Using Vicat Apparatus	106
4.2.1.3	Density of Cement	108

4.2.1.4	Define Cement Fineness by Using Blaine Apparatus	110
4.2.1.5	Compressive Strength of Cement Mortars	112
4.2.2	Aggregate Tests	113
4.2.2.1	Sieve Analysis Test	113
4.2.2.2	Abrasion Resistance of Coarse Aggregates in Los Angeles Test	122
4.2.2.3	Determination of Clay and Other Fine Materials in Aggregates.....	123
4.2.2.4	Aggregate Specific Gravity Test	124
4.2.2.5	Fine Aggregate Test	125
4.2.2.6	Define Specific Gravity for Coarse Aggregate.....	125
4.2.2.7	Bulk Density or Volumetric Weight Test for Aggregate.....	126
4.2.2.8	Percentage of Aggregate Absorption.....	126
4.2.2.9	Recycled Aggregate Concrete.....	127
4.2.3	Mixing Water Test.....	129
4.3	Steel Reinforcement Test.....	129
4.3.1	Weights and Measurement Test.....	130
4.3.2	Tension Test	130
4.4	Nondestructive Test for Hardened Concrete	132
4.4.1	Core Test.....	132
4.4.1.1	Core Size.....	133
4.4.1.2	Sample Preparation for Test.....	135
4.4.2	Rebound Hammer	137
4.4.2.1	Data Analysis.....	140
4.4.3	Ultrasonic Pulse Velocity	140
4.4.4	Load Test for Concrete Members	145
4.4.4.1	Test Procedure	146
4.4.4.2	Test Steps	146
4.4.4.3	Results Calculations.....	147
4.4.4.4	Acceptance and Refusal Limits	148
4.4.5	Pullout Test.....	149
4.4.6	Define Chloride Content in Hardened Concrete	149
	References	151

Chapter 5 Concrete Mix Design

5.1	Introduction	153
5.2	Essential Statistical Information	153
5.2.1	Arithmetic Mean	153
5.2.2	Standard Deviation.....	154
5.2.3	Coefficient of Variation	155

5.3	Basics of Concrete Mix Design.....	156
5.3.1	Normal Distribution.....	158
5.4	Egyptian Code.....	159
5.5	British Standard.....	163
5.6	American Specification (ACI).....	163
5.6.1	Acceptance and Refusal for Concrete Mix.....	164
5.6.2	Concrete Mix Procedure.....	164
5.6.2.1	Step 1: Choice of Slump.....	165
5.6.2.2	Step 2: Choice of Maximum Size of Aggregate.....	165
5.6.2.3	Step 3: Estimation of Mixing Water and Air Content.....	165
5.6.2.4	Step 4: Chemical Admixtures.....	166
5.6.2.5	Step 5: Selection of Water/Cement (w/c) Ratio.....	168
5.6.3	Mix Proportions.....	168
5.6.3.1	British Standard.....	170
5.7	Fresh Concrete Test.....	170
5.7.1	Cylinder and Cube Test.....	170
5.7.1.1	Cube Test.....	171
5.7.1.2	Cylinder Test.....	172
5.7.2	Predict Concrete Strength.....	173
5.8	Define Concrete Density.....	174
5.9	Define Settlement for Fresh Concrete.....	177
5.10	Determining Compacting Factor for Fresh Concrete.....	180
5.11	High Performance Concrete Mix.....	182
5.11.1	Required Strength.....	182
5.12	Pumped Concrete Mix.....	184
5.12.1	Basic Considerations.....	184
5.12.2	Coarse Aggregate.....	184
5.12.3	Fine Aggregate.....	184
5.12.4	Combined Normal Weight Aggregates.....	184
5.12.5	Water.....	185
5.12.6	Cementitious Materials.....	185
5.12.7	Admixtures.....	185
5.12.8	Field Practice.....	186
5.12.9	Field Control.....	186
	References.....	188

Chapter 6 Special Concrete..... 191

6.1	Introduction.....	191
6.2	Admixtures.....	191
6.2.1	Samples for Test.....	192
6.2.1.1	Powder Admixtures.....	192
6.2.1.2	Liquid Admixtures.....	192

6.2.2	Tests to Verify Admixture Requirements	193
6.2.2.1	Chemical Tests.....	193
6.2.2.2	Ash Content	193
6.2.2.3	Relative Density	194
6.2.2.4	Define Hydrogen Number.....	194
6.2.2.5	Define Chloride Ion	194
6.2.3	Performance Test.....	195
6.2.3.1	Control Mixing	195
6.3	Hot Weather Concrete	195
6.3.1	Definition of Hot Weather Region.....	197
6.3.2	Problems with Concrete in Hot Climate	198
6.3.2.1	Fresh Concrete Problems	198
6.3.2.2	Hardened Concrete Problems	198
6.3.2.3	Problems Due to Other Factors in Hot Climate	198
6.3.3	Effect of Hot Climate on Concrete Properties	199
6.3.3.1	Control Water Temperature in Mixing	200
6.3.3.2	Control Cement Temperature	202
6.3.3.3	Control Aggregate Temperature	202
6.3.3.4	Control Mixing Ratios.....	203
6.3.3.5	Control Concrete Mixing Process	203
6.3.3.6	Control Project Management	204
6.4	High-Strength Concrete.....	204
6.4.1	High-Strength Concrete Composition.....	206
6.4.1.1	Cement.....	206
6.4.1.2	Mineral Admixture.....	206
6.5	Self-Compacted Concrete.....	217
6.5.1	Development of Prototype.....	219
6.5.2	Applications of Self-Compacting Concrete	220
6.6	Lightweight Aggregate Concrete.....	220
6.6.1	Lightweight Aggregates	222
6.6.2	Lightweight Coarse Aggregate or Structural Member	222
6.6.3	Lightweight Aggregate Concrete Durability.....	223
6.7	Cellular Concrete.....	223
6.8	No-Fines Concrete.....	224
6.9	Sawdust Concrete	224
6.10	Rice Husk Ash.....	225
6.11	Advanced Materials for Concrete Protection	225
6.11.1	Corrosion Inhibitor.....	226
6.11.1.1	Anodic Inhibitors.....	226
6.11.1.2	Cathodic Inhibitor.....	227
6.11.2	Coating of Steel Reinforcement by Epoxy	227
6.11.3	Galvanized Steel Bars	229
6.11.4	Stainless Steel.....	230
6.11.5	Fiber Reinforcement Bars	231

6.11.6	Cathodic Protection by Surface Painting	232
6.11.7	Cathodic Protection System	232
6.11.7.1	Cathodic Protection	233
6.11.7.2	Cathodic Protection Components and Design Considerations	235
	References	240

Chapter 7 The Concrete Industry..... 243

7.1	Introduction	243
7.2	Execute Wooden Form	243
7.3	Formwork for High-Rise Buildings.....	249
7.3.1	Formwork Types.....	249
7.3.2	Delivery Systems.....	250
7.3.3	Allowable Tolerance in Dimensions.....	251
7.4	Detailing, Fabrication, and Installation of Steel Bars	252
7.4.1	Tolerance of Steel Bars in EGP.....	252
7.4.2	Allowable Tolerances in ACI 318.....	255
7.5	Concrete Cover and Specifications.....	255
7.5.1	British Standard.....	259
7.5.2	American Code	260
7.5.3	European Code.....	260
7.5.4	Special Specifications for Structures Exposed to Very Severe Conditions.....	262
7.5.5	Egyptian Code.....	263
7.5.6	Execute Concrete Cover	265
7.6	Concrete Pouring	270
7.6.1	Pouring Pumping Concrete	274
7.6.1.1	Incorrect Mix.....	275
7.6.1.2	Problems with Pipeline.....	275
7.6.1.3	Operator Error	276
7.6.2	Construction Joint	276
7.7	Compaction Procedure	277
7.8	Execute Curing.....	279
7.8.1	Curing Process in ACI	282
7.8.2	Curing in British Standard.....	283
7.8.3	Protect Special Structures.....	285
	References	285

Chapter 8 Structure Integrity Management 287

8.1	Introduction	287
8.2	Structure Integrity Management	287
8.3	Risk-Based Maintenance Strategy.....	289
8.3.1	Cost Calculation Basic Rules	290
8.3.2	Present Value Method	290

8.3.3	Repair Time.....	291
8.3.4	Capacity Loss in Reinforced Concrete Sections	292
8.4	Example	294
8.4.1	Required Time to Corrosion.....	294
8.4.2	Time Required to Deteriorate	296
8.4.3	Cost Analysis for Different Protection Methods	297
8.5	Repair and Inspection Strategy and Optimization	298
8.5.1	Repair	299
8.5.2	Expected Total Cost	300
8.5.3	Optimization Strategy	301
8.6	Maintenance Plan	303
8.6.1	Assessment Process.....	303
8.6.2	Risk-Based Inspection Maintenance Plan.....	307
	References	309
	Index	311
