

**THE CLINICAL
PRACTICE OF**

**Neurological &
Neurosurgical
Nursing**

SIXTH EDITION

JOANNE V. HICKEY

Wolters Kluwer
Health

**Lippincott
Williams & Wilkins**

Contents

SECTION 1

NEUROSCIENCE NURSING: CONTEMPORARY PRACTICE 1

CHAPTER 1

The State of the Science of Neuroscience Nursing Practice 2

Joanne V. Hickey

- The State of Health Care and Practice 2
- The Information Society and Knowledge Workers 2
- Trends Shaping Health Care Delivery 3
- Political Trends and Regulations 3
- Economic Trends 4
- Demographics 4
- Sociological Trends 5
- Technological Trends 6
- National Agenda for Health 6
- Professional Nursing and Neuroscience Specialty Practice 6

CHAPTER 2

Care Settings and Transitions in Care 11

Joanne V. Hickey

- Health Care Financing 11
- The Focus of Health Care 12
- The Continuum of Health Care Services 14
- Transitions in Care and Discharge Planning 17
- Planning for Transitions in Health Care Settings 17
- Discharge Planning for Neuroscience Patients 18

CHAPTER 3

Ethical Perspectives and End-of-Life Care 21

Joanne V. Hickey and Kathryn Montgomery

- An Ethical Perspective of Neuroscience Practice 21
- Ethics, Morality, and Legality 21
- Framework for Ethical Decision Making 22
- Independent Role of the Nurse 24
- Independent Role of the Physician 24
- Collaborative Roles 24
- Decision-Making Capacity and Advance Directives and Living Wills 26
- End-of-Life Care 28

Selected End-of-Life Ethical Issues Common in Neuroscience

Nursing Practice 28

Fostering Professional Growth in Ethical Decision Making 33

SECTION 2

ASSESSMENT AND EVALUATION OF NEUROSCIENCE PATIENTS 39

CHAPTER 4

Overview of Neuroanatomy and Neurophysiology 40

Joanne V. Hickey and Joseph T. Kanusky

- Embryonic Development of the Nervous System 40
- Cells of the Nervous System 40
- Components of the Cell Body 41
- Cell Processes: Axons and Dendrites 42
- Physiology of Nerve Impulses 43
- Functions and Divisions of the Nervous System 45
- Cranial and Spinal Bones 45
- Sutures of the Skull 48
- Spine 48
- Ligaments of the Spine 49
- Intervertebral Discs 50
- Meninges 50
- Cerebrospinal Fluid 52
- Formation of Cerebrospinal Fluid 52
- Cerebrovascular Circulation 53
- Characteristics of the Cerebral Circulation 54
- Blood-Brain Barrier 59
- Brain (Encephalon) 59
- General Functions of the Cerebral Cortex According to Lobes 60
- Dominance of a Cerebral Hemisphere 63
- Corpus Callosum 63
- Basal Ganglia 63
- Diencephalon 63
- Internal Capsule 64
- Hypophysis (Pituitary Gland) 64
- Brainstem (Midbrain, Pons, and Medulla) 65
- Cerebellum 67
- Special Systems Within the Brain 67
- Spinal Cord 68
- Dorsal (Sensory) Roots 70

Ventral (Motor) Roots	70
Classification of Nerve Fibers	71
Motor System	72
Sensory System	73
Autonomic Nervous System	76
Cranial Nerves	82

CHAPTER 5

Diagnostic Procedures and Laboratory Tests for Neuroscience Patients89

Joanne V. Hickey

Patient and Family Teaching	89
Outpatient Procedures	89
Hospitalized Patients and Procedures	90
Informed Consent	90
X-Rays of the Head and Vertebral Column	90
Spinal X-Rays	91
Anatomic Imaging Techniques of the Brain	91
Physiologic Imaging Techniques of the Brain	96
Cerebrospinal Fluid and Spinal Procedures	97
Cerebrovascular Studies	100
Biopsies	104
Nervous System Electrical Activity and Conduction	104
Testing of the Special Senses	108
Neuropsychological Examination	109
Common Neuropsychological Deficits Associated With Cerebral Dysfunction	110
Summary	110

CHAPTER 6

Comprehensive Neurological Examination 111

Joanne V. Hickey

Purposes	111
The Neurological Examination	111
Conducting the Neurological Examination	113
Level of Consciousness	113
Mental Status Examination	113
Cranial Nerve Examination	120
Motor System Examination	132
Upper Extremities	133
Lower Extremities	133
Sensory System Examination	134
Cerebellar System Examination	138
Reflexes	138
The Neurological Examination of the Comatose Patient	144
Summary	152

CHAPTER 7

Neurological Assessment 154

Joanne V. Hickey

Establishing a Nursing Database	154
Overview of Neurological Assessment	154

Frequency of Assessment and Documentation	155
Concept of Consciousness	155
Identifying the Levels of Consciousness	158
The Glasgow Coma Scale	159
Changes in Level of Consciousness	159
Recovery and Rehabilitation	163
Cranial Nerve Assessment	163
Assessment of Visual Fields (Optic Nerve)	163
Assessment of Pupils (Oculomotor Nerve)	163
Assessment of Extraocular Movement (Oculomotor, Trochlear, and Abducens Nerves)	168
Assessment of the Conscious, Cooperative Patient	169
Assessment of the Unconscious Patient	170
Assessment of Motor Function	170
Assessment of Muscle Strength	172
Involuntary Movement, Posture, and Gait	173
Sensory Assessment	173
Frequency and Documentation of Sensory Data	173
Assessment of Cerebellar Function	173
Vital Signs and Clinical Implications	174
Summary	179

SECTION 3

GENERAL CONSIDERATIONS IN NEUROSCIENCE NURSING 181

CHAPTER 8

Nutritional Support for Neuroscience Patients182

Joanne V. Hickey and Theresa Dildy

Basic Nutritional Requirements	182
Metabolic Changes and Characteristics of Acute Stress	184
Nutritional Assessment	184
Estimating Nutrient Requirements	186
Providing Nutrients	186
Problems Associated With Tube Feedings	188
The Nurse's Role: Meeting the Nutritional Needs of Patients	190

CHAPTER 9

Fluid and Metabolic Disorders in Neuroscience Patients 195

Joanne V. Hickey

Hypothalamic-Neurohypophyseal System	195
Hyponatremia	196
Hypernatremia	198
Other Common Electrolyte Imbalances	199
Syndrome of Inappropriate Secretion of Antidiuretic Hormone	201
Diabetes Insipidus	201
Cerebral Salt Wasting	203
Hyperosmolar Nonketotic Hyperglycemia	204
Summary	204

CHAPTER 10

Behavioral and Psychological Responses to Neurological Illness 206

Joanne V. Hickey

- Stress and the Stress Response 206
- Human Adaptation and Coping 207
- Neurological Conditions and Their Psychological Effects 207
- General Principles: Emotional and Psychological Responses to Neurological Conditions 207
- Common Emotional and Psychological Responses to the Stress Associated With Neurological Conditions 208
- Summary 212

CHAPTER 11

Rehabilitation of Neuroscience Patients 213

Joanne V. Hickey

- Framework for Disability 213
- Concepts of Rehabilitation 213
- A Philosophy of Rehabilitation 214
- Assessment of Activities of Daily Living 216
- Principles of Rehabilitation Nursing 216
- The Basis of Movement and Treatment of Movement Disorders 218
- Management of the Skin 225
- Sensory-Perceptual Deficits 225
- Communication Deficits 226
- Swallowing Deficits 229
- Bladder Dysfunction and Retraining 230
- Bowel Elimination and Dysfunction 236
- Cognitive Rehabilitation 237
- The Home-Based Ventilator-Dependent Patient 238
- Discharge Planning 238
- Rehabilitation Legislation and Entitlement Programs 238

CHAPTER 12

Pharmacologic Management of Neuroscience Patients 239

Timothy F. Lassiter and Amy I. Henkel

- Overview 239
- Commonly Used Drugs Along the Continuum of Care 239
- Antibiotics 248
- Steroids 253
- Diuretics 254
- Gastrointestinal Agents 254
- Anticoagulants and Antiplatelet Agents 256
- Volume Expanders and Intravenous Fluids 258
- Electrolyte Management 259
- Pharmacologic Treatment of Multiple Sclerosis 260
- Pharmacologic Treatment of Myasthenia Gravis 262
- Pharmacologic Treatment of Parkinson's Disease 264
- Summary 266

SECTION 4

COMMON MANAGEMENT PROBLEMS WITH NEUROSCIENCE PATIENTS 269

CHAPTER 13

Intracranial Hypertension: Theory and Management of Increased Intracranial Pressure 270

Joanne V. Hickey and DaiWai M. Olson

- Concept of Intracranial Pressure 270
- Pathophysiology 275
- Herniation Syndromes of the Brain 279
- Signs and Symptoms of Increased Intracranial Pressure 284
- Management of Patients With Intracranial Hypertension: A Collaborative Problem 287
- Monitoring Intracranial Pressure 296
- Special Syndromes: Benign Intracranial Hypertension and Hydrocephalus 303
- Summary 304

CHAPTER 14

Management of Patients Undergoing Neurosurgical Procedures 308

Joanne V. Hickey and Jamie L. Zoelner

- The Preoperative Phase 308
- The Intraoperative Phase 309
- Sitting Position 311
- Neurosurgical Procedures and Other Related Therapeutic Techniques 311
- Postoperative Phase 315
- Postoperative Management and Prevention of Complications 321
- Neurological Deficits in the Postoperative Period 324
- Nurse's Role in Rehabilitation and Discharge Planning 326
- Selected Neurosurgical Procedures 327
- Future Trends 334

CHAPTER 15

Nursing Management of Patients With a Depressed State of Consciousness 336

Joanne V. Hickey and Mary Bray Powers

- Immobility 336
- Specialty Beds and Support Surfaces 340
- The Consequences of Immobility: Nursing Management of the Patient With Depressed Consciousness 341
- The Care Environment 350
- Therapeutic Communications 350
- Regaining Consciousness 350
- Summary 350

CHAPTER 16

Neuroscience Critical Care 352

Susan Chioffi

- Critical Care Personnel 352
- The Intensive Care Unit Physical Environment 355

Clinical Management Issues	356
Anxiety, Agitation, and Delirium	360
Transport of the Critical Care Patient	361
Evidence-Based Practice and Research	362
Institute for Healthcare Improvement Initiatives	363
Interacting With the Families of Neuroscience Intensive Care Unit Patients	364
Nursing Management in Organ Donation	364
Ethical and Legal Concerns	365
Future Trends	365

SECTION 5

NURSING MANAGEMENT OF PATIENTS WITH INJURY TO THE NEUROLOGICAL SYSTEM 369

CHAPTER 17

Craniocerebral Injuries370

Joanne V. Hickey and Bettina C. Prator

Scope of the Problem	370
Overview of Craniocerebral Trauma	370
Pathophysiology	370
Primary Brain Injury	371
Secondary Brain Injury	373
Primary Injury: Diagnosis and Management	374
Other Injuries Related to Traumatic Brain Injury	382
Management of the Traumatic Brain Injury Patient: The Continuum of Care	382
Prehospital Management	385
Emergency Department or Trauma Center Management	387
Intensive Care Unit Management of Severe Traumatic Brain Injury	389
Management of Severe Traumatic Brain Injury During the Postacute Phase	400
Rehabilitation	400
Predicting Outcome From Traumatic Brain Injury	401
Prevention of Traumatic Brain Injury	401
Management of Traumatic Brain Injury: A Dynamic Process Through Research	401
Assessment and Clinical Reasoning: Key Role of the Neuroscience Nurse in Patient Care	402
Nursing Management of Traumatic Brain Injury	404
Nursing Management for Special Problems	405
Summary and Future Trends	406

CHAPTER 18

Vertebral and Spinal Cord Injuries410

Joanne V. Hickey

A Perspective	410
Understanding Spinal Cord Injuries	410
Specific Categories of Injuries	414
Acute Spinal Cord Trauma	426
Early Management of Patients With Spinal Cord Injury	427

Surgical Management of Spinal Cord Injury	432
Nonsurgical Management of Spinal Cord Injuries	433
Focus on Collaborative Management in the Acute and Postacute Phases	434
Major Patient Management Responsibilities of the Nurse	438
Summary	451

CHAPTER 19

Back Pain and Spinal Disorders 454

Joanne V. Hickey and Andrea L. Strayer

Conditions Related to Back or Neck Pain	454
Herniated Intervertebral Discs	460
Additional Common Diagnoses	474
Recurrent Symptoms After Surgery	483
Summary	484

CHAPTER 20

Peripheral Nerve Injuries486

Joanne V. Hickey

Mechanisms of Injury	486
Pathophysiology	486
Classification of Peripheral Nerve Injuries	487
Diagnosis of Peripheral Nerve Injuries	488
Peripheral Nerve Injuries: Treatment	491
Collaborative and Nursing Management of the Patient With Peripheral Nerve Trauma	493

SECTION 6

NURSING MANAGEMENT OF PATIENTS WITH NEOPLASMS OF THE NEUROLOGICAL SYSTEM 495

CHAPTER 21

Brain Tumors 496

Joanne V. Hickey and Terri S. Armstrong

Overview of Brain Tumors	496
Signs and Symptoms of Brain Tumor	498
Associated Increased Intracranial Pressure Signs	501
Approach to the Patient With a Brain Tumor	501
Nursing Management of the Patient With a Brain Tumor	515
Summary	519

CHAPTER 22

Spinal Cord Tumors 521

Joanne V. Hickey and Terri S. Armstrong

Epidemiology	521
Classification	521
Diagnosis	527
Principles of Treatment	528
Nursing Management of the Patient With a Spinal Cord Tumor	529

SECTION 7

NURSING MANAGEMENT OF PATIENTS WITH CEREBROVASCULAR PROBLEMS 535

CHAPTER 23

Cerebral Aneurysms 536

Deidre A. Buckley and Joanne V. Hickey

Overview 536

Familial Aneurysms 537

Etiology 538

Aneurysm Hemodynamics 539

Classification 540

Location 540

Ruptured Aneurysm 540

Signs and Symptoms 541

Diagnosis 544

Initial Approach to Medical Management 546

Surgical/Interventional Treatment 549

Complications of Aneurysmal Rupture/Bleeding 558

Nursing Management of the Patient With
an Aneurysm 562

Summary 567

CHAPTER 24

Arteriovenous Malformations and Other Cerebrovascular Anomalies 570

Deidre A. Buckley and Joanne V. Hickey

Classifications of Vascular Malformations 570

Arteriovenous Malformations in the Adult: An Overview 572

Pediatric Arteriovenous Malformations 578

Arteriovenous Malformations and Pregnancy 584

Nursing Management of Arteriovenous
Malformations 585

CHAPTER 25

Stroke 588

Joanne V. Hickey and Ann Quinn Todd

Disease-Specific Certification: Primary Stroke Center 589

Public and Professional Education 589

Definition and Classification of Stroke 589

Anatomy, Atherogenesis, and Pathophysiology
Related to Stroke 593

Signs and Symptoms of Stroke Syndromes According to the Involved
Vessel 598

Medical Management and Treatment of Acute
Ischemic Stroke 603

General Nursing Management of the Stroke Patient 610

CHAPTER 26

Other Cerebrovascular Disorders 620

Joanne V. Hickey

Cerebral Venous Thrombosis 620

Moyamoya Disease 621

Summary 621

SECTION 8

NURSING MANAGEMENT OF PATIENTS WITH PAIN, SEIZURES, AND CNS INFECTIONS 623

CHAPTER 27

Chronic Pain 624

Joanne V. Hickey

Definition of Terms 624

Pain Theories 625

Anatomy and Physiology of Pain 626

Assessment and Management of Chronic Pain 627

Nursing Management of Patients With Chronic Pain 631

Pain Management and the Future 632

CHAPTER 28

Headaches 633

Joanne V. Hickey

Pain-Sensitive Cranial Structures and
Pathophysiology 633

Classification of Headaches 634

Approach to Management of Headaches 635

Nursing Management of the Patient With Headache 643

CHAPTER 29

Seizures and Epilepsy 646

Joanne V. Hickey

Background and Definitions 646

Seizure Classification and Observations/Identification 647

Diagnosis 651

Treatment 653

Management of Seizures and Status Epilepticus in an Acute Care
Setting 658

Nursing Management of Patients With Epilepsy: Community-Based
Care 660

CHAPTER 30

Infections of the Central Nervous System 665

Joanne V. Hickey

Meningitis 665

Encephalitis 670

Other Viral Organisms That Attack the Central
Nervous System 675

Summary 678

SECTION 9

NURSING MANAGEMENT OF PATIENTS WITH NEURODEGENERATIVE DISEASES 679

CHAPTER 31

Dementias and Alzheimer's Disease 680

Joanne V. Hickey

Dementia 680

Alzheimer's Disease 684

CHAPTER 32

Neurodegenerative Diseases 690

Joanne V. Hickey

Models for Chronic Illness Management 690

Parkinson's Disease 691

Multiple Sclerosis 697

Amyotrophic Lateral Sclerosis 702

Myasthenia Gravis 704

Summary 708

SECTION 10

NURSING MANAGEMENT OF PATIENTS WITH PERIPHERAL NERVE DISEASES 711

CHAPTER 33

Peripheral Neuropathies 712

Joanne V. Hickey

Pathophysiology 712

Distribution Patterns of Peripheral Neuropathies 712

Development and Causes 713

Signs, Symptoms, and Clinical Presentations 713

Assessment, Investigation, and Diagnosis of
Neuropathies 714

Selected Peripheral Neuropathies 714

CHAPTER 34

Cranial Nerve Diseases 723

Joanne V. Hickey

Trigeminal Neuralgia 723

Bell's Palsy 725

Ménière's Disease 726

Glossopharyngeal Neuralgia 727

Index 729
