

Microchemical Engineering in Practice

*Edited by
Thomas R. Dietrich*

CONTENTS

PREFACE	xi
CONTRIBUTORS	xvii
I INTRODUCTION	1
1 Impact of Microtechnologies on Chemical Processing	3
<i>Jean F. Jenck</i>	
1.1 Innovation: An Answer to the Challenges of Sustainable Development / 3	
1.2 Process Intensification: A New Paradigm in Chemical Engineering / 4	
1.3 Microprocessing for Process Identification / 11	
1.4 Intensified Flux of Information (R&D) vs. Intensified Flux of Material (Production) / 15	
1.5 Implementation of Microtechnologies in Chemical Processing: A Few Select Examples / 16	
1.6 Challenge of Cost Efficiency: Balance between Capex and Opex / 20	
1.7 Perspectives / 24	
Bibliography and Other Sources / 27	

II	MICROFLUIDIC METHODS	29
2	Microreactors Constructed from Metallic Materials	31
	<i>Frank N. Herbstritt</i>	
2.1	Metals as Materials of Construction for Microreactors /	31
2.2	Material Selection /	32
2.3	Micro- and Precision Engineering Methods /	37
2.4	Joining and Mounting Techniques /	44
	Bibliography and Other Sources /	46
3	Microreactors Constructed from Insulating Materials and Semiconductors	47
	<i>Norbert Schwesinger and Andreas Freitag</i>	
3.1	Silicon Microreactors /	47
3.2	Glass Microreactors /	55
	Bibliography and Other Sources /	63
4	Micromixers	65
	<i>Joëlle Aubin and Catherine Xuereb</i>	
4.1	Introduction /	65
4.2	Mixing Principles and Fluid Contacting /	66
4.3	Technical Aspects /	70
4.4	Evaluating the Performance of a Micromixer /	73
4.5	Multiphase Mixing /	79
4.6	Problems and Solutions /	82
	Bibliography /	84
5	Microchannel Heat Exchangers and Reactors	87
	<i>Mark George Kirby and Svend Rumbold</i>	
5.1	Microchannel Heat Exchangers /	87
5.2	Chemical Reaction and Microchannel Heat Exchangers /	126
	Bibliography /	128
6	Separation Units	131
	<i>Asterios Gavrilidis and John Edward Andrew Shaw</i>	
6.1	Introduction /	131
6.2	Membrane Separation of Gases /	134
6.3	Absorption of Gases /	139
6.4	Stripping of Volatile Components /	145

6.5	Distillation of Binary Mixtures /	146
6.6	Immiscible Phase Liquid–Liquid Extraction /	146
6.7	Particle Separation from Liquids /	151
6.8	Concluding Remarks /	155
	Bibliography /	156
7	Calculations and Simulations	165
	<i>Dieter Bothe</i>	
7.1	Introduction /	165
7.2	Mechanisms and Scales /	166
7.3	Modeling and Computation of Reacting Flows /	172
7.4	Evaluation and Validation of CFD Simulations /	179
	Bibliography /	182
III	PERIPHERIC EQUIPMENT	185
8	Dosage Equipment	187
	<i>Asif Karim and Wolfgang Loth</i>	
8.1	Concept and Requirements /	187
8.2	Type of Pumps /	188
8.3	Range of Suitability /	194
	Bibliography /	197
9	Micromachined Sensors for Microreactors	199
	<i>Jan Dziuban</i>	
9.1	Introduction /	199
9.2	Pressure Sensors /	201
9.3	Temperature Sensors /	215
9.4	Flow and Mass Flow Sensors /	220
9.5	Conductometric/Amperometric Sensors /	223
9.6	Optical Photometric and Fluorometric Sensors /	226
9.7	Closing Remarks /	237
	Acknowledgments /	239
	Bibliography and Other Sources /	239
10	Automating Microprocess Systems	245
	<i>Thomas Müller-Heinzerling</i>	
10.1	Automation: Why? /	245
10.2	Sensors and Actuators for Microprocess Systems /	247

18	Intensification of Catalytic Process by Micro-Structured Reactors	403
	<i>Lioubov Kiwi-Minsker and Albert Renken</i>	
18.1	Introduction /	403
18.2	Characteristics of Microstructured Reactors /	405
18.3	Microstructured Reactors for Heterogeneous Catalytic Reactions /	412
18.4	Main Design Parameters of Catalytic MSR /	419
18.5	Conclusions /	425
	Bibliography /	426
19	Microstructured Immobilized Enzyme Reactors for Biocatalysis	431
	<i>Malene S. Thomsen and Bernd Nidetzky</i>	
19.1	Introduction /	431
19.2	Steps Toward a Microstructured Immobilized Enzyme Reactor. /	435
19.3	Selected Examples from the Literature /	440
	Acknowledgments /	441
	Bibliography /	442
20	Multiphase Reactions	449
	<i>J. G. E. (Har) Gardeniers</i>	
20.1	Introduction /	449
20.2	Two-Phase Flow Regimes /	450
20.3	Examples of Microreactors Based on Segmented Flow /	453
20.4	Examples of Microreactors Based on Other Flow Types /	464
20.5	Concluding Remarks /	468
	Bibliography /	469
