<i>Dedication</i>	xiii
<i>Acknowledgements</i>	xiv
<i>Preface</i>	xv
<i>Introduction</i>	xvi
1 Causes of depression	1
Epidemiology of depression	1
Gender and depression	2
What is depression?	3
Causes of depression	3
Recognizing the symptoms of depression	4
Depression as normal	4
Different types of depression	5
Major depression	5
Typical symptoms	5
Common symptoms	5
Dysthymia	6
Common symptoms	6
Manic depression or bipolar disorder	6
Mania	7
Seasonal affective disorder	8
Postnatal depression	9
Anxiety	10
Physical causes linked to depression	10
Beliefs about depression	11
Cultural beliefs about depression	11
Lay beliefs and depression	12

Sociological beliefs	12
Conclusion	13
Reflection and discussion	14
Why is it important to consider cultural beliefs about depression?	14
Give some causes of depression	14
Recognize some of the symptoms of depression	14
Name some of the different types of depression	15
Discuss the importance of recognizing the signs and symptoms of depression and how this influences patient care	15
References	15
2 Depression in children and young people	18
Introduction	18
Incidence of mental disorder in children	18
Causes of depression in young people	19
Physical conditions	20
Diagnosing depression in children	20
Associated risk factors	22
Treatment of depression in children and young people	23
Drug treatment	23
Therapies	24
Substance misuse in young people	25
Cannabis or marijuana	25
Self-harm and suicide	27
Self-harming behaviour	28
Suicide in young people	29
Risk factors associated with suicide	30
Conclusion	30
Reflection and discussion	31
What factors need to be considered when suspecting depression in children?	31
What other factors need to be considered?	31
Discuss appropriate treatments for depressed children and young people. Reflect on the impact of substance abuse in children and young people and the impact upon their mental health. Give examples of self-harming behaviour	32
Describe the risk factors associated with suicide	32
References	32

3	Depression throughout the adult female life cycle	37
	Introduction	37
	Premenstrual syndrome and premenstrual dysphoric disorder	38
	Diagnosis of premenstrual syndrome and premenstrual dysphoric disorder	39
	Depression in pregnancy	40
	Anxiety and depression during pregnancy	42
	Postpartum depression	42
	Trans-cultural studies	44
	Predicting risk of postnatal depression	45
	Puerperal psychosis	47
	Depression related to the menopause	47
	Learning disabilities and the menopause	49
	Conclusion	50
	Reflection and discussion	50
	Discuss the importance of attaining a correct diagnosis for PMS and PMDD	50
	Why is it important to diagnose depression in pregnancy?	51
	Why is it important to recognize postpartum depression?	51
	Why is it important to consider depression during the menopause?	51
	References	52
4	The impact of stress and depression upon work and well-being	56
	Introduction	56
	Causes of work-related stress and depression	57
	Bullying and harassment in the workplace	57
	Bullying in the workplace	58
	Depression and the ability to work	58
	The economic impact of stress and depression in the workplace	60
	Improving health and well-being and employer's responsibility	61
	Men and depression	62
	Paternal perinatal mental health	64
	Unemployment and retirement	64
	PTSD in men and women	65
	Persistent symptoms experienced by PTSD sufferers	66
	Conclusion	68

Reflection and discussion	68
What causes work-related stress and depression?	68
Describe the types of workplace bullying	68
How can employers help to improve health and well-being?	69
How do you ensure that depression in men is addressed?	69
Why is it important to understand posttraumatic stress disorder (PTSD)?	69
References	70
5 Depression in chronic disease and long-term conditions	74
Introduction	74
Depression and coronary heart disease	75
Depression and stroke	77
Depression and chronic obstructive airways disease	78
Depression and renal disease	79
Depression and diabetes	80
Depression and cancer	82
The role of the clinical nurse specialist in palliative care	83
Neurological conditions	84
Evidence regarding long-term conditions	85
Conclusion	85
Reflection and discussion	87
Discuss the impact of depression on long-term conditions	87
Give some examples of chronic diseases where depression is evident	87
Discuss the importance of the role of the clinical nurse specialist in palliative care	87
References	87
6 Depression in later life	92
Introduction	92
Causes and incidence of depression in late life	93
Depression and dementia	93
Alcohol misuse in old age	94
Anorexia in old age	95
Beliefs about depression	95
The Geriatric Depression Scale-15	97
Management of depression in old age	97
Treatment	98
Adherence, compliance and concordance	99

Types of treatment available	100
Medication	100
Psychological interventions	101
Electroconvulsive therapy	102
Suicide and older people	102
Morbidity and mortality	103
Perceptions of care workers caring for older depressed adults	103
National Service Framework for older people	104
Bereavement and grief	104
Kubler Ross stages of dying	105
Ethnicity and depression	106
Lifespan developmental theories	106
Normal grief reactions	107
Abnormal or complicated grief	109
Conclusion	109
Reflection and discussion	110
What factors influence depression in late life?	110
Discuss adherence, compliance and concordance of treatment in relation to older people with depression	111
Discuss the impact of suicide in older people	111
Discuss the importance of the grieving process and the difference between normal and abnormal grieving	111

Useful website resources	116
7 Suicide and self-harm	117
Introduction	117
Background on suicide	118
Suicide rates and statistics	118
Potential reasons for reduction in reported suicide rates in England	119
National strategies to reduce suicide	119
The role of the GP in the prevention of suicide	120
Socio-economic factors associated with suicidal behaviour	121
Discharge liaison, the role of the community psychiatric nurse and the care programme approach	121
Potential guidelines and recommendations on suicide prevention prior to discharge	122
Suicidal behaviour	123
People associated with higher incidence of suicide	124
Young people	124

Suicide and depression in young people with learning disabilities	126
Prisoners	126
Clergy	127
Alcohol abuse	127
Psychiatric illness associated with suicide	128
HIV and AIDS	129
Older people	130
Antidepressants and the risk of suicidal behaviour	130
The importance of managing suicidal risk	131
Risk assessment	131
No-suicide contracts	133
Review of risk assessment scales	133
Self-harm	135
Reasons why young people self-harm	135
Self-harm and high suicidal risk	136
The professional's role in suicide prevention	138
The doctor's role	138
The nurse's role	138
Conclusion	139
Reflection and discussion	140
Case scenarios and key observations	140
Reflect on the two case scenarios and discuss your actions with colleagues	141
References	141
8 Treatment for depression	146
Introduction	146
Antidepressants	148
Types of antidepressants	148
Psychological therapies	152
Problem-solving therapy	152
Counselling	153
Cognitive behaviour therapy	154
Guided self-help	157
Group work	157
Interpersonal psychotherapy	157
Electroconvulsive therapy	158
Exercise and dance	158
Electromagnetic stimulation	160
Compliance with treatment	160
Accessing treatment	161
Nurse prescribing	162
Crisis resolution services	163

Conclusions	163
Reflection and discussion	164
Case study scenarios	164
Reflect on the case study and discuss your actions with colleagues	165
Reflect on the case study and discuss your actions with colleagues	165
References	166
9 Ethnicity and depression and mental health and learning disabilities	171
Introduction	171
Prevalence of depression by race or ethnicity	171
Ethnicity and diversity	172
Monitoring ethnicity and inequality	173
Depression in immigrants and ethnic minorities	173
Treatment of depression	175
Physical health, ageing and depression	176
Supporting race equality	177
Provision of services	178
Depression in people with learning disabilities	179
Low self-esteem in people with learning disabilities	180
Learning disabilities and self-harm	181
Learning disabilities and self-injury	181
Conclusion	182
Reflection and discussion	183
Why is it important to consider culture and diversity when providing care for people with depression?	183
Why is it important to consider treatment options for ethnic minorities?	183
What factors need to be considered in relation to physical health, ageing and depression?	183
How can race equality be ensured in mental health care?	183
What factors need to be considered in relation to people with learning disabilities who self-harm or self-injure?	184
References	184
10 Managing depression in primary and secondary care and evidence-based practice	188
Introduction	188
Evidence-based care for depression in primary care	188
Management of depression in primary and secondary care	191

National guidance for depression in children and young people	192
Guidance on posttraumatic stress disorder in adults and children	193
Patient's experience of depression and the expert patient	194
The expert patient	195
Patient safety in mental health	195
National patient safety agency	196
Root cause analysis	196
Barrier analysis	197
Suicide prevention: good practice guidelines	197
Evidence-based practice	198
Medicine management	199
Improving access to cognitive behavioural therapy	200
Mental health policy	201
National suicide prevention strategy	201
Care programme approach	202
Screening for depression	202
Progress on mental health reform	203
Media reporting on suicide	203
Mental health research	204
Conclusion	204
Reflection and discussion	205
Using a step approach/model where should depressed people be treated?	205
What two key questions should be asked when assessing people for depression?	205
What four key underlying principles need to be considered when balancing care needs against risk needs?	206
What key questions does root cause analysis ask?	206
Name four barriers to managing risk?	206
Share four examples from your clinical practice with your team. Discuss with your colleagues policies and strategies in relation to suicide and self-harm in your organization	206
