

David W.A. Rees

Mechanics of Optimal Structural Design

Minimum Weight Structures

 **WILEY**

Contents

Preface	xi
Glossary of Terms	xv
Key Symbols	xix
Chapter 1 Compression of Slender Struts	1
1.1 Introduction	1
1.2 Failure Criteria	1
1.3 Solid Cross-Sections	3
1.4 Thin-Walled, Tubular Sections	6
1.5 Thin-Walled, Open Sections	13
1.6 Summary of Results	24
References	25
Exercises	25
Chapter 2 Compression of Wide Struts	29
2.1 Introduction	29
2.2 Failure Criteria	29
2.3 Cellular Sections	31
2.4 Open Sections	37
2.5 Corrugated Sandwich Panel	57
2.6 Summary of Results	60
References	61
Exercise	61
Chapter 3 Bending of Slender Beams	65
3.1 Introduction	65
3.2 Solid Cross-Sections	66
3.3 Thin-Walled, Tubular Sections	69
3.4 Open Sections	76
3.5 Summary of Results	88
References	89
Exercises	89

Chapter 4	Torsion of Bars and Tubes	91
4.1	Introduction	91
4.2	Solid Cross-Sections	92
4.3	Thin-Walled, Open Sections	99
4.4	Thin-Walled, Closed Tubes	109
4.5	Multi-Cell Tubes	121
	References	130
	Exercises	130
Chapter 5	Shear of Solid Bars, Tubes and Thin Sections	135
5.1	Introduction	135
5.2	Bars of Solid Section	136
5.3	Thin-Walled Open Sections	143
5.4	Thin-Walled, Closed Tubes	159
5.5	Concluding Remarks	170
	References	171
	Exercise	171
Chapter 6	Combined Shear and Torsion in Thin-Walled Sections	173
6.1	Introduction	173
6.2	Thin-Walled, Open Sections	173
6.3	Thin-Walled, Closed Tubes	177
6.4	Concluding Remarks	189
	References	190
	Exercises	190
Chapter 7	Combined Shear and Bending in Idealised Sections	193
7.1	Introduction	193
7.2	Idealised Beam Sections	193
7.3	Idealised Open Sections	201
7.4	Idealised Closed Tubes	210
	References	221
	Exercises	221
Chapter 8	Shear in Stiffened Webs	223
8.1	Introduction	223
8.2	Castellations in Shear	223
8.3	Corrugated Web	226
8.4	Flat Web with Stiffeners	231
	References	237
	Exercises	237
Chapter 9	Frame Assemblies	239
9.1	Introduction	239
9.2	Double-Strut Assembly	239
9.3	Multiple-Strut Assembly	244

9.4	Cantilevered Framework	247
9.5	Tetrahedron Framework	253
9.6	Cantilever Frame with Two Struts	256
9.7	Cantilever Frame with One Strut	259
	References	264
	Exercises	264
Chapter 10	Simply Supported Beams and Cantilevers	265
10.1	Introduction	265
10.2	Variable Bending Moments	265
10.3	Cantilever with End-Load	271
10.4	Cantilever with Distributed Loading	281
10.5	Simply Supported Beam with Central Load	292
10.6	Simply Supported Beam with Uniformly Distributed Load	303
10.7	Additional Failure Criteria	316
	References	322
	Exercises	323
Chapter 11	Optimum Cross-Sections for Beams	325
11.1	Introduction	325
11.2	Approaching Optimum Sections	326
11.3	Generalised Optimum Sections	328
11.4	Optimum Section, Combined Bending and Shear	330
11.5	Solid, Axisymmetric Sections	331
11.6	Fully Optimised Section	341
11.7	Fully Optimised Weight	345
11.8	Summary	355
	References	356
	Exercises	356
Chapter 12	Structures under Combined Loading	357
12.1	Introduction	357
12.2	Combined Bending and Torsion	357
12.3	Cranked Cantilever	359
12.4	Cranked Strut with End-Load	362
12.5	Cranked Bracket with End-Load	365
12.6	Portal Frame with Central Load	368
12.7	Cantilever with End and Distributed Loading	371
12.8	Centrally Propped Cantilever with End-Load	377
12.9	End-Propped Cantilever with Distributed Load	385
12.10	Simply Supported Beam with Central-Concentrated and Distributed Loadings	390
12.11	Centrally Propped, Simply Supported Beam with Distributed Load	395
	References	400
	Exercises	400

Chapter 13	Encastré Beams	403
13.1	Introduction	403
13.2	Central-Concentrated Load	403
13.3	Uniformly Distributed Load	418
13.4	Combined Loads	437
	References	463
	Exercises	463
Chapter 14	Plastic Collapse of Beams and Frames	465
14.1	Introduction	465
14.2	Plane Frames	466
14.3	Beam Plasticity	468
14.4	Collapse of Simple Beams	474
14.5	Encastré Beams	478
14.6	Continuous Beams	481
14.7	Portal Frames	486
14.8	Effect of Axial Loading upon Collapse	497
14.9	Effect of Shear Force upon Collapse	500
14.10	Effect of Hardening upon Collapse	505
	References	507
	Exercises	507
Chapter 15	Dynamic Programming	511
15.1	Introduction	511
15.2	Single-Span Beam	511
15.3	Two-Span Beam	513
15.4	Three-Span Beam	515
15.5	Design Space	517
	Reference	520
	Exercises	520
Appendix A	Mechanical Properties	521
A.1	Non-Metals	521
A.2	Metals and Alloys	522
	References	524
Appendix B	Plate Buckling Under Uniaxial Compression	525
B.1	Wide and Slender Struts	525
B.2	Plates with Supported Sides	527
B.3	Inelastic Buckling	530
B.4	Post-Buckling	533
	References	534
Appendix C	Plate Buckling Under Biaxial Compression and Shear	537
C.1	Biaxial Compression	537
C.2	Pure Shear	539

C.3	Inelastic Shear Buckling	541
	References	541
Appendix D Secondary Buckling		543
D.1	Buckling Modes	543
D.2	Local Compressive Buckling	544
D.3	Global Buckling	545
D.4	Local Shear Buckling	547
	References	547
Bibliography		549
Index		553
