

DNA and Biotechnology

Molly Fitzgerald-Hayes
Frieda Reichsman

Contents

Acknowledgments vii

Introduction ix

1	The Roots of DNA Research	1
2	The DNA Double Helix	15
3	DNA in Action	39
4	Tools of the DNA Trade	77
5	Working with DNA	101
6	Human Genomics	127
7	Bioinformatics	149
8	DNA Forensics	173
9	Exploring Cell Fate	191

10	Human Genetic Diseases	217
11	Gene Therapy	243
12	Stem Cell Research	265
13	Pharmaceutical Biotechnology	287
14	Animal Biotechnology	311
15	Agricultural Biotechnology	331
16	Genes and Race	351
