

Series on Photoconversion of Solar Energy — Vol. 1

CLEAN ELECTRICITY FROM PHOTOVOLTAICS

Editors

Mary D. Archer
Robert Hill

Imperial College Press

CONTENTS

About the authors	xiii
Preface	xxiii
1 The past and present	1
<i>M. D. Archer</i>	
1.1 Milestones in photovoltaic technology	4
1.2 Evolution of the PV market	11
1.3 Overview of photovoltaic cell operation	14
1.4 Other junction types	24
1.5 Sources of further information	28
2 Device physics of silicon solar cells	33
<i>J. O. Schumacher and W. Wettling</i>	
2.1 Introduction	33
2.2 Semiconductor device equations	35
2.3 The p - n junction model of Shockley	37
2.4 Real diode characteristics	55
2.5 Numerical solar cell modelling	67
2.6 Concluding remarks	86
3 Principles of cell design	91
<i>J. Poortmans, J. Nijs and R. Mertens</i>	
3.1 Introduction	91
3.2 Main cell types	93
3.3 Optical design of cells	99
3.4 Surface recombination losses and their reduction	108
3.5 Bulk recombination losses and their reduction	121
3.6 Design and fabrication of the metal contacts	133
3.7 Conclusions	140
4 Crystalline silicon solar cells	149
<i>M. A. Green</i>	
4.1 Overview	
4.2 Silicon cell development	

4.3	Substrate production	164
4.4	Cell processing	173
4.5	Cell costs	178
4.6	Opportunities for improvement	180
4.7	Silicon-supported thin films	185
4.8	Summary	189
5	Amorphous silicon solar cells	199
	<i>C. R. Wronski and D. E. Carlson</i>	
5.1	Introduction	199
5.2	Background	201
5.3	Amorphous silicon-based materials	202
5.4	Growth and microstructure	209
5.5	Solar cells	211
5.6	Solar cell structures	221
5.7	PV modules	225
5.8	Manufacturing costs	231
5.9	Long-term reliability	232
5.10	Environmental issues	235
5.11	Challenges for the future	236
6	Cadmium telluride solar cells	245
	<i>D. Bonnet</i>	
6.1	Introduction	245
6.2	Early work	246
6.3	The potential of the base material	246
6.4	Diodes and cells	249
6.5	Cell production	251
6.6	Module production	262
6.7	Industrial status—achievements and projections	264
6.8	Economic aspects	267
6.9	Health and environmental aspects	268
6.10	Conclusions	269
7	Cu(In,Ga)Se₂ solar cells	277
	<i>U. Rau and H. W. Schock</i>	
7.1	Introduction	277

7.2	Material properties	279
7.3	Cell and module technology	286
7.4	Device physics	306
7.5	Wide-gap chalcopyrites	325
7.6	Conclusions	332
8	Super-high efficiency III–V tandem and multijunction cells	347
	<i>M. Yamaguchi</i>	
8.1	Introduction	347
8.2	Principles of super-high efficiency multijunction solar cells	349
8.3	Candidate materials for multijunction cells and their present status	355
8.4	Epitaxial technologies for growing III–V compound cells	363
8.5	Monolithic vs. multi-terminal connection modes	364
8.6	Cell interconnection	365
8.7	Possible applications of multijunction cells	368
8.8	Predictions	369
9	Organic photovoltaic devices	377
	<i>J. J. M. Halls and R. H. Friend</i>	
9.1	Introduction	377
9.2	Background—early work on photoresponsive organic semiconductors	383
9.3	Conjugated molecules: a new class of semiconductors	384
9.4	Basic organic photovoltaic cells	390
9.5	Photogeneration and charge transport in organic PV cells	398
9.6	The characteristics of organic photovoltaic cells	405
9.7	Heterojunction photovoltaic cells	413
9.8	Dispersed heterojunction photovoltaic cells	421
9.9	Diffuse interface photovoltaic cells	428
9.10	Towards future applications	429
9.11	Conclusions	432
10	Quantum well solar cells	447
	<i>J. Nelson</i>	
10.1	Introduction	447
10.2	Device design, materials and technology	448
10.3	Physics of QWs	451

10.4	Performance characteristics of QWSCs	462
10.5	Limits to efficiency	472
10.6	Applications	474
10.7	Conclusions	476
11	Thermophotovoltaic generation of electricity	481
	<i>T. J. Coutts</i>	
11.1	Introduction	481
11.2	Radiators	487
11.3	Optical control elements	490
11.4	Device modelling	497
11.5	Potentially suitable materials	506
11.6	System modelling	512
11.7	Summary	518
12	Concentrator cells and systems	529
	<i>A. Luque</i>	
12.1	Introduction	529
12.2	Concentrator solar cells	531
12.3	Tracking concentrators	556
12.4	Performance and cost considerations	570
12.5	Conclusion: under what circumstances is concentration worthwhile?	574
13	Cells and systems for space applications	585
	<i>C. M. Hardingham</i>	
13.1	Space systems	585
13.2	The space environment	588
13.3	History of solar arrays in space	592
13.4	Market trends and drivers in satellite power requirements	593
13.5	Satellite solar arrays	596
13.6	Space solar cell technology	599
13.7	New approaches for satellite solar arrays	604
13.8	Long-term directions	605

14	Storage of electrical energy	609
	<i>R. M. Dell</i>	
14.1	Introduction	609
14.2	Electricity storage options	610
14.3	Kinetic energy storage	614
14.4	Hydrogen energy storage	618
14.5	Storage batteries	633
14.6	Super- and ultra-capacitors (electrochemical capacitors)	662
14.7	Conclusions	663
15	Photovoltaic modules, systems and applications	671
	<i>N. M. Pearsall and R. Hill</i>	
15.1	Introduction	671
15.2	Photovoltaic modules	672
15.3	The photovoltaic array	683
15.4	The photovoltaic system	688
15.5	Costs of PV components and systems	704
15.6	Conclusions	710
16	The photovoltaic business: manufacturers and markets	713
	<i>B. McNelis</i>	
16.1	Introduction	713
16.2	Origins and structure of the industry	715
16.3	Growth in PV production	716
16.4	Manufacturers	718
16.5	Markets	726
16.6	Future market growth	732
16.7	International financing and new initiatives	734
16.8	Concluding remarks	736
17	The economics of photovoltaic technologies	741
	<i>D. Anderson</i>	
17.1	Introduction	741
17.2	Economics of PV applications	742
17.3	The policy framework	754
17.4	Conclusions	765

18	The outlook for PV in the 21st century	771
	<i>E. H. Lysen and B. Yordi</i>	
18.1	The changing outlook for PV	771
18.2	PV and world energy supply	773
18.3	PV can play an impressive local role	774
18.4	The ultimate PV system	779
18.5	Market development	781
18.6	Barriers to the introduction of PV	784
18.7	Costs	786
18.8	International co-operation	787
18.9	The future of PV	788
	Appendices	
I	Fundamental Constants	791
II	Useful Quantities and Conversion Factors	792
III	List of Symbols	793
IV	Acronyms and Abbreviations	797
	Index	799
