Preface.....	xv
1 Introduction to Statistics and Data Analysis	1
1.1 Overview: Statistical Inference, Samples, Populations and Experimental Design.....	1
1.2 The Role of Probability.....	4
1.3 Sampling Procedures; Collection of Data.....	7
1.4 Measures of Location: The Sample Mean and Median.....	11
Exercises.....	13
1.5 Measures of Variability.....	14
Exercises.....	17
1.6 Discrete and Continuous Data.....	17
1.7 Statistical Modeling, Scientific Inspection, and Graphical Diagnostics.....	19
1.8 Graphical Methods and Data Description.....	20
1.9 General Types of Statistical Studies: Designed Experiment, Observational Study, and Retrospective Study.....	25
Exercises.....	28
2 Probability.....	31
2.1 Sample Space.....	31
2.2 Events.....	34
Exercises.....	38
2.3 Counting Sample Points.....	40
Exercises.....	47
2.4 Probability of an Event.....	48
2.5 Additive Rules.....	52
Exercises.....	55
2.6 Conditional Probability.....	58
2.7 Multiplicative Rules.....	61
Exercises.....	65

2.8	Bayes' Rule	68
	Exercises	72
	Review Exercises.....	73

3 Random Variables and Probability Distributions..... 77

3.1	Concept of a Random Variable	77
3.2	Discrete Probability Distributions	80
3.3	Continuous Probability Distributions	84
	Exercises	88
3.4	Joint Probability Distributions	91
	Exercises	101
	Review Exercises.....	103
3.5	Potential Misconceptions and Hazards; Relationship to Material in Other Chapters.....	106

4 Mathematical Expectation..... 107

4.1	Mean of a Random Variable.....	107
	Exercises	113
4.2	Variance and Covariance of Random Variables.....	115
	Exercises	122
4.3	Means and Variances of Linear Combinations of Random Variables	123
4.4	Chebyshev's Theorem	131
	Exercises	134
	Review Exercises.....	136
4.5	Potential Misconceptions and Hazards; Relationship to Material in Other Chapters.....	138

5 Some Discrete Probability Distributions..... 141

5.1	Introduction and Motivation	141
5.2	Discrete Uniform Distribution	141
5.3	Binomial and Multinomial Distributions.....	143
	Exercises	150
5.4	Hypergeometric Distribution	152
	Exercises	157
5.5	Negative Binomial and Geometric Distributions	158
5.6	Poisson Distribution and the Poisson Process.....	161
	Exercises	165
	Review Exercises.....	167
5.7	Potential Misconceptions and Hazards; Relationship to Material in Other Chapters.....	169

6	Some Continuous Probability Distributions	171
6.1	Continuous Uniform Distribution	171
6.2	Normal Distribution	172
6.3	Areas under the Normal Curve	176
6.4	Applications of the Normal Distribution	182
	Exercises	185
6.5	Normal Approximation to the Binomial	187
	Exercises	193
6.6	Gamma and Exponential Distributions	194
6.7	Applications of the Exponential and Gamma Distributions	197
6.8	Chi-Squared Distribution	200
6.9	Lognormal Distribution	201
6.10	Weibull Distribution (Optional)	202
	Exercises	205
	Review Exercises	206
6.11	Potential Misconceptions and Hazards; Relationship to Material in Other Chapters	209
7	Functions of Random Variables (Optional)	211
7.1	Introduction	211
7.2	Transformations of Variables	211
7.3	Moments and Moment-Generating Functions	219
	Exercises	226
8	Fundamental Sampling Distributions and Data Descriptions	229
8.1	Random Sampling	229
8.2	Some Important Statistics	231
	Exercises	234
8.3	Data Displays and Graphical Methods	236
8.4	Sampling Distributions	243
8.5	Sampling Distribution of Means	244
	Exercises	251
8.6	Sampling Distribution of S^2	254
8.7	t -Distribution	257
8.8	F -Distribution	261
	Exercises	265
	Review Exercises	266
8.9	Potential Misconceptions and Hazards; Relationship to Material in Other Chapters	268

9 One- and Two-Sample Estimation Problems 269

9.1	Introduction	269
9.2	Statistical Inference	269
9.3	Classical Methods of Estimation	270
9.4	Single Sample: Estimating the Mean	274
9.5	Standard Error of a Point Estimate	280
9.6	Prediction Intervals	281
9.7	Tolerance Limits	283
	Exercises	285
9.8	Two Samples: Estimating the Difference between Two Means	288
9.9	Paired Observations	294
	Exercises	297
9.10	Single Sample: Estimating a Proportion	299
9.11	Two Samples: Estimating the Difference between Two Proportions	302
	Exercises	304
9.12	Single Sample: Estimating the Variance	306
9.13	Two Samples: Estimating the Ratio of Two Variances	308
	Exercises	310
9.14	Maximum Likelihood Estimation (Optional)	310
	Exercises	315
	Review Exercises	315
9.15	Potential Misconceptions and Hazards; Relationship to Material in Other Chapters	319

10 One- and Two-Sample Tests of Hypotheses 321

10.1	Statistical Hypotheses: General Concepts	321
10.2	Testing a Statistical Hypothesis	323
10.3	One- and Two-Tailed Tests	332
10.4	The Use of P -Values for Decision Making in Testing Hypotheses	334
	Exercises	336
10.5	Single Sample: Tests Concerning a Single Mean (Variance Known)	338
10.6	Relationship to Confidence Interval Estimation	341
10.7	Single Sample: Tests on a Single Mean (Variance Unknown)	342
10.8	Two Samples: Tests on Two Means	345
10.9	Choice of Sample Size for Testing Means	350
10.10	Graphical Methods for Comparing Means	355
	Exercises	357
10.11	One Sample: Test on a Single Proportion	361
10.12	Two Samples: Tests on Two Proportions	364
	Exercises	366
10.13	One- and Two-Sample Tests Concerning Variances	367

Exercises	370
10.14 Goodness-of-Fit Test	371
10.15 Test for Independence (Categorical Data)	374
10.16 Test for Homogeneity	377
10.17 Testing for Several Proportions	378
10.18 Two-Sample Case Study	380
Exercises	383
Review Exercises	385
10.19 Potential Misconceptions and Hazards; Relationship to Material in Other Chapters	387

11 Simple Linear Regression and Correlation .. 389

11.1 Introduction to Linear Regression	389
11.2 The Simple Linear Regression Model	390
11.3 Least Squares and the Fitted Model	394
Exercises	397
11.4 Properties of the Least Squares Estimators	400
11.5 Inferences Concerning the Regression Coefficients	402
11.6 Prediction	409
Exercises	412
11.7 Choice of a Regression Model	414
11.8 Analysis-of-Variance Approach	415
11.9 Test for Linearity of Regression: Data with Repeated Observations Exercises	417 423
11.10 Data Plots and Transformations	425
11.11 Simple Linear Regression Case Study	430
11.12 Correlation	432
Exercises	438
Review Exercises	438
11.13 Potential Misconceptions and Hazards; Relationship to Material in Other Chapters	443

12 Multiple Linear Regression and Certain Nonlinear Regression Models 445

12.1 Introduction	445
12.2 Estimating the Coefficients	446
12.3 Linear Regression Model Using Matrices (Optional)	449
Exercises	452
12.4 Properties of the Least Squares Estimators	456
12.5 Inferences in Multiple Linear Regression	458
Exercises	464

12.6	Choice of a Fitted Model through Hypothesis Testing	465
12.7	Special Case of Orthogonality (Optional)	469
	Exercises	473
12.8	Categorical or Indicator Variables	474
	Exercises	478
12.9	Sequential Methods for Model Selection	479
12.10	Study of Residuals and Violation of Assumptions	485
12.11	Cross Validation, C_p , and Other Criteria for Model Selection	490
	Exercises	496
12.12	Special Nonlinear Models for Nonideal Conditions	499
	Review Exercises	503
12.13	Potential Misconceptions and Hazards; Relationship to Material in Other Chapters	508

13 One-Factor Experiments: General..... 511

13.1	Analysis-of-Variance Technique	511
13.2	The Strategy of Experimental Design	512
13.3	One-Way Analysis of Variance: Completely Randomized Design (One-Way ANOVA)	513
13.4	Tests for the Equality of Several Variances	518
	Exercises	521
13.5	Single-Degree-of-Freedom Comparisons	523
13.6	Multiple Comparisons	527
13.7	Comparing Treatments with a Control	531
	Exercises	533
13.8	Comparing a Set of Treatments in Blocks	535
13.9	Randomized Complete Block Designs	537
13.10	Graphical Methods and Model Checking	544
13.11	Data Transformations In Analysis of Variance)	547
13.12	Latin Squares (Optional)	549
	Exercises	551
13.13	Random Effects Models	555
13.14	Power of Analysis-of-Variance Tests	559
13.15	Case Study	563
	Exercises	565
	Review Exercises	567
13.16	Potential Misconceptions and Hazards; Relationship to Material in Other Chapters	571

14	Factorial Experiments (Two or More Factors)	573
14.1	Introduction	573
14.2	Interaction in the Two-Factor Experiment.....	574
14.3	Two-Factor Analysis of Variance	577
	Exercises	587
14.4	Three-Factor Experiments.....	590
	Exercises	597
14.5	Model II and III Factorial Experiments.....	600
14.6	Choice of Sample Size.....	603
	Exercises	605
	Review Exercises.....	607
14.7	Potential Misconceptions and Hazards; Relationship to Material in Other Chapters.....	609
15	2^k Factorial Experiments and Fractions	611
15.1	Introduction	611
15.2	The 2^k Factorial: Calculation of Effects and Analysis of Variance	612
15.3	Nonreplicated 2^k Factorial Experiment	618
15.4	Injection Molding Case Study	619
	Exercises	622
15.5	Factorial Experiments in a Regression Setting	625
15.6	The Orthogonal Design	631
15.7	Factorial Experiments in Incomplete Blocks	639
	Exercises	645
15.8	Fractional Factorial Experiments	647
15.9	Analysis of Fractional Factorial Experiments	653
	Exercises	656
15.10	Higher Fractions and Screening Designs	657
15.11	Construction of Resolution III and IV Designs.....	658
15.12	Other Two-Level Resolution III Designs; The Plackett-Burman Designs	660
15.13	Robust Parameter Design	661
	Exercises	666
	Review Exercises.....	667
15.14	Potential Misconceptions and Hazards; Relationship to Material in Other Chapters.....	669
16	Nonparametric Statistics	671
16.1	Nonparametric Tests	671
16.2	Signed-Rank Test	676

Exercises	679
16.3 Wilcoxon Rank-Sum Test	681
16.4 Kruskal-Wallis Test	684
Exercises	686
16.5 Runs Test	687
16.6 Tolerance Limits	690
16.7 Rank Correlation Coefficient	690
Exercises	693
Review Exercises	695
17 Statistical Quality Control.....	697
17.1 Introduction	697
17.2 Nature of the Control Limits	699
17.3 Purposes of the Control Chart	699
17.4 Control Charts for Variables	700
17.5 Control Charts for Attributes	713
17.6 Cusum Control Charts	721
Review Exercises	722
18 Bayesian Statistics (Optional).....	725
18.1 Bayesian Concepts	725
18.2 Bayesian Inferences	726
18.3 Bayes Estimates Using Decision Theory Framework	732
Exercises	734
Bibliography	737
A Statistical Tables and Proofs.....	741
B Answers to Odd-Numbered Non-Review Exercises	795
Index.....	811
