
A decorative border at the top of the cover featuring various autumn leaves in shades of red, orange, and brown, arranged in a somewhat horizontal but slightly irregular pattern.

Analysis *in* Qualitative Research

Hennie Boeijs

A decorative border at the bottom of the cover featuring various autumn leaves in shades of red, orange, and brown, arranged in a somewhat horizontal but slightly irregular pattern, mirroring the top border.

CONTENTS

List of figures and tables	x
Preface	xi
Acknowledgements	xiii
1 Introduction to qualitative research	1
Learning aims	1
Preparatory thoughts	2
Considering quantitative or qualitative research	3
Diversity in qualitative research	7
Defining and delineating qualitative research in this book	10
Overview of the qualitative research process	14
Readings I learnt much from	17
Doing your own qualitative research project: Step 1	17
2 Research design	19
Learning aims	19
Planning a research project	20
Literature review	21
Research question and purpose	24
Legitimizing the choice for qualitative research	32
Sampling, recruitment and access	34
Readings I learnt much from	40
Doing your own qualitative research project: Step 2	41
3 Ethics in qualitative research	43
Learning aims	43
Ethics in social research	44
Sensitive topics	48
Balancing risk and benefits for participants	49
Researcher's stress	52
Ethical issues in analysis	53
Readings I learnt much from	55
Other resources	55
Doing your own qualitative research project: Step 3	55

4	Data collection	57
	Learning aims	57
	Data	58
	Qualitative data collection	59
	Instruments used	67
	Writing memos	70
	Preparing data for analysis	71
	Readings I learnt much from	73
	Doing your own qualitative research project: Step 4	73
5	Principles of qualitative analysis	75
	Learning aims	75
	What is analysis?	76
	Segmenting data	77
	Reassembling data	79
	Three starting points	83
	A stepwise approach: the spiral of analysis	89
	Readings I learnt much from	90
	Doing your own qualitative research project: Step 5	90
6	Doing qualitative analysis	93
	Learning aims	93
	Introduction to coding	94
	Open coding	96
	Axial coding	108
	Selective coding	114
	Reflections on analysis	119
	Readings I learnt much from	120
	Doing your own qualitative research project: Step 6	121
7	Integrative procedures	123
	Learning aims	123
	Heuristics for discovery	123
	Think aloud analysis	135
	Special devices: focus groups and visuals	139
	Using the computer in analysis	142
	Reflections on computer-assisted data analysis	145
	Readings I learnt much from	148
	Doing your own qualitative research project: Step 7	148
8	Findings	149
	Learning aims	149
	Results of qualitative research	149
	Meta-synthesis of qualitative studies	154
	Muddling qualitative methods	155
	Mixed methods research	157

Practical use	161
Readings I learnt much from	165
Doing your own qualitative research project: Step 8	165
9 Quality of the research	167
Learning aims	167
Thinking about quality	168
'Doing' quality	173
Checklists for asserting quality of the analysis	178
External validity or generalizability	180
Quality challenges	183
Readings I learnt much from	186
Doing your own qualitative research project: Step 9	186
10 Writing the research report	187
Learning aims	187
Writing: the last part of the analysis	188
The researcher as writer	189
The position of participants	190
Structure of the final report	192
Publishing	206
Readings I learnt much from	208
Doing your own qualitative research project: Step 10	208
References	211
