The Social Semantic Web

Springer

Contents

1 Introduction to the book	1
1.1 Overview.....	1
1.2 Aims of the book, and who will benefit from it?	3
1.3 Structure of the book.....	4
1.3.1 Motivation for applying Semantic Web technologies to the Social Web	5
1.3.2 Introduction to the Social Web (Web 2.0, social media, social software).....	5
1.3.3 Adding semantics to the Web.....	6
1.3.4 Discussions.....	6
1.3.5 Knowledge and information sharing	6
1.3.6 Multimedia sharing.....	7
1.3.7 Social tagging.....	7
1.3.8 Social sharing of software	7
1.3.9 Social networks	8
1.3.10 Interlinking online communities.....	8
1.3.11 Social Web applications in enterprise	8
1.3.12 Towards the Social Semantic Web.....	9
2 Motivation for applying Semantic Web technologies to the Social Web	11
2.1 Web 2.0 and the Social Web.....	11
2.2 Addressing limitations in the Social Web with semantics	13
2.3 The Social Semantic Web: more than the sum of its parts.....	15
2.4 A food chain of applications for the Social Semantic Web	17
2.5 A practical Social Semantic Web	19
3 Introduction to the Social Web (Web 2.0, social media, social software)	21
3.1 From the Web to a Social Web.....	21
3.2 Common technologies and trends.....	25
3.2.1 RSS.....	25
3.2.2 AJAX.....	27
3.2.3 Mashups	28
3.2.4 Advertising.....	30
3.2.5 The Web on any device	32
3.2.6 Content delivery	34
3.2.7 Cloud computing.....	35
3.2.8 Folksonomies	38
3.3 Object-centred sociality	39

3.4 Licensing content.....	42
3.5 Be careful before you post	42
3.6 Disconnects in the Social Web	44
4 Adding semantics to the Web	45
4.1 A brief history.....	45
4.2 The need for semantics	47
4.3 Metadata	51
4.3.1 Resource Description Framework (RDF).....	52
4.3.2 The RDF syntax	54
4.4 Ontologies.....	56
4.4.1 RDF Schema	59
4.4.2 Web Ontology Language (OWL).....	61
4.5 SPARQL.....	62
4.6 The 'lowercase' semantic web, including microformats	64
4.7 Semantic search.....	66
4.8 Linking Open Data	67
4.9 Semantic mashups	69
4.10 Addressing the Semantic Web 'chicken-and-egg' problem.....	71
5 Discussions	75
5.1 The world of boards, blogs and now microblogs.....	75
5.2 Blogging	76
5.2.1 The growth of blogs	77
5.2.2 Structured blogging	79
5.2.3 Semantic blogging.....	81
5.3 Microblogging	85
5.3.1 The Twitter phenomenon	88
5.3.2 Semantic microblogging	89
5.4 Message boards.....	91
5.4.1 Categories and tags on message boards.....	92
5.4.2 Characteristics of forums	94
5.4.3 Social networks on message boards	97
5.5 Mailing lists and IRC.....	100
6 Knowledge and information sharing	103
6.1 Wikis.....	103
6.1.1 The Wikipedia.....	105
6.1.2 Semantic wikis	105
6.1.3 DBpedia	110
6.1.4 Semantics-based reputation in the Wikipedia	111

6.2 Other knowledge services leveraging semantics.....	112
6.2.1 Twine.....	112
6.2.2 The Internet Archive	115
6.2.3 Powerset.....	117
6.2.4 OpenLink Data Spaces	119
6.2.5 Freebase.....	119
7 Multimedia sharing	121
7.1 Multimedia management	121
7.2 Photo-sharing services	122
7.2.1 Modelling RDF data from Flickr.....	123
7.2.3 Annotating images using Semantic Web technologies.....	125
7.3 Podcasts	126
7.3.1 Audio podcasts	127
7.3.2 Video podcasts	129
7.3.3 Adding semantics to podcasts	131
7.4 Music-related content	133
7.4.1 DBTune and the Music Ontology.....	133
7.4.2 Combining social music and the Semantic Web	134
8 Social tagging	137
8.1 Tags, tagging and folksonomies	137
8.1.1 Overview of tagging	137
8.1.2 Issues with free-form tagging systems	140
8.2 Tags and the Semantic Web.....	142
8.2.1 Mining taxonomies and ontologies from folksonomies	143
8.2.2 Modelling folksonomies using Semantic Web technologies.....	144
8.3 Tagging applications using Semantic Web technologies.....	148
8.3.1 Annotea	148
8.3.2 Revyu.com.....	149
8.3.3 SweetWiki.....	151
8.3.4 int.ere.st.....	151
8.3.5 LODr	152
8.3.6 Atom Interface.....	153
8.3.7 Faviki.....	154
8.4 Advanced querying capabilities thanks to semantic tagging	155
8.4.1 Show items with the tag 'semanticweb' on any platform.....	155
8.4.2 List the ten latest items tagged by Alexandre on SlideShare.....	155
8.4.3 List the tags used by Alex on SlideShare and by John on Flickr.....	157
8.4.4 Retrieve any content tagged with something relevant to the Semantic Web field	158

9 Social sharing of software.....	159
9.1. Software widgets, applications and projects	159
9.2 Description of a Project (DOAP).....	160
9.2.1 Examples of DOAP use.....	161
9.3 Crawling and browsing software descriptions	164
9.4 Querying project descriptions and related data.....	166
9.4.1 Locating software projects from people you trust.....	166
9.4.2 Locating a software project related to a particular topic	167
10 Social networks.....	169
10.1 Overview of social networks	169
10.2 Online social networking services	173
10.3 Some psychology behind SNS usage.....	175
10.4 Niche social networks.....	177
10.5 Addressing some limitations of social networks.....	179
10.6 Friend-of-a-Friend (FOAF).....	181
10.6.1 Consolidation of people objects	184
10.6.2 Aggregating a person's web contributions	186
10.6.3 Inferring relationships from aggregated data.....	187
10.7 hCard and XFN.....	189
10.8 The Social Graph API and OpenSocial	190
10.8.1 The Social Graph API	190
10.8.2 OpenSocial	192
10.9 The Facebook Platform.....	193
10.10 Some social networking initiatives from the W3C	194
10.11 A social networking stack.....	194
11 Interlinking online communities	197
11.1 The need for semantics in online communities.....	197
11.2 Semantically-Interlinked Online Communities (SIOC).....	198
11.2.1 The SIOC ontology	201
11.2.2 SIOC metadata format.....	203
11.2.3 SIOC modules	205
11.3 Expert finding in online communities.....	206
11.3.1 FOAF for expert finding	208
11.3.2 SIOC for expert finding.....	209
11.4 Connections between community description formats	211
11.5 Distributed conversations and channels.....	212
11.6 SIOC applications.....	215
11.7 A food chain for SIOC data	216
11.7.1 SIOC producers.....	218
11.7.2 SIOC collectors	223
11.7.3 SIOC consumers.....	224
11.8 RDFa for interlinking online communities.....	231

11.9	Argumentative discussions in online communities	234
11.10	Object-centred sociality in online communities	236
11.11	Data portability in online communities	238
11.11.1	The DataPortability working group	238
11.11.2	Data portability with FOAF and SIOC	240
11.11.3	Connections between portability efforts	241
11.12	Online communities for health care and life sciences	242
11.12.1	Semantic Web Applications in Neuromedicine	243
11.12.2	Science Collaboration Framework	244
11.12.3	bio-zen and the art of scientific community maintenance	246
11.13	Online presence	246
11.14	Online attention	247
11.15	The SIOC data competition	247
12	Social Web applications in enterprise	251
12.1	Overview of Enterprise 2.0	251
12.2	Issues with Enterprise 2.0	255
12.2.1	Social and philosophical issues with Enterprise 2.0	255
12.2.2	Technical issues with Enterprise 2.0	258
12.3	Improving Enterprise 2.0 ecosystems with semantic technologies	262
12.3.1	Introducing SemSLATES	262
12.3.2	Implementing semantics in Enterprise 2.0 ecosystems	263
12.3.3	SIOC for collaborative work environments	266
13	Towards the Social Semantic Web	269
13.1	Possibilities for the Social Semantic Web	269
13.2	A community-guided Social Semantic Web	271
13.2.1	Wisdom of the crowds and the Semantic Web	272
13.2.2	A grassroots approach	273
13.2.3	The vocabulary onion	275
13.3	Integrating with the Social Semantic Desktop	278
13.4	Privacy and identity on the Social Semantic Web	279
13.4.1	Keeping privacy in mind	279
13.4.2	Identity fragmentation	280
13.5	The vision of a Social Semantic Web	281
