Mechanics of Natural Solids

 Springer

Contents

Sand as an archetypical natural solid	1
<i>Dimitrios Kolymbas</i>	
The Physics of Granular Mechanics	27
<i>Yimin Jiang, Mario Liu</i>	
Are we there yet? Following the energy trail in cohesionless granular solids	47
<i>Antoinette Tordesillas, Robert P. Behringer</i>	
Micromechanical alternatives to phenomenological hardening plasticity	85
<i>Itai Einav, Giang D. Nguyen</i>	
Mechanisms of localized deformation in geomaterials: an experimental insight using full-field measurement techniques	105
<i>Gioacchino Viggiani</i>	
Two-dimensional Distinct Element Method (DEM) modeling of tectonic fault growth in mechanically layered sequences	127
<i>Martin P.J. Schöpfer, Conrad Childs, John J. Walsh</i>	
When geophysics met geomechanics: Imaging of geomechanical properties and processes using elastic waves	147
<i>Stephen A. Hall</i>	
Fracture of Ice and other Coulombic Materials	177
<i>Erland M. Schulson</i>	

Experimental studies of the viscoplasticity of ice and snow ...	203
<i>Jacques Meyssonier, Armelle Philip, Laura Capolo, Philippe Mansuy</i>	
Discontinuities in granular materials: Particle-level mechanisms.....	223
<i>J. Carlos Santamarina, Hosung Shin</i>	
Grain Crushing, Pore Collapse and Strain Localization in Porous Sandstone.....	239
<i>Teng-fong Wong, Patrick Baud</i>	
Long term behaviour and size effects of coarse granular media	255
<i>E.E. Alonso, L. Oldecop, N.M. Pinyol</i>	
Nature A Very Clever Experimentalist.....	283
<i>Gary D. Couples</i>	
Author Index.....	297
