PART I BUILDING YOUR MATHCAD TOOLBOX

CHAPTER 1	AN INTRODUCTION TO MATHCAD	3
	Before You Begin	3
	Mathcad Basics	4
	Creating Simple Math Expressions	5
	Editing Lines	6
	Editing Expressions	8
	Selecting Characters	8
	Deleting Characters	8
	Deleting and Replacing Operators	9
	Wrapping Equations	9
	Toolbars.....	10
	Calculator Toolbar	11
	Greek Toolbar.....	12
	Regions.....	13
	Math Regions	14
	Text Regions	14
	Functions	14
	Built-In Functions	14
	User-Defined Functions	14
	Units	15
	Assigning Units to Numbers	16
	Evaluating and Displaying Units	17
	Arrays and Subscripts	18
	Creating Arrays	18
	Origin	20
	Subscripts.....	20
	Range Variables.....	22
	Plotting: X-Y Plots	25
	Graphing Toolbar.....	25
	Setting Plotting Ranges.....	28
	Programming, Symbolic Calculations, Solving, and Calculus	29
	Resources Toolbar and My Site.....	30

	Summary	30
	Practice	32
CHAPTER 2	VARIABLES AND REGIONS	33
	Variables	33
	Types of variables	33
	Rules for Naming Variables	34
	Case and Font	34
	Characters that Can Be Used in Variable Names	34
	Literal Subscripts	35
	Special Text Mode	35
	Chemistry Notation	36
	String Variables	37
	Why Use Variables?	37
	Regions.....	39
	Using the Worksheet Ruler	39
	Tabs	39
	Selecting and Moving Regions	39
	Aligning Regions and Alignment Guidelines	40
	Text Regions	41
	Changing Font Characteristics	41
	Inserting Greek Symbols	42
	Controlling the Width of a Text Region.....	42
	Moving Regions Below the Text Region	42
	Paragraph Properties	43
	Text Ruler	45
	Spell Check	45
	Additional Information About Math Regions	46
	Math Regions in Text Regions	46
	Math Regions that Do Not Calculate.....	46
	Find and Replace	47
	Find	47
	Replace.....	49
	Inserting and Deleting Lines	50
	Summary	51
	Practice	51
CHAPTER 3	SIMPLE FUNCTIONS	53
	Built-in Functions.....	53
	User-Defined Functions	55

Why Use User-Defined Functions?.....	58
Using Multiple Arguments	58
Variables in User-Defined Functions.....	59
Examples of User-Defined Functions.....	60
Passing a Function to a Function	61
Custom Operator Notation	63
Prefix Operator.....	63
Postfix Operator	63
Infix Operator.....	63
Trefix Operator.....	64
Warnings	65
Engineering Example 3.1: Column Buckling	67
Engineering Example 3.2: Torsional Shear Stress	67
Summary	68
Practice	69

CHAPTER 4	UNITS!.....	71
	Introduction.....	71
	Definitions.....	72
	Changing the Default Unit System	73
	Using and Displaying Units	73
	Derived Units.....	76
	Custom Default Unit System.....	76
	Units of force and units of mass.....	78
	Creating Custom Units	79
	Units in Equations	80
	Do Not Redefine Built-in Units	81
	Units in User-Defined Functions.....	83
	Units in Empirical Formulas.....	83
	SIUnitsOf()	85
	Custom Scaling Units	87
	Fahrenheit and Celsius.....	87
	Change in Temperature.....	89
	Degrees Minutes Seconds (DMS).....	89
	Hours Minutes Seconds (hhmmss)	90
	Feet Inch Fraction (FIF)	92
	Money	94
	Creating Your Own Custom Scaling Function.....	94
	Dimensionless units.....	95
	Limitation of Units.....	96

Summary	96
Practice	97

PART II HAND TOOLS FOR YOUR MATHCAD TOOLBOX

CHAPTER 5	ARRAYS, VECTORS, AND MATRICES.....	101
	Review of Chapter 1	101
	Range Variables.....	102
	Using Range Values to Create Arrays	104
	Using Units in Range Variables	105
	Calculating Increments from the Beginning and Ending Values.....	108
	Displaying Arrays.....	109
	Table Display Form.....	110
	Using Units with Arrays	112
	Calculating with Arrays	113
	Addition and Subtraction	113
	Multiplication.....	114
	Division	117
	Array functions	120
	Creating Array Functions	120
	Size Functions.....	120
	Lookup Functions.....	120
	Extracting Functions and Operators.....	120
	Sorting Functions.....	121
	Calculation Summary.....	121
	Converting a range variable to a vector.....	121
	Engineering Examples.....	122
	Engineering Example 5.1: Using Vectors in a User-Defined Function	123
	Engineering Example 5.2: Using Vectors in Expressions	124
	Engineering Example 5.3: Using Element by Element Multiplication (Vectorize Operator)	125
	Engineering Example 5.4: Charge on a capacitor.....	126
	Summary	127
	Practice	127
CHAPTER 6	SELECTED MATHCAD FUNCTIONS	129
	Review of Built-In Functions.....	130
	Toolbars.....	130

Selected Functions.....	131
<i>max</i> and <i>min</i> Functions	131
<i>mean</i> and <i>median</i> Functions	132
Truncation and Rounding Functions	137
Summation Operators	141
<i>if</i> Function	145
<i>interp</i> Function	146
Miscellaneous Categories of Functions	151
Curve Fitting, Regression, and Data Analysis	151
Namespace Operator.....	151
Error Function	151
String Functions.....	151
Picture Functions and Image Processing	153
Complex Numbers, Polar Coordinates, and Mapping Functions	154
Mapping Functions.....	154
Polar Notation.....	154
Angle Functions.....	155
Reading From and Writing To Files.....	156
Summary	157
Practice	158

CHAPTER 7	PLOTTING	161
	Creating a Simple X-Y QuickPlot.....	161
	Creating a Simple Polar Plot	162
	Using Range Variables	162
	Setting Plotting Ranges.....	164
	Graphing with Units.....	168
	Graphing Multiple Functions	169
	Formatting Plots	172
	Axes Tab.....	172
	Traces Tab.....	173
	Number Format Tab	174
	Labels Tab	174
	Defaults Tab	176
	Zooming.....	177
	Plotting Data Points.....	179
	Range Variables.....	179
	Data Vectors.....	180
	Numeric Display of Plotted Points (Trace)	180

Using Plots for Finding Solutions to Problems	183
Parametric Plotting	183
Plotting Over a Log Scale.....	184
Plotting Conics	185
Plotting a Family of Curves.....	185
3D Plotting.....	188
Engineering Example 7.1: Shear, Moment, and Deflection Diagrams	192
Engineering Example 7.2: Determining the Flow Properties of a Circular Pipe Flowing Partially Full.....	192
Input Parameters	195
Summary	196
Practice	197

CHAPTER 8 SIMPLE LOGIC PROGRAMMING..... 199

Introduction to the Programming Toolbar.....	199
Creating a Simple Program	200
<i>Return</i> Operator.....	202
Boolean Operators.....	204
Adding Lines to a Program.....	207
Using Conditional Programs to Make and Display Conclusions	211
Engineering Examples	212
Engineering Example 8.1	212
Engineering Example 8.2	215
Summary	216
Practice	216

PART III POWER TOOLS FOR YOUR MATHCAD TOOLBOX

CHAPTER 9 INTRODUCTION TO SYMBOLIC CALCULATIONS 219

Getting Started with Symbolic Calculations	219
Evaluate	222
Float.....	222
Expand, Simplify, and Factor	227
Explicit	232
Using More than one Keyword.....	233
Units with Symbolic Calculations	233

Additional Topics to Study	237
Summary	237
Practice	238

CHAPTER 10 SOLVING ENGINEERING EQUATIONS 241

Root Function	241
Polyroots Function	242
Solve Blocks Using Given and Find	247
<i>Solve</i> Function	250
Solve Blocks Using <i>Maximize</i> and <i>Minimize</i>	250
TOL, CTOL, and Minerr	252
Using Units.....	253
Engineering Examples	253
Engineering Example 10.1: Object in Motion.....	253
Engineering Example 10.2: Electrical Network	256
Engineering Example 10.3: Pipe Network	257
Engineering Example 10.4: Chemistry	259
Engineering Example 10.5: Determining the Flow Properties of a Circular Pipe Flowing Partially Full.....	261
Engineering Example 10.6: Box Volume	262
Engineering Example 10.7: Maximize Profit	262
Summary	263
Practice	264

CHAPTER 11 ADVANCED PROGRAMMING 265

Local Definition	265
Looping	266
<i>For</i> Loops.....	267
<i>While</i> Loops.....	271
<i>Break</i> and <i>Continue</i> Operators.....	273
<i>Return</i> Operator.....	276
<i>On Error</i> Operator	277
Engineering Example 11.1	278
Development of Intensity Duration Frequency (IDF) Curves.....	278
Step 1: Compute the Rainfall Intensities (cm/hr).....	280
Step 2: Sort Data and Assign a Rank	280

Step 3: Calculate Return Periods Using the Weibull Formula.....	282
Step 4: Plot the Rainfall Intensity vs Return Period.....	282
Step 5: Create a data matrix.....	283
Step 6: Plot a 5, 10, and 25 Year IDF Curve (Using Data Points).....	283
Step 7: Model IDF Curves to Fit a Function of the Form: $i = \frac{a}{t+b}$	284
Step 8: Plot the IDF Curves Using the Mathematical Formula.....	286
Summary.....	287
Practice.....	287

CHAPTER 12 CALCULUS AND DIFFERENTIAL EQUATIONS..... 289

Differentiation.....	289
Integration.....	291
Differential Equations.....	292
Ordinary Differential Equations (ODEs).....	294
Partial Differential Equations (PDEs).....	294
Engineering Example 12.1.....	298
Integration.....	298
Shear.....	298
Moment.....	298
Slope.....	298
Deflection.....	299
Engineering Example 12.2.....	300
2 Cell, Well Mixed, Lagoon System.....	300
Mass Balance Equation.....	301
Input Variables.....	301
Method 1: <i>Odesolve</i>	302
Method 2: <i>Radau</i>	304
Practice.....	308

PART IV CREATING AND ORGANIZING YOUR ENGINEERING CALCULATIONS WITH MATHCAD

CHAPTER 13 PUTTING IT ALL TOGETHER.....	311
Introduction.....	311
Guidelines for Naming Variables.....	312

Naming Guideline 1: Use Descriptive Variable Names.....	312
Naming Guideline 2: Use a Combination of Uppercase and Lowercase Letters to Help Make Your Variable Names Easier to Read.....	313
Naming Guideline 3: Use Underscores to Separate Different Names in Your Variable Names.....	313
Naming Guideline 4: Make Good Use of Subscripts in Your Variable Names.....	313
Naming Guideline 5: Use the (') Key If You Need to Use a "Prime" (Single Apostrophe) in Your Variable Name.....	314
Mathcad Toolbox.....	314
Variables.....	314
Editing.....	315
User-Defined Functions.....	315
Units!.....	315
Mathcad Settings.....	316
Customizing Mathcad with Templates.....	316
Hand Tools.....	316
Power Tools.....	316
Let's Start Building.....	317
What is Ahead.....	317
Summary.....	317
Practice.....	318

CHAPTER 14 MATHCAD SETTINGS..... 319

Preferences Dialog Box.....	319
General Tab.....	320
File Locations Tab.....	321
HTML Options Tab.....	322
Warnings Tab.....	323
Script Security Tab.....	325
Language.....	326
Save Tab.....	326
Summary of the Preference Tab.....	327
Worksheet Options Dialog Box.....	327
Built-in Variables Tab.....	327
Calculation Tab.....	328

Display Tab	330
Unit System Tab.....	331
Dimensions Tab	331
Compatibility Tab	331
Result Format Dialog Box	331
Number Format Tab	332
Display Options Tab	333
Unit Display Tab	334
Tolerance Tab	335
Individual Result Formatting	335
Automatic Calculation	336
Summary	337
Practice	338

CHAPTER 15 CUSTOMIZING MATHCAD **341**

Default Mathcad Styles	341
Default Math Styles.....	342
Default Text Styles.....	342
Additional Mathcad Styles	343
Additional Math Styles.....	344
Additional Text Styles.....	347
Changing and Creating New Math Styles.....	348
Changing the Variables Style.....	349
Changing the Constants Style	349
Creating New Math Styles.....	351
Changing and Creating New Text Styles.....	351
Changing Text Styles	352
Creating New Text Styles.....	355
Headers and Footers.....	357
Creating Headers and Footers.....	357
Information to Include in Headers and Footers.....	359
Examples	359
Margins and Page Setup	361
Toolbar Customization	362
Summary	363
Practice	363

CHAPTER 16	TEMPLATES	365
	Information Saved in a Template.....	365
	Mathcad Templates.....	366
	Review of Chapters 4, 14, and 15.....	367
	Creating Your Own Customized Template	367
	EM Metric.....	368
	EM US.....	376
	Normal.xmct File.....	376
	Summary	377
	Practice	378
CHAPTER 17	ASSEMBLING CALCULATIONS FROM STANDARD CALCULATION WORKSHEETS	379
	Copying Regions from Other Mathcad Worksheets	380
	XML and Metadata.....	380
	Provenance	384
	Creating Standard Calculation Worksheets	385
	Protecting Information	387
	Locking Areas	388
	Protecting Regions	390
	Advantages and Disadvantages of Locking Areas versus Protecting Worksheets	392
	Potential Problems with Inserting Standard Calculation Worksheets and Recommended solutions	393
	<i>Guidelines</i>	394
	How to Use Redefined Variables in Project Calculations	395
	Resetting Variables.....	396
	Using User-Defined Functions in Standard Calculation Worksheets	397
	Using the Reference Function	400
	When to Separate Project Calculation Files.....	403
	Using <i>Find</i> and <i>Replace</i>	403
	Summary	404

CHAPTER 18	IMPORTING FILES FROM OTHER PROGRAMS INTO MATHCAD	405
	Introduction	405
	Object linking and embedding (OLE)	406
	Bringing Objects into Mathcad	406
	Drawing Tools	408
	Use and Limitations of OLE	408
	Common Software Applications that Support OLE	408
	Microsoft Excel	409
	Microsoft Word or Corel WordPerfect	409
	Adobe Acrobat	409
	AutoCAD	409
	Multimedia	410
	Data Files	410
	Summary	411

CHAPTER 19	COMMUNICATING WITH OTHER PROGRAMS USING COMPONENTS	413
	What is a component?	413
	Application Components	414
	Microsoft Excel	414
	Microsoft Access and Other Open DataBase Connectivity (ODBC) Components	415
	MathWorks MATLAB®	418
	Data Components	420
	Data Import Wizard Component	421
	File Input Component	424
	Data Table	425
	File Output Component	426
	Read and Write Functions	427
	Data Acquisition	428
	Scriptable Object Component	428
	Controls	429
	Inserting Mathcad into Other Applications	429
	Pro/ENGINEER	430
	Summary	430

CHAPTER 20	MICROSOFT EXCEL COMPONENT	433
	Introduction	433
	Inserting New Excel Spreadsheets	434
	Multiple Input and Output	435
	Hiding Arguments.....	436
	Using Excel Within Mathcad	437
	Using Units with Excel.....	437
	Input.....	437
	Output.....	439
	Inserting Existing Excel Files	439
	Mechanics	439
	Embedding versus Linking	444
	Printing the Excel Component	444
	Getting Mathcad Data From and Into Existing Excel Spreadsheets	445
	Example	447
	Summary	447
	Practice	448
CHAPTER 21	INPUTS AND OUTPUTS	449
	Emphasizing Input and Output Values.....	449
	Input.....	449
	Output.....	450
	Project Calculation Input	451
	Variable Names	452
	Creating Input for Standard Calculation Worksheets	452
	Inputting Information from Mathcad Variables.....	454
	Data Tables.....	454
	Microsoft Excel Component	456
	Which Method Is Best to Use?.....	457
	Summarizing Output	457
	Controls.....	457
	Text Box.....	458
	Check Box	460
	List Box	461
	Radio Box.....	461
	Submit Box	462
	Summary	462

CHAPTER 22	HYPERLINKS AND TABLES OF CONTENTS	465
	Hyperlinks.....	465
	Linking to Regions in Your Current Worksheet.....	466
	Linking to Region in Another Worksheet.....	467
	Notes about Hyperlinks	467
	Creating a Pop-Up Document.....	469
	Tables of Contents.....	470
	Mathcad calculation E-book	472
	Summary	473
CHAPTER 23	CONCLUSION	475
	Advantages of Mathcad	475
	Creating Project Calculations.....	476
	Additional Resources	476
	Conclusion	477
Appendix		479
Index.....		495
