# Mechanical Vibrations and Noise Engineering

A.G. Ambekar

# Contents

*Preface*

*ix*

## **1. FUNDAMENTALS AND BASIC CONCEPTS**

**1–35**

- 1.1 Introduction 1
  - 1.2 Importance 2
  - 1.3 Main Causes of Vibration 3
  - 1.4 Vector Method of Representing Harmonic Motion 4
  - 1.5 Characteristics of Vibration 6
  - 1.6 Harmonic Analysis 8
    - 1.6.1 Addition of Harmonic Motions 8
    - 1.6.2 Lissajous Figures: A case of harmonic motions directed along perpendicular lines 11
    - 1.6.3 Beats Phenomenon 11
  - 1.7 Work Done by a Harmonic Force on a Harmonic Motion 13
  - 1.8 Periodic, Non-harmonic Excitation: Fourier Series Analysis 15
  - 1.9 Evaluation of Coefficients of Fourier's Series 17
  - 1.10 Mathematical Models 25
  - 1.11 Elements of a Vibratory System 26
  - 1.12 Lumped/Discrete Parameter and Continuous Distributed Parameter Systems 27
  - 1.13 Linear and Non-linear Vibrating Systems 28
  - 1.14 Equivalent Springs and Dashpots 29
- Review Questions* 33

## **2. UNDAMPED FREE VIBRATIONS**

**36–78**

- 2.1 Introduction 36
  - 2.2 Derivation of Differential Equation of Motion 36
    - 2.2.1 The Energy Method 36
    - 2.2.2 Method Based on Newton's Second Law of Motion 38
    - 2.2.3 Rayleigh's Method 39
  - 2.3 Solution of Differential Equation of Motion 40
  - 2.4 Systems Involving Angular Oscillations 42
  - 2.5 The Compound Pendulum 45
- Review Questions* 73

**3. DAMPED FREE VIBRATIONS**

- 3.1 Introduction 79
- 3.2 Viscous Damping 79
- 3.3 Free Vibrations with Viscous Damping 81
- 3.4 Logarithmic Decrement 93
- 3.5 Coulomb or Dry Friction Damping 102
  - 3.5.1 Frequency of Damped Vibrations and Rate of Decay 103
  - 3.5.2 Rate of Decay from Energy Considerations 106
- 3.6 Comparison between Viscous and Coulomb Damping 107
- 3.7 Solid or Structural Damping 109
- 3.8 Slip or Interfacial Damping 110

*Review Questions* 111

**4. HARMONICALLY EXCITED VIBRATION (SYSTEMS WITH SINGLE DEGREE OF FREEDOM)**

115-162

- 4.1 Introduction 115
- 4.2 Forced Harmonic Vibration 116
- 4.3 Vector Representation of Forces in Forced Vibration 126
- 4.4 Excitation Due to Unbalance 127
  - 4.4.1 Rotating Unbalance 127
  - 4.4.2 Reciprocating Unbalance 130
- 4.5 Vibration Isolation 135
- 4.6 Force Transmissibility 135
  - 4.6.1 Isolation Using Springs Alone 135
  - 4.6.2 Isolation Using Springs and Damper 138
- 4.7 Force Transmissibility Aspect of Variable Speed Machine 141
- 4.8 Motion Transmissibility (Systems Attached to Moving Supports) 147
  - 4.8.1 Absolute Motion of Mass 147
  - 4.8.2 Relative Motion of Mass (Seismic Instruments) 152

*Review Questions* 159

**5. SYSTEMS WITH TWO DEGREES OF FREEDOM**

163-213

- 5.1 Introduction 163
- 5.2 Undamped Free Vibrations and the Principal Modes of Vibration 164
- 5.3 Torsional Vibrations 178
- 5.4 Forced Undamped Vibration with Harmonic Excitation (2 d.o.f.) 183
- 5.5 Coordinate Coupling 184
- 5.6 Dynamic Vibration Absorber 188
- 5.7 Torsional Vibration Absorber 196
- 5.8 Pendulum Type Dynamic Vibration Absorber 196
- 5.9 Generalized Coordinates and Lagrange's Equation 205

*Review Questions* 210

<b>6. MULTI-DEGREE OF FREEDOM SYSTEMS</b>	<b>214–259</b>
6.1 Introduction	214
6.2 Equation of Motion	215
6.3 The Matrix Method (Eigenvalues and Eigenvectors)	219
6.4 Method of Influence Coefficients and Maxwell's Reciprocal Theorem	222
6.5 Orthogonality of the Principal Modes of Vibration	227
6.6 Approximate Methods of Determining Fundamental Frequencies	228
6.6.1 Dunkerley's Lower Bound Approximation	229
6.6.2 Rayleigh's Method	233
6.7 Stodola's Method	237
6.8 The Holzer Method	243
6.9 Method of Matrix Iteration	251
<i>Review Questions</i>	255
 <b>7. WHIRLING MOTION AND CRITICAL SPEEDS</b>	 <b>260–283</b>
7.1 Introduction	260
7.2 Critical Speed of a Light Vertical Shaft with Single Disc (Without Damping)	261
7.3 Critical Speed of a Vertical, Light-Flexible Shaft Carrying Single Rotor with Damping	267
7.4 Critical Speeds of a Shaft Carrying Multiple Discs (Without Damping)	276
7.5 Secondary Critical Speed	279
<i>Review Questions</i>	282
 <b>8. CONTINUOUS SYSTEMS</b>	 <b>284–309</b>
8.1 Introduction	284
8.2 Vibration of Strings (Transverse Wave Propagation on a String)	285
8.3 Longitudinal Vibrations of Bars	287
8.4 Torsional Vibrations of Circular Members	289
8.5 Transverse Vibration of Beams	290
<i>Review Questions</i>	308
 <b>9. SOUND LEVEL AND SUBJECTIVE RESPONSE TO SOUND</b>	 <b>310–342</b>
9.1 Introduction	310
9.2 Subjective Response to Sound	311
9.3 Frequency Dependent Human Response to Sound	312
9.4 Sound-Pressure Dependent Human Response	313
9.5 The Decibel Scale	314
9.6 Relationship among Sound Power, Sound Intensity and Sound Pressure Level	316
9.6.1 Relation between Sound Power Level and Sound Intensity Level	316
9.6.2 Relation between Sound Intensity Level and Sound Pressure Level	317

9.7	Summation of Pure Tones	318
9.8	Decibel Addition, Subtraction and Averaging	320
9.9	Approximate Method for Decibel Addition	322
9.10	Sound Spectra	325
9.11	Types of Sound Fields	326
9.12	Octave Band Analysis	327
9.13	Anatomy of Human Ear	329
9.14	Mechanism of Hearing	331
9.15	Loudness	332
9.16	Loudness of Composite Sounds	334
9.17	Weighting Networks	335
9.18	Equivalent Sound Level	340
	<i>Review Questions</i>	341

## 10. NOISE: EFFECTS, RATINGS AND REGULATIONS

343–363

10.1	Introduction	343
10.2	Non-auditory Effects of Noise on People	344
10.3	Auditory Effects of Noise	348
10.4	Noise Standards and Limits	351
10.5	Ambient Emission Noise Standards in India	353
10.6	Hazardous Noise Exposure—Legal Aspect	354
10.7	Hearing Conservation and Damage Risk Criteria	355
10.8	Day-Night Sound Level, $L_{dn}$	361
10.9	Time Varying Community Noise	361
	<i>Review Questions</i>	362

## 11. NOISE: SOURCES, ISOLATION AND CONTROL

364–384

11.1	Major Sources of Noise	364
11.2	Noise Survey Techniques	366
11.3	Measurement Technique for Vehicular Noise	367
11.4	Road Vehicles Noise Standard	369
11.5	Noise Due to Construction Equipments and Domestic Appliances	370
11.6	Industrial Noise Sources	372
11.7	Industrial Noise Control—Strategies	373
11.8	Noise Control at the Source	375
11.9	Noise Control along the Path	377
11.10	Acoustic Barriers	380
11.11	Noise Control at the Receiver	381
	<i>Review Questions</i>	384

## Bibliography

385–386

## Answers to Selected Review Questions

387–396

## Index

397–402
