

The background of the cover is a dark blue, textured aerial photograph of a building under construction. A white grid of lines is overlaid on the image, creating a technical or architectural feel. The grid lines are more prominent in the foreground and become fainter towards the top.

Manager's Guide to Preventive Building Maintenance

Ryan Cruzan

Table of Contents

PART I—Creating an Effective PM Program	1
Chapter 1—What is PM?	3
So, What is PM?.....	4
Preventive maintenance defined.....	4
Why Do PM?.....	5
Reason 1: PM extends equipment life.....	5
Reason 2: PM reduces costs.....	5
Reason 3: PM saves energy.....	7
Reason 4: PM improves the experience of your occupants.....	7
Reason 5: PM makes your job easier.....	8
Predictive Maintenance (PdM).....	9
Thermal imaging.....	10
Group re-lamping.....	10
Infant mortality and the bathtub chart.....	11
Other types of maintenance.....	13
Corrective maintenance.....	13
Deferred maintenance.....	15
Run to failure.....	15
Emergency maintenance.....	16
Call-back maintenance.....	16
PM planning begins with design.....	17
Chapter 2—The Economics of Preventive Maintenance	21
The Jones-Lang-LaSalle Report.....	22
Selling PM to Management.....	23
PM as a Budgeting Tool.....	27
The Long Range Facilities Plan.....	27
The Repair or Replacement Decision.....	28
The Useful Life of Building Systems.....	33
Estimating PM Costs.....	34
Chapter 3—Getting to Work—Setting Up a PM Program	37
Too Busy for Preventive Maintenance.....	37
Not Enough Maintenance Staff.....	37

Can't Afford to Hire Skilled Staff for Specialized Tasks	38
Don't Need to PM Something That's Already Past Its Useful Service Life.....	38
Starting To Do Preventive Maintenance	38
Step 1—Determining Your Organization's Goals	39
Step 2—Inventory Capital Equipment and Decide What to PM.....	40
Equipment Data Sheets.....	42
Unique Identifier	44
Commonly used equipment identifiers.....	45
Step 3—Scope and Frequency.....	48
Deciding what PM tasks to do and how often to do them.....	48
Scope—or how will you PM each piece of equipment?.....	48
CLAIR.....	50
Frequency—or how often will you do PM to each piece of equipment?.....	51
PM schedules based on hours of operation.....	52
Choosing a CMMS.....	53
Do I really need a CMMS?	54
Step 4—Making a PM Calendar	57
Scheduling by the week vs. by the day	59
Other things on my PM Calendar	60
Getting your Hands Dirty— The first few month of actually doing PM.....	60
Getting Support from Upper Management.....	61
Document, Document, Document	63
As a <i>reference</i>	63
As a CYA.....	63
As a CYCoA.....	63
Regulatory compliance	64
Chapter 4—The people that Do PM	67
Managing People.....	68
Getting Staff to Buy into Your Program.....	69
That Attitude of Continual Improvement	70
Training and Direction.....	70
Where to get staff trained	71
An HVAC example	72
Investing in Tools	73
Trust but Verify	74

Outsourcing PM	75
Final Thoughts.....	76

PART II—Technical Information for Preventive

Maintenance Success	79
Chapter 5—Lubrication Theory	83
Tribology.....	83
Reynold’s Theory	83
Reynold’s Theory Equation	86
Choosing a Lubricant.....	89
Viscosity.....	89
Problems with choosing the wrong viscosity	90
Types of Lubricants.....	91
Mineral oils.....	91
Synthetic oils	92
Solid lubricants	92
Greases	92
The Useful Life of Oil and Grease.....	94
How Often Do We Need to Grease Bearings?.....	95
Types of Bearings.....	98
Plain or sleeve bearings	98
Rolling element bearings.....	99
Chapter 6—Maintaining Commercial Roofs	103
The Four Common Types of Commercial Roofs.....	104
Built-up roofing (BUR).....	105
Modified bitumen roofing (MBR)	106
EPDM and thermoplastics	107
Standing seam metal roofing	109
Roof Insulation	110
Common types of roof insulation	112
Fasteners, Flashing, and Roof Penetrations.....	113
Fasteners	114
Flashing.....	114
Roof Warranties	116
Preventive Maintenance of the Roof	118
Built-up Roofing (BUR) & Modified Bitumen Roofing (MBR) and Single Ply (EPDM) PM Inspection Checklist.....	120

Flashing, fasteners, penetrations PM inspection checklist	121
Standing seam metal roofing PM inspection checklist	121
All roofing types PM inspection checklist	121
Chapter 7—HVAC Systems	125
Refrigeration Machinery	126
Heat Pumps.....	129
Preventive Maintenance of Air Conditioning and Refrigeration Equipment.....	130
Preventive maintenance of condensing units—compressors	131
Preventive maintenance of condensing units— The condenser coil	133
Preventive maintenance of air handlers—the evaporator coil.....	134
Preventive maintenance of air handlers—air filters.....	135
Preventive maintenance of air handlers— condensate equipment.....	136
Preventive maintenance of air handlers—blowers.....	137
Preventive maintenance of air handlers— heating and other equipment.....	138
Cooling Towers and Cooling Loops	139
Preventive maintenance of cooling towers and cooling loops.....	142
Chillers	142
Automated Controls	144
HVAC PM Checklist	146
Chapter 8—Belt Drives	149
The 3 Types of Drive Belts.....	150
Drive Belt Lengths.....	151
What If I Don't Have an Old Belt to Measure?	152
Other Drive Belt Characteristics.....	153
Proper Operation.....	154
Problems with Belt Drives	155
Inspecting Belt Drives.....	156
Chapter 9—Indoor Air Quality	159
The 3 Parts of IAQ Problems (The 3 P's).....	159
Pollutants—the first P.....	160
The most common IAQ pollutants.....	160
Pathways—the second P	161

People—the third P	162
Comfort Issues	163
Solving IAQ Problems	164
Pollutants—solving problems	165
Pathways—solving problems	165
People—solving problems	166
The 8 common pollutant solutions	167
The “M” Word	167
Difficult IAQ Problems—Sick Building Syndrome	168
Collecting Data	169
Seeking Professional Assistance.....	170
Effective Communication.....	172
PM Tasks That Affect IAQ.....	172
Chapter 10—Paint and Protective Coatings	175
Types of Paint.....	175
Oil-based paint.....	177
Latex paint	178
Elastomeric wall coatings.....	179
Epoxy paints.....	180
Urethane paints.....	180
Rust inhibitive paints	181
Mildew resistant paints	181
Cold galvanizing compounds	181
Primers and Sealers.....	182
Water and oil-based primers.....	183
Shellac primers.....	183
Rust-inhibitive primers.....	183
Bonding primers.....	184
The Right Paint or Primer for the Job.....	184
Preparing the Surface.....	185
Note about lead paint:	186
Six steps to proper surface preparation.....	186
Rust converters	187
Environmental Concerns.....	188
Volatile organic compounds (VOCs)	188
Lead paint	189
Paint disposal.....	189
Paint Failures	191

Application temperature	191
Common modes of paint failure	192
Inspecting and Recoating	194
Part III—Specific Maintenance Procedures and Requirements	197
Chapter 11—Specific Maintenance Procedures and Requirements	199
List 1: PM Tasks Listed by Frequency	201
List 2: PM Tasks required by building codes or regulatory agencies ...	204
List 3: Equipment Specific Procedures, Requirements, and Technical Details for PM	206
Informational Symbols	206
APPENDIX	283
Sample Preventive Maintenance Record Forms	283
Emergency generator testing log	284
Hotel room PM checklist	285
Smoke detector testing log	287
Troubleshooter’s Creed	288
Truisms	289
Glossary of Preventive Maintenance Terminology	290
INDEX	299
