

SECOND EDITION

# UHMWPE BIOMATERIALS HANDBOOK

EDITED BY STEVEN M. KURTZ, PH.D.

Dedication	v	2.5 Conclusion	18
Foreword	xvii	References	18
Contributors	xix		
<b>1. A Primer on UHMWPE</b>		<b>3. Packaging and Sterilization of UHMWPE</b>	
<i>Steven M. Kurtz</i>		<i>Steven M. Kurtz</i>	
1.1 Introduction	1	3.1 Introduction	21
1.2 What is a Polymer?	2	3.2 Gamma Sterilization in Air	22
1.3 What is Polyethylene?	2	3.3 Gamma Sterilization in Barrier Packaging	23
1.4 Crystallinity	4	3.4 Ethylene Oxide Gas Sterilization	25
1.5 Thermal Transitions	4	3.5 Gas Plasma Sterilization	26
1.6 Overview of the <i>Handbook</i>	5	3.6 The Torino Survey of Contemporary Orthopedic Packaging	26
References	6	3.7 Shelf Life of UHMWPE Components for TJR	28
		3.8 Overview of Current Trends	29
		3.9 Acknowledgments	29
		References	29
<b>2. From Ethylene Gas to UHMWPE Component: The Process of Producing Orthopedic Implants</b>		<b>4. The Origins of UHMWPE in Total Hip Arthroplasty</b>	
<i>Steven M. Kurtz</i>		<i>Steven M. Kurtz</i>	
2.1 Introduction	7	4.1 Introduction and Timeline	31
2.2 Polymerization: from Ethylene Gas to UHMWPE Powder	8	4.2 The Origins of a Gold Standard (1958 to 1982)	32
2.2.1 GUR Resins	9	4.3 Charnley's First Hip Arthroplasty Design with PTFE (1958)	33
2.2.2 1900 Resins	10	4.4 Implant Fixation with Pink Dental Acrylic Cement (1958 to 1966)	33
2.2.3 Molecular Weight	10	4.5 Interim Hip Arthroplasty Designs with PTFE (1958 to 1960)	33
2.2.4 GUR versus 1900 Resin	10	4.6 Final Hip Arthroplasty Design with PTFE (1960 to 1962)	34
2.2.5 Calcium Stearate	11	4.7 Implant Fabrication at Wrightington	35
2.2.6 DSM Resin	12	4.8 The First Wear Tester	36
2.3 Conversion: from UHMWPE Powder to Consolidated Form	12	4.9 Searching to Replace PTFE	37
2.3.1 Compression Molding of UHMWPE	13	4.10 UHMWPE Arrives at Wrightington	38
2.3.2 Ram Extrusion of UHMWPE	14	4.11 Implant Sterilization Procedures at Wrightington	38
2.3.3 Hot Isostatic Pressing of ArCom UHMWPE	14	4.12 Summary	40
2.3.4 Direct Compression Molding of UHMWPE	14	4.13 Acknowledgments	40
2.3.5 ArCom	16	References	41
2.3.6 Properties of Extruded versus Molded UHMWPE	16		
2.4 Machining: from Consolidated Form to Implant	17		

<b>5. The Clinical Performance of UHMWPE in Hip Replacements</b>		<b>6.5 Highly-crosslinked UHMWPE</b>	<b>72</b>
<i>Steven M. Kurtz</i>		6.5.1 Historical Clinical Experience with Highly Crosslinked UHMWPE	72
5.1 Introduction	43	6.5.2 First-Generation Highly Crosslinked UHMWPE	72
5.2 Joint Replacements do not Last Forever	44	6.5.3 Second-Generation Highly Crosslinked UHMWPE	74
5.3 Range of Clinical Wear Performance in Cemented Acetabular Components	45	<b>6.6 Summary</b>	<b>74</b>
5.4 Wear versus Wear Rate of Hip Replacements	46	<b>References</b>	<b>75</b>
5.5 Comparing Wear Rates Between Different Clinical Studies	47	<b>7. The Origins and Adaptations of UHMWPE for Knee Replacements</b>	
5.6 Comparison of Wear Rates in Clinical and Retrieval Studies	49	<i>Steven M. Kurtz</i>	
5.7 Current Methods for Measuring Clinical Wear in THA	49	7.1 Introduction	81
5.8 Range of Clinical Wear Performance in Modular Acetabular Components	51	7.2 Frank Gunston and the Wrightington Connection to TKA	83
5.9 Conclusion	51	7.3 Polycentric Knee Arthroplasty	85
5.10 Acknowledgments	52	7.4 Unicodylar Polycentric Knee Arthroplasty	86
References	52	7.5 Bicondylar Total Knee Arthroplasty	87
<b>6. Contemporary Total Hip Arthroplasty: Hard-on-Hard Bearings and Highly Crosslinked UHMWPE</b>		7.5.1 Cruciate Sparing Bicondylar Prostheses	87
<i>Steven M. Kurtz and Kevin Ong</i>		7.5.2 The Total Condylar Knee	89
6.1 Introduction	55	7.6 Patello-femoral Arthroplasty	91
6.2 Metal-on-Metal Alternative Hip Bearings	57	7.7 Uhmwpe with Metal Backing	92
6.2.1 Historical Overview of Metal-on-Metal	58	7.7.1 Fixed Bearing TKA	93
6.2.2 Contemporary (Second Generation) Metal-on-Metal Hip Designs	59	7.7.2 Mobile Bearing TKA	93
6.2.3 Metal-on-Metal Hip Resurfacing	60	<b>7.8 Conclusion</b>	<b>94</b>
6.2.4 Potential Biological Risks Associated with MOM Joints	61	<b>7.9 Acknowledgments</b>	<b>94</b>
<b>6.3 Ceramics in hip arthroplasty</b>	<b>61</b>	<b>References</b>	<b>94</b>
6.3.1 Historical Overview of Ceramics in THA	62	<b>8. The Clinical Performance of UHMWPE in Knee Replacements</b>	
6.3.2 Ceramic Biomaterials for Hip Arthroplasty	62	<i>Steven M. Kurtz</i>	
6.3.3 Ceramic-on-UHMWPE	66	<b>8.1 Introduction</b>	<b>97</b>
6.3.4 Contemporary Ceramic-on-Ceramic Hip Implants	68	<b>8.2 Biomechanics of Total Knee Arthroplasty</b>	<b>98</b>
6.3.5 Differential Hardness Bearings: Ceramic-on-Metal	69	8.2.1 Anatomical Considerations	98
6.3.6 Wear Mechanisms in Ceramic Bearings	69	8.2.2 Knee Joint Loading	98
6.3.7 <i>In Vivo</i> Fracture Risk of Ceramic Components for THA	70	8.2.3 Stresses in UHMWPE Tibial and Patellar Components for TKR	100
<b>6.4 Noise and Squeaking from Hard-on-Hard Bearings</b>	<b>72</b>	<b>8.3 Clinical Performance of UHMWPE in Knee Arthroplasty</b>	<b>102</b>
		8.3.1 Survivorship of Knee Arthroplasty	102
		8.3.2 Reasons for Knee Arthroplasty Revision Surgery	103
		8.3.3 Articulating Surface Damage Modes	105
		<b>8.4 Osteolysis and Wear in TKA</b>	<b>107</b>
		8.4.1 Incidence and Significance of Osteolysis in TKA	107
		8.4.2 Methods to Assess <i>In Vivo</i> Wear in TKA	108

8.4.3	Backside Wear	112	10.4	Implant Design	141
8.4.4	Damage to Posts in PS Tibial Components	112	10.4.1	Historical Context	141
8.5	Alternatives to Conventional UHMWPE in TKA	113	10.4.2	Contemporary Designs	142
8.5.1	Ceramic Bearings in TKA	113	10.5	Osteolysis and Wear	149
8.5.2	Highly Crosslinked UHMWPE in TKA	114	10.6	Conclusion	151
	Summary	114	10.7	Acknowledgments	151
	Acknowledgments	114		References	151
	References	115	11.	Applications of UHMWPE in Total Ankle Replacements

### 13. Highly Crosslinked and Melted UHMWPE

*Orhun K. Muratoglu*

13.1	Introduction	197
13.2	Radiation Crosslinking	198
13.3	Irradiation and Melting	198
13.4	Effect of Radiation Dose, Melting, and Irradiation Temperature on UHMWPE Properties	199
13.5	Effect of Crosslinking on Fatigue Resistance	200
13.6	Optimum Radiation Dose	201
13.7	Hip Simulator Data	201
13.8	Knee Simulator Data	201
13.9	Clinical Follow-up Studies	202
13.10	<i>In vivo</i> Changes: Explants	202
13.11	Conclusion	203
	References	203

### 14. Highly Crosslinked and Annealed UHMWPE

*John H. Dumbleton, Aiguo Wang, Kate Sutton and Michael T. Manley*

14.1	Introduction	205
14.2	Development of Duration Stabilized UHMWPE	205
14.2.1	The Duration Process	206
14.2.2	Properties of Duration Stabilized UHMWPE	206
14.2.3	Clinical Studies	207
14.2.4	Summary	207
14.3	Crossfire	207
14.3.1	Crossfire Process	208
14.3.2	Properties	208
14.3.3	Clinical Studies	209
14.3.4	Crossfire Retrievals	210
14.3.5	Summary	212
14.4	X3: Sequentially Irradiated and Annealed UHMWPE	212
14.4.1	Sequential Crosslinking Process	212
14.4.2	X3 Properties	213
14.4.3	X3 Clinical Studies	216

14.4.4	X3 Retrievals	216
14.4.5	X3 Summary	216
14.5	Conclusion	217
	References	217

### 15. Highly Crosslinked UHMWPE Doped with Vitamin E

*Ebru Oral and Orhun K. Muratoglu*

15.1	Introduction	221
15.2	Function of Vitamin E	222
15.3	Diffusion of Vitamin E in Crosslinked UHMWPE	223
15.4	Wear	224
15.4.1	Hip	224
15.4.2	Knee	226
15.5	Mechanical and Fatigue Properties	226
15.5.1	Adverse Conditions	227
15.6	Oxidative stability	228
15.7	Biocompatibility	229
15.7.1	Vitamin E Toxicity in Clinical Studies with Large Cohorts and Comorbidities	230
15.7.2	Toxic Effects of High Dose of Vitamin E in Patients on Warfarin Therapy (Two Cases)	231
15.7.3	Plasma and Tissue Levels of Vitamin E in Healthy Adults with and without Vitamin E Supplementation	231
15.7.4	Estimates of Possible Systemic Vitamin Exposure Using the UHMWPE Articulation Components for Total Joint Arthroplasty	232
15.7.5	Animal Studies to Determine the Local Effects of Vitamin E in the Joint Space	232
15.8	Conclusion and Future Prospects	233
15.9	Acknowledgments	233
	References	233

### 16. Vitamin-E-Blended UHMWPE Biomaterials

*Steven M. Kurtz, Pierangiola Bracco and Luigi Costa*

16.1	Introduction	237
16.2	Vitamin E as an Antioxidant for Polyolefins	238
16.3	Vitamin E Blends in Food Packaging	239
16.4	Vitamin E Studies from Japan	240

16.5	Vitasul and Vitamin E Studies from Austria	240
16.6	Vitamin E Studies from Italy	242
16.7	Vitamin E Blends and Thresholds for Oxidative Stability	243
16.8	Vitamin E Blends and Mechanical Behavior	244
16.9	Vitamin E Blends and Crosslinking Efficiency	245
16.10	Summary and Conclusion	245
16.11	Acknowledgments	245
	References	246

## 17. Composite UHMWPE Biomaterials and Fibers

*Steven M. Kurtz*

17.1	Introduction	249
17.2	CFR UHMWPE Composite: Poly II	250
17.3	UHMWPE Homocomposites	252
17.4	UHMWPE Matrix Composites for Orthopedic Bearings	254
17.5	Polyethylene-hydroxyapatite Composites	255
17.6	UHMWPE Fibers	255
17.7	Summary	256
17.8	Acknowledgments	256
	References	257

## 18. UHMWPE/Hyaluronan Microcomposite Biomaterials

*Susan P. James, Rachael (Kurkowski) Oldinski, Min Zhang and Herb Schwartz*

18.1	Introduction	259
18.2	Surface Modification of UHMWPE	260
18.3	Polyurethanes and Hydrogels	260
18.4	Hyaluronan	261
18.5	Synthesis and Processing of UHMWPE/HA Microcomposites	263
	18.5.1 UHMWPE/HA	263
	18.5.2 Crosslinked UHMWPE/HA	265
	18.5.3 Crosslinked Compatibilized UHMWPE/HA	266
18.6	Chemical and Physical Characterization of UHMWPE/HA Biomaterials	266
	18.6.1 UHMWPE/HA Composition	266
	18.6.2 UHMWPE/HA Hydrophilicity	267
	18.6.3 UHMWPE/HA Biostability	268
	18.6.4 UHMWPE Crystallinity in UHMWPE/HA	268

18.7	Mechanical and Tribological Characterization of UHMWPE/HA Biomaterials	269
	18.7.1 Tensile Properties	269
	18.7.2 Wear Resistance	270
18.8	Sterilization of UHMWPE/HA Biomaterials	272
18.9	Biocompatibility of UHMWPE/HA Biomaterials	273
18.10	Commercialization of UHMWPE/HA Biomaterials	273
18.11	Conclusion	273
18.12	Acknowledgments	273
	References	274

## 19. High Pressure Crystallized UHMWPEs

*Anuj Bellare and Steven M. Kurtz*

19.1	Introduction	277
19.2	Extended Chain Crystallization	278
	19.2.1 Phase Diagram for PE	280
19.3	Hylamer	281
	19.3.1 Structure and Properties	282
	19.3.2 <i>In Vitro</i> Studies of Hylamer	282
	19.3.3 <i>In Vitro</i> Studies of Hylamer-M	283
	19.3.4 Clinical Studies of Hylamer in Hip Arthroplasty	283
	19.3.5 Clinical Studies of Hylamer in the Knee	284
	19.3.6 Hylamer: A Current Perspective	285
19.4	Crosslinking Followed by High-pressure Crystallization	285
19.5	High-pressure Crystallization Followed by Crosslinking	286
19.6	Summary	286
19.7	Acknowledgments	286
	References	286

## 20. Compendium of Highly Crosslinked UHMWPEs

*Steven M. Kurtz*

20.1	Introduction	291
20.2	ALTRX	292
	20.2.1 Development History and Overview	292
	20.2.2 Properties and <i>In Vitro</i> Performance	293
	20.2.3 Clinical Results	293
20.3	Arcom XL Polyethylene	293
	20.3.1 Development History and Overview	294

20.3.2	Properties and <i>In Vitro</i> Performance	294	20.12	XLPE	305
20.3.3	Clinical Results	294	20.12.1	Development History and Overview	306
<b>20.4</b>	<b>Crossfire</b>	<b>294</b>	20.12.2	Properties and <i>In Vitro</i> Performance	306
20.4.1	Development History and Overview	294	20.12.3	Clinical Results	306
20.4.2	Properties and <i>In Vitro</i> Performance	294	<b>20.13</b>	<b>The Future for Highly Crosslinked UHMWPE</b>	<b>306</b>
20.4.3	Clinical Results	295	<b>20.14</b>	<b>Acknowledgments</b>	<b>306</b>
<b>20.5</b>	<b>Durasul</b>	<b>295</b>		<b>References</b>	<b>306</b>
20.5.1	Development History and Overview	295	<b>21. Mechanisms of Crosslinking, Oxidative Degradation and Stabilization of UHMWPE</b>		
20.5.2	Properties and <i>In Vitro</i> Performance	297	<i>Luigi Costa and Pierangiola Bracco</i>		
20.5.3	Clinical Results	297	<b>21.1</b>	<b>Introduction</b>	<b>309</b>
<b>20.6</b>	<b>E-poly HXLPE</b>	<b>297</b>	<b>21.2</b>	<b>Mechanisms of Crosslinking</b>	<b>310</b>
20.6.1	Development History and Overview	298	21.2.1	Mechanism of Macroradical Formation During Irradiation	310
20.6.2	Properties and <i>In Vitro</i> Performance	298	21.2.2	Reaction of Isolated Radicals	311
20.6.3	Clinical Results	298	21.2.3	Y-Crosslinking Mechanism	311
<b>20.7</b>	<b>Longevity</b>	<b>298</b>	21.2.4	H-Crosslinking Mechanism	312
20.7.1	Development History and Overview	298	<b>21.3</b>	<b>UHMWPE Oxidation</b>	<b>312</b>
20.7.2	Properties and <i>In Vitro</i> Performance	300	21.3.1	Introduction	312
20.7.3	Clinical Results	300	21.3.2	UHMWPE Post-irradiation Oxidation	313
<b>20.8</b>	<b>Marathon</b>	<b>300</b>	<b>21.4</b>	<b>Critical Products of the Oxidation Process: Macroradicals</b>	<b>314</b>
20.8.1	Development History and Overview	301	21.4.1	Alkyl Macroradical (R <sup>*</sup> )	314
20.8.2	Properties and <i>In Vitro</i> Performance	302	21.4.2	Peroxy Macroradical (ROO <sup>*</sup> )	314
20.8.3	Clinical Results	302	21.4.3	Alkoxy Macroradical (RO <sup>*</sup> )	314
<b>20.9</b>	<b>Prolong</b>	<b>302</b>	<b>21.5</b>	<b>Critical Products of the Oxidation Process: Oxidized Products</b>	<b>314</b>
20.9.1	Development History and Overview	303	21.5.1	Hydroperoxide (ROOH)	314
20.9.2	Properties and <i>In Vitro</i> Performance	303	21.5.2	Ketone (R <sub>2</sub> CO)	314
20.9.3	Clinical Results	304	21.5.3	Carboxylic Acid (RCOOH)	315
<b>20.10</b>	<b>X3</b>	<b>304</b>	21.5.4	Sec-alcohol (R <sub>2</sub> CHOH)	315
20.10.1	Development History and Overview	304	21.5.5	Ester	315
20.10.2	Properties and <i>In Vitro</i> Performance	304	<b>21.6</b>	<b>Considerations on Accelerated Aging Methods: Comparison Between Postirradiation Oxidation and Thermal Oxidation</b>	<b>315</b>
20.10.3	Clinical Results	304	21.6.1	Temperature Effects During Irradiation	316
<b>20.11</b>	<b>XLK</b>	<b>305</b>	21.6.2	Distribution of Oxidized Compounds in the New UHMWPE Prosthetic Components	316
20.11.1	Development History and Overview	305	21.6.3	Postoxidative Degradation after Implant Manufacture	317
20.11.2	Properties and <i>In Vitro</i> Performance	305			
20.11.3	Clinical Results	305			

21.7	Stabilization of UHMWPE	318
21.7.1	Introduction	318
21.7.2	Chemical Mechanisms of Vitamin E Stabilization	319
21.7.3	Determination of the Vitamin E Content in UHMWPE	320
21.8.	<i>In Vivo</i> Absorption of LIPIDS	320
21.9	Chemical properties of Wear Debris	320
21.10	Acknowledgments	321
	References	321

## 22. *In Vivo* Oxidation of UHMWPE

*Steven M. Kurtz*

22.1	Introduction	325
22.2	Perspective of <i>In Vivo</i> Oxidation in the 1980s to the Present	326
22.3	Experimental Techniques for Studying <i>In Vivo</i> Oxidation	328
22.3.1	Institutional Procedures and Study Design	328
22.3.2	Experimental Techniques	329
22.3.3	Correlation of <i>In Vivo</i> Oxidation and Mechanical Behavior in Retrievals	331
22.4	Clinical Significance of <i>In Vivo</i> Oxidation	331
22.4.1	<i>In Vivo</i> Oxidation and Total Hip Arthroplasty	331
22.4.2	<i>In Vivo</i> Oxidation and Total Knee Arthroplasty	333
22.5	Laboratory Simulation of <i>In Vivo</i> Oxidation	336
22.6	Summary and Conclusion	338
22.7	Acknowledgments	338
	References	339

## 23. Pathophysiologic Reactions to UHMWPE Wear Particles

*Marla J. Steinbeck, Ryan M. Baxter and Theresa A. Freeman*

23.1	Introduction	341
23.2	Rationale for Evaluating Tissue Responses	342
23.3	Immune System	342
23.3.1	Adaptive Immune Response	343
23.3.2	Cytokines and Chemokines	343
23.4	Immunologic Responses to Joint Replacement UHMWPE Wear Debris	343

23.5	<i>In Vitro</i> and <i>In Vivo</i> Models Used to Study the Immune Response to UHMWPE Wear Debris	346
23.6	Inflammatory- and Noninflammatory-based Histomorphologic Changes in Periprosthetic Tissues	347
23.7	Current Considerations Based on More Recent Findings and Approaches to Tissue Analysis	348
23.8	Exacerbation of the Immune Response to Wear Debris as a Result of Subclinical Infection	349
23.9	Comparative Pathophysiologic Changes in Periprosthetic Hip Tissues from Historical and Highly Crosslinked UHMWPE Implant Retrievals	349
23.10	Conclusion	350
23.11	Acknowledgments	350
	References	350

## 24. Characterization of Physical, Chemical, and Mechanical Properties of UHMWPE

*Stephen Spiegelberg*

24.1	Introduction	355
24.2	What does the FDA Require?	355
24.3	Physical Property Characterization	356
24.3.1	Differential Scanning Calorimetry	356
24.3.2	Scanning Electron Microscopy	358
24.3.3	Intrinsic Viscosity	359
24.3.4	Fusion Assessment	360
24.3.5	Transmission Electron Microscopy	361
24.3.6	Density Measurements	361
24.4	Chemical Property Characterization	361
24.4.1	Trace Element Analysis	361
24.4.2	Fourier Transform Infrared Spectroscopy	362
24.4.3	Electron Spin Resonance	363
24.4.4	Swell Ratio Testing	364
24.5	Mechanical Property Characterization	365
24.5.1	Poisson's Ratio	365
24.5.2	J-Integral Testing	365
24.5.3	Tensile Testing	365
24.5.4	Fatigue Testing	366
24.5.5	Creep	366
24.5.6	Impact Testing	367
24.5.7	Small Punch	367

24.6	Other Testing	367	26.4.2	Soaking UHMWPE Prior to Testing and Soak Controls during Testing	401
24.7	Conclusion	367	26.4.3	Symmetry of Applied Inputs and Simulator Tuning	402
	References	367	26.4.4	Choice of Lubricant in Testing UHMWPE Wear in Knee Replacements	404

## 29. ESR Insights into Macroradicals in UHMWPE

*M. Shah Jahan*

29.1 Introduction	433
29.2 Basic Principle of ESR	434
29.3 Free Radicals in UHMWPE	436
29.3.1 Alkyl Radical	436
29.3.2 Allyl Radical	436
29.3.3 Polyenyl Radical	437
29.3.4 Peroxy Radical	437
29.3.5 ESR Evidence of the Peroxy Radical in UHMWPE	439
29.3.6 Half-Life of the Peroxy Radical in UHMWPE	440
29.4 Long-lived Oxygen-induced Radical in UHMWPE	440
29.4.1 ESR Evidence of the Long-Lived Radicals in UHMWPE	440
29.4.2 Growth and Decay of the Oxygen-induced Radicals	442
29.4.3 Identification of the Oxygen-induced Radicals by ESR	442
29.5 Intermediate Radicals	445
29.6 ESR of Vitamin E-doped UHMWPE	446
29.7 Quantitative ESR in UHMWPE	448

## 30. Fatigue and Fracture of UHMWPE

*Francisco J. Medel and Jevan Furmanski*

30.1 Introduction	451
30.2 Fatigue Resistance	452
30.2.1 Basic Concepts of Fatigue Resistance	452
30.2.2 Fatigue Analysis: Total Life Approach	452
30.2.3 Total Life Fatigue Testing in UHMWPE	453
30.2.4 Fatigue Analysis: Defect Tolerant Approach	453
30.2.5 Fatigue Crack Propagation Testing in UHMWPE	455
30.2.6 Viscoelastic Fatigue Crack Propagation	455

30.2.7 Non-Conventional Fatigue Experimental Approaches	459
30.3 Fracture resistance	460
30.3.1 Introduction	460
30.3.2 Uniaxial Tensile Failure: Work to Fracture and Estimated $K_C$	460
30.3.3 Izod and Charpy Impact Tests	460
30.3.4 Elastic-Plastic Fracture Mechanics and the J-integral Concept	461
30.3.5 J-integral Based Fracture Toughness Testing	463
30.3.6 J-integral Fracture Toughness of UHMWPE	467
30.4 Summary and Conclusion	469
References	469

## 31. Development and Application of the Notched Tensile Test to UHMWPE

*Michael C. Sobieraj and Clare M. Rinnac*

31.1 Introduction	473
31.2 Overview of Notch Behavior	473
31.3 Overview of the Notched Tensile test method	476
31.3.1 Specimen Geometry and Loading	476
31.3.2 Data Acquisition and Stress-Strain Determination	476
31.3.3 Mechanical Characterization of Notch Effects	476
31.3.4 Material Characterization and Fracture Micromechanism	477
31.4 Recent Studies of Conventional and Highly Crosslinked UHMWPE Materials	478
31.4.1 Mechanical Characterization of Notch Effects	478
31.4.2 Material Characterization and Fracture Micromechanism	478
31.4.3 Hybrid Model Finite Element Analysis	479
31.5 The Effects of Notches on Deformation and Fracture Mechanisms	481
31.6 Conclusion and Future Directions	482
Acknowledgements	482
