

Reliable Lab Solutions

Easy-to-use

Dependable

Respected

ESSENTIAL BIOIMAGING METHODS

- Captures the top chapters from the 2 volumes of *Imaging in the acclaimed **Methods in Enzymology** series*
- Working techniques, tried and tested by the experts
- Highlights top downloads, enhanced with author tips and value-added short-cuts

P. Michael Conn

CONTENTS

Contributors	xi
Preface	xv

PART I Imaging in Animal and Human Models

1. Positron Emission Tomography (PET): Research to Clinical Practice <i>Rakesh Kumar and Suman Jana</i>	
I. Introduction	4
II. Tracers	4
III. Drug Evaluation	5
IV. Biological Function Evaluation	7
V. Clinical Applications	8
VI. Future Perspectives	16
VII. Conclusions	18
References	18
2. Biophysical Basis of Magnetic Resonance Imaging of Small Animals <i>Bruce M. Damon and John C. Gore</i>	
I. Introduction	27
II. Spin Relaxation	28
III. Effects of Exchange and Compartmentation	31
IV. Paramagnetic Relaxation	33
V. Susceptibility Contrast and BOLD Effects	33
VI. Effects of Spin Motion	34
VII. An Illustrative Example: MRI of Exercising Skeletal Muscle	35
References	45
3. Functional Magnetic Resonance Imaging of Macaque Monkeys <i>Kiyoshi Nakahara</i>	
I. Introduction	47
II. Potential of Functional MRI in Macaque Monkeys	48

III. Brief History of fMRI in Macaque Monkeys	49
IV. Experimental Procedures	50
V. Conclusion	52
References	52
4. Atlas Template Images for Nonhuman Primate Neuroimaging: Baboon and Macaque	
<i>Kevin J. Black, Jonathan M. Koller, Abraham Z. Snyder, and Joel S. Perlmutter</i>	
I. Introduction	56
II. Methods	57
III. Discussion	64
References	65
5. Magnetic Resonance Imaging of Brain Function	
<i>Stuart Clare</i>	
I. Update	67
II. Introduction	68
III. Experimental Procedures	69
IV. An Application of Functional MRI	80
V. Discussion and Conclusion	81
References	81

PART II Imaging of Receptors, Small Molecules, and Protein-Protein Interactions

6. Positron Emission Tomography Receptor Assay with Multiple Ligand Concentrations: An Equilibrium Approach	
<i>Doris J. Doudet and James E. Holden</i>	
I. Update	86
II. Introduction	88
III. Overview of <i>In Vivo</i> Receptor Assay	89
IV. Methods	93
V. Example Applications	98
VI. Conclusions	101
References	101

7. Estimation of Local Receptor Density, B'_{\max} , and Other Parameters via Multiple-Injection Positron Emission Tomography Experiments

Evan D. Morris, Bradley T. Christian, Karmen K. Yoder, and Raymond F. Muzic, Jr.

I. Update	106
II. Introduction	107
III. Theory	109
IV. Experimental Protocol and Considerations	115
V. Models and Data Fitting	120
VI. Results and Interpretation	125
VII. Understanding and Designing M-I Experiments	128
VIII. Conclusion	131
References	132

8. Magnetic Resonance Imaging in Biomedical Research: Imaging of Drugs and Drug Effects

Markus Rudin, Nicolau Beckmann, and Martin Rausch

I. Introduction	135
II. Drug Imaging and PK Studies	136
III. Noninvasive Assessment of Drug Efficacy/Pharmacodynamic Studies	138
IV. Disease and Efficacy Biomarkers as Bridge Between Preclinical and Clinical Drug Evaluation	145
V. Conclusion and Outlook	147
References	148

9. Imaging Myocardium Enzymatic Pathways with Carbon-11 Radiotracers

Carmen S. Dence, Pilar Herrero, Sally W. Schwarz, Robert H. Mach, Robert J. Gropler, and Michael J. Welch

I. Introduction	152
II. Overview of the Production of Carbon-11	153
III. Overview of the Quality Assurance of C-11 Radiopharmaceuticals	163
IV. Dosimetry Calculations	165
V. Conduct of GAP Studies	166
VI. Conclusion	177
References	178

10. Molecular and Functional Imaging of Cancer: Advances in MRI and MRS	
<i>Arvind P. Pathak, Barjor Gimi, Kristine Glunde, Ellen Ackerstaff, Dmitri Artemov, and Zaver M. Bhujwala</i>	
I. Update	184
II. Introduction	185
III. Vascular Imaging of Tumors with MRI	186
IV. Cellular and Molecular Imaging	200
V. Metabolic and Physiologic Spectroscopy and Spectroscopic Imaging with MRS and MRSI	214
VI. Examples of Integrated Imaging and Spectroscopy Approaches to Studying Cancer	222
References	229
11. A Modified Transorbital Baboon Model of Reperfused Stroke	
<i>Anthony L. D'Ambrosio, Michael E. Sughrue, J. Mocco, William J. Mack, Ryan G. King, Shivani Agarwal, and E. Sander Connolly, Jr.</i>	
I. Update	238
II. Introduction	238
III. Preoperative Care	240
IV. Operative Technique	243
V. Postoperative Care	246
VI. Data Collection and Analysis	246
VII. Model Application: HuEP5C7	249
VIII. Conclusion	249
References	250
12. Structural and Functional Optical Imaging of Angiogenesis in Animal Models	
<i>Richard L. Roberts and Pengnian Charles Lin</i>	
I. Introduction	251
II. Intravital Microscopy and Animal Window Models	252
III. Imaging of Tumor-Host Interaction and Angiogenesis Initiation Using Fluorescent Protein-Labeled Tumor Cells	256
IV. Vascular Reporter Transgenic Mouse Model	260
V. Conclusions	266
References	267

13. MRI of Animal Models of Brain Disease	
<i>Rob Nabuurs, David L. Thomas, John S. Thornton, Mark F. Lythgoe, and Louise van der Weerd</i>	
How to Avoid Pitfalls: Tips and Tricks	270
I. Introduction	270
II. Biophysical Background and Methods	271
III. Applications of MRI to Experimental Neuropathology	284
IV. Conclusion	294
References	295
14. Magnetic Resonance Imaging in Animal Models of Pathologies	
<i>Pasquina Marzola, Stefano Tambalo, and Andrea Sbarbati</i>	
I. Update	301
II. Introduction	302
III. Bacterial Infections	303
IV. Ischemic Pathologies	309
V. Neoplastic Pathologies	311
VI. Lipid Accumulation in Metabolic-Degenerative Disorders	316
VII. Conclusions	320
References	320
15. Application of Combined Magnetic Resonance Imaging and Histopathologic and Functional Studies for Evaluation of Aminoguanidine Following Traumatic Brain Injury in Rats	
<i>Jia Lu and Shabbir Moochhala</i>	
I. Introduction	325
II. Materials and Methods	326
III. Results and Discussion	334
References	335

PART IV Preparation of Materials

16. Vascular-Targeted Nanoparticles for Molecular Imaging and Therapy	
<i>Samira Guccione, King C.P. Li, and Mark D. Bednarski</i>	
I. Introduction	339
II. Rationale Behind Choosing a Vascular Target for Molecular Imaging	341
III. Design and Preclinical Studies of a Vascular-Targeted Molecular Imaging Agent	344

IV. Molecular Imaging and Vascular-Targeted Therapeutics	351
V. Summary	354
References	355
17. Generation of DOTA-Conjugated Antibody Fragments for Radioimmunoimaging	
<i>Peter M. Smith-Jones and David B. Solit</i>	
I. Introduction	358
II. Selection of a Radionuclide and Chelating Agent	359
III. Generation of Antibody Fragments	364
IV. Conjugation of DOTA to Intact Antibodies or Fragments	365
V. Radiolabeling of DOTA Conjugates	366
VI. Characterization of DOTA-F(ab') ₂ Conjugates	367
VII. PET Imaging	369
VIII. Conclusion	369
References	370
PART V General Methods	
18. The Application of Magnetic Resonance Imaging and Spectroscopy to Gene Therapy	
<i>Po-Wah So, Kishore K. Bhakoo, I. Jane Cox, Simon D. Taylor-Robinson, and Jimmy D. Bell</i>	
I. Introduction	374
II. Magnetic Resonance Techniques	376
III. MR Overview	377
IV. MR Imaging (MRI)	377
V. MR Spectroscopy (MRS)	380
VI. Role of Magnetic Resonance Methods in GT	380
VII. MRI-Based Systems	383
VIII. MRS-Based Systems	387
IX. Conclusions	389
References	390
19. Voxellation Methods for Genome Scale Imaging of Brain Gene Expression	
<i>Daniel M. Sforza and Desmond J. Smith</i>	
I. Update	399
II. Introduction	400
III. Methods	401
IV. Data Analysis	405
References	408
