

Deploying Mobile WiMAX

Max Riegel
Dirk Kroeselberg
Aik Chindapol

Contents

About the Authors	ix
Preface	xi
Acknowledgements	xiii
List of Acronyms	xv
1 Introduction	1
1.1 WiMAX in the Telecommunication Markets	1
1.1.1 <i>Integrated Services Digital Networks</i>	1
1.1.2 <i>The Digital Subscriber Line to the Internet</i>	2
1.2 Mobile WiMAX Specifications	3
1.2.1 <i>Specification Areas</i>	4
1.2.2 <i>Development Process for WiMAX Interoperability</i>	5
1.2.3 <i>Documentation Structure of the WiMAX Forum</i>	7
1.3 About This Book	9
2 Network Architecture	11
2.1 Providing Access to the Internet	11
2.1.1 <i>Traditional Operator Networks</i>	11
2.1.2 <i>Internet Access Networks</i>	12
2.1.3 <i>Mobile WiMAX Networking</i>	14
2.2 Mobile WiMAX Network Reference Architecture	16
2.2.1 <i>Reference Points in the Mobile WiMAX Network</i>	17
2.2.2 <i>The Mobile WiMAX Network Reference Model</i>	21
2.2.3 <i>Control Plane Functions</i>	22
2.2.4 <i>Data Path</i>	23
2.2.5 <i>Transport Plane</i>	24
2.2.6 <i>Mobile WiMAX Identifiers</i>	24
2.3 Mobile WiMAX Roaming Architecture	26
2.3.1 <i>Roaming Functions</i>	26
2.3.2 <i>Roaming Models</i>	27
2.3.3 <i>WiMAX Roaming Interface</i>	30
2.4 Ethernet Services Support	31
2.4.1 <i>Ethernet Services</i>	32

2.4.2	<i>Ethernet Standards</i>	34
2.4.3	<i>Ethernet Services Support in Mobile WiMAX</i>	36
2.4.4	<i>Deployment Options</i>	39
2.5	Mobile WiMAX and 3GPP SAE/LTE	41
2.5.1	<i>Introduction to SAE</i>	42
2.5.2	<i>Architectural Differences</i>	45
2.5.3	<i>Deployment Differences</i>	46
3	Subscription Handling and Security	49
3.1	The Meaning of a Subscription	49
3.2	A Network Reference Model for Security	51
3.3	Subscription versus Device Authentication	53
3.3.1	<i>Subscription Types and Security Credentials</i>	54
3.3.2	<i>Authenticated Network Access</i>	56
3.3.3	<i>EAP and EAP Methods</i>	59
3.3.4	<i>WiMAX-SIM Cards</i>	69
3.4	Certificates and the WiMAX Public Key Infrastructure	72
3.4.1	<i>A Brief Overview: Digital Certificates and PKI</i>	73
3.4.2	<i>WiMAX PKI Hierarchy</i>	74
3.4.3	<i>WiMAX Certificate Profiles</i>	76
3.4.4	<i>Certificate Revocation</i>	77
3.4.5	<i>Challenges</i>	79
3.4.6	<i>Use Cases</i>	80
3.5	Security Design Considerations in the WiMAX Network Architecture	82
3.5.1	<i>Authenticator Mobility Support</i>	83
3.5.2	<i>Anchor Authenticator and Relocation</i>	85
3.5.3	<i>Identity Hiding</i>	86
3.6	'Bootstrapping' a Subscription OTA	90
3.6.1	<i>Subscription Creation and Device Models</i>	90
3.6.2	<i>OTA Provisioning Model and Protocols</i>	92
3.6.3	<i>Activation and Initial Network Entry</i>	93
3.6.4	<i>Reprovisioning</i>	96
3.7	Identities in Mobile WiMAX	97
3.7.1	<i>Overview of WiMAX Identities</i>	98
3.7.2	<i>Device Identity</i>	98
3.7.3	<i>Subscription Identity</i>	99
3.7.4	<i>Identities within the Network</i>	101
3.8	AAA Protocols and Routing in WiMAX	103
3.8.1	<i>RADIUS and Diameter Overview</i>	104
3.8.2	<i>Making WiMAX Speak AAA</i>	107
3.8.3	<i>Routing of AAA Messages and Roaming</i>	111
4	Service Provisioning	115
4.1	Enablers for WiMAX-Based Services	115
4.1.1	<i>Motivation and Available Service Enablers</i>	115
4.2	AAA Support for Services and Applications	116

4.2.1	Overview	117
4.2.2	Mobility Support from AAA	118
4.3	Accounting and Charging	122
4.3.1	Architecture and WiMAX-Specific Aspects	123
4.3.2	Offline Accounting and Session Concept	127
4.3.3	Online Accounting	130
4.3.4	Accounting-Related Identifiers	133
4.4	Network QoS Architecture	134
4.4.1	Motivation and Overview	134
4.4.2	The Basic WiMAX QoS Concepts	135
4.4.3	Flow Management and Dynamic QoS Support	138
4.4.4	Identifiers	142
4.4.5	The PCC Framework for WiMAX	144
4.5	Location Support	147
4.5.1	WiMAX Architecture for Location Support	149
4.5.2	Scenarios and Use Cases	150
4.5.3	Communication between Device and Network	152
4.5.4	AAA Integration of Location Support	155
4.6	IMS Support	158
4.6.1	Architecture Overview and WiMAX Impact	159
4.6.2	Service Discovery and Roaming Aspects	160
4.6.3	IMS Identities	163
4.7	Emergency Services in WiMAX	165
4.7.1	Motivating the Problem Space	165
4.7.2	WiMAX Architecture for Emergency Services Support	166
4.7.3	Design Criteria and Building Blocks	168
4.7.4	Limited Access to Emergency Services	170
4.7.5	Roaming Considerations	173
4.7.6	Further Aspects of Emergency Support	174
5	Mobility	177
5.1	Mobile Networking	177
5.1.1	Mobility Mechanisms in Packet-Based Networks	178
5.1.2	Mobile IP	180
5.1.3	Link Layer Mobility	183
5.2	WiMAX Mobility Architecture	184
5.2.1	Mobility Anchors	184
5.2.2	Hierarchy	186
5.3	CSN-Anchored Mobility	187
5.3.1	CMIPv4	189
5.3.2	CMIPv6	192
5.3.3	PMIPv4	196
5.3.4	PMIPv6	203
5.4	ASN-Anchored Mobility	207
5.4.1	R6 Mobility	208

5.4.2	<i>R4 Mobility</i>	211
5.4.3	<i>Unprepared Handover</i>	214
5.5	Simple IP	214
5.5.1	<i>HA-less Architecture</i>	215
5.5.2	<i>Unspecified R3 Data Path</i>	215
5.6	Mobility Restriction	216
5.6.1	<i>Dynamic Limitation of Attachment and Handover</i>	217
6	WiMAX Radio Interface	219
6.1	Physical Layer	219
6.1.1	<i>Overview of OFDMA</i>	219
6.1.2	<i>Frame Structure</i>	220
6.2	MAC Layer	225
6.2.1	<i>Protocol Data Unit</i>	228
6.2.2	<i>Basic Control Signaling</i>	230
6.2.3	<i>Network Entry and Initialization</i>	233
6.2.4	<i>Connection Management and QoS</i>	237
6.3	Mobility Support	244
6.3.1	<i>Handover</i>	245
6.3.2	<i>Sleep Mode</i>	254
6.3.3	<i>Idle Mode</i>	258
7	Radio Evolution beyond System Profile Release 1.0	265
7.1	Mobile WiMAX System Profile Release 1.5	265
7.1.1	<i>Support of Frequency Division Duplexing</i>	265
7.1.2	<i>Persistent Allocation for VoIP</i>	268
7.1.3	<i>Load Balancing and Seamless Handover</i>	270
7.1.4	<i>Location-Based Services</i>	274
7.1.5	<i>Coexistence with Wi-Fi and Bluetooth</i>	275
8	Outlook	277
8.1	WiMAX Forum Release Planning	277
8.2	Network Architecture Evolution	278
8.3	Support for Femtocell Deployments	281
8.4	IEEE 802.16m and Relay Support	283
	References	285
	Index	291
