

CCNA Learning

# Authorized Self-Study Guide Interconnecting Cisco Network Devices, Part 2 (ICND2)

Third Edition

Foundation learning for CCNA ICND2 Exam 640-816

# Contents

	Foreword	xviii
	Introduction	xix
Chapter 1	Review of Cisco IOS for Routers and Switches	3
	Chapter Objectives	3
	Cisco IOS CLI Functions	4
	<i>Configuration Modes of Cisco IOS Software</i>	4
	<i>Help Facilities of the Cisco IOS CLI</i>	6
	<i>Commands Review</i>	7
	<i>Summary of Cisco IOS CLI Commands</i>	8
	Chapter Summary	8
	Review Questions	8
Chapter 2	Medium-Sized Switched Network Construction	13
	Chapter Objectives	13
	Implementing VLANs and Trunks	13
	<i>Understanding VLANs</i>	14
	VLAN Overview	15
	<i>Grouping Business Functions into VLANs</i>	16
	<i>Applying IP Address Space in the Enterprise Network</i>	17
	<i>Example: Network Design</i>	18
	<i>Considering Traffic Source to Destination Paths</i>	20
	<i>Voice VLAN Essentials</i>	22
	VLAN Operation	23
	Understanding Trunking with 802.1Q	24
	802.1Q Frame	25
	802.1Q Native VLAN	26
	Understanding VLAN Trunking Protocol	26
	VTP Modes	27
	VTP Operation	28
	VTP Pruning	29
	Configuring VLANs and Trunks	30
	VTP Configuration	30
	<i>Example: VTP Configuration</i>	31
	802.1Q Trunking Configuration	32
	VLAN Creation	35
	VLAN Port Assignment	37
	<i>Adds, Moves, and Changes for VLANs</i>	38
	<i>Adding VLANs and Port Membership</i>	39
	<i>Changing VLANs and Port Membership</i>	39
	<i>Deleting VLANs and Port Membership</i>	39
	<i>Summary of Implementing VLANs and Trunks</i>	39

Improving Performance with Spanning Tree	40
<i>Building a Redundant Switched Topology</i>	40
<i>Choosing Interconnection Technologies</i>	40
<i>Determining Equipment and Cabling Needs</i>	42
<i>EtherChannel Overview</i>	43
Redundant Topology	45
Recognizing Issues of a Redundant Switched Topology	46
<i>Switch Behavior with Broadcast Frames</i>	46
<i>Broadcast Storms</i>	46
<i>Example: Broadcast Storms</i>	46
<i>Multiple Frame Transmissions</i>	47
<i>Example: Multiple Transmissions</i>	47
<i>MAC Database Instability</i>	48
Resolving Issues with STP	49
<i>Spanning-Tree Operation</i>	50
<i>Example: Selecting the Root Bridge</i>	51
<i>Example: Spanning-Tree Operation</i>	54
<i>Example: Spanning-Tree Path Cost</i>	55
<i>Example: Spanning-Tree Recalculation</i>	56
<i>STP Convergence</i>	56
<i>Per VLAN Spanning Tree+</i>	56
<i>PVST+ Operation</i>	57
<i>Rapid Spanning Tree Protocol</i>	58
<i>Per VLAN RSTP</i>	59
<i>Multiple Spanning Tree Protocol</i>	59
<i>RSTP Port Roles</i>	60
Configuring RSTP	61
<i>Summary of Improving Performance with Spanning Tree</i>	63
Routing Between VLANs	64
<i>Understanding Inter-VLAN Routing</i>	64
<i>Example: Router on a Stick</i>	64
<i>Example: Subinterfaces</i>	65
<i>Configuring Inter-VLAN Routing</i>	65
<i>Summary of Routing Between VLANs</i>	66
Securing the Expanded Network	66
<i>Overview of Switch Security Concerns</i>	66
<i>Securing Switch Devices</i>	68
<i>Securing Switch Protocols</i>	70
<i>Mitigating Compromises Launched Through a Switch</i>	70
<i>Describing Port Security</i>	71
<i>802.X Port-Based Authentication</i>	73
<i>Summary of Securing the Expanded Network</i>	76

Troubleshooting Switched Networks	76
<i>Troubleshooting Switches</i>	76
<i>Troubleshooting Port Connectivity</i>	77
<i>Hardware Issues</i>	78
<i>Configuration Issues</i>	79
<i>Troubleshooting VLANs and Trunking</i>	80
<i>Native VLAN Mismatches</i>	80
<i>Trunk Mode Mismatches</i>	81
<i>VLANs and IP Subnets</i>	81
<i>Inter-VLAN Connectivity</i>	81
<i>Troubleshooting VTP</i>	82
<i>Unable to See VLAN Details in the show run Command Output</i>	82
<i>Cisco Catalyst Switches Do Not Exchange VTP Information</i>	83
<i>Recently Installed Switch Causes Network Problems</i>	84
<i>All Ports Inactive After Power Cycle</i>	84
<i>Troubleshooting Spanning Tree</i>	85
<i>Use the Diagram of the Network</i>	85
<i>Identify a Bridging Loop</i>	86
<i>Log STP Events</i>	86
<i>Temporarily Disable Unnecessary Features</i>	87
<i>Designate the Root Bridge</i>	87
<i>Verify the Configuration of RSTP</i>	87
<i>Summary of Troubleshooting Switched Networks</i>	87
Chapter Summary	88
Review Questions	88
<b>Chapter 3 Medium-Sized Routed Network Construction</b>	<b>97</b>
Chapter Objectives	97
Reviewing Dynamic Routing	98
<i>Understanding Distance Vector Routing Protocols</i>	103
<i>Route Discovery, Selection, and Maintenance</i>	104
<i>Routing Loops</i>	105
<i>Route Maintenance Using Hold-Down Timers</i>	110
<i>Route Maintenance Using Triggered Updates</i>	111
<i>Route Maintenance Using Hold-Down Timers with Triggered Updates</i>	112
<i>Link-State and Advanced Distance Vector Protocols</i>	115
<i>Link-State Routing Protocol Algorithms</i>	118
<i>Advanced Distance Vector Protocol Algorithm</i>	122
<i>Summary of Reviewing Routing Operations</i>	122
Implementing Variable-Length Subnet Masks	123
Reviewing Subnets	123
<i>Computing Usable Subnetworks and Hosts</i>	123
Introducing VLSMs	125
<i>Route Summarization with VLSM</i>	128
<i>Summary of Implementing Variable-Length Subnet Masks</i>	132

	Chapter Summary	133
	Review Questions	133
<b>Chapter 4</b>	<b>Single-Area OSPF Implementation</b>	<b>139</b>
	Chapter Objectives	139
	Introducing OSPF	139
	<i>Establishing OSPF Neighbor Adjacencies</i>	141
	<i>SPF Algorithm</i>	143
	<i>Configuring and Verifying OSPF</i>	144
	<i>Loopback Interfaces</i>	145
	<i>Verifying the OSPF Configuration</i>	146
	<i>Using OSPF debug Commands</i>	152
	<i>Load Balancing with OSPF</i>	154
	<i>OSPF Authentication</i>	156
	<i>Types of Authentication</i>	156
	<i>Configuring Plaintext Password Authentication</i>	157
	<i>Example: Plaintext Password Authentication Configuration</i>	158
	<i>Verifying Plaintext Password Authentication</i>	159
	<i>Summary of OSPF Introduction</i>	159
	Troubleshooting OSPF	160
	<i>Components of Troubleshooting OSPF</i>	160
	<i>Troubleshooting OSPF Neighbor Adjacencies</i>	161
	<i>Troubleshooting OSPF Routing Tables</i>	164
	<i>Troubleshooting Plaintext Password Authentication</i>	165
	<i>Summary of Troubleshooting OSPF</i>	167
	Chapter Summary	167
	Review Questions	167
<b>Chapter 5</b>	<b>Implementing EIGRP</b>	<b>171</b>
	Chapter Objectives	171
	Implementing EIGRP	171
	<i>Introducing EIGRP</i>	171
	<i>Configuring and Verifying EIGRP</i>	174
	<i>Load Balancing with EIGRP</i>	181
	<i>EIGRP Metric</i>	181
	<i>Load Balancing Across Equal Paths</i>	182
	<i>Configuring Load Balancing Across Unequal-Cost Paths</i>	182
	<i>Example: Variance</i>	183
	<i>EIGRP Authentication</i>	184
	<i>Creating a Key Chain</i>	185
	<i>Configuring MD5 Authentication for EIGRP</i>	188
	<i>Example: MD5 Authentication Configuration</i>	188
	<i>Verifying MD5 Authentication</i>	190
	<i>Summary of Implementing EIGRP</i>	191

Troubleshooting EIGRP	192
<i>Components of Troubleshooting EIGRP</i>	192
<i>Troubleshooting EIGRP Neighbor Relationships</i>	192
<i>Troubleshooting EIGRP Routing Tables</i>	195
<i>Troubleshooting EIGRP Authentication</i>	198
<i>Example: Successful MD5 Authentication</i>	198
<i>Example: Troubleshooting MD5 Authentication Problems</i>	199
<i>Summary of Troubleshooting EIGRP</i>	200
Chapter Summary	200
Review Questions	201
<b>Chapter 6</b>	<b>Managing Traffic with Access Control Lists</b>
<b>Chapter Objectives</b>	205
<b>Access Control List Operation</b>	205
<i>Understanding ACLs</i>	206
<i>ACL Operation</i>	208
<i>Types of ACLs</i>	211
<i>ACL Identification</i>	211
<i>Additional Types of ACLs</i>	214
<i>Dynamic ACLs</i>	214
<i>Reflexive ACLs</i>	216
<i>Time-Based ACLs</i>	217
<i>ACL Wildcard Masking</i>	219
<i>Summary of ACL Operations</i>	221
<b>Configuring ACLs</b>	222
<i>Configuring Numbered Standard IPv4 ACLs</i>	222
<i>Example: Numbered Standard IPv4 ACL—Permit My Network Only</i>	223
<i>Example: Numbered Standard IPv4 ACL—Deny a Specific Host</i>	224
<i>Example: Numbered Standard IPv4 ACL—Deny a Specific Subnet</i>	225
<i>Controlling Access to the Router Using ACLs</i>	227
<i>Configuring Numbered Extended IPv4 ACLs</i>	227
<i>Extended ACL with the established Parameter</i>	229
<i>Numbered Extended IP ACL: Deny FTP from Subnets</i>	231
<i>Numbered Extended ACL: Deny Only Telnet from Subnet</i>	232
<i>Configuring Named ACLs</i>	233
<i>Creating Named Standard IP ACLs</i>	234
<i>Creating Named Extended IP ACLs</i>	235
<i>Named Extended ACL: Deny a Single Host from a Given Subnet</i>	237
<i>Named Extended ACL—Deny a Telnet from a Subnet</i>	238
<i>Adding Comments to Named or Numbered ACLs</i>	238
<i>Summary of Configuring ACLs</i>	239
<b>Troubleshooting ACLs</b>	239
<i>Problem: Host Connectivity</i>	241
<i>Summary of Troubleshooting ACLs</i>	243

	Chapter Summary	244
	Review Questions	244
<b>Chapter 7</b>	<b>Managing Address Spaces with NAT and IPv6</b>	<b>249</b>
	Chapter Objectives	249
	Scaling the Network with NAT and PAT	249
	<i>Introducing NAT and PAT</i>	250
	<i>Translating Inside Source Addresses</i>	253
	<i>Static NAT Address Mapping</i>	256
	<i>Dynamic Address Translation</i>	257
	<i>Overloading an Inside Global Address</i>	258
	<i>Resolving Translation Table Issues</i>	262
	<i>Resolving Issues with Using the Correct Translation Entry</i>	264
	<i>Summary of Scaling the Network with NAT and PAT</i>	269
	Transitioning to IPv6	270
	<i>Reasons for Using IPv6</i>	270
	<i>Understanding IPv6 Addresses</i>	273
	<i>Global Addresses</i>	275
	<i>Reserved Addresses</i>	275
	<i>Private Addresses</i>	275
	<i>Loopback Address</i>	276
	<i>Unspecified Address</i>	276
	<i>IPv6 over Data Link Layers</i>	277
	<i>Assigning IPv6 Addresses</i>	278
	<i>Manual Interface ID Assignment</i>	279
	<i>EUI-64 Interface ID Assignment</i>	279
	<i>Stateless Autoconfiguration</i>	279
	<i>DHCPv6 (Stateful)</i>	279
	<i>Use of EUI-64 Format in IPv6 Addresses</i>	280
	<i>Routing Considerations with IPv6</i>	282
	<i>Strategies for Implementing IPv6</i>	283
	<i>Configuring IPv6</i>	287
	<i>Configuring and Verifying RIPng for IPv6</i>	287
	<i>Example: RIPng for IPv6 Configuration</i>	288
	<i>Summary of Transitioning to IPv6</i>	289
	Chapter Summary	289
	Review Questions	290
<b>Chapter 8</b>	<b>Extending the Network into the WAN</b>	<b>297</b>
	Chapter Objectives	297
	Introducing VPN Solutions	298
	<i>VPNs and Their Benefits</i>	298
	<i>Types of VPNs</i>	299

<i>Benefits</i>	302
<i>Restrictions</i>	303
<i>IPsec SSL VPN (WebVPN)</i>	304
<i>Benefits</i>	304
<i>Restrictions</i>	305
<i>Components of VPNs</i>	305
<i>Introducing IPsec</i>	307
<i>IPsec Protocol Framework</i>	313
<i>Summary of Introducing VPN Solutions</i>	314
Establishing a Point-to-Point WAN Connection with PPP	315
<i>Understanding WAN Encapsulations</i>	315
<i>Overview of PPP</i>	317
<i>Configuring and Verifying PPP</i>	320
<i>Example: PPP and CHAP Configuration</i>	322
<i>Example: Verifying PPP Encapsulation Configuration</i>	322
<i>Example: Verifying PPP Authentication</i>	323
<i>Summary of Establishing a Point-to-Point WAN Connection with PPP</i>	324
Establishing a WAN Connection with Frame Relay	325
<i>Understanding Frame Relay</i>	325
<i>Example: Frame Relay Terminology—DLCI</i>	328
<i>Example: Frame Relay Address Mapping</i>	331
<i>Configuring Frame Relay</i>	334
<i>Example: Configuring Frame Relay Point-to-Point Subinterfaces</i>	336
<i>Example: Configuring Frame Relay Multipoint Subinterfaces</i>	338
<i>Verifying Frame Relay</i>	340
<i>Summary of Establishing a WAN Connection with Frame Relay</i>	347
Troubleshooting Frame Relay WANs	347
<i>Components of Troubleshooting Frame Relay</i>	347
<i>Troubleshooting Frame Relay Connectivity Issues</i>	348
<i>Summary of Troubleshooting Frame Relay WANs</i>	354
Chapter Summary	354
Review Questions	355

Appendix    Answers to Chapter Review Questions    361

Index        368
