

 WILEY

Risk Assessment for Chemicals in Drinking Water

*Edited by Robert A. Howd
Anna M. Fan*

CONTENTS

Contributors	ix
Foreword	xi
Preface	xiii
1 Introduction to Drinking Water Risk Assessment	1
<i>Robert A. Howd</i>	
Development of Drinking Water Regulations, 2	
The Risk Assessment Process, 8	
Public Perceptions and the Precautionary Principle, 13	
References, 14	
2 Summary of the Development of Federal Drinking Water Regulations and Health-Based Guidelines for Chemical Contaminants	17
<i>Joyce Morrissey Donohue and Wynne Maynor Miller</i>	
Selecting Candidates for Regulatory Consideration, 19	
Key Components for Regulatory Development, 20	
Development of Regulatory Values, 28	
Nonregulatory Options, 30	
References, 32	

3	Interpretation of Toxicologic Data for Drinking Water Risk Assessment	35
	<i>Robert A. Howd and Anna M. Fan</i>	
	Animal Toxicity Studies, 38	
	Human Toxicity Studies, 47	
	Conclusions, 57	
	References, 57	
4	Exposure Source and Multiroute Exposure Considerations for Risk Assessment of Drinking Water Contaminants	67
	<i>Kannan Krishnan and Richard Carrier</i>	
	Exposure Source Considerations in Risk Assessment, 68	
	Routes of Exposure and Dose Calculations, 72	
	References, 86	
5	Toxicokinetics for Drinking Water Risk Assessment	91
	<i>John C. Lipscomb</i>	
	Evaluation of Toxicity Data, 93	
	Toxicokinetics: PBPK Modeling, 95	
	Risk Assessment, 101	
	Conclusions, 117	
	References, 118	
6	Health Risk Assessment of Chemical Mixtures in Drinking Water	123
	<i>Richard C. Hertzberg, Glenn E. Rice, Linda K. Teuschler, J. Michael Wright, and Jane E. Simmons</i>	
	Drinking Water Mixture Concerns, 124	
	Estimating Exposures to Multiple Chemicals in Drinking Water, 130	
	Toxicological Concepts for Joint Toxicity, 139	
	Chemical Mixtures Risk Assessment Methods, 143	
	New Approaches for Assessing Risk from Exposure to Drinking Water Mixtures, 155	
	Conclusions, 162	
	References, 163	
7	Protection of Infants, Children, and Other Sensitive Subpopulations	171
	<i>George V. Alexeeff and Melanie A. Marty</i>	
	Factors Influencing Differences in Susceptibility Between Infants and Children and Adults, 173	
	Critical Systems and Periods in Development, 185	
	Age at Exposure and Susceptibility to Carcinogens, 189	

Drinking Water Standards Developed to Protect Sensitive
Subpopulations, 190
References, 192

8 Risk Assessment for Essential Nutrients 201

Joyce Morrissey Donohue

Assessment Approaches, 203
Comparison of Guideline Values, 206
Risk Assessment Recommendations, 210
References, 211

9 Risk Assessment for Arsenic in Drinking Water 213

Joseph P. Brown

Occurrence and Exposure, 214
Metabolism, 216
Health Effects, 221
Risk Assessment, 245
Conclusions, 250
References, 252

10 Risk Assessment for Chloroform, Reconsidered 267

Richard Sedman

Carcinogenic Effects, 268
Noncancer Toxic Effects, 268
Mechanisms of Carcinogenicity, 271
Regulation of Cancer Risk, 280
Discussion, 281
References, 283

11 Risk Assessment of a Thyroid Hormone Disruptor: Perchlorate 287

David Ting

Background, 287
Human Health Risk Assessment, 292
Risk Characterization and Conclusions, 296
References, 298

**12 Emerging Contaminants in Drinking Water: A California
Perspective 303**

Steven A. Book and David P. Spath

Emerging Chemicals of the Recent Past, 304
Newer Emerging Contaminants, 306
Future Emerging Chemicals, 306

Conclusions,	311	
References,	312	
13 U.S. EPA Drinking Water Field Office Perspectives and Needs for Risk Assessment		315
<i>Bruce A. Macler</i>		
The Nature of Regulatory Risk Assessments,	315	
Use of Drinking Water Risk Information in EPA Field Offices,	318	
Conclusions,	322	
References,	322	
14 Risk Assessment: Emerging Issues, Recent Advances, and Future Challenges		325
<i>Anna M. Fan and Robert A. Howd</i>		
Emerging Issues,	326	
Advances in Science, Approaches, and Methods,	332	
Conclusions,	357	
References,	359	
Index		365
