Managing Transport Energy

Power for a Sustainable Future

Contents

INTRODUCTION	3
References	6
CHAPTER 1 SUSTAINABILITY, ENERGY CONSERVATION AND PERSONAL TRANSPORT	
1.1 Technical and consumption factors in transport's environmental impacts	9
1.2 Exploring the issue	12
1.3 Business as usual	13
1.4 Reducing transport's environmental impacts	16
1.5 Alternative fuels and renewable energy	18
Fuel efficiency and alternative fuels – conclusions	22
1.6 Travel mode and volume of travel	23
1.7 A multiple approach	27
The multiple approach – conclusions	28
1.8 Reducing transport dependency	28
IT and travel substitution/generation	28
Reinventing car 'ownership'	29
1.9 Conclusions: travelling lightly	31
References	33
CHAPTER 2 SUSTAINABLE ROAD TRANSPORT TECHNOLOGIES	
2.1 Introduction	39
2.2 Petrol and diesel engines	42
2.3 Petrol and diesel fuels	47
2.4 Petrol and diesel vehicle emissions	48
2.5 Cleaner conventional vehicle technologies	53
The hybrid electric vehicle	54
2.6 Alternative vehicle fuels and engines	59
2.7 Compressed natural gas and liquefied petroleum gas	60
Vehicle technology	61
Fuel supply and infrastructure	62
Environmental impact	63

2.8	Biofuels	66
	Vehicle technology	68
	Fuel supply and infrastructure	68
	Environmental impact	69
2.9	Battery electric vehicles	71
	Vehicle technology	71
	Fuel supply and infrastructure	72
	Environmental impact	72
2.10	Fuel cell electric vehicles	76
	The fuel cell	77
	Vehicle technology	79
	Fuel supply and infrastructure	83
	Environmental impact	86
	Hydrogen – where next?	87
	References	89
CHAPTER 3	MOBILITY MANAGEMENT IN ORGANISATIONS	
3.1	Transport impacts and institutions	95
3.2	The ‘bed of nails’ of mobility management	96
	The transport policy challenge	96
	Targeting the ‘easy wins’	97
3.3	What is a travel plan?	100
	Incentive mechanisms for employers	102
3.4	Transport impacts at hospitals	106
3.5	Case studies of hospital travel plans in practice	108
	Plymouth Hospitals NHS Trust	108
	Nottingham City Hospital NHS Trust	113
3.6	Rising from the ‘bed of nails’	117
	References	118
CHAPTER 4	TRAVEL PLANNING	
4.1	Introduction	123
4.2	Institutions and mobility management	123
4.3	Motivations for and benefits of travel plans	123
	The story of the travel plan	126
4.4	Developing a travel plan	131
	Steps to success	132

4.5	Travel plan measures	139
	Reducing the need to travel	139
	Encouraging travel to work by train or bus	140
	Car park charges and cash-out	142
	Walking and cycling to work	144
	Car sharing/lift sharing	144
4.6	Travel plans: future directions and implications for policy	146
	References	148
	CONCLUSION	153
	Backcasting from sustainability	153
	Current trajectories	154
	Alternative trajectories	157
	Behavioural change approaches	159
	Drivers for transformation	161
	ACKNOWLEDGEMENTS	168
	INDEX	170
