

THE

PHYSICS OF SAILING

Explained

BRYON D. ANDERSON

Contents

Introduction	1
1. Hulls	7
1.1 Hull Speed	9
1.2 Surface Resistance	25
1.3 Shape Resistance	29
1.4 Parasitic Resistance	32
2. Keels	41
2.1 Bernoulli's Principle and Lift	42
2.2 Vortex Formation	51
2.3 Righting Moment	60
2.4 Total Resistance	66
3. Sails	69
3.1 Basic Sail Theory	70
3.2 Induced Drag	76
3.3 Turbulence	79
3.4 Sail Interaction	83
3.5 Sail Shapes for Different Points of Sail	88
3.6 Sail Trim	97

4. The Physics of Weather for Sailors	105
4.1 Local Weather	106
4.2 Global Weather Patterns	115
4.3 Tides	128
Further Reading	143
Sailing Terms	149
Index	150
