

WOODHEAD PUBLISHING IN MATERIALS

Titanium alloys: modelling of microstructure, properties and applications

Wei Sha and Savko Malinov

WP

| | |
|--|-------------|
| <i>Author contact details</i> | <i>xi</i> |
| <i>Preface</i> | <i>xiii</i> |
| 1 Introduction to titanium alloys | 1 |
| 1.1 Introduction | 1 |
| 1.2 Conventional titanium alloys | 2 |
| 1.3 Titanium aluminides | 4 |
| 1.4 Modelling | 7 |
| 1.5 References | 8 |
| Part I Experimental techniques | |
| 2 Microscopy | 11 |
| 2.1 High temperature microscopy of surface oxidation and transformations | 11 |
| 2.2 Gamma titanium aluminide | 16 |
| 2.3 Transmission electron microscopy of microstructural evolution | 25 |
| 2.4 References | 31 |
| 3 Synchrotron radiation X-ray diffraction | 33 |
| 3.1 Introduction | 33 |
| 3.2 Measurements at room temperature | 34 |
| 3.3 Measurements at elevated temperatures | 42 |
| 3.4 Gamma titanium aluminide | 54 |
| 3.5 References | 68 |
| 4 Differential scanning calorimetry and property measurements | 70 |
| 4.1 Phase and structural transformations | 70 |
| 4.2 Mechanical properties of β 21S alloy | 83 |

| | | |
|-----|---------------------------------|----|
| 4.3 | Effects of hydrogen penetration | 86 |
| 4.4 | References | 91 |

Part II Physical models

| | | |
|------|--|-----|
| 5 | Thermodynamic modelling | 95 |
| 5.1 | Introduction | 95 |
| 5.2 | Conventional titanium alloys | 96 |
| 5.3 | Titanium aluminides | 106 |
| 5.4 | References | 115 |
| 6 | The Johnson–Mehl–Avrami method: isothermal transformation kinetics | 117 |
| 6.1 | Introduction | 117 |
| 6.2 | Resistivity experiments | 118 |
| 6.3 | Metallography | 123 |
| 6.4 | X-ray diffraction | 128 |
| 6.5 | Additional ageing | 130 |
| 6.6 | Thermodynamic equilibria | 132 |
| 6.7 | Kinetics of the transformation | 140 |
| 6.8 | Time–temperature–transformation diagrams | 156 |
| 6.9 | Summary | 162 |
| 6.10 | References | 163 |
| 7 | The Johnson–Mehl–Avrami method adapted to continuous cooling | 165 |
| 7.1 | Introduction | 165 |
| 7.2 | Interpretation of calorimetry data | 165 |
| 7.3 | X-ray diffraction | 172 |
| 7.4 | Microstructure and hardness | 174 |
| 7.5 | Calculation of continuous-cooling-transformation diagrams | 178 |
| 7.6 | Calculation of transformation kinetics | 183 |
| 7.7 | Simulation and monitoring of transformations on continuous cooling | 197 |
| 7.8 | Summary | 200 |
| 7.9 | References | 202 |
| 8 | <i>Finite element method: morphology of β to α phase transformation</i> | 203 |
| 8.1 | Introduction | 203 |
| 8.2 | Experimental and modelling methodology | 204 |

| | | |
|------|---|-----|
| 8.3 | Experimental observation of the morphology of the phase transformation | 205 |
| 8.4 | Mathematical formulation in the model for the microstructure of Ti-6Al-4V | 205 |
| 8.5 | The 1-D model | 217 |
| 8.6 | The 2-D model | 222 |
| 8.7 | Summary of the models for Ti-6Al-4V | 232 |
| 8.8 | Extending to other alloys | 232 |
| 8.9 | Summary | 235 |
| 8.10 | References | 235 |
| 9 | Phase-field method: lamellar structure formation in γ -TiAl | 237 |
| 9.1 | Introduction | 237 |
| 9.2 | Mathematical formulation | 239 |
| 9.3 | Computer simulation of lamellar structure formation in γ -TiAl | 251 |
| 9.4 | Summary | 255 |
| 9.5 | References | 256 |
| 10 | Cellular automata method for microstructural evolution modelling | 257 |
| 10.1 | Introduction | 257 |
| 10.2 | Microstructural evolution of Ti-6Al-4V during thermomechanical processing | 258 |
| 10.3 | The simulation model | 262 |
| 10.4 | Simulated microstructural evolution during dynamic recrystallisation | 264 |
| 10.5 | Simulated flow stress–strain behaviour | 265 |
| 10.6 | Summary of the simulation method and its capabilities | 266 |
| 10.7 | References | 269 |
| 11 | Crystallographic and fracture behaviour of titanium aluminide | 270 |
| 11.1 | Introduction | 270 |
| 11.2 | Single crystal characteristic | 271 |
| 11.3 | Crack path analyses | 273 |
| 11.4 | Transmission electron microscopy | 279 |
| 11.5 | A model for microcracks nucleation in basal slip | 281 |
| 11.6 | Summary | 289 |
| 11.7 | References | 289 |

| | | |
|------|---|-----|
| 12 | Atomistic simulations of interfaces and dislocations relevant to TiAl | 290 |
| 12.1 | Introduction | 290 |
| 12.2 | Tasks | 291 |
| 12.3 | Computational procedure | 292 |
| 12.4 | Choice of interatomic potential | 295 |
| 12.5 | References | 297 |

Part III Neural network models

| | | |
|------|--|-----|
| 13 | Neural network method | 301 |
| 13.1 | Introduction | 301 |
| 13.2 | Software description | 302 |
| 13.3 | Use of the software | 319 |
| 13.4 | Upgrading the software system | 326 |
| 13.5 | Summary | 328 |
| 13.6 | References | 328 |
| 14 | Neural network models and applications in phase transformation studies | 331 |
| 14.1 | β -transus temperature | 331 |
| 14.2 | Time–temperature–transformation diagrams | 343 |
| 14.3 | An example of MatLab program code for neural network training | 361 |
| 14.4 | References | 363 |
| 15 | Neural network models and applications in property studies | 365 |
| 15.1 | Correlation between processing parameters and mechanical properties | 365 |
| 15.2 | Fatigue stress life (S-N) diagrams | 388 |
| 15.3 | Mechanical properties of gamma-based titanium aluminides | 397 |
| 15.4 | Reference | 409 |
| 15.5 | Appendix | 410 |

Part IV Surface engineering products

| | | |
|------|---|-----|
| 16 | Surface gas nitriding: phase composition and microstructure | 413 |
| 16.1 | Introduction | 413 |
| 16.2 | Near- α Ti-8Al-1Mo-1V | 417 |

| | | |
|-------|--|-----|
| 16.3 | Near- α Ti-6Al-2Sn-4Zr-2Mo | 422 |
| 16.4 | $\alpha + \beta$ Ti-6Al-4V | 427 |
| 16.5 | Near- β Ti-10V-2Fe-3Al | 431 |
| 16.6 | β 21s | 435 |
| 16.7 | Timetal 205 | 442 |
| 16.8 | Ti-Al | 446 |
| 16.9 | Summary of the effect of the parameters of gas nitriding on the microstructure | 449 |
| 16.10 | References | 450 |
| 17 | Surface gas nitriding: mechanical properties, morphology, corrosion | 451 |
| 17.1 | Hardness evolution | 451 |
| 17.2 | Tensile properties and fatigue performance after nitriding | 468 |
| 17.3 | Surface morphology and roughness of Ti-6Al-2Sn-4Zr-2Mo after nitriding | 471 |
| 17.4 | Corrosion behaviour | 487 |
| 17.5 | References | 496 |
| 18 | Nitriding: modelling of hardness profiles and the kinetics | 497 |
| 18.1 | Artificial neural network modelling of microhardness profiles | 497 |
| 18.2 | Kinetics of gas nitriding | 513 |
| 18.3 | References | 530 |
| 19 | Aluminising: fabrication of Al and Ti-Al coatings by mechanical alloying | 532 |
| 19.1 | Introduction | 532 |
| 19.2 | As-synthesised state | 533 |
| 19.3 | Annealing treatment of the aluminium coating | 536 |
| 19.4 | Annealing treatment of titanium/aluminium coating | 542 |
| 19.5 | Summary | 547 |
| 19.6 | References | 548 |
| | <i>Index</i> | 549 |
