

# ENVIRONMENTAL CHEMISTRY

**NINTH  
EDITION**

**STANLEY E. MANAHAN**

# Contents

Preface .....	xxvii
Author .....	xxix

<b>Chapter 1</b>	<b>The Environment and Sustainability Science .....</b>	<b>1</b>
1.1	From the Sun to Fossil Fuels and Back Again .....	1
1.1.1	The Brief but Spectacular Era of Fossil Fuels .....	2
1.1.2	Back to the Sun .....	2
1.2	The Science of Sustainability .....	3
1.2.1	Environmental Science .....	4
1.2.2	Green Science and Technology .....	4
1.3	Chemistry and the Environment .....	4
1.4	Water, Air, Earth, Life, and Technology .....	5
1.4.1	Water and the Hydrosphere .....	5
1.4.2	Air and the Atmosphere .....	6
1.4.3	Earth, the Geosphere .....	7
1.4.4	Life, the Biosphere .....	7
1.4.5	Technology and the Environment .....	7
1.5	Ecology, Ecotoxicology, and the Biosphere .....	8
1.5.1	The Biosphere .....	8
1.5.2	Ecology .....	9
1.5.3	Ecotoxicology .....	9
1.6	Energy and Cycles of Energy .....	10
1.6.1	Light and Electromagnetic Radiation .....	10
1.6.2	Energy Flow and Photosynthesis in Living Systems .....	11
1.6.3	Energy Utilization .....	11
1.7	Human Impact and Pollution .....	12
1.7.1	Some Definitions Pertaining to Pollution .....	12
1.7.2	Pollution of Various Spheres of the Environment .....	12
1.8	Chemical Fate and Transport .....	12
1.8.1	Physical Transport .....	14
1.8.2	Reactivity .....	14
1.8.3	Mass Balance Expression .....	14
1.8.4	Distribution among Phases .....	15
1.9	Chemical Fate and Transport in the Atmosphere, Hydrosphere, and Geosphere .....	15
1.9.1	Pollutants in the Atmosphere .....	16
1.9.2	Pollutants in the Hydrosphere .....	16
1.9.3	Pollutants in the Geosphere .....	17
1.10	Environmental Mischief and Terrorism .....	17
1.10.1	Protection through Green Chemistry and Engineering .....	17
1.11	Environmental Forensics .....	18
	Literature Cited .....	19

Supplementary References .....	19
Questions and Problems .....	19
<b>Chapter 2</b> Chemistry and the Anthrosphere: Environmental Chemistry and Green Chemistry .....	23
2.1 Environmental Chemistry .....	23
2.2 Matter and Cycles of Matter .....	24
2.2.1 Carbon Cycle .....	25
2.2.2 Nitrogen Cycle .....	27
2.2.3 Oxygen Cycle .....	28
2.2.4 Phosphorus Cycle .....	28
2.2.5 Sulfur Cycle .....	28
2.3 Anthrosphere and Environmental Chemistry .....	29
2.3.1 Components of the Anthrosphere .....	30
2.4 Technology and the Anthrosphere .....	31
2.4.1 Engineering .....	32
2.5 Infrastructure .....	33
2.5.1 <i>Vulnerable Infrastructure</i> .....	34
2.6 Components of the Anthrosphere That Influence the Environment .....	35
2.7 Effects of the Anthrosphere on Earth .....	37
2.8 Integration of the Anthrosphere into the Total Environment .....	38
2.8.1 Anthrosphere and Industrial Ecology .....	39
2.9 Green Chemistry .....	40
2.9.1 Green Synthetic Chemistry .....	40
2.9.2 Risk Reduction .....	41
2.9.3 Specific Aspects of Green Chemistry .....	41
2.9.4 Three Undesirable Characteristics of Chemicals: Persistence, Bioaccumulation, and Toxicity .....	42
2.9.5 Green Chemistry and Environmental Chemistry .....	42
Literature Cited .....	42
Supplementary References .....	43
Questions and Problems .....	43
<b>Chapter 3</b> Fundamentals of Aquatic Chemistry .....	47
3.1 Importance of Water .....	47
3.2 Water: From Molecules to Oceans .....	47
3.2.1 Sources and Uses of Water: The Hydrological Cycle .....	47
3.2.2 Properties of Water, a Unique Substance .....	50
3.2.3 Water Molecule .....	50
3.3 Characteristics of Bodies of Water .....	52
3.4 Aquatic Life .....	52
3.5 Introduction to Aquatic Chemistry .....	53
3.6 Gases in Water .....	54
3.6.1 Oxygen in Water .....	54
3.7 Water Acidity and Carbon Dioxide in Water .....	55
3.7.1 Carbon Dioxide in Water .....	56
3.8 Alkalinity .....	59
3.8.1 Contributors to Alkalinity at Different pH Values .....	60
3.8.2 Dissolved Inorganic Carbon and Alkalinity .....	60
3.8.3 Influence of Alkalinity on CO <sub>2</sub> Solubility .....	61

3.9	Calcium and Other Metals in Water .....	62
3.9.1	Hydrated Metal Ions as Acids .....	62
3.9.2	Calcium in Water .....	63
3.9.3	Dissolved Carbon Dioxide and Calcium Carbonate Minerals .....	64
3.10	Complexation and Chelation .....	65
3.10.1	Occurrence and Importance of Chelating Agents in Water .....	67
3.11	Bonding and Structure of Metal Complexes .....	68
3.11.1	Selectivity and Specificity in Chelation .....	68
3.12	Calculations of Species Concentrations .....	68
3.13	Complexation by Deprotonated Ligands .....	69
3.14	Complexation by Protonated Ligands .....	70
3.15	Solubilization of Lead Ion from Solids by NTA .....	71
3.15.1	Reaction of NTA with Metal Carbonate .....	73
3.15.2	Effect of Calcium Ion upon the Reaction of Chelating Agents with Slightly Soluble Salts .....	74
3.16	Polyphosphates and Phosphonates in Water .....	75
3.16.1	Polyphosphates .....	76
3.16.2	Hydrolysis of Polyphosphates .....	76
3.16.3	Complexation by Polyphosphates .....	76
3.16.4	Phosphonates .....	77
3.17	Complexation by Humic Substances .....	77
3.18	Complexation and Redox Processes .....	79
	Literature Cited .....	79
	Supplementary References .....	79
	Questions and Problems .....	80
<b>Chapter 4</b>	<b>Oxidation–Reduction in Aquatic Chemistry.....</b>	<b>83</b>
4.1	The Significance of Oxidation–Reduction .....	83
4.2	Electron and Redox Reactions .....	85
4.3	Electron Activity and $pE$ .....	87
4.4	The Nernst equation .....	88
4.5	Reaction Tendency: Whole Reaction from Half-Reactions .....	89
4.6	The Nernst Equation and Chemical Equilibrium .....	90
4.7	The Relationship of $pE$ to Free Energy .....	91
4.8	Reactions in Terms of One Electron-Mole .....	91
4.9	The Limits of $pE$ in Water .....	93
4.10	$pE$ Values in Natural Water Systems .....	94
4.11	$pE$ – $pH$ Diagrams .....	95
4.12	Humic Substances as Natural Reductants .....	98
4.13	Photochemical Processes in Oxidation–Reduction .....	99
4.14	Corrosion .....	99
	Literature Cited .....	100
	Supplementary References .....	100
	Questions and Problems .....	101
<b>Chapter 5</b>	<b>Phase Interactions in Aquatic Chemistry.....</b>	<b>103</b>
5.1	Chemical Interactions Involving Solids, Gases, and Water .....	103
5.2	Importance and Formation of Sediments .....	103
5.2.1	Formation of Sediments .....	104
5.2.2	Organic and Carbonaceous Sedimentary Materials .....	105

5.3	Solubilities .....	106
5.3.1	Solubilities of Solids .....	106
5.3.2	Solubilities of Gases .....	107
5.4	Colloidal Particles in Water .....	108
5.4.1	Contaminant Transport by Colloids in Water .....	109
5.4.2	Occurrence of Colloids in Water .....	109
5.4.3	Kinds of Colloidal Particles .....	109
5.4.4	Colloid Stability .....	110
5.5	Colloidal Properties of Clays .....	112
5.6	Aggregation of Particles .....	113
5.6.1	Flocculation of Colloids by Polyelectrolytes .....	114
5.6.2	Flocculation of Bacteria by Polymeric Materials .....	114
5.7	Surface Sorption by Solids .....	115
5.8	Solute Exchange with Bottom Sediments .....	116
5.8.1	Trace-Level Metals in Suspended Matter and Sediments .....	117
5.8.2	Phosphorus Exchange with Bottom Sediments .....	118
5.8.3	Organic Compounds on Sediments and Suspended Matter .....	119
5.8.4	Bioavailability of Sediment Contaminants .....	120
5.9	Interstitial Water .....	121
5.10	Phase Interactions in Chemical Fate and Transport .....	122
5.10.1	Rivers .....	122
5.10.2	Lakes and Reservoirs .....	122
5.10.3	Exchange with the Atmosphere .....	122
5.10.4	Exchange with Sediments .....	123
	Literature Cited .....	124
	Supplementary References .....	124
	Questions and Problems .....	125

<b>Chapter 6</b>	<b>Aquatic Microbial Biochemistry .....</b>	<b>127</b>
6.1	<i>Aquatic Biochemical Processes</i> .....	127
6.1.1	Microorganisms at Interfaces .....	128
6.2	Algae .....	129
6.3	Fungi .....	130
6.4	Protozoa .....	130
6.5	Bacteria .....	131
6.5.1	Autotrophic and Heterotrophic Bacteria .....	131
6.5.2	Oxic and Anoxic Bacteria .....	132
6.5.3	Marine Bacteria .....	132
6.6	The Prokaryotic Bacterial Cell .....	133
6.7	<i>Kinetics of Bacterial Growth</i> .....	134
6.8	Bacterial Metabolism .....	134
6.8.1	Factors Affecting Bacterial Metabolism .....	135
6.8.2	Microbial Oxidation and Reduction .....	137
6.9	Microbial Transformations of Carbon .....	139
6.9.1	Methane-Forming Bacteria .....	139
6.9.2	Bacterial Utilization of Hydrocarbons .....	140
6.9.3	Microbial Utilization of Carbon Monoxide .....	140
6.10	Biodegradation of Organic Matter .....	140
6.10.1	Oxidation .....	141
6.10.1.1	Microbial Oxidation of Hydrocarbons .....	141
6.10.2	Other Biochemical Processes in Biodegradation of Organics .....	142

6.11	Microbial Transformations of Nitrogen .....	143
6.11.1	Nitrogen Fixation .....	144
6.11.2	Nitrification .....	145
6.11.3	Nitrate Reduction .....	146
6.11.4	Denitrification .....	146
6.11.5	Competitive Oxidation of Organic Matter by Nitrate Ion and Other Oxidizing Agents .....	146
6.12	Microbial Transformations of Phosphorus and Sulfur .....	147
6.12.1	Phosphorus Compounds .....	147
6.12.2	Sulfur Compounds .....	148
6.12.2.1	Oxidation of H <sub>2</sub> S and Reduction of Sulfate by Bacteria .....	148
6.12.3	Microorganism-Mediated Degradation of Organic Sulfur Compounds .....	149
6.13	Microbial Transformations of Halogens and Organohalides .....	149
6.14	Microbial Transformations of Metals and Metalloids .....	150
6.14.1	Acid Mine Waters .....	151
6.14.2	Microbial Transitions of Selenium .....	152
6.14.3	Microbial Corrosion .....	153
	Literature Cited .....	153
	Supplementary References .....	154
	Questions and Problems .....	154

<b>Chapter 7</b>	Water Pollution .....	159
7.1	Nature and Types of Water Pollutants .....	159
7.1.1	Markers of Water Pollution .....	159
7.2	Elemental Pollutants .....	159
7.3	Heavy Metals .....	161
7.3.1	Cadmium .....	161
7.3.2	Lead .....	161
7.3.3	Mercury .....	162
7.4	Metalloids .....	163
7.5	Organically Bound Metals and Metalloids .....	164
7.5.1	Organotin Compounds .....	165
7.6	Inorganic Species .....	165
7.6.1	Cyanide .....	165
7.6.2	Ammonia and Other Inorganic Pollutants .....	166
7.6.3	Asbestos in Water .....	167
7.7	Algal Nutrients and Eutrophication .....	167
7.8	Acidity, Alkalinity, and Salinity .....	168
7.9	Oxygen, Oxidants, and Reductants .....	169
7.10	Organic Pollutants .....	170
7.10.1	Bioaccumulation of Organic Pollutants .....	170
7.10.2	Sewage .....	170
7.10.3	Soaps, Detergents, and Detergent Builders .....	171
7.10.3.1	Soaps .....	171
7.10.3.2	Detergents .....	172
7.10.4	Naturally Occurring Chlorinated and Brominated Compounds .....	174
7.10.5	Microbial Toxins .....	174

7.11	Pesticides in Water .....	175
7.11.1	Natural Product Insecticides, Pyrethrins, and Pyrethroids .....	175
7.11.2	DDT and Organochlorine Insecticides .....	177
7.11.3	<i>Organophosphate Insecticides</i> .....	178
7.11.4	Carbamates .....	179
7.11.5	Fungicides .....	179
7.11.6	Herbicides .....	180
7.11.6.1	Bipyridilium Compounds .....	180
7.11.6.2	Herbicidal Heterocyclic Nitrogen Compounds .....	181
7.11.6.3	Chlorophenoxy Herbicides .....	181
7.11.6.4	Miscellaneous Herbicides .....	181
7.11.7	By-Products of Pesticide Manufacture .....	182
7.12	Polychlorinated Biphenyls .....	183
7.13	Emerging Water Pollutants, Pharmaceuticals, and Household Wastes .....	184
7.13.1	Bactericides .....	186
7.13.2	Estrogenic Substances in Wastewater Effluents .....	186
7.13.3	Biorefractory Organic Pollutants .....	186
7.14	Radionuclides in the Aquatic Environment .....	188
	Literature Cited .....	192
	Supplementary References .....	192
	Questions and Problems .....	193

<b>Chapter 8</b>	<b>Water Treatment .....</b>	<b>197</b>
8.1	Water Treatment and Water Use .....	197
8.2	Municipal Water Treatment .....	197
8.3	Treatment of Water for Industrial Use .....	198
8.4	Sewage Treatment .....	199
8.4.1	Primary Waste Treatment .....	199
8.4.2	Secondary Waste Treatment by Biological Processes .....	200
8.4.3	<i>Membrane Bioreactor</i> .....	203
8.4.4	Tertiary Waste Treatment .....	203
8.4.5	Physical-Chemical Treatment of Municipal Wastewater .....	203
8.5	Industrial Wastewater Treatment .....	204
8.6	Removal of Solids .....	205
8.6.1	Dissolved Air Flotation .....	206
8.6.2	Membrane Filtration Processes .....	206
8.7	Removal of Calcium and Other Metals .....	207
8.7.1	Removal of Iron and Manganese .....	211
8.8	Removal of Dissolved Organics .....	212
8.8.1	Removal of Herbicides .....	213
8.9	Removal of Dissolved Inorganics .....	214
8.9.1	<i>Ion Exchange</i> .....	214
8.9.2	Electrodialysis .....	214
8.9.3	Reverse Osmosis .....	215
8.9.4	Phosphorus Removal .....	216
8.9.5	Nitrogen Removal .....	217
8.10	Sludge .....	218
8.11	Water Disinfection .....	219
8.11.1	Chlorine Dioxide .....	220

8.11.2	Ozone and Other Oxidants	221
8.11.3	Disinfection with Ultraviolet Radiation	222
8.12	Natural Water Purification Processes	222
8.12.1	Industrial Wastewater Treatment by Soil	223
8.13	Green Water	223
8.13.1	Reuse and Recycling of Wastewater	224
8.14	Water Conservation	226
8.15	Protecting Water Supplies from Attack	227
	Literature Cited	228
	Supplementary References	228
	Questions and Problems	229

<b>Chapter 9</b>	<b>The Atmosphere and Atmospheric Chemistry</b>	<b>233</b>
9.1	Introduction	233
9.1.1	Photochemistry and Some Important Terms	233
9.1.2	Atmospheric Composition	234
9.1.3	Gaseous Oxides in the Atmosphere	234
9.1.4	Atmospheric Methane	235
9.1.5	Hydrocarbons and Photochemical Smog	236
9.1.6	Particulate Matter	236
9.1.7	Primary and Secondary Pollutants	236
9.2	Importance of the Atmosphere	236
9.3	Physical Characteristics of the Atmosphere	237
9.3.1	Variation of Pressure and Density with Altitude	237
9.3.2	Stratification of the Atmosphere	238
9.4	Energy Transfer in the Atmosphere	240
9.4.1	The Earth's Radiation Budget	241
9.5	Atmospheric Mass Transfer, Meteorology, and Weather	241
9.5.1	Atmospheric Water in Energy and Mass Transfer	243
9.5.2	Air Masses	243
9.5.3	Topographical Effects	244
9.5.4	Movement of Air Masses	244
9.5.5	Global Weather	245
9.5.6	Weather Fronts and Storms	246
9.6	Inversions and Air Pollution	247
9.7	Global Climate and Microclimate	247
9.7.1	Atmospheric Carbon Dioxide and Human Modifications of Climate	248
9.7.2	Microclimate	248
9.7.3	Effects of Urbanization on Microclimate	249
9.8	Chemical and Photochemical Reactions in the Atmosphere	249
9.8.1	Photochemical Processes	251
9.8.2	Ions and Radicals in the Atmosphere	253
9.8.2.1	Free Radicals	254
9.8.3	Hydroxyl and Hydroperoxyl Radicals in the Atmosphere	254
9.8.4	Chemical and Biochemical Processes in Evolution of the Atmosphere	256
9.9	Acid-Base Reactions in the Atmosphere	257
9.10	Reactions of Atmospheric Oxygen	258
9.11	Reactions of Atmospheric Nitrogen	259

9.12	Atmospheric Water .....	260
9.13	Influence of the Anthrosphere .....	260
9.14	Chemical Fate and Transport in the Atmosphere .....	261
	<i>Literature Cited</i> .....	262
	Supplementary References .....	262
	Questions and Problems .....	263
<b>Chapter 10</b>	<b>Particles in the Atmosphere .....</b>	<b>265</b>
10.1	Introduction .....	265
10.2	Physical Behavior of Particles in the Atmosphere .....	266
10.2.1	Size and Settling of Atmospheric Particles .....	267
10.3	Physical Processes for Particle Formation .....	267
10.4	Chemical Processes for Particle Formation .....	268
10.4.1	Inorganic Particles .....	269
10.4.2	Organic Particles .....	270
10.4.3	Polycyclic Aromatic Hydrocarbon Synthesis .....	270
10.5	The Composition of Inorganic Particles .....	271
10.5.1	Fly Ash .....	272
10.5.2	Asbestos .....	272
10.6	Toxic Metals in the Atmosphere .....	273
10.6.1	Atmospheric Mercury .....	273
10.6.2	Atmospheric Lead .....	273
10.6.3	Atmospheric Beryllium .....	274
10.7	Radioactive Particles .....	274
10.8	The Composition of Organic Particles .....	275
10.8.1	PAHs .....	275
10.8.2	Carbonaceous Particles from Diesel Engines .....	276
10.9	Effects of Particles .....	276
10.9.1	Partitioning of Semivolatile Organic Substances between Air and Particles .....	277
10.10	Water as Particulate Matter .....	277
10.11	Atmospheric Chemical Reactions Involving Particles .....	278
10.12	Control of Particulate Emissions .....	280
10.12.1	Particle Removal by Sedimentation and Inertia .....	280
10.12.2	Particle Filtration .....	280
10.12.3	Scrubbers .....	281
10.12.4	Electrostatic Removal .....	282
	<i>Literature Cited</i> .....	282
	Supplementary References .....	283
	Questions and Problems .....	283
<b>Chapter 11</b>	<b>Gaseous Inorganic Air Pollutants .....</b>	<b>285</b>
11.1	Inorganic Pollutant Gases .....	285
11.2	Production and Control of Carbon Monoxide .....	285
11.2.1	Control of Carbon Monoxide Emissions .....	285
11.3	Fate of Atmospheric CO .....	286
11.4	Sulfur Dioxide Sources and the Sulfur Cycle .....	286
11.5	Sulfur Dioxide Reactions in the Atmosphere .....	287
11.5.1	<i>Effects of Atmospheric Sulfur Dioxide</i> .....	289
11.5.2	Sulfur Dioxide Removal .....	290

11.6	Nitrogen Oxides in the Atmosphere .....	292
11.6.1	Atmospheric Reactions of NO <sub>x</sub> .....	294
11.6.2	Harmful Effects of Nitrogen Oxides .....	296
11.6.3	Control of Nitrogen Oxides .....	297
11.7	Acid Rain .....	299
11.8	Ammonia in the Atmosphere .....	299
11.9	Fluorine, Chlorine, and their Gaseous Compounds .....	299
11.9.1	Chlorine and Hydrogen Chloride .....	300
11.10	Reduced Sulfur Gases .....	301
	Literature Cited .....	303
	Supplementary References .....	303
	Questions And Problems .....	304
<b>Chapter 12</b>	<b>Organic Air Pollutants .....</b>	<b>307</b>
12.1	Organic Compounds in the Atmosphere .....	307
12.1.1	Loss of Organic Substances from the Atmosphere .....	307
12.1.2	Global Distillation and Fractionation of Persistent Organic Pollutants (POP) .....	307
12.2	Biogenic Organic Compounds .....	308
12.2.1	Removal of Atmospheric Organic Compounds by Plants .....	310
12.3	Pollutant Hydrocarbons .....	310
12.3.1	Aromatic Hydrocarbons .....	313
12.3.2	Reactions of Atmospheric Aromatic Hydrocarbons .....	314
12.4	Carbonyl Compounds: Aldehydes and Ketones .....	315
12.5	Miscellaneous Oxygen-Containing Compounds .....	317
12.5.1	Alcohols .....	317
12.5.2	Phenols .....	318
12.5.3	Ethers .....	318
12.5.4	Oxides .....	319
12.5.5	Carboxylic Acids .....	319
12.6	Organonitrogen Compounds .....	320
12.7	Organohalide Compounds .....	322
12.7.1	Chlorofluorocarbons .....	323
12.7.2	Atmospheric Reactions of Hydrofluorocarbons and Hydrochlorofluorocarbons .....	324
12.7.3	Perfluorocarbons .....	325
12.7.4	Marine Sources of Organohalogen Compounds .....	325
12.7.5	Chlorinated Dibenzo- <i>p</i> -dioxins and Dibenzofurans .....	325
12.8	Organosulfur Compounds .....	326
12.9	Organic Particulate Matter .....	327
12.10	Hazardous Air Pollutants Organic Compounds .....	327
	Literature Cited .....	329
	Supplementary References .....	330
	Questions and Problems .....	330
<b>Chapter 13</b>	<b>Photochemical Smog .....</b>	<b>333</b>
13.1	Introduction .....	333
13.2	Smog-Forming Emissions .....	334
13.2.1	Control of Exhaust Hydrocarbons .....	334
13.2.2	Automotive Emission Standards .....	337
13.2.3	Polluting Green Plants .....	337

13.3	Smog-Forming Reactions of Organic Compounds in the Atmosphere .....	338
13.3.1	Photochemical Reactions of Methane .....	338
13.4	Overview of Smog Formation .....	340
13.5	Mechanisms of Smog Formation .....	341
13.5.1	Nitrate Radical .....	347
13.5.2	Photolyzable Compounds in the Atmosphere .....	347
13.6	Reactivity of Hydrocarbons .....	348
13.7	Inorganic Products from Smog .....	348
13.8	Effects of Smog .....	349
	Literature Cited .....	352
	Supplementary References .....	352
	Questions and Problems .....	353
<b>Chapter 14</b>	<b>The Endangered Global Atmosphere .....</b>	<b>355</b>
14.1	Climate Change and Anthropogenic Effects .....	355
14.1.1	Changes in Climate .....	356
14.2	Global Warming .....	357
14.2.1	Methane and Other Greenhouse Gases .....	360
14.2.2	Particles and Global Warming .....	360
14.2.3	The Outlook for Global Warming and Associated Effects .....	361
14.3	Green Science and Technology to Alleviate Global Warming .....	361
14.3.1	Minimization .....	362
14.3.2	Counteracting Measures .....	364
14.3.3	Adaptation .....	364
14.4	Acid Rain .....	365
14.5	Stratospheric Ozone Destruction .....	368
14.5.1	Shielding Effect of the Ozone Layer .....	369
14.5.2	Ozone Layer Destruction .....	369
14.5.3	Green Chemistry Solutions to Stratospheric Ozone Depletion .....	372
14.6	Atmospheric Brown Clouds .....	373
14.6.1	Yellow Dust .....	374
14.7	Atmospheric Damage by Photochemical Smog .....	375
14.8	Nuclear Winter .....	377
14.8.1	Doomsday Visitors from Space .....	379
14.9	What Is to Be Done? .....	379
	Literature Cited .....	381
	Supplementary References .....	381
	Questions and Problems .....	382
<b>Chapter 15</b>	<b>The Geosphere and Geochemistry .....</b>	<b>385</b>
15.1	Introduction .....	385
15.2	The Nature of Solids in the Geosphere .....	386
15.2.1	Structure and Properties of Minerals .....	386
15.2.2	Kinds of Minerals .....	387
15.2.3	Evaporites .....	387
15.2.4	Volcanic Sublimates .....	388
15.2.5	Igneous, Sedimentary, and Metamorphic Rock .....	388
15.2.5.1	Rock Cycle .....	389
15.2.5.2	Stages of Weathering .....	389

15.3	Physical Form of the Geosphere .....	389
15.3.1	Plate Tectonics and Continental Drift .....	390
15.3.2	Structural Geology .....	390
15.4	Internal Processes .....	391
15.4.1	Earthquakes .....	392
15.4.2	Volcanoes .....	392
15.4.3	Surface Processes .....	393
15.5	Sediments .....	393
15.6	Clays .....	394
15.7	Geochemistry .....	395
15.7.1	Physical Aspects of Weathering .....	396
15.7.2	Chemical Weathering .....	396
15.7.3	Biological Aspects of Weathering .....	397
15.8	Groundwater in the Geosphere .....	397
15.8.1	Water Wells .....	399
15.8.2	Qanats .....	400
15.9	Environmental Aspects of the Geosphere .....	400
15.9.1	Natural Hazards .....	401
15.9.2	Anthropogenic Hazards .....	401
15.10	Earthquakes .....	401
15.11	Volcanoes .....	403
15.11.1	Mud Volcanoes .....	404
15.12	Surface Earth Movement .....	404
15.13	Stream and River Phenomena .....	406
15.14	Phenomena at the Land/Ocean Interface .....	407
15.14.1	The Threat of Rising Sea Levels .....	408
15.15	Phenomena at the Land/Atmosphere Interface .....	409
15.16	Effects of Ice .....	409
15.17	Effects of Human Activities .....	410
15.17.1	Extraction of Geospheric Resources: Surface Mining .....	411
15.17.2	Environmental Effects of Mining and Mineral Extraction .....	411
15.18	Air Pollution and the Geosphere .....	411
15.19	Water Pollution and the Geosphere .....	412
15.20	Waste Disposal and the Geosphere .....	413
15.20.1	Municipal Refuse .....	413
	Literature Cited .....	415
	Supplementary References .....	415
	Questions and Problems .....	416
<b>Chapter 16</b>	<b>Soil and Agricultural Environmental Chemistry .....</b>	<b>419</b>
16.1	Soil and Agriculture .....	419
16.1.1	Agriculture .....	419
16.1.2	Pesticides and Agriculture .....	421
16.2	Nature and Composition of Soil .....	421
16.2.1	Water and Air in Soil .....	422
16.2.2	The Inorganic Components of Soil .....	424
16.2.3	Organic Matter in Soil .....	424
16.2.4	Soil Humus .....	426
16.2.5	The Soil Solution .....	426

16.3	Acid–Base and Ion-Exchange Reactions in Soils .....	427
16.3.1	Adjustment of Soil Acidity .....	428
16.3.2	Ion-Exchange Equilibria in Soil .....	428
16.4	Macronutrients in Soil .....	429
16.5	Nitrogen, Phosphorus, and Potassium in Soil .....	430
16.5.1	Nitrogen .....	430
16.5.2	Phosphorus .....	432
16.5.3	Potassium .....	433
16.6	Micronutrients in Soil .....	433
16.7	Fertilizers .....	434
16.7.1	Fertilizer Pollution .....	435
16.8	Pollutants from Livestock Production .....	436
16.9	Pesticides and Their Residues in Soil .....	436
16.9.1	Soil Fumigants .....	437
16.10	Wastes and Pollutants in Soil .....	438
16.10.1	Biodegradation and the Rhizosphere .....	440
16.11	Soil Loss and Degradation .....	440
16.11.1	Soil Sustainability and Water Resources .....	441
16.12	Saving the Land .....	442
16.12.1	Agroforestry .....	443
16.12.2	Soil Restoration .....	443
16.13	Genetic Engineering and Agriculture .....	444
16.14	Green Chemistry and Sustainable Agriculture .....	445
16.15	Agriculture and Health .....	447
16.15.1	Food Contamination .....	448
16.16	Protecting the Food Supply from Attack .....	448
	Literature Cited .....	449
	Supplementary References .....	449
	Questions and Problems .....	450

<b>Chapter 17</b>	<b>Green Chemistry and Industrial Ecology .....</b>	<b>453</b>
17.1	Changing the Bad Old Ways .....	453
17.2	Green Chemistry .....	454
17.2.1	Twelve Principles of Green Chemistry .....	454
17.3	Reduction of Risk: Hazard and Exposure .....	456
17.3.1	The Risks of Not Taking Risks .....	458
17.4	Waste Prevention and Green Chemistry .....	458
17.5	Green Chemistry and Synthetic Chemistry .....	459
17.5.1	Yield and Atom Economy .....	459
17.6	Feedstocks .....	461
17.6.1	Biological Feedstocks .....	461
17.7	Reagents .....	463
17.8	Stoichiometric and Catalytic Reagents .....	464
17.9	Media and Solvents .....	465
17.9.1	Water, the Greenest Solvent .....	466
17.9.2	Dense Phase Carbon Dioxide as a Solvent .....	467
17.9.3	Gas-Expanded Solvents .....	468
17.10	Enhancing Reactions .....	468
17.11	Industrial Ecology .....	470
17.12	The Five Major Components of an Industrial Ecosystem .....	472

17.13	Industrial Metabolism .....	474
17.14	Materials Flow and Recycling in an Industrial Ecosystem .....	475
17.15	The Kalundborg Industrial Ecosystem .....	475
17.16	Consideration of Environmental Impacts in Industrial Ecology .....	476
17.17	Life Cycles: Expanding and Closing the Materials Loop .....	477
	17.17.1 Product Stewardship .....	479
	17.17.2 Embedded Utility .....	479
17.18	Life-Cycle Assessment .....	480
	17.18.1 Scoping in Life-Cycle Assessment .....	480
17.19	Consumable, Recyclable, and Service (Durable) Products .....	481
	17.19.1 Desirable Characteristics of Consumables .....	481
	17.19.2 Desirable Characteristics of Recyclables .....	481
	17.19.3 Desirable Characteristics of Service Products .....	482
17.20	Design for Environment .....	482
	17.20.1 Products, Processes, and Facilities .....	483
	17.20.2 Key Factors in Design for Environment .....	483
	17.20.3 Hazardous Materials in Design for Environment .....	484
17.21	Inherent Safety .....	484
	17.21.1 Increased Safety with Smaller Size .....	485
17.22	Industrial Ecology and Ecological Engineering .....	486
	Literature Cited .....	486
	Supplementary References .....	486
	Questions and Problems .....	488

**Chapter 18** Resources and Sustainable Materials ..... 491

18.1	Where to Get the Stuff We Need? .....	491
18.2	Minerals in the Geosphere .....	492
	18.2.1 Evaluation of Mineral Resources .....	492
18.3	Extraction and Mining .....	493
18.4	Metals .....	494
18.5	Metal Resources and Industrial Ecology .....	496
	18.5.1 Aluminum .....	497
	18.5.2 Chromium .....	497
	18.5.3 Copper .....	498
	18.5.4 Cobalt .....	498
	18.5.5 Lead .....	498
	18.5.6 Lithium .....	498
	18.5.7 Potassium .....	499
	18.5.8 Zinc .....	500
18.6	Nonmetal Mineral Resources .....	500
18.7	Phosphates .....	501
18.8	Sulfur .....	502
	18.8.1 Gypsum .....	503
18.9	Wood: A Major Renewable Resource .....	503
18.10	Extending Resources through the Practice of Industrial Ecology .....	504
	18.10.1 Metals .....	504
	18.10.2 Plastics and Rubber .....	505
	18.10.3 Lubricating Oil .....	506
	Literature Cited .....	506
	Supplementary References .....	506
	Questions and Problems .....	507

<b>Chapter 19</b>	<b>Sustainable Energy: The Key to Everything</b>	509
19.1	Energy Problem	509
19.2	Nature of Energy	510
19.3	Sources of Energy Used in the Anthrosphere	511
19.4	Energy Devices and Conversions	513
19.4.1	Fuel Cells	516
19.5	Green Technology and Energy Conversion Efficiency	517
19.6	<i>Energy Conservation and Renewable Energy Sources</i>	518
19.7	Petroleum and Natural Gas	520
19.8	Coal	521
19.8.1	Coal Conversion	521
19.9	Carbon Sequestration for Fossil Fuel Utilization	523
19.10	Industrial Ecology for Energy and Chemicals	524
19.11	Nuclear Energy	526
19.11.1	Nuclear Fusion	528
19.12	Geothermal Energy	528
19.13	The Sun: An Ideal, Renewable Energy Source	529
19.14	Energy from Moving Air and Moving Water	531
19.14.1	Surprising Success of Wind Power	531
19.14.2	Energy from Moving Water	533
19.14.3	<i>Energy from Moving Water without Dams</i>	534
19.15	Biomass Energy	534
19.15.1	Ethanol Fuel	535
19.15.2	Biodiesel Fuel	535
19.15.3	Unrealized Potential of Lignocellulose Fuels	536
19.15.4	Biogas	539
19.16	Hydrogen as a Means to Store and Utilize Energy	540
19.17	Combined Power Cycles	540
19.18	A System of Industrial Ecology for Methane Production	541
	Literature Cited	542
	Supplementary References	542
	Questions and Problems	543
<b>Chapter 20</b>	<b>Nature, Sources, and Environmental Chemistry of Hazardous Wastes</b>	545
20.1	Introduction	545
20.1.1	History of Hazardous Substances	545
20.1.2	Legislation	546
20.2	Classification of Hazardous Substances and Wastes	547
20.2.1	Characteristics and Listed Wastes	547
20.2.2	Hazardous Wastes	548
20.2.2.1	Hazardous Wastes and Air and Water Pollution Control	548
20.3	Sources of Wastes	549
20.3.1	Types of Hazardous Wastes	550
20.3.2	Hazardous Waste Generators	550
20.4	Flammable and Combustible Substances	551
20.4.1	Combustion of Finely Divided Particles	552
20.4.2	Oxidizers	552
20.4.3	<i>Spontaneous Ignition</i>	553
20.4.4	Toxic Products of Combustion	553

20.5	Reactive Substances .....	553
20.5.1	Chemical Structure and Reactivity .....	554
20.6	Corrosive Substances .....	555
20.6.1	Sulfuric Acid .....	556
20.7	Toxic Substances .....	556
20.7.1	Toxicity Characteristic Leaching Procedure .....	556
20.8	Physical Forms and Segregation of Wastes .....	557
20.9	Environmental Chemistry of Hazardous Wastes .....	558
20.10	Physical and Chemical Properties of Hazardous Wastes .....	559
20.11	Transport, Effects, and Fates of Hazardous Wastes .....	559
20.11.1	Physical Properties of Wastes .....	560
20.11.2	Chemical Factors .....	560
20.11.3	Effects of Hazardous Wastes .....	560
20.11.4	Fates of Hazardous Wastes .....	561
20.12	Hazardous Wastes and the Anthrosphere .....	561
20.13	Hazardous Wastes in the Geosphere .....	562
20.14	Hazardous Wastes in the Hydrosphere .....	564
20.15	Hazardous Wastes in the Atmosphere .....	566
20.16	Hazardous Wastes in the Biosphere .....	567
20.16.1	Microbial Metabolism in Waste Degradation .....	567
20.16.2	Ecotoxicology of Hazardous Wastes .....	568
20.17	Hazardous Substances in Terrorism .....	569
20.17.1	Detection of Hazardous Substances .....	570
20.17.2	Removing Hazardous Agents .....	571
	Literature Cited .....	571
	Supplementary References .....	572
	Questions and Problems .....	572

**Chapter 21** Industrial Ecology for Waste Minimization, Utilization, and Treatment ..... 575

21.1	Introduction .....	575
21.2	Waste Reduction and Minimization .....	575
21.3	Recycling .....	577
21.3.1	Examples of Recycling .....	578
21.3.2	Waste Oil Utilization and Recovery .....	578
21.3.2.1	Recycling Waste Oil .....	578
21.3.2.2	Waste Oil Fuel .....	579
21.3.3	Waste Solvent Recovery and Recycle .....	579
21.3.4	Recovery of Water from Wastewater .....	580
21.4	Physical Methods of Waste Treatment .....	580
21.4.1	Methods of Physical Treatment .....	581
21.4.1.1	Phase Separations .....	582
21.4.1.2	Phase Transition .....	582
21.4.1.3	Phase Transfer .....	583
21.4.1.4	Molecular Separation .....	584
21.5	Chemical Treatment: An Overview .....	584
21.5.1	Acid–Base Neutralization .....	584
21.5.1.1	Acid Recovery .....	584
21.5.2	Chemical Precipitation .....	585
21.5.2.1	Precipitation of Metals .....	585
21.5.2.2	Coprecipitation of Metals .....	586
21.5.3	Oxidation–Reduction .....	586

21.5.4	Electrolysis .....	587
21.5.5	Hydrolysis .....	588
21.5.6	Chemical Extraction and Leaching .....	588
21.5.7	Ion Exchange .....	589
21.6	Green Waste Treatment by Photolysis and Sonolysis .....	589
21.7	Thermal Treatment Methods .....	590
21.7.1	Incineration .....	591
21.7.1.1	Incinerable Wastes .....	591
21.7.2	Hazardous Waste Fuel .....	591
21.7.3	Incineration Systems .....	591
21.7.4	Types of Incinerators .....	592
21.7.5	Combustion Conditions .....	592
21.7.6	<i>Effectiveness of Incineration</i> .....	593
21.7.7	Wet Air Oxidation .....	593
21.7.8	UV-Enhanced Wet Oxidation .....	593
21.7.9	<i>Destruction of Hazardous Wastes in Cement Manufacture</i> .....	593
21.8	Biodegradation of Wastes .....	594
21.8.1	Biodegradability .....	594
21.8.2	Aerobic Treatment .....	595
21.8.3	Anaerobic Treatment .....	595
21.8.4	Reductive Dehalogenation .....	595
21.9	Phytoremediation .....	596
21.10	Land Treatment and Composting .....	596
21.10.1	Land Treatment .....	596
21.10.2	Composting .....	597
21.11	Preparation of Wastes for Disposal .....	597
21.11.1	Immobilization .....	597
21.11.2	Stabilization .....	597
21.11.3	Solidification .....	597
21.11.3.1	Sorption to a Solid Matrix Material .....	598
21.11.3.2	Thermoplastics and Organic Polymers .....	598
21.11.3.3	Vitrification .....	598
21.11.3.4	<i>Solidification with Cement</i> .....	599
21.11.3.5	Solidification with Silicate Materials .....	599
21.11.3.6	Encapsulation .....	599
21.11.4	Chemical Fixation .....	599
21.12	Ultimate Disposal of Wastes .....	600
21.12.1	Disposal Aboveground .....	600
21.12.2	Landfill .....	600
21.12.3	Surface Impoundment of Liquids .....	601
21.12.4	Deep-Well Disposal of Liquids .....	601
21.13	Leachate and Gas Emissions .....	601
21.13.1	Leachate .....	601
21.13.2	Hazardous Waste Leachate Treatment .....	602
21.13.3	Gas Emissions .....	602
21.14	<i>In Situ</i> Treatment .....	602
21.14.1	<i>In Situ</i> Immobilization .....	602
21.14.2	Vapor Extraction .....	603
21.14.3	Solidification <i>In Situ</i> .....	603
21.14.4	Detoxification <i>In Situ</i> .....	603
21.14.5	Permeable Bed Treatment .....	603

21.14.6	<i>In Situ</i> Thermal Processes	604
21.14.7	Soil Washing and Flushing	604
	Literature Cited	604
	Supplementary References	605
	Questions and Problems	606
<b>Chapter 22</b>	<b>Environmental Biochemistry</b>	<b>609</b>
22.1	Biochemistry	609
22.1.1	Biomolecules	609
22.2	Biochemistry and the Cell	610
22.2.1	Major Cell Features	610
22.3	Proteins	611
22.3.1	Protein Structure	613
22.3.2	Denaturation of Proteins	614
22.4	Carbohydrates	614
22.5	Lipids	616
22.6	Enzymes	618
22.7	Nucleic Acids	620
22.7.1	Nucleic Acids in Protein Synthesis	623
22.7.2	Modified DNA	623
22.8	Recombinant DNA and Genetic Engineering	623
22.9	Metabolic Processes	624
22.9.1	Energy-Yielding Processes	624
22.10	Metabolism of Xenobiotic Compounds	625
22.10.1	Phase I and Phase II Reactions	625
	Literature Cited	626
	Supplementary References	626
	Questions and Problems	626
<b>Chapter 23</b>	<b>Toxicological Chemistry</b>	<b>629</b>
23.1	Introduction to Toxicology and Toxicological Chemistry	629
23.1.1	Toxicology	629
23.1.2	Synergism, Potentiation, and Antagonism	631
23.2	Dose–Response Relationships	631
23.3	Relative Toxicities	632
23.3.1	Nonlethal Effects	632
23.4	Reversibility and Sensitivity	634
23.4.1	Hypersensitivity and Hyposensitivity	634
23.5	Xenobiotic and Endogenous Substances	634
23.6	Toxicological Chemistry	635
23.6.1	Toxicological Chemistry Defined	635
23.6.2	Toxicants in the Body	635
23.6.2.1	Phase I Reactions	635
23.6.2.2	Phase II Reactions	636
23.7	Kinetic Phase and Dynamic Phase	637
23.7.1	Kinetic Phase	637
23.7.2	Dynamic Phase	637
23.7.2.1	Primary Reaction in the Dynamic Phase	637
23.7.2.2	Biochemical Effects in the Dynamic Phase	638
23.7.2.3	Responses to Toxicants	639

23.8	Teratogenesis, Mutagenesis, Carcinogenesis, and Effects On the Immune and Reproductive Systems .....	639
23.8.1	Teratogenesis .....	639
23.8.2	Mutagenesis .....	639
23.8.2.1	Biochemistry of Mutagenesis .....	640
23.8.3	Carcinogenesis .....	641
23.8.3.1	Biochemistry of Carcinogenesis .....	642
23.8.3.2	Alkylating Agents in Carcinogenesis .....	642
23.8.4	Testing for Carcinogens .....	643
23.8.4.1	Bruce Ames Test .....	644
23.8.5	Immune System Response .....	644
23.8.6	Endocrine Disruption .....	644
23.9	Health Hazards .....	644
23.9.1	Assessment of Potential Exposure .....	645
23.9.2	Epidemiological Evidence .....	645
23.9.3	Estimation of Health Effects Risks .....	646
23.9.4	Risk Assessment .....	646
	Literature Cited .....	646
	Supplementary References .....	646
	Questions and Problems .....	647

## **Chapter 24** Toxicological Chemistry of Chemical Substances ..... 649

24.1	Introduction .....	649
24.1.1	ATSDR Toxicological Profiles .....	649
24.2	Toxic Elements and Elemental Forms .....	649
24.2.1	Ozone .....	649
24.2.2	White Phosphorus .....	651
24.2.3	Elemental Halogens .....	651
24.2.4	Heavy Metals .....	651
24.3	Toxic Inorganic Compounds .....	652
24.3.1	Cyanide .....	652
24.3.2	Carbon Monoxide .....	652
24.3.3	Nitrogen Oxides .....	653
24.3.4	Hydrogen Halides .....	653
24.3.4.1	Hydrogen Fluoride .....	653
24.3.4.2	Hydrogen Chloride .....	654
24.3.5	Interhalogen Compounds and Halogen Oxides .....	654
24.3.6	Inorganic Compounds of Silicon .....	654
24.3.7	Asbestos .....	655
24.3.8	Inorganic Phosphorus Compounds .....	655
24.3.9	<i>Inorganic Compounds of Sulfur</i> .....	655
24.3.10	Perchlorate .....	656
24.3.11	Organometallic Compounds .....	656
24.3.11.1	Organolead Compounds .....	656
24.3.11.2	Organotin Compounds .....	657
24.3.11.3	Carbonyls .....	657
24.3.11.4	Reaction Products of Organometallic Compounds .....	657
24.4	Toxicology of Organic Compounds .....	657
24.4.1	Alkane Hydrocarbons .....	657
24.4.2	Alkene and Alkyne Hydrocarbons .....	658

24.4.3	Benzene and Aromatic Hydrocarbons .....	658
24.4.3.1	Toluene .....	659
24.4.3.2	Naphthalene .....	659
24.4.3.3	Polycyclic Aromatic Hydrocarbons .....	659
24.4.4	Oxygen-Containing Organic Compounds .....	660
24.4.4.1	Oxides .....	660
24.4.4.2	Alcohols .....	660
24.4.5	Phenols .....	661
24.4.5.1	Aldehydes and Ketones .....	661
24.4.5.2	Carboxylic Acids .....	662
24.4.5.3	Ethers .....	662
24.4.5.4	Acid Anhydrides .....	662
24.4.5.5	Esters .....	662
24.4.6	Organonitrogen Compounds .....	663
24.4.6.1	Aliphatic Amines .....	663
24.4.6.2	Carbocyclic Aromatic Amines .....	664
24.4.6.3	Pyridine .....	664
24.4.6.4	Acrylamide: Toxic Potato Chips? .....	664
24.4.6.5	Nitriles .....	665
24.4.6.6	Nitro Compounds .....	665
24.4.6.7	Nitrosamines .....	665
24.4.6.8	Isocyanates and Methyl Isocyanate .....	665
24.4.6.9	Organonitrogen Pesticides .....	665
24.4.7	Organohalide Compounds .....	666
24.4.7.1	Alkyl Halides .....	666
24.4.7.2	Alkenyl Halides .....	667
24.4.7.3	Aryl Halides .....	667
24.4.8	Organohalide Pesticides .....	668
24.4.8.1	TCDD .....	668
24.4.8.2	Chlorinated Phenols .....	669
24.4.9	Organosulfur Compounds .....	669
24.4.9.1	Sulfur Mustards .....	669
24.4.10	Organophosphorus Compounds .....	670
24.4.10.1	Organophosphate Esters .....	670
24.4.10.2	Phosphorothionate and Phosphorodithioate Ester Insecticides .....	670
24.4.10.3	Organophosphorus Military Poisons .....	671
24.5	Toxic Natural Products .....	671
	Literature Cited .....	672
	Supplementary References .....	672
	Questions and Problems .....	673

**Chapter 25** Chemical Analysis of Water and Wastewater ..... 677

25.1	General Aspects of Environmental Chemical Analysis .....	677
25.1.1	Error and Quality Control .....	677
25.1.2	Water Analysis Methods .....	678
25.2	Classical Methods .....	678
25.3	Spectrophotometric Methods .....	679
25.3.1	Absorption Spectrophotometry .....	679
25.3.2	Atomic Absorption and Emission Analyses .....	680
25.3.3	Atomic Emission Techniques .....	682

25.4	Electrochemical Methods of Analysis .....	682
25.5	Chromatography .....	683
25.5.1	High-Performance Liquid Chromatography .....	685
25.5.2	Chromatographic Analysis of Water Pollutants .....	686
25.5.3	Ion Chromatography .....	686
25.6	Mass Spectrometry .....	686
25.7	Analysis of Water Samples .....	687
25.7.1	Physical Properties Measured in Water .....	687
25.7.2	Water Sampling .....	687
25.7.2.1	Extractors .....	688
25.7.3	Water Sample Preservation .....	689
25.7.4	Total Organic Carbon in Water .....	689
25.7.5	Measurement of Radioactivity in Water .....	690
25.7.6	Biological Toxins .....	690
25.7.7	Summary of Water Analysis Procedures .....	690
25.8	Automated Water Analyses .....	692
25.9	Speciation .....	692
25.10	Emerging Contaminants in Water Analysis .....	693
25.11	Chiral Contaminants .....	694
	Literature Cited .....	695
	Supplementary References .....	695
	Questions and Problems .....	696
<b>Chapter 26</b>	<b>Analysis of Wastes and Solids .....</b>	<b>697</b>
26.1	Introduction .....	697
26.2	Sample Digestion for Elemental Analysis .....	698
26.3	Analyte Isolation for Organics Analysis .....	698
26.3.1	Solvent Extraction .....	698
26.3.2	Supercritical Fluid Extraction .....	699
26.3.3	Pressurized Liquid Extraction and Subcritical Water Extraction .....	699
26.4	Sample Cleanup .....	700
26.5	Sample Preparation for VOCs .....	701
26.6	Bioassay and Immunoassay Screening of Wastes .....	702
26.7	Determination of Chelating Agents .....	702
26.8	Toxicity Characteristic Leaching Procedure .....	703
	Literature Cited .....	704
	Supplementary References .....	704
	Questions and Problems .....	705
<b>Chapter 27</b>	<b>Analysis of the Atmosphere and Air Pollutants .....</b>	<b>707</b>
27.1	Atmospheric Monitoring .....	707
27.1.1	Air Pollutants Measured .....	707
27.2	Sampling .....	708
27.3	Methods of Analysis .....	709
27.4	Determination of Sulfur Dioxide .....	710
27.5	Nitrogen Oxides .....	711
27.6	Analysis of Oxidants .....	712

27.7	Analysis of Carbon Monoxide .....	713
27.8	Determination of Hydrocarbons and Organics .....	714
27.8.1	Determination of Specific Organics in the Atmosphere .....	714
27.9	Analysis of Particulate Matter .....	714
27.9.1	Filtration .....	714
27.9.2	Collection by Impactors .....	716
27.9.3	Particle Analysis .....	716
27.9.4	X-Ray Fluorescence .....	716
27.9.5	Determination of Lead in Particulate Matter .....	717
27.10	Direct Spectrophotometric Analysis of Gaseous Air Pollutants .....	718
	Literature Cited .....	719
	Supplementary References .....	720
	Questions and Problems .....	720
<b>Chapter 28</b>	<b>Analysis of Biological Materials and Xenobiotics .....</b>	<b>723</b>
28.1	Introduction .....	723
28.2	Indicators of Exposure to Xenobiotics .....	723
28.3	Determination of Metals .....	725
28.3.1	Direct Analysis of Metals .....	725
28.3.2	Metals in Wet-Ashed Blood and Urine .....	725
28.3.3	Extraction of Metals for Atomic Absorption Analysis .....	725
28.4	Determination of Nonmetals and Inorganic Compounds .....	726
28.5	Determination of Parent Organic Compounds .....	726
28.6	Measurement of Phase I and Phase II Reaction Products .....	727
28.6.1	Phase I Reaction Products .....	727
28.6.2	Phase II Reaction Products .....	728
28.6.3	Mercapturates .....	729
28.7	Determination of Adducts .....	729
28.8	The Promise of Immunological Methods .....	730
	Literature Cited .....	732
	Supplementary References .....	732
	Questions and Problems .....	733
<b>Index</b>	.....	<b>735</b>
