

Third Edition

Applied Weed Science

Including the Ecology and
Management of Invasive Plants

Merrill A. Ross

Carole A. Lembi

CONTENTS

Preface	ix	Levels of Complexity	36
Acknowledgments	xi	Succession and Disturbance	38
Chapter 1		Population and Community Ecology	
WEEDS AND THEIR IMPORTANCE	1	of Weeds	39
What Are Weeds?	1	Competition for Resources	40
The Undesirable Effects of Weeds	2	Resource Allocation	40
Impacts on Crops	2	Ecosystem (Landscape) Ecology of Weeds	43
Direct Impacts on Humans	5	Fragmentation and Weed Invasion	43
Impact on Livestock	7	Impacts of Invasive Species	44
The Concept of Invasive Species	7		
Impact of Invasive Plants	8	Chapter 4	
		THE MECHANISMS OF PLANT	
Chapter 2		INVASIONS	53
WHY WEEDS ARE SUCCESSFUL	12	Reasons Why Some Plant Species Invade	54
Classification of Weeds	12	Release From Enemies	54
Interference with Growth of Desirable		Life History Characteristics	55
Plants	13	Traits That Enhance Competitiveness	56
Competition	14	Geographic Range	62
Allelopathy	18	Taxonomic Grouping	63
Parasitism	19	Characteristics of Habitats Vulnerable	
Persistence of Weeds	21	to Invasion	64
Weed Seeds	22	Disturbance	64
Seed Banks	25	Species Richness	64
How Long Does It Take to Deplete		Resource Availability	64
a Soil of Its Seeds?	31	Resistance to Invasion	65
Vegetative Reproductive Structures	32	The Stages of Invasion	65
		Introduction	65
Chapter 3		Naturalization	66
THE ECOLOGY OF WEEDS		Invasion	67
AND INVASIVE PLANTS	35	Time Lags and Bottlenecks	67
What Is Ecology and Why Is It Important?	35	Impact of Global Change on Plant Invasion	68
Some Concepts Relevant to Weed Ecology	36	Carbon Dioxide and Climate Change	68
		Nitrogen Deposition	69
		Models for Predicting Invasion	70

Chapter 5		Chapter 8	
THE PLANT SYSTEM	74	INTRODUCTION TO HERBICIDES	132
The Plant System	74	History	132
Plant Structures	74	The Early Years (1900–1941)	132
Plant Growth	78	2,4-D to Glyphosate (1941–1975)	133
Plant Development	79	Selective Postemergence Herbicides	
Transport Pathways	79	(1975–1995)	134
Weed Life Cycles	83	Herbicide-Resistant Crops and Weed	
Annuals	84	Populations (1995–2008)	134
Biennials	85	Characteristics of Herbicides	135
Perennials	85	Herbicide Nomenclature	135
Shoot Regeneration	86	Herbicide Classification	136
Annuals	86	Herbicide Chemistry	137
Biennials	86	How Chemistry Affects Herbicidal	
Herbaceous Simple Perennials	87	Properties	138
Creeping Perennials	89	Concerns Regarding Herbicide Use	142
Woody Perennials	89	Movement Off Target	142
		Effects on Human Health and	
		the Environment	144
		Herbicide Registration	151
Chapter 6		Chapter 9	
THE SOIL SYSTEM	91	PLANT-HERBICIDE	
The Soil System	91	INTERACTIONS	154
The Soil Phases	92	Herbicide Uptake	154
Colloidal Properties	93	Soil-Applied Herbicides	154
Living Components	93	Foliar-Applied Herbicides	155
Soil as an Open System	94	Herbicide Movement	160
Soil as a Buffered System	94	Symplastically Translocated Herbicides	160
Weeds and Soil	94	Apoplastically Translocated Herbicides	162
Weed Control Practices and the Soil	95	Nontranslocated (Contact)	
General Considerations	95	Herbicides	163
Tillage	95	Herbicide Mode of Action	163
No-Till Cropping	96	Our Mode-of-Action Scheme	165
Surface Conditions	96	Herbicide Families with Significant	
		Foliar Use	169
		Herbicide Families Applied Almost	
		Exclusively to the Soil	179
Chapter 7		Herbicide Fate	181
MANAGEMENT METHODS		Metabolic Transformation	182
FOR CROPLAND AND INVASIVE		Conjugation	182
WEEDS	98	Compartmentalization	182
New Directions in Weed Management	98	Final Processing	185
Knowledgeable Practitioners Are		Plant-Related Selectivity	185
Required	99	Plant Age and Stage	
A Scientific Approach to Solving Weed		of Development	185
and Invasive Plant Problems	99	Plant Height	185
Objectives of Weed Management	99	Differential Retention	185
Stepwise Procedures for Solving Weed		Differential Penetration	186
and Invasive Plant Problems	100	Differential Translocation	186
The Need for Realistic Expectations	105	Differential Metabolism/	
Management Methods for Cropland		Conjugation	187
and Invasive Weeds	106	Role of Varietal Differences in	
Preventive Practices	106	Selectivity	188
Mechanical and Physical Practices	110	Role of Other Chemicals in Selectivity	
Cultural Practices (Crop Competition		and Activity	189
and Management)	118		
Biological Control Practices	122		
Chemical Control Practices	128		

Chapter 10			
SOIL-HERBICIDE INTERACTIONS	192		
Fate of Herbicides in the Soil	192		
Adsorption	192		
Movement	197		
Degradation	199		
Soil, Herbicides, and Weed Control	203		
Contact with Developing Plant Structures	204		
Availability	205		
Presence of Soil Moisture	207		
Soil-Herbicide Interactions in Reduced-Tillage Systems	207		
Chapter 11			
HERBICIDE RESISTANCE	209		
Weed Resistance to Herbicides	209		
Tolerance, Susceptibility, and Resistance	209		
Time Periods for Appearance of Resistance	211		
Development of Resistant Biotypes within a Species	213		
Factors Determining Rapid Development of Herbicide Resistance	214		
Management Practices to Minimize the Selection of Herbicide-Resistant Weeds	218		
A Socioeconomic Problem	220		
Period Required for a Field to Recover From Resistant Populations	220		
Crop Resistance to Herbicides	220		
Herbicide-Resistant Crop Cultivars from Standard Selection Techniques	221		
Herbicide-Resistant Crop Cultivars from Genetic Engineering	221		
Benefits of Herbicide-Resistant Crops	221		
Concerns Regarding the Use of Herbicide-Resistant Crops	222		
Chapter 12			
HERBICIDE GROUPS WITH SIGNIFICANT FOLIAR USE: SYMPLASTICALLY TRANSLOCATED HERBICIDES SHOWING DELAYED INITIAL SYMPTOMS ON NEW GROWTH	226		
Herbicides and Herbicide Groups	226		
Symplastically Translocated Herbicides Showing Delayed Initial Symptoms on New Growth	227		
Synthetic Auxins (WSSA-4, HRAC-O)	227		
Phenoxy Acids	229		
Benzoic Acids	232		
Pyridinecarboxylic Acids	234		
Quinoline Carboxylic Acids	236		
Auxin Transport Inhibitors (WSSA-19, HRAC-P)	236		
Aromatic Amino Acid (EPSP Synthase) Inhibitor (WSSA-9, HRAC-G)	237		
Branched-Chain Amino Acid (ALS) Inhibitors (WSSA-2, HRAC-B)	239		
Sulfonylureas	241		
Imidazolinones	246		
Triazolopyrimidine Sulfonanilides	249		
Pyrimidinylthiobenzoates	250		
Sulfonylaminocarbonyltriazolinones	250		
Carotenoid Pigment Inhibitors (Bleachers or Whiteners)	251		
Grass-Specific Lipid Biosynthesis (ACCase) Inhibitors (WSSA-1, HRAC-A)	254		
Aryloxyphenoxypropionates (the Fops)	254		
Cyclohexanediones (the Dims)	256		
Miscellaneous Herbicides	258		
Organic Arsenicals (WSSA-17 and -27, HRAC-Z and -NC)	258		
Asulam and Fosamine	259		
Chapter 13			
HERBICIDE GROUPS WITH SIGNIFICANT FOLIAR USE: APOPLASTICALLY TRANSLOCATED HERBICIDES SHOWING DELAYED INITIAL SYMPTOMS ON OLD GROWTH	260		
Photosystem (PS) II Classical			
Photosynthetic Inhibitors, Site A (WSSA-5, HRAC-C1)	262		
Triazines (<i>s</i> -Triazines and Triazinones)	262		
Uracils	265		
Phenylcarbamates and Pyridazinones	266		
PS II Classical Photosynthetic Inhibitors, Different Binding Behavior at Site A (WSSA-7, HRAC-C2)	266		
Ureas	266		
Amides	268		
PS II Rapidly Acting Photosynthetic Inhibitors (WSSA-6, HRAC-C3)	268		
Bentazon	269		
Chapter 14			
HERBICIDE GROUPS WITH SIGNIFICANT FOLIAR USE: NONTRANSLOCATED HERBICIDES SHOWING INITIAL LOCALIZED INJURY	271		
PS I Electron Diverters (WSSA-22, HRAC-D)	271		
Protoporphyrinogen Oxidase (Protox or PPG) Inhibitors (WSSA-14, HRAC-E)	273		
Diphenylethers	273		
Oxadiazoles	275		

N-phenylphthalimides	275	Recognizing and Evaluating Levels of Control	308
Thiadazoles	276	Understanding the Probable Impacts of Individual Control and Management Practices	308
Triazolinones	276	Developing a Multicomponent and Continuing Management Program	311
Glutamine Synthesis Inhibitors (WSSA-10, HRAC-H)	277	Control of Creeping Perennial Grasses and Other Monocots	311
Chapter 15		Johnsongrass	312
HERBICIDE GROUPS APPLIED ALMOST EXCLUSIVELY TO THE SOIL: INHIBITORS OF CELL DIVISION IN GERMINATING SEEDS AND SEEDLINGS	279	Quackgrass	317
Microtubule/Spindle Apparatus (Root) Inhibitors (WSSA-3, HRAC-K1)	279	Yellow and Purple Nutsedges	319
Dinitroanilines	279	Wild Garlic	324
Other Microtubule/Spindle Apparatus (Root) Inhibitors	283	Control of Creeping Perennial Broadleaves	327
Shoot Inhibitors	284	Canada Thistle	327
Chloroacetamides and Oxyacetamides (WSSA-15, HRAC-K3)	284	Field Bindweed	331
Thiocarbamates (WSSA-8, HRAC-N)	287	Chapter 18	
Cell Wall Formation Inhibitors	288	WEED LIFE CYCLES AND MANAGEMENT: WOODY PERENNIALS	334
Nitriles (WSSA-20, HRAC-L) and Others	289	Factors That Contribute to the Success of Woody Perennial Weeds	334
Miscellaneous Cell Division Inhibitors	290	Approaches to the Control of Woody Perennials	335
Bensulide	290	Kudzu	342
Chapter 16		Multiflora Rose	345
WEED LIFE CYCLES AND MANAGEMENT: PLANTS FROM SEED, BIENNIALS, AND SIMPLE HERBACEOUS PERENNIALS	292	Bush Honeysuckles	346
Controlling Weeds Establishing from Seeds	292	Chapter 19	
Annual Weeds	293	WEED MANAGEMENT IN ANNUAL CROPS	350
Biennial Weeds	294	Annual Crops and Weed Competition	350
Musk and Bull Thistles	296	Critical Period	351
Wild Carrot	299	Agronomic and Horticultural Crops	353
Garlic Mustard	300	Timing of Weed Control Practices to Fit Weed Emergence and Crop Development	354
Simple Herbaceous Perennial Weeds	302	Control Practices for Weeds Established Prior to or at Planting	354
Dandelion	303	Selective Control of Germinating Weeds Emerging with the Crop	354
Chapter 17		Selective Control of Emerged or Late-Emerging Weeds in an Emerged Crop	355
WEED LIFE CYCLES AND MANAGEMENT: CREEPING HERBACEOUS PERENNIALS	305	Tillage Systems for Annual Crops	355
Factors That Contribute to the Success of Creeping Perennial Weeds	306	Crops Grown Under Conventional Tillage	357
Reproductive and Survival Mechanisms	306	Conservation Tillage Systems	358
Cropping and Management Practices	306	Weed Control Practices in Annual Crops	361
Approaches to the Control of Creeping Perennial Weeds	307	Corn	362
Adopting a Realistic Approach	307	Soybeans	365
Being Aware of Susceptible Growth Stages	307	Tomatoes	371

Onions	372	Conditions for Aquatic Plant Growth	433
Small Grains	373	Light	433
Ornamentals	377	Nutrients	433
Organically Grown Crops	379	Temperature	435
		Substrate	435
Chapter 20		Aquatic Plant Management Methods	435
WEED MANAGEMENT		Preventive Practices	435
IN PERENNIAL CROPS AND		Habitat Alteration	437
NATURAL ECOSYSTEMS	383	Mechanical and Physical Practices	440
Weeds in Management Systems		Biological Control Practices	441
Dominated by Perennial Plants	383	Chemical Control Practices	444
Range of External Inputs versus Return	384	Diagnosis and Prevention of	
Systems with Extensive External Inputs	384	Fish-Related Problems	457
Systems with Continuing but Moderate		Fish Stunting	457
to Minimal External Inputs	384	Fish Kills	457
Systems with Infrequent to No		Winter Fish Kills	458
External Inputs	384	Diagnosis	458
Establishment of Perennial Crops		Chapter 22	
and Plant Communities	385	HERBICIDE FORMULATIONS AND	
Site Preparation	385	PACKAGING, CARRIERS, SPRAY	
Planting	386	ADDITIVES, AND TANK MIXES	460
Initial Weed Suppression	386	Herbicide Formulations and Packaging	460
Propagation Practices for Perennials	387	General Considerations	461
Weed Control Practices in Perennial		Sprayable Formulations	461
Systems	387	Dry Application Formulations	463
Herbaceous Crops with Limited Tillage	387	Trends in Formulation and	
Lawn-Quality Turf (A Frequently-		Packaging Technology	463
Mowed Herbaceous Crop)	391	Herbicide Carriers	464
Well-Managed Pastures and Haycrops		Liquid Carriers	464
(Forages)	395	Dry Carriers	465
Roadsides, Waterways, Filter Strips,		Gas Carriers	465
and Other Noncropped Sods	397	Spray Additives	465
Native Prairie Plantings	399	Surfactants	466
Grazing Lands (Permanent Pastures,		Oil-Based Adjuvants	472
Rangelands)	400	Fertilizer Salts	473
Woody Plants	402	Tank Mixes Involving Herbicide	473
Natural Areas and Ecosystems		Tank Mix Interactions	473
(Wildlands)	408	Chapter 23	
Bare Soil Sites/Total Vegetation Control	414	HERBICIDE APPLICATION	476
Persistent Herbicides	414	Application Equipment	477
Precautions for Use of Highly Persistent		Conventional Agricultural Sprayers	477
Herbicides	415	Devices for Above-Crop Placement	483
		Compressed Gas-Powered Sprayers	485
Chapter 21		Keeping Herbicides on Target	486
AQUATIC PLANT MANAGEMENT	418	Reducing Spray Drift	489
Problems Caused by Aquatic Weeds	418	Herbicide Incorporation Techniques	493
Major Aquatic Plant Groups and Habitats	421	and Equipment	493
Invasive Species	422	Rain and Irrigation Incorporation	494
Submersed and Free-Floating Invaders	423	Advantages of Mechanical Incorporation	494
Effects of Submersed and Free-Floating		Disadvantages of Mechanical	
Invaders on Native Submersed		Incorporation	495
Species	426	Incorporation Techniques	495
Emergent Invaders	427	Implements Used for Incorporation	496
Algal and Fern Invaders	430		
Goals for Aquatic Plant Managers	432		

Equipment Calibration and Associated Procedures	497	Purposes of Tillage	518
Spray Equipment	497	Conservation Tillage Systems	518
Granular Application Equipment	500		
Calibrating Granular Applicators for Band Application	503	Chapter 25	
Cleaning the Sprayer	503	TROUBLESHOOTING	522
		Your Conduct	523
Chapter 24		Your Investigation	524
TILLAGE EQUIPMENT	505	Determining Patterns in the Field (or Problem Area)	524
The Conventional Tillage System	505	Identifying Injury Symptoms on Individual Plants	526
Primary Tillage Equipment	506	Interpreting Your Findings	529
Moldboard Plow	506	Decisions That Require Quick Action	530
Disk Plow	507	Decontamination	530
Chisel Plow	507	Replanting Annual Crops	531
Sweep Plow	508	When to Reestablish Perennial Plants	531
Secondary Tillage Equipment	509		
Tandem Disk (Tandem Disk Harrow)	509	Appendix A	
Field Cultivator	510	COLLECTING PLANTS FOR IDENTIFICATION	532
Spring Tooth Harrow	510		
Mulch Treader	510	Appendix B	
Light Harrows	510	USEFUL CONVERSION FACTORS	534
Rollers and Packers	511		
Rod Weeder	511	Appendix C	
Multicomponent Tillage Implements	512	WEED SCIENCE JOURNALS, PROCEEDINGS, AND SOCIETIES	536
Power-Driven Tillage Equipment	512		
Rototiller	513	Literature Cited	537
Vertical Tine Tiller	513		
Equipment for Selective Weeding	513	Index	552
Light Harrows	513		
Rotary Hoe	514		
Within-Row Weeder	514		
Row Crop Cultivators	516
