

Hermann Janeschitz-Kriegl

Crystallization Modalities in Polymer Melt Processing

Fundamental Aspects
of Structure Formation

SpringerWienNewYork

Contents

1	Required Basic Achievements	1
1.1	Interaction of Three Transport Phenomena: Heat Transfer, Flow and Crystallization Kinetics	1
1.2	Available Theories Describing the Crystallization Process	5
1.2.1	The Kolmogoroff–Avrami–Evans Theory	5
1.2.2	The Rate Equations of Schneider, Köppl and Berger	12
1.3	Examples for Special Cases	15
1.3.1	Minimum Cooling Speed for by-Passing Crystallization, Eder [28]	15
1.3.2	A Dimensionless Process Classification Number	18
1.3.3	Scanning Calorimetry	22
1.3.4	Phenomena of Propagation and Spreading	35
1.4	Crystallization in Confined Spaces	48
1.4.1	A Derivation of Kolmogoroff's Equation According to G. Eder, Enabling a Generalization	48
1.4.2	Behavior of Confined Samples	51
1.5	Influence of Strong Temperature Gradients	60
1.5.1	Growth of Spherulites in Temperature Gradient	61
1.5.2	Counter-Balance by a Gradient in the Number Density of Nuclei	64
	References	65
2	Kinetics and Structure Formation in Unloaded Quiescent Melts	69
2.1	Introductory Remarks	69
2.2	Empirical Techniques	69
2.2.1	Number Density of Nuclei	69
2.2.2	Growth Speeds of Spherulites	77
2.3	Theoretical Considerations	90
2.3.1	Theory of the Growth Speed of Spherulites	90

2.3.2	On the Nature of Primary Nuclei in Polymer Melts	94
2.3.3	Winter's Gel Point	102
	References	103
3	Flow Induced Processes Causing Oriented Crystallization	107
3.1	Preamble	107
3.2	Some Comments of Considerable Reach	108
3.3	Survey of Activities in the Field of Flow Induced Crystallization ...	114
3.3.1	Duct Flow Experiments	115
3.3.2	Flow Induced Small-Sized ("point-like") Nuclei	134
3.3.3	Relaxation Phenomena	146
3.3.4	Adherence to the Growth Mechanism	163
3.3.5	Uninterrupted Flow Treatments	173
	References	189
4	Closing Remarks	195
4.1	General Aspects	195
4.2	Views on Flow Induced Processes	199
	References	211
	Subject Index	215
	Author Index	219
