CONTENTS

Preface

ix

PART I BACKGROUND MATERIAL

1	Sets and Functions	3
1.1	Sets in General	3
1.2	Sets of Numbers	10
1.3	Functions	17
2	Real Numbers	31
2.1	Review of the Order Relations	32
2.2	<i>Completeness of Real Numbers</i>	<i>36</i>
2.3	<i>Sequences of Real Numbers</i>	40
2.4	Subsequences	45
2.5	Series of Real Numbers	50
2.6	Intervals and Connected Sets	54

3	Vector Functions	61
3.1	Vector Spaces: The Basics	62
3.2	Bilinear Functions	82
3.3	Multilinear Functions	88
3.4	Inner Products	95
3.5	Orthogonal Projections	103
3.6	Spectral Theorem	109

PART II DIFFERENTIATION

4	Normed Vector Spaces	123
4.1	Preliminaries	124
4.2	Convergence in Normed Spaces	128
4.3	Norms of Linear and Multilinear Transformations	135
4.4	Continuity in Normed Spaces	142
4.5	Topology of Normed Spaces	156
5	Derivatives	175
5.1	Functions of a Real Variable	176
5.2	Differentiable Functions	190
5.3	Existence of Derivatives	201
5.4	Partial Derivatives	205
5.5	Rules of Differentiation	211
5.6	Differentiation of Products	218
6	Diffeomorphisms and Manifolds	225
6.1	The Inverse Function Theorem	226
6.2	Graphs	238
6.3	Manifolds in Parametric Representations	243
6.4	Manifolds in Implicit Representations	252
6.5	Differentiation on Manifolds	260
7	Higher-Order Derivatives	267
7.1	Definitions	267
7.2	Change of Order in Differentiation	270
7.3	Sequences of Polynomials	273

7.4	Local Extremal Values	282
-----	-----------------------	-----

PART III INTEGRATION

8	Multiple Integrals	287
----------	---------------------------	------------

8.1	Jordan Sets and Volume	289
8.2	Integrals	303
8.3	Images of Jordan Sets	321
8.4	Change of Variables	328

9	Integration on Manifolds	339
----------	---------------------------------	------------

9.1	Euclidean Volumes	340
9.2	Integration on Manifolds	345
9.3	<i>Oriented Manifolds</i>	353
9.4	Integrals of Vector Fields	361
9.5	Integrals of Tensor Fields	366
9.6	Integration on Graphs	371

10	Stokes' Theorem	381
-----------	------------------------	------------

10.1	Basic Stokes' Theorem	382
10.2	Flows	386
10.3	Flux and Change of Volume in a Flow	390
10.4	Exterior Derivatives	396
10.5	Regular and Almost Regular Sets	401
10.6	Stokes' theorem on Manifolds	412

PART IV APPENDICES

Appendix A:	Construction of the real numbers	419
--------------------	---	------------

A.1	Field and Order Axioms in \mathbb{Q}	420
A.2	Equivalence Classes of Cauchy Sequences in \mathbb{Q}	421
A.3	Completeness of \mathbb{R}	427

Appendix B:	Dimension of a vector space	431
--------------------	------------------------------------	------------

B.1	Bases and linearly independent subsets	432
-----	--	-----

Appendix C:	Determinants	435
--------------------	---------------------	------------

C.1	Permutations	435
C.2	Determinants of Square Matrices	437
C.3	Determinant Functions	439
C.4	Determinant of a Linear Transformation	443
C.5	Determinants on Cartesian Products	444
C.6	Determinants in Euclidean Spaces	445
C.7	Trace of an Operator	448
Appendix D: Partitions of unity		451
D.1	Partitions of Unity	452
Index		455
