

Handbook of Sugar Refining

**A Manual for
the Design
and Operation
of Sugar
Refining Facilities**

**Edited by
Chung Chi Chou**

Contents

Foreword	vii
Preface	ix
Acknowledgments	x
Contributors	xi
Part I: Introduction to Sugar Refining	1
1 Glossary of Terms and Definitions, <i>Chung Chi Chou</i>	3
2 Sugar Refining Processes and Equipment, <i>Chung Chi Chou</i>	11
3 Automation in a Raw Cane Sugar Factory, <i>Robert J. Kwok and Eddy H. Lam</i>	19
4 Raw Sugar Storage and Handling, <i>Hsin Sui Chang and Chung Chi Chou</i>	33
Part II: Refining Process and Operations	47
5 Affination, <i>Thomas N. Pearson</i>	49
6 Phosphatation for Turbidity and Color Removal, <i>Richard Riffer</i>	55
7 Carbonation for Turbidity and Color Removal, <i>Peter Rein</i>	73
8 Granular Carbon Decolorization System, <i>Peter J. Field and H. Paul Benecke</i>	91
9 Pulsed-Bed Moving-Granular Activated Carbon System, <i>Ju-Hwa Liang</i>	121
10 Ion-Exchange Resin Process for Color and Ash Removal, <i>Denis Bouree and François Rousset</i>	135
11 Filtration Processes, <i>Chung Chi Chou</i>	155
12 Evaporation Theory and Practices, <i>Willem H. Kampen</i>	169
13 White Sugar Boiling and Crystallization, <i>Chung Chi Chou</i>	189
14 Centrifugation Operation, <i>G. Clive Grimwood</i>	203
15 Refined Sugar Drying, Conditioning, and Storage, <i>Dave Meadows</i>	245
16 Pacakaging, Warehousing, and Shipping of Refined Products, <i>Jean-Paul Merle</i>	293

17	Remelt and Recovery House Operations, <i>Chung Chi Chou</i>	321
18	Application of Membrane Technology in Sugar Manufacturing, <i>Michael Saska</i>	335
Part III: Refinery Design and Process Control		353
19	Refining Design Criteria, <i>Chung Chi Chou</i>	355
20	Process Selection, <i>Richard Riffer</i>	363
21	Instrumentation for Process Control, <i>Walter Simoneaux, Sr.</i>	379
22	Operational Computers, <i>Ray Burke</i>	415
23	Automation of a Sugar Refinery, <i>Naotsugu Mera</i>	427
24	Integration of Raw and Refined Sugar Operations, <i>Stephen J. Clarke</i>	445
25	Off-Crop Sugar Refining for a Back-End Refinery, <i>Raoul G. R. E. Lionnet</i>	457
26	Energy Conservation for Sugar Refining, <i>Joseph C. Tillman, Jr.</i>	467
27	Technical Control of Sucrose Loss, <i>Joseph F. Dowling</i>	491
28	Microbiological Control in Sugar Manufacturing and Refining, <i>Donal F. Day</i>	505
29	Refinery Maintenance Program, <i>G. Fawcett</i> , updated by <i>Chung Chi Chou</i>	523
30	Environmental Quality Assurance, <i>Chung Chi Chou</i>	537
Part IV: Specialty Sugar Products		565
31	Brown or Soft Sugar, <i>John C. Thompson</i>	567
32	Areado Soft Sugar Process, <i>Luis San Miguel Bento and Francisco Carlos Bártolo</i>	579
33	Liquid Sugar Production, <i>Leon Anhaiser</i>	587
34	Microcrystalline Sugar, <i>Chung Chi Chou</i>	597
Part V: Chemistry of Sugar Refining		605
35	Refining Quality of Raw Sugar, <i>Stephen J. Clarke</i>	607
36	Nonsugars and Sugar Refining, <i>Richard Riffer</i>	627
37	Analysis of Sugar and Molasses, <i>Walter Altenburg</i>	661
Appendix: Reference Tables		687
About the Editor/Author		741
