INTRODUCTION TO DIFFERENTIAL EQUATIONS

with Dynamical Systems

Stephen L. Campbell Richard Haberman

CONTENTS

| Preface | | ix |
|---------|---|----------|
| СНАРТЕ | R 1 | |
| First-C | Order Differential Equations and Their Applications | 1 |
| 1.1 | Introduction to Ordinary Differential Equations | 1 |
| 1.2 | The Definite Integral and the Initial Value Problem | 4 |
| | 1.2.1 The Initial Value Problem and the Indefinite Integral | 5 |
| | 1.2.2 The Initial Value Problem and the Definite Integral | 6 |
| | 1.2.3 Mechanics I: Elementary Motion of a Particle with Gravity Only | 8 |
| 1.3 | First-Order Separable Differential Equations | 13 |
| | 1.3.1 Using Definite Integrals for Separable Differential Equations | 16 |
| 1.4 | Direction Fields | 19 |
| | 1.4.1 Existence and Uniqueness | 25 |
| 1.5 | Euler's Numerical Method (optional) | 31 |
| 1.6 | First-Order Linear Differential Equations | 37 |
| | 1.6.1 Form of the General Solution | 37 |
| | 1.6.2 Solutions of Homogeneous First-Order Linear Differential | |
| | Equations | 39 |
| | 1.6.3 Integrating Factors for First-Order Linear Differential Equations | 42 |
| 1.7 | Linear First-Order Differential Equations with Constant | |
| | Coefficients and Constant Input | 48 |
| | 1.7.1 Homogeneous Linear Differential Equations with Constant | |
| | Coefficients | 48 |
| | 1.7.2 Constant Coefficient Linear Differential Equations with Constant | |
| | Input | 50 |
| | 1.7.3 Constant Coefficient Differential Equations with Exponential | |
| | Input | 52 |
| | 1.7.4 Constant Coefficient Differential Equations with Discontinuous | |
| 1.8 | Input Growth and Decay Problems | 52 59 |
| 1.0 | 1.8.1 A First Model of Population Growth | 59 59 |
| | 1.8.2 Radioactive Decay | 59 65 |
| | 1.8.3 Thermal Cooling | 68 |
| 1.9 | Mixture Problems | 74 |
| 1.9 | 1.9.1 Mixture Problems with a Fixed Volume | 74 |
| | 1.9.2 Mixture Problems with Variable Volumes | 74 77 |
| 1 10 | Electronic Circuits | 82 |
| | Mechanics II: Including Air Resistance | 88 |
| | Orthogonal Trajectories (optional) | 92 |
| 1.12 | real-occurron (observer) | 1 |

CHAPTER 2

| Linear Second- and Higher-Order Differential Equations | | | | | |
|--|--|-----------|--|--|--|
| 2.1 | General Solution of Second-Order Linear Differential Equations | | | | |
| 2.2 | Initial Value Problem (for Homogeneous Equations) | 96 100 | | | |
| 2.3 | Reduction of Order | 107 | | | |
| 2.4 | 2.4 Homogeneous Linear Constant Coefficient Differential Equation (Second Order) | | | | |
| | 2.4.1 Homogeneous Linear Constant Coefficient Differential Equations (nth-Order) | 122 | | | |
| 2.5 | Mechanical Vibrations I: Formulation and Free Response | 124 | | | |
| | 2.5.1 Formulation of Equations | 124 | | | |
| | 2.5.2 Simple Harmonic Motion (No Damping, $\delta = 0$) | 128 | | | |
| | 2.5.3 Free Response with Friction ($\delta > 0$) | 135 | | | |
| 2.6 | The Method of Undetermined Coefficients | 142 | | | |
| 2.7 | Mechanical Vibrations II: Forced Response | 159 | | | |
| | 2.7.1 Friction is Absent ($\delta = 0$) | 159 | | | |
| | 2.7.2 Friction is Present ($\delta > 0$) (Damped Forced Oscillations) | 168 | | | |
| 2.8 | Linear Electric Circuits | 174 | | | |
| 2.9 | Euler Equation | 179 | | | |
| 2.10 | Variation of Parameters (Second-Order) | 185 | | | |
| | Variation of Parameters (nth-Order) | 193 | | | |
| CHAPTE The La | place Transform | 197 | | | |
| 3.1 | Definition and Basic Properties | 197 | | | |
| 5.1 | 3.1.1 The Shifting Theorem (Multiplying by an Exponential) | 205 | | | |
| | 3.1.2 Derivative Theorem (Multiplying by t) | 210 | | | |
| 3.2 | Inverse Laplace Transforms (Roots, Quadratics, and Partial | | | | |
| 2.2 | Fractions) | 213 | | | |
| 3.3 | Initial Value Problems for Differential Equations | 225 | | | |
| 3.4 | Discontinuous Forcing Functions | 234 | | | |
| 2.5 | 3.4.1 Solution of Differential Equations | 239 | | | |
| 3.5 | Periodic Functions | 248 | | | |
| 3.6 | Integrals and the Convolution Theorem | 253 | | | |
| 0.7 | 3.6.1 Derivation of the Convolution Theorem (optional) | 256 | | | |
| 3.7 | Impulses and Distributions | 260 | | | |
| CHAPTE | R 4 | | | | |
| | roduction to Linear Systems of Differential Equations heir Phase Plane | 265 | | | |
| | | | | | |
| 4.1 | Introduction | 265 | | | |
| 4.2 | Introduction to Linear Systems of Differential Equations | 268 | | | |
| | | | | | |

CONTENTS

| | 4.2.1 Solving Linear Systems Using Eigenvalues and Eigenvectors | |
|--------|--|-----|
| | of the Matrix | 269 |
| | 4.2.2 Solving Linear Systems if the Eigenvalues are Real | |
| | and Unequal | 272 |
| | 4.2.3 Finding General Solutions of Linear Systems in the Case | |
| | of Complex Eigenvalues | 276 |
| | 4.2.4 Special Systems with Complex Eigenvalues (optional) | 279 |
| | 4.2.5 General Solution of a Linear System if the Two Real Eigenvalues | |
| | are Equal (Repeated) Roots | 281 |
| | 4.2.6 Eigenvalues and Trace and Determinant (optional) | 283 |
| 4,3 | The Phase Plane for Linear Systems of Differential Equations | 287 |
| 7,0 | 4.3.1 Introduction to the Phase Planc for Linear Systems of Differential | 20, |
| | Equations | 287 |
| | 4.3.2 Phase Plane for Linear Systems of Differential Equations | 295 |
| | 4.3.3 Real Eigenvalues | 296 |
| | 4.3.4 Complex Eigenvalues | 304 |
| | | 310 |
| | 4.3.5 General Theorems | 310 |
| СНАРТЕ | ER 5 | |
| | N. H P O. L. Diffe. Al LE. Al | 215 |
| Mostly | Nonlinear First-Order Differential Equations | 315 |
| 5.1 | First-Order Differential Equations | 315 |
| 5.2 | Equilibria and Stability | 316 |
| | 5.2.1 Equilibrium | 316 |
| | 5.2.2 Stability | 317 |
| | 5.2.3 Review of Linearization | 318 |
| | 5.2.4 Linear Stability Analysis | 318 |
| 5.3 | One-Dimensional Phase Lines | 322 |
| 5.4 | Application to Population Dynamics: The Logistic | |
| | Equation | 327 |
| | | |
| CHAPTE | ER 6 | |
| Nonlin | near Systems of Differential Equations in the Plane | 332 |
| 6.1 | Introduction | 332 |
| 6.2 | Equilibria of Nonlinear Systems, Linear Stability Analysis of | |
| | Equilibrium, and the Phase Plane | 335 |
| | 6.2.1 Linear Stability Analysis and the Phase Plane | 336 |
| | 6.2.2 Nonlinear Systems: Summary, Philosophy, Phase Plane, Direction | |
| | Field, Nullclines | 341 |
| 6.3 | Population Models | 349 |
| | 6.3.1 Two Competing Species | 350 |
| | 6.3.2 Predator-Prey Population Models | 356 |
| 6.4 | Mechanical Systems | 363 |
| | 6.4.1 Nonlinear Pendulum | 363 |
| | 6.4.2 Linearized Pendulum | 364 |

Viii CONTENTS

6.4.3 Conservative Systems and the Energy Integral 6.4.4 The Phase Plane and the Potential

Index

Answers to Odd-Numbered Exercises
