

Second Edition

COGNITIVE RADIO TECHNOLOGY

Bruce A. Fette
Editor

Contents

Preface		xiii
Acknowledgments		xvii
Chapter 1	History and Background of Cognitive Radio Technology	1
	<i>Bruce A. Fette</i>	
1.1	The Vision of Cognitive Radio	1
1.2	History and Background Leading to Cognitive Radio	1
1.3	A Brief History of Software Defined Radio	3
1.4	Basic SDR	6
1.5	Cognitive Radio	13
1.6	Spectrum Management	16
1.7	US Government Roles in Cognitive Radio	21
1.8	How Smart Is Useful?	22
1.9	Organization of This Book	23
Chapter 2	Communications Policy and Spectrum Management	27
	<i>Paul Kolodzy</i>	
2.1	Introduction	27
2.2	Cognitive Radio Technology Enablers	28
2.3	New Opportunities in Spectrum Access	30
2.4	Policy Challenges for Cognitive Radios	39
2.5	Telecommunications Policy and Technology Impact on Regulation	48
2.6	Global Policy Interest in Cognitive Radios	54
2.7	Summary	61
Chapter 3	The Software-Defined Radio as a Platform for Cognitive Radio	65
	<i>Max Robert, Bruce A. Fette</i>	
3.1	Introduction	65
3.2	Hardware Architecture	67
3.3	Software Architecture	79

3.4	SDR Development and Design	82
3.5	Applications	94
3.6	Development	97
3.7	Cognitive Waveform Development	99
3.8	Summary	102
Chapter 4	Cognitive Radio: The Technologies Required	105
	<i>John Polson</i>	
4.1	Introduction	105
4.2	Radio Flexibility and Capability	105
4.3	Aware, Adaptive, and Cognitive Radios	111
4.4	Comparison of Radio Capabilities and Properties	114
4.5	Available Technologies for Cognitive Radios	115
4.6	Funding and Research in Cognitive Radios	123
4.7	Timeline for Cognitive Radios	133
4.8	Update of CR-Specific Technologies	135
4.9	Summary	138
Chapter 5	Spectrum Awareness and Access Considerations	143
	<i>Preston Marshall</i>	
5.1	Dynamic Spectrum Awareness and Access Objectives	143
5.2	Prior Work in Spectrum Awareness and Access	144
5.3	Some End-to-End DSA Example Implementations	146
5.4	Dynamic Spectrum Awareness	147
5.5	Front-End Linearity Management	161
5.6	Dynamic Spectrum Access Objectives	176
5.7	Spectral Footprint Management Objectives	186
5.8	Implications on Network-Level Decision Making	188
5.9	Summary	191
Chapter 6	Cognitive Policy Engines	195
	<i>Robert J. Wellington</i>	
6.1	The Promise of Policy Management for Radios	195
6.2	Background and Definitions	195
6.3	Spectrum Policy	197
6.4	Antecedents for Cognitive Policy Management	199
6.5	Policy Engine Architectures for Radio	205
6.6	Integration of Policy Engines into Cognitive Radio	210
6.7	The Future of Cognitive Policy Management	216
6.8	Summary	219
Chapter 7	Cognitive Techniques: Physical and Link Layers	223
	<i>Thomas W. Rondeau, Charles W. Bostian</i>	
7.1	Introduction	223
7.2	Optimizing PHY and Link Layers for Multiple Objectives Under Current Channel Conditions	224

7.3	Defining the Cognitive Radio	225
7.4	Developing Radio Controls (Knobs) and Performance Measures (Meters).....	226
7.5	Multiobjective Decision-Making Theory and Its Application to Cognitive Radio	232
7.6	The Multiobjective Genetic Algorithm for Cognitive Radios.....	240
7.7	Advanced Genetic Algorithm Techniques.....	252
7.8	Need for a Higher-Layer Intelligence	256
7.9	How the Intelligent Computers Operate	258
7.10	Summary	260
Chapter 8	Cognitive Techniques: Position Awareness	265
	<i>John Polson, Bruce A. Fette</i>	
8.1	Introduction.....	265
8.2	Radio Geolocation and Time Services.....	266
8.3	Network Localization.....	270
8.4	Additional Geolocation Approaches.....	272
8.5	Network-Based Approaches.....	281
8.6	Boundary Decisions	281
8.7	Example of Cellular Phone 911 Geolocation for First Responders	285
8.8	Interfaces to Other Cognitive Technologies.....	286
8.9	Summary	287
Chapter 9	Cognitive Techniques: Three Types of Network Awareness	289
	<i>Jonathan M. Smith</i>	
9.1	Introduction.....	289
9.2	Applications and their Requirements.....	289
9.3	Network Awareness: Protocols	291
9.4	Situation-Aware Protocols in Edge Network Technologies	295
9.5	Network Awareness: Node Capabilities and Cooperation.....	297
9.6	A Distributed System of Radios—The Radio Team.....	298
9.7	Network Awareness: Node Location and Cognition for Self-Placement	300
9.8	Summary	302
Chapter 10	Cognitive Services for the User	305
	<i>Joseph P. Campbell, William M. Campbell, Alan V. McCree, Scott M. Lewandowski, Clifford J. Weinstein</i>	
10.1	Introduction.....	305
10.2	Speech and Language Processing.....	306
10.3	Concierge Services.....	320
10.4	Summary	322

Chapter 11	Network Support: The Radio Environment Map	325
	<i>Youping Zhao, Bin Le and Jeffrey H. Reed</i>	
11.1	Introduction	325
11.2	REM: The Vehicle for Providing Network Support to CRs.....	326
11.3	Obtaining Cognition with REM: A Systematic Top-Down Approach	330
11.4	High-Level System Design of REM.....	338
11.5	Network Support Scenarios and Applications	352
11.6	Example Applications of REM to Cognitive Wireless Networks.....	355
11.7	Summary and Open Issues	363
Chapter 12	Cognitive Research: Knowledge Representation and Learning	367
	<i>Vincent J. Kovarik Jr.</i>	
12.1	Introduction	367
12.2	Knowledge Representation and Reasoning.....	371
12.3	Machine Learning	382
12.4	Implementation Considerations	393
12.5	Summary	395
Chapter 13	The Role of Ontologies in Cognitive Radios	401
	<i>Mieczyslaw M. Kokar, David Brady, Kenneth Baclawski</i>	
13.1	Overview of Ontology-Based Radios	401
13.2	Knowledge-Intense Characteristics of Cognitive Radios	401
13.3	Ontologies and Their Roles in Cognitive Radio.....	406
13.4	A Layered Ontology and Reference Model	412
13.5	Examples.....	418
13.6	Open Research Issues.....	423
13.7	Summary	426
Chapter 14	Cognitive Radio Architecture	429
	<i>Joseph Mitola III</i>	
14.1	Introduction	429
14.2	CRA-I: Functions, Components, and Design Rules	431
14.3	CRA-II: The Cognition Cycle	448
14.4	CRA-III: The Inference Hierarchy.....	453
14.5	CRA-IV: Architecture Maps.....	461
14.6	CRA-V: Building the CRA on SDR Architectures.....	467
14.7	Cognition Architecture Research Topics	478
14.8	Industrial-Strength CR Design Rules.....	478
14.9	Summary and Future Directions.....	480

Chapter 15	Cognitive Radio Performance Analysis	483
	<i>James O. Neel, Jeffrey H. Reed, Allen B. MacKenzie</i>	
15.1	Introduction	483
15.2	The Analysis Problem	485
15.3	Traditional Engineering Analysis Techniques	491
15.4	Applying Game Theory to the Analysis Problem.....	502
15.5	Relevant Game Models	511
15.6	Summary	529
Chapter 16	Cognitive Radio in Multiple-Antenna Systems	535
	<i>Jae Mounq Kim, Sung Hwan Sobn, Ning Han, Seungwon Choi, Chiyounq Ahn, Gyeonghua Hong, Yusuk Yun</i>	
16.1	Introduction	535
16.2	Multiple-Antenna Techniques.....	536
16.3	Cognitive Capability in an MA System	541
16.4	Application to neXt-Generation Wireless Communications	553
16.5	Summary	555
Chapter 17	Cognitive Radio Policy Language and Policy Engine	557
	<i>Grit Denker, Daniel Elenius, David Wilkins</i>	
17.1	Introduction.....	557
17.2	Benefits of a Policy-Based Approach.....	559
17.3	NeXt-Generation Spectrum Policy Architecture	561
17.4	Policy Language and Engine Design.....	563
17.5	SRI Spectrum Policy Language	567
17.6	SRI Policy Engine	573
17.7	SRI Policy Engine Demonstration.....	582
17.8	Lessons Learned and Future Work.....	588
17.9	Summary	590
Chapter 18	Spectrum Sensing Based on Spectral Correlation	593
	<i>Chad M. Spooner, Richard B. Nicholls</i>	
18.1	Introduction.....	593
18.2	The Statistical Nature of Communication Signals	604
18.3	Spectrum Sensing Based on Spectral Correlation	613
18.4	Application to Modern Communication Signals	616
18.5	Summary	629
Chapter 19	Rendezvous in Cognitive Radio Networks	635
	<i>Luiz A. DaSilva, Ryan W. Thomas</i>	
19.1	Introduction.....	635
19.2	The Use of Control Channels	637
19.3	Blind Rendezvous	638

19.4	Link Maintenance and the Effect of Primary Users.....	643
19.5	Summary	644
Chapter 20	Spectrum-Consumption Models	645
	<i>John A. Stine</i>	
20.1	Introduction.....	645
20.2	Reconciling DSA and Spectrum Management.....	646
20.3	The Location-Based Method to Specify RF Spectrum Rights	653
20.4	Optimized Data Structures for the LBSR.....	669
20.5	Constructing Rights	676
20.6	Applications	682
20.7	Future Research and Work.....	685
20.8	Summary	686
Chapter 21	Protocols for Adaptation in Cognitive Radio.....	689
	<i>Michael B. Pursley, Thomas C. Royster IV</i>	
21.1	Introduction.....	689
21.2	Modulation.....	690
21.3	Error-Control Codes.....	691
21.4	Performance Measures for a Code-Modulation Library.....	692
21.5	Special Subsets of the Code-Modulation Library.....	696
21.6	Receiver Statistics	698
21.7	Initial Power Adjustment.....	699
21.8	Adaptive Transmission.....	710
21.9	Protocol Throughput Performance for Dynamic Channels	712
21.10	Summary	718
Chapter 22	Cognitive Networking	723
	<i>Ryan W. Thomas, Luiz A. DaSilva</i>	
22.1	Introduction.....	723
22.2	Current CN Research.....	727
22.3	Research Holes and Future Directions.....	736
22.4	Summary	739
Chapter 23	The Role of IEEE Standardization in Next-Generation Radio and Dynamic Spectrum Access Developments.....	743
	<i>Ralph Martinez, Donya He</i>	
23.1	Introduction.....	743
23.2	Definitions and Terminology.....	747
23.3	Overview of the IEEE Standards Activities.....	749
23.4	IEEE 802 Cognitive Radio-Related Activities	751
23.5	IEEE SCC41: Dynamic Spectrum Access Networks	760
23.6	Potential for New Products and Systems	772
23.7	Summary	774

Chapter 24	The Really Hard Problems	777
	<i>Bruce A. Fette</i>	
24.1	Introduction	777
24.2	Discussion and Summary of CR Technologies	777
24.3	Services Offered to Wireless Networks Through Infrastructure.....	784
	Glossary.....	791
	Index	803
