

Advanced Series on Ocean Engineering — Volume 30

INTRODUCTION TO COASTAL ENGINEERING AND MANAGEMENT

2nd Edition

J. William Kamphuis

 World Scientific

Contents

Preface to 2nd Edition	vii
Preface to 1st Edition	ix
Notation	xxv
1. Introduction	1
1.1 Introduction	1
1.2 Synthesis	4
1.3 Simplification	4
1.4 Systems	6
1.5 Jargon and Terminology.....	11
1.6 Engineering Time.....	12
1.7 Handy References	13
1.8 Data Requirements	15
1.9 Coastal Design	20
1.10 Concluding Remarks	22
2. Water Waves	25
2.1 Introduction	25
2.1.1 Description of Waves.....	25
2.1.2 Wind and Waves	27
2.1.3 Sea and Swell.....	29
2.1.4 Introduction to Small Amplitude Wave Theory	32
2.2 Wave Theories.....	34
2.3 Small Amplitude Wave Theory.....	36
2.3.1 Wave Tables.....	37

2.3.2	Small Amplitude Expressions	41
2.3.3	Calculation by Computer	45
2.4	Reflected Waves	47
2.5	Wave Measurement	49
2.5.1	Wave Direction	49
2.5.2	Equipment	51
2.5.3	Laboratory Sensors	54
2.6	Summary	55
3.	Short-Term Wave Analysis	57
3.1	Introduction.....	57
3.2	Short-Term Wave Height Distribution	60
3.3	Wave Period Distribution	65
3.4	Time Domain Analysis of a Wave Record	66
3.5	Frequency Domain Analysis of a Wave Record.....	70
3.6	Parameters Derived from the Wave Spectrum.....	76
3.7	Uncertainties in Wave Measurements	79
3.8	Common Parametric Expressions for Wave Spectra	81
3.9	Directional Wave Spectra	85
4.	Long-Term Wave Analysis.....	87
4.1	Introduction.....	87
4.2	Statistical Analysis of Grouped Wave Data.....	88
4.3	Transformation of Coordinate Axes	90
4.3.1	Normal Probability Distribution	92
4.3.2	Log-Normal Probability Distribution.....	94
4.3.3	Gumbel Distribution	95
4.3.4	Weibull Distribution	96
4.4	Extrapolation.....	99
4.5	Sensitivity to Distribution and Threshold Wave Height.....	100
4.6	Extreme Value Analysis from Ordered Data	101
4.7	Conclusions about Wave Heights	104
4.8	Other Long-Term Wave Distributions	105

5. Wave Generation.....	109
5.1 Wave Generation	109
5.2 Simple Wave Hindcasting.....	111
5.2.1 Introduction to Parametric Methods	111
5.2.2 Wind.....	112
5.2.3 Jonswap Parameters	114
5.2.4 Maximum Wave Conditions	118
5.2.5 Finite Water Depth.....	120
5.3 Hindcast Models	121
5.3.1 Parametric Models	121
5.3.2 Wave Spectra Models	122
5.3.3 More Complex Hindcasting Models	124
5.4 Uncertainty.....	124
6. Wave Transformation and Breaking.....	125
6.1 Wave Transformation Equations	125
6.2 Wave Shoaling.....	127
6.3 Wave Refraction	128
6.3.1 The Equations	128
6.3.2 Refraction Diagrams	129
6.3.3 Snell's Law	132
6.3.4 Summary	134
6.4 Wave Breaking	135
6.5 Wave Diffraction	141
6.6 Uncertainty.....	144
7. Tides and Water Levels	145
7.1 Introduction.....	145
7.2 Tides	146
7.2.1 Equilibrium Tide (Moon).....	147
7.2.2 Equilibrium Tide (Sun and Moon).....	148
7.2.3 Daily Inequality	148
7.2.4 Other Effects	151
7.2.5 Tide Analysis and Prediction	152

7.2.6	Tidal Propagation.....	153
7.2.7	Tidal Currents	156
7.2.8	Stratification and Density Currents.....	160
7.2.9	Tidal Computation	163
7.3	Storm Surge	164
7.4	Barometric Surge	167
7.5	Seiche.....	167
7.6	Seasonal Fluctuations	171
7.7	Long-Term Water Level Changes	172
7.7.1	Climatic Fluctuations	172
7.7.2	Eustatic (Sea) Level Change	173
7.7.3	Isostatic (Land) Rebound and Subsidence	174
7.7.4	Global Climate Change.....	176
8.	Rare Extraneous Events	187
8.1	Introduction.....	187
8.2	Cyclone-Generated Storm Surge	189
8.2.1	Hurricane Katrina at New Orleans.....	190
8.3	Tsunamis.....	195
8.3.1	Tsunamis Generated by Earthquakes.....	196
8.3.2	Tsunamis Generated by Landslides	201
8.4	Transformation and Breaking of Long Waves.....	205
9.	Design of Structures	207
9.1	Introduction.....	207
9.2	Basics of Probabilistic Design	208
9.2.1	Introduction.....	208
9.2.2	Probability of Failure	209
9.2.3	Levels of Probabilistic Design	210
9.3	Level II Demonstration	211
9.3.1	Equations.....	211
9.3.2	Two Probability Distributions.....	212
9.3.3	One Single Distribution	214
9.3.4	Example Calculations	216

9.4	Extension to More Complex Designs	217
9.5	Encounter Probability	218
9.6	Level I Design	219
9.7	Risk and Damage	221
9.8	The Design Wave	222
9.8.1	Wave Statistics	222
9.8.2	Equivalence of Design Wave Height and Failure Probability	223
9.8.3	Offshore Design Wave Height	224
9.8.4	Design Wave Height for Non-Breaking Waves	225
9.8.5	Design Wave Height for Breaking Waves.....	227
9.8.6	Model Study	230
9.9	Water Levels.....	230
10.	Breakwaters	233
10.1	Vertical Breakwaters	233
10.1.1	Introduction	233
10.1.2	Forces for Non-Breaking Waves	234
10.1.3	Forces for Breaking Waves	239
10.1.4	Stability Design	242
10.1.5	Geotechnical Stability.....	244
10.1.6	Other Design Considerations.....	245
10.2	Design Examples	247
10.2.1	Vertical Breakwater in 12 m of Water with a Short Fetch.....	247
10.2.2	Vertical Breakwater in 12 m of Water on an Open Coast	248
10.2.3	Vertical Breakwater in 3 m of Water.....	251
10.2.4	Summary.....	253
10.3	Rubble Mound Breakwaters	253
10.3.1	Filter Characteristics.....	253
10.3.2	Rock Armor	255
10.3.3	Concrete Armor	259
10.3.4	Armor Unit Density	260

10.3.5	Primary Armor Layer.....	261
10.3.6	Breakwater Crest.....	262
10.4	Design Examples	264
10.4.1	Breakwater in 12 m of Water.....	264
10.4.2	Breakwater in 3 m of Water.....	267
10.5	Berm Breakwaters.....	268
11.	Introduction to Coastal Management.....	271
11.1	Introduction.....	271
11.2	Decision Making.....	271
11.3	The Coast under Pressure.....	276
11.4	Conforming Use.....	277
11.5	Conflict and Compatibility.....	281
11.6	Management Strategies.....	283
11.7	Coastal Management in Spite of the Odds.....	285
11.8	Management of Coastal Lands.....	287
11.9	Management of Coastal Waters	290
11.9.1	Groundwater	290
11.9.2	Waste Water.....	292
11.9.3	Other Forms of Pollution	294
11.10	Example: Management of the Great Lakes– St. Lawrence Shoreline	295
11.11	Example: Management of Coastal Ecosystems	300
11.12	Concluding Remarks.....	303
12.	Coastal Sediment Transport.....	307
12.1	Introduction.....	307
12.2	Dynamic Beach Profile	307
12.3	Cross-Shore Transport	312
12.3.1	Dune-Beach Utopia.....	312
12.3.2	Dune-Beach Disturbance	313
12.3.3	Dune-Beach Encouragement.....	314
12.3.4	Soft Protection.....	320

12.4	Alongshore Sediment Transport.....	321
12.4.1	The Process.....	321
12.4.2	Measurement of Littoral Transport.....	323
12.4.3	Computation of Littoral Transport.....	324
12.5	Complications.....	324
12.5.1	Limited Amounts of Beach Material	325
12.5.2	Sediment Transport in Two Directions.....	326
12.5.3	Short Term Littoral Transport.....	328
12.6	Cohesive Shores	328
13.	Basic Shore Processes.....	333
13.1	Introduction	333
13.2	Nearshore Current Patterns	333
13.3	Littoral Materials.....	335
13.4	The Beach.....	337
13.4.1	Beach Slope	337
13.4.2	Beach Profile	338
13.5	Cross Shore Sediment Transport.....	340
13.6	Alongshore Sediment Transport Rate	342
13.6.1	Alongshore Component of Wave Power	343
13.6.2	CERC Expression	344
13.6.3	Kamphuis (1991) Expression	345
13.7	Actual Alongshore Sediment Transport Rate.....	346
13.8	The Littoral Cell.....	348
13.9	Uncertainty	350
14.	Coastal Design.....	351
14.1	Introduction	351
14.2	Model Classification	354
14.2.1	Time-Space Classification.....	354
14.2.2	Classification by Purpose	356
14.3	Physical Models	357
14.3.1	General	357

14.3.2	Scaling and Scale Effect.....	359
14.3.3	Laboratory Effect.....	364
14.3.4	Implications for Physical Modeling.....	364
14.4	Numerical Modeling.....	365
14.4.1	General.....	365
14.4.2	Simplifications of Three-Dimensional Models.....	368
14.4.3	One-Dimensional Models and their Extensions.....	371
14.4.4	Performance of Coastal Models.....	372
14.5	Field Measurement and Data Models.....	374
14.6	Uncertainty.....	375
14.7	Reducing Uncertainty.....	377
14.8	Model Interpretation.....	379
14.9	The Future.....	381
14.10	Composite Modeling.....	383
14.11	Summary.....	388
15.	One-Dimensional Modeling of Coastal Morphology.....	391
15.1	Introduction.....	391
15.2	The 1-D Morphology Equation.....	392
15.3	Sediment Transport Rate.....	393
15.3.1	Potential Sediment Transport Rate.....	393
15.3.2	Actual Sediment Transport Rate.....	394
15.4	Wave Transformation Computation.....	395
15.4.1	Wave Shoaling, Refraction and Breaking.....	395
15.4.2	Wave Diffraction.....	395
15.5	Analytical Computation of Shore Morphology.....	398
15.5.1	Simplifications and Assumptions.....	398
15.5.2	Complete Barrier Solution.....	400
15.5.3	Bypassing Barrier Solution.....	402
15.6	Numerical Solutions.....	405
15.6.1	Basics.....	405
15.6.2	Implicit Finite Difference Scheme.....	407
15.6.3	Boundary Conditions.....	410
15.6.4	Beach Slope.....	412

15.6.5 Large Shoreline Curvatures	413
15.6.6 Summary	414
15.7 Examples of ONELINE	415
15.8 Examples of NLINE	420
16. Shore Protection	423
16.1 Introduction	423
16.2 Sediment Movement	425
16.3 Groins	426
16.4 Seawalls	431
16.5 Headlands	434
16.6 Offshore Breakwaters	436
16.7 Artificial Nourishment	439
16.8 Concluding Remarks	444
17. Contemporary Concepts	447
17.1 Introduction	447
17.2 Decision Making	448
17.3 Contemporary Coastal System Design	451
17.4 Contemporary Decision Making	452
17.5 Failure, Mitigation and Adaptation	455
17.6 Risk and Minimum Cost	458
17.7 Resilience	460
17.7.1 Introduction of Resilience	461
17.7.2 Level 1 — Design of a Resilient PES	463
17.8 Uncertainty	466
18. Problems	469
18.1 Introduction	469
Problem 1.1 Preparation	469
Problem 1.2 Proposal	470
18.2 Water Waves	471
Problem 2.1 Basic Wave Calculations	471
Problem 2.2 Wave Reflection	472

18.9	Coastal Management.....	489
	Problem 9.1 Expansion at Site M.....	489
	Problem 9.2 Facilities at Site B.....	490
	Problem 9.3 Development of Property	491
18.10	Sediment Transport and Morphology.....	492
	Problem 10.1 Potential Sediment Transport Rate	492
	Problem 10.2 Potential Sediment Transport Rate	492
	Problem 10.3 Accretion	492
	Problem 10.4 Sediment Transport in Two Directions	493
	Problem 10.5 Sea Level Rise	493
	Problem 10.6 Northeaster Storm.....	493
18.11	Modeling.....	494
	Problem 11.1 Physical Models.....	494
	Problem 11.2 Numerical Models	494
18.12	Shore Protection.....	495
	Problem 12.1 Recommendations about Shore Protection.....	495
18.13	Contemporary Decision Making.....	495
	Problem 13.1 Pre-Design Analysis	495
	Problem 13.2 Recommend Improvements to Flood Protection.....	496
18.14	Comprehensive Problems	497
	Problem 14.1 Design Analysis.....	497
	Problem 14.2 Design of Breakwater with Parapet Wall	501
	Problem 14.3 Vertical Breakwater Design.....	502
