

Systems Analysis and Design with UML

An Object-Oriented Approach

3rd
Edition

ALAN DENNIS • BARBARA HALEY WIXOM • DAVID TEGARDEN

INTERNATIONAL STUDENT VERSION

CONTENTS

PREFACE XIII

Chapter 1 **Introduction 1**

INTRODUCTION	2
THE SYSTEMS DEVELOPMENT LIFE CYCLE	3
Planning	4
Analysis	4
Design	5
Implementation	6
SYSTEMS DEVELOPMENT	
METHODOLOGIES	6
Structured Design	8
Rapid Application Development (RAD)	10
Agile Development	14
Selecting the Appropriate Development Methodology	15
OBJECT-ORIENTED SYSTEMS ANALYSIS AND DESIGN (OOSAD)	17
Use-Case Driven	18
Architecture Centric	18
Iterative and Incremental	18
Benefits of Object-Oriented Systems Analysis and Design	19
THE UNIFIED PROCESS	19
Phases	20
Workflows	22
Extensions to the Unified Process	24
THE UNIFIED MODELING LANGUAGE	29
PROJECT TEAM ROLES AND SKILLS	30
Business Analyst	32
Systems Analyst	32
Infrastructure Analyst	32
Change Management Analyst	32
Project Manager	32

APPLYING THE CONCEPTS AT CD SELECTIONS	33
Summary	33

■ **PART ONE** **INITIATION 39**

Chapter 2 **Project Identification and Selection 41**

INTRODUCTION	41
PROJECT IDENTIFICATION	43
System Request	44
FEASIBILITY ANALYSIS	44
Technical Feasibility	46
Economic Feasibility	48
Organizational Feasibility	56
PROJECT SELECTION	58
APPLYING THE CONCEPTS AT CD SELECTIONS	61
Project Identification and System Request	61
Feasibility Analysis	62
Project Selection	64
Summary	66

Chapter 3 **Project Management 69**

INTRODUCTION	69
IDENTIFYING PROJECT SIZE	70
Function Point Approach	72
CREATING AND MANAGING THE WORKPLAN	77
Identifying Tasks	78
The Project Workplan	79

Gantt Chart	79
PERT Chart	81
Refining Estimates	82
Scope Management	83
Timeboxing	85
Evolutionary Work Breakdown Structures and Iterative Workplans	86
STAFFING THE PROJECT	91
Staffing Plan	91
Motivation	94
Handling Conflict	94
COORDINATING PROJECT ACTIVITIES	96
CASE Tools	96
Standards	97
Documentation	98
Managing Risk	98
APPLYING THE CONCEPTS AT CD	
SELECTIONS	100
Staffing the Project	104
Coordinating Project Activities	105
Summary	106

Chapter 4

Requirements Analysis 110

INTRODUCTION	110
REQUIREMENTS DETERMINATION	111
Defining a Requirement	111
Requirements Definition	114
Determining Requirements	115
Creating a Requirements Definition	116
REQUIREMENTS ANALYSIS STRATEGIES	117
Business Process Automation	117
Business Process Improvement	120
Business Process Reengineering	121
Selecting Appropriate Strategies	122
REQUIREMENTS-GATHERING TECHNIQUES	125
Interviews	125
Joint application development (JAD)	132
Questionnaires	136
Document Analysis	138
Observation	138
Other Techniques	140
Selecting the Appropriate Techniques	142

THE SYSTEM PROPOSAL	144
APPLYING THE CONCEPTS AT CD	
SELECTIONS	145
Requirements Analysis Strategies	145
Requirements-Gathering Techniques	146
Requirements Definition	146
System Proposal	148
Summary	149

■ PART TWO

ANALYSIS 155

Chapter 5

Use Case Diagrams 157

INTRODUCTION	158
BUSINESS PROCESS MODELING WITH ACTIVITY DIAGRAMS	159
Elements of an Activity Diagram	160
Guidelines for Creating Activity Diagrams	165
USE-CASE DESCRIPTIONS	166
Types of Use Cases	167
Elements of a Use-Case Description	168
Guidelines for Creating Use-Case Descriptions	171
USE-CASE DIAGRAMS	173
Actors	173
Association	175
Use Case	176
System Boundary	176
CREATING USE-CASE DESCRIPTIONS AND USE-CASE DIAGRAMS	178
Identifying the Major Use Cases	179
Expanding the Major Use Cases	180
Confirming the Major Use Cases	181
Creating a Use-Case Diagram	181
REFINING PROJECT SIZE AND EFFORT ESTIMATION USING USE-CASE POINTS	182
APPLYING THE CONCEPTS AT CD	
SELECTIONS	188
Business Process Modeling with Activity Diagrams	188
Identifying the Major Use Cases	189
Expanding the Major Use Cases	191

- Confirming the Major Use Cases 193
- Creating the Use-Case Diagram 198
- Refining Project Size and Effort
 - Estimation Using Use-Case Points 198

Summary 201

Chapter 6

Class Diagrams 207

- INTRODUCTION 207
- STRUCTURAL MODELS 208
 - Classes, Attributes, and Operations 209
 - Relationships 209
- CRC CARDS 211
 - Responsibilities and Collaborations 211
 - Elements of a CRC Card 212
- CLASS DIAGRAMS 213
 - Elements of a Class Diagram 213
 - Simplifying Class Diagrams 221
 - Object Diagrams 221
- CREATING CRC CARDS AND CLASS
 - DIAGRAMS 222
 - Object Identification 223
 - Building CRC Cards and Class
 - Diagrams 225
- APPLYING THE CONCEPTS AT CD
 - SELECTIONS 228
 - Step 1: Create CRC Cards 228
 - Step 2: Examine Common Object
 - Lists 228
 - Step 3: Role-Play the CRC Cards 230
 - Step 4: Create the Class Diagram 231
 - Step 5: Review the Class Diagram 231
 - Step 6: Incorporate Patterns 231
 - Step 7: Review the Model 232

Summary 233

Chapter 7

Interaction Diagrams 238

- INTRODUCTION 238
- BEHAVIORAL MODELS 239
- INTERACTION DIAGRAMS 239
 - Objects, Operations, and Messages 240
 - Sequence Diagrams 240
 - Communication Diagrams 246

- BEHAVIORAL STATE MACHINES 250
 - States, Events, Transitions, Actions,
 - and Activities 250
 - Elements of a Behavioral State
 - Machine 251
 - Building Behavioral State Machines 254
 - CRUD ANALYSIS 256
 - APPLYING THE CONCEPTS AT CD
 - SELECTIONS 257
 - Sequence Diagrams 257
 - Communication Diagrams 260
 - Behavioral State Machines 261
 - CRUD Analysis 262
- Summary* 264

■ PART THREE

DESIGN 269

Chapter 8

System Design 271

- INTRODUCTION 272
- VERIFYING AND VALIDATING THE ANALYSIS
 - MODELS 273
 - Verification and Validation through
 - Walkthroughs 273
 - Functional Model Verification
 - and Validation 275
 - Structural Model Verification
 - and Validation 276
 - Behavioral Model Verification
 - and Validation 278
 - Balancing the Analysis Models 280
 - EVOLVING THE ANALYSIS MODELS
 - INTO DESIGN MODELS 287
 - Factoring 290
 - Partitions and Collaborations 290
 - Layers 292
 - PACKAGES AND PACKAGE DIAGRAMS 294
 - Identifying Packages and Creating Package
 - Diagrams 297
 - Verifying and Validating Package
 - Diagrams 297
 - DESIGN STRATEGIES 299
 - Custom Development 299

- Packaged Software 300
- Outsourcing 302
- Selecting a Design Strategy 304
- DEVELOPING THE ACTUAL DESIGN 306
 - Alternative Matrix 306
- APPLYING THE CONCEPTS AT CD
 - SELECTIONS 308
 - Packages and Package Diagrams 308
 - Verifying and Validating the Analysis Models 310
 - Developing the Actual Design 311
- Summary* 312

Chapter 9
Class and Method Design 318

- INTRODUCTION 318
- REVIEW OF THE BASIC CHARACTERISTICS OF OBJECT ORIENTATION 320
 - Classes, Objects, Methods, and Messages 320
 - Encapsulation and Information Hiding 321
 - Polymorphism and Dynamic Binding 321
 - Inheritance 322
- DESIGN CRITERIA 325
 - Coupling 325
 - Cohesion 328
 - Connascence 331
- OBJECT DESIGN ACTIVITIES 332
 - Adding Specifications 332
 - Identifying Opportunities for Reuse 333
 - Restructuring the Design 335
 - Optimizing the Design 336
 - Mapping Problem-Domain Classes to Implementation Languages 339
- CONSTRAINTS AND CONTRACTS 343
 - Types of Constraints 343
 - Elements of a Contract 346
- METHOD SPECIFICATION 347
 - General Information 348
 - Events 349
 - Message Passing 349
 - Algorithm Specification 349
- APPLYING THE CONCEPTS AT CD
 - SELECTIONS 351
- Summary* 354

Chapter 10
Data Base Design 361

- INTRODUCTION 362
- OBJECT-PERSISTENCE FORMATS 362
 - Sequential and Random Access Files 363
 - Relational Databases 366
 - Object-Relational Databases 368
 - Object-Oriented Databases 368
 - Selecting an Object-Persistence Format 369
- MAPPING PROBLEM-DOMAIN OBJECTS TO OBJECT-PERSISTENCE FORMATS 372
 - Mapping Problem-Domain Objects to an OODBMS Format 372
 - Mapping Problem-Domain Objects to an ORDBMS Format 376
 - Mapping Problem-Domain Objects to an RDBMS Format 379
- OPTIMIZING RDBMS-BASED OBJECT STORAGE 382
 - Optimizing Storage Efficiency 382
 - Optimizing Data Access Speed 388
 - Estimating Data Storage Size 393
- NONFUNCTIONAL REQUIREMENTS AND DATA MANAGEMENT LAYER DESIGN 394
- DESIGNING DATA ACCESS AND MANIPULATION CLASSES 395
- APPLYING THE CONCEPTS AT CD
 - SELECTIONS 398
 - Select Object-Persistence Format 398
 - Map Problem-Domain Objects to Object-Persistence Format 399
 - Optimize Object Persistence and Estimate Its Size 400
 - Data Access and Manipulation Class Design 402
- Summary* 404

Chapter 11
User Interface Design 411

- INTRODUCTION 412
- PRINCIPLES FOR USER INTERFACE DESIGN 412
 - Layout 413

Writing Documentation Topics	524
Identifying Navigation Terms	525
APPLYING THE CONCEPTS AT CD	
SELECTIONS	526
Managing Programming	526
Testing	526
Developing User Documentation	528
<i>Summary</i>	530
Chapter 14	
Installation	533
<hr/>	
INTRODUCTION	533
CULTURAL ISSUES AND INFORMATION	
TECHNOLOGY	535
CONVERSION	537
Conversion Style	538
Conversion Location	539
Conversion Modules	540
Selecting the Appropriate Conversion Strategy	541
CHANGE MANAGEMENT	543
Understanding Resistance to Change	544

Revising Management Policies	546
Assessing Costs and Benefits	547
Motivating Adoption	549
Enabling Adoption: Training	550
POSTIMPLEMENTATION ACTIVITIES	552
System Support	552
System Maintenance	554
Project Assessment	555
APPLYING THE CONCEPTS AT CD	
SELECTIONS	557
Conversion	557
Change Management	558
Postimplementation Activities	558
