Contents

Preface	ix
MATERIALS SOLUTIONS FOR THE NUCLEAR RENAISSANCE	
Irradiation Effects in Ceramics for Plutonium Disposition C. Davoisne, W. E. Lee, M. C. Stennett, N. C. Hyatt, N. Peng, and C. Jaynes	3
Synthesis and Structures of $Gd_2(Zr_{2-x}Ce_x)O_7$: A Model Ceramic System for Plutonium Disposition D. P. Reid, M. C. Stennett, and N. C. Hyatt	11
Waste Form Development for SRS MOX Plant Effluent Erich Hansen, Timothy Jones, Tommy Edwards, and Alex Cozzi	21
Flammable Gasses in the Saltstone Process Flowsheet A. D. Cozzi	31
Development of Crystal-Tolerant Waste Glasses J. Matyáš, J. D. Vienna, A. Kimura, M. Schaible, and R. M. Tate	41
Phase Stability of Defense Waste Processing Facility (DWPF) Type High Level Nuclear Waste Glasses Amanda L. Billings, Carol M. Jantzen, Connie C. Herman, and Sharon L. Marra	51
Alkali/Akaline-Earth Content Effects on Properties of High-Alumina Nuclear Waste Glasses J. S. McCloy, C. Rodriguez, C. Windisch, C. Leslie, M. J. Schweiger, B. R. Riley, and J. D. Vienna	63
Nepheline Crystallization in Nuclear Waste Glasses Kevin M. Fox, David K. Peeler, and Thomas B. Edwards	77

Cold Crucible Vitrification of SRS SB4 HLW Surrogate at High Waste Loadings	91
A. P. Kobelev, S. V. Stefanovsky, V. V. Lebedev, D. Y. Suntsov, M. A. Polkanov, O. A. Knyazev, and J. C. Marra	
An Extraction of Platinum Group Metals and Molybdenum from Molten Borosilicate Glass Using Cu and Cu ₅ Si	105
Kazuyoshi Uruga	
Microstructure of Laser-Melted Zirconium Carbide Ceramics	113
H. F. Jackson, D. D. Jayaseelan, W. J. Clegg, M. J. Reece, F. Inam, D. Manara, C. Perinetti Casoni, and W. E. Lee	
On the Mechanism of Radiation Damage in Zircon by High-Energy Electrons	127
N. Jiang	
Anelasticity in Austenitic Steels	133
Ashwin Rao, P. John Bouchard, and Michael E. Fitzpatrick	
Molten Salts for Nuclear Cogeneration	145
Luke Olson, James Ambrosek, Guoping Cao, Kumar Sridharan, Mark Anderson, and Todd Allen	
GREEN ENGINEERING AND ENVIRONMENTAL STEWARDSHIP	
Development of Low-Cost Functional Geopolymeric Materials	159
Mazen Alshaaer, Faten Slaty, Hani Khoury, Hubert Rahier, and Jan Wastiels	
Green Technology for Extraction of Iron from Ores and Other Materials	169
Allen W. Apblett and Kevin Barber	
Nanotechnology for Uranium Separations and Immobilization	177
Kevin Barber, Allen W. Apblett, Sulaiman Al-Fadul, Alan Piquette, and Mohamed Chehbouni	
How the Classic Materials Science Stool is being Changed by the Sustainability Stool	189
Marsha S. Bischel and Amy A. Costello	
Impact of Materials Selection on the Sustainability of Wind Energy	203
Davion M. Hill and Narasi Sridhar	
Precipitation Behavior of Chromium in Chromium(III)-Bearing Slag	217
Xingrong Wu, Liaosha Li, Ping Wang, Zhaojin Wu, and Yuanchi Dong	
Improved Energy Efficiency and Environmental Benefits for Calcium Treatment in Steel	227
James Yanker and David Dudek	

NANOTECHNOLOGY FOR ENERGY

Optical Characterization of Chemically Deposited SbCuS Thin Films Chinedu Ekuma, Mishack Nnabuchi, Nwabueze Aja, and Israel Owate	243
Examining Defects in Solid Core 2-D Photonic Band-Gap Fibers with High Index Inclusions Neal T. Pfeifferberger and Gary R. Pickrell	251
Nanophased Materials in Supercritical CO₂: Ceramic Nanopowder Synthesis, Encapsulation and Deposition J. C. Ruiz, F. Charton, S. Sarrade, A. Hertz, B. Fournel, A. Julbe, and C. Guizard	259
Influence of Gas Flow Rate on the Formation of ZnO Nanorods and Their Effects on Photoelectrochemical Response Sudhakar Shet, Kwang-Soon Ahn, Ravindra Nuggehalli, Yanfa Yan, Todd Deutsch, John Turner, and Mowafak Al-Jassim	267
Nanocoating Enhanced Optical Fiber Sensors M. Smietana, W. J. Bock, J. Szmidt, and G. R. Pickrell	275
Surface Plasmon Resonant Enhanced Optical Transmission through ZnO/Ag/ZnO Multilayered Films Pangpang Wang, Dongyan Zhang, Chang Huang, Xiaoping Song, and Ri-ichi Murakami	287
Controlled Shape Synthesis of BaTiO₃-(Mn_{0.5}Zn_{0.5})Fe₂O₄ Nanocomposites Yaodong Yang, Wenwei Ge, Shashank Priya, Yu U. Wang, Jie-Fang Li, and D. Viehland	295
Author Index	301
