Essentials of Progressive Care Nursing

Marianne Chulay
Suzanne M. Burns

SECOND EDITION

Contents in Detail

<i>Contributors</i>	xvii
<i>Reviewers</i>	xix
<i>Preface</i>	xxi
 Section I. The Essentials.....	1
1. Assessment of Progressive Care Patients and Their Families.....	3
<i>Mary Fran Tracy</i>	
Assessment Framework 3	
Prearrival Assessment 4 / Arrival Quick Check 4 / Comprehensive Initial Assessment 4/ Ongoing	
Assessment 4/ Patient Safety Considerations in Admission Assessments 4	
Prearrival Assessment: Before The Action Begins 5	
Arrival Quick Check Assessment 6	
Airway and Breathing 6 / Circulation and Cerebral Perfusion 6 / Chief Complaint 6 /	
Drugs and Diagnostic Tests 7 / Equipment 7	
Comprehensive Initial Assessment 7	
Past Medical History 9 / Social History 9 / Physical Assessment by Body System 9 /	
Transition/Discharge Planning 14	
Ongoing Assessment 15	
 2. Planning Care for Progressive Care Patients and Their Families	17
<i>Mary Fran Tracy</i>	
Multidisciplinary Plan of Care and Critical Pathways 18	
Patient Safety Considerations in Planning Care 18	
Prevention of Common Complications 19	
Physiologic Instability 19 / Deep Venous Thrombosis 19 / Hospital-Acquired Infections 19 /	
Skin Breakdown 20 / Sleep Pattern Disturbance 21 / Psychosocial Impact 21	
Patient and Family Education 23	
Assessment of Learning Readiness 23 / Strategies to Address Patient and Family Education 23 /	
Outcome Measurement 24	
Family-Focused Care 24	
Transporting the Progressive Care Patient 26	
Assessment of Risk for Complications 26 / Level of Care Required During Transport 27 /	
Preparation 28/ Transport 28/ Interfacility Transfers 29	
Transitioning to the Next Stage of Care 29	
Supporting Patients and Families During the Dying Process 30	

3. Interpretation and Management of Basic Cardiac Rhythms	33
<i>Carol Jacobson</i>	
Basic Electrophysiology	33
ECG Waveforms, Complexes, and Intervals	34
P Wave 34 / QRS Complex 35 / T Wave 35 / U Wave 35 / PR Interval 35 / ST Segment 35 /	
QT Interval 35	
Basic Electrocardiography	35
Cardiac Monitoring	35
Determination of the Heart Rate	38
Determination of Cardiac Rhythm	39
Common Arrhythmias	39
Rhythms Originating in the Sinus Node	39
Normal Sinus Rhythm 39 / Sinus Bradycardia 39 / Sinus Tachycardia 40 / Sinus Arrhythmia 40 /	
Sinus Arrest 41	
Arrhythmias Originating in the Atria	41
Premature Atrial Complexes 41 / Wandering Atrial Pacemaker 42 / Atrial Tachycardia 42 /	
Atrial Flutter 43 / Atrial Fibrillation 44	
Arrhythmias Originating in the Atrioventricular Junction	46
Premature Junctional Complexes 46 / Junctional Rhythm, Accelerated Junctional Rhythm, and	
Junctional Tachycardia 47	
Arrhythmias Originating in the Ventricles	47
Premature Ventricular Complexes 47 / Ventricular Rhythm and Accelerated Ventricular Rhythm 48 /	
Ventricular Tachycardia 49 / Ventricular Fibrillation 49 / Ventricular Asystole 50	
Atrioventricular Blocks	51
First-Degree Atrioventricular Block 51 / Second-Degree Atrioventricular Block 51 / High-Grade	
Atrioventricular Block 53 / Third-Degree Atrioventricular Block (Complete Block) 53	
Temporary Pacing	54
Indications 54 / Transvenous Pacing 54 / Epicardial Pacing 54 / Components of a Pacing System 55 /	
Basics of Pacemaker Operation 56 / Initiating Transvenous Ventricular Pacing 57 / Initiating	
Epicardial Pacing 58 / External (Transcutaneous) Pacemakers 58	
Defibrillation and Cardioversion	58
Defibrillation 58 / Automatic External Defibrillators 59 / Cardioversion 59	
4. Hemodynamic Monitoring	63
<i>Leanna R. Miller and Suzanne M. Burns</i>	
Hemodynamic Parameters	63
Cardiac Output 63 / Components of Cardiac Output/Cardiac Index 65 / Stroke Volume and Stroke	
Volume Index 66 / Factors Affecting Stroke Volume/Stroke Volume Index 66	
Basic Components of Hemodynamic Monitoring Systems	69
Pulmonary Artery Catheter 70 / Arterial Catheter 70 / Pressure Tubing 70 / Pressure Transducer 70 /	
Pressure Amplifier 70 / Pressure Bag and Flush Device 70 / Alarms 72	
Obtaining Accurate CVP and Arterial Values	72
Zeroing the Transducer 72 / Leveling the Transducer to the Catheter Tip 72 / Calibration of the	
Transducer/Amplifier System 72 / Ensuring Accurate Waveform Transmission 72	
Insertion and Removal of Catheters	74
Central Venous Catheters 74 / Arterial Catheters 74	
Obtaining and Interpreting Hemodynamic Waveforms	77
Patient Positioning 78 / Interpretation 78 / Artifacts in Hemodynamic Waveforms: Respiratory	
Influence 81	
Continuous Mixed and Central Venous Oxygen Monitoring (SvO ₂ /ScvO ₂)	82
SvO ₂ /ScvO ₂ Monitoring Principles 82	
Minimally Invasive Hemodynamic Monitoring	83
Thoracic Bioimpedance 83	

5. Airway and Ventilatory Management	87
<i>Robert E. St. John, Maureen Seckel, and Suzanne M. Burns</i>	
Respiratory Assessment Techniques, Diagnostic Tests, and Monitoring Systems	87
Arterial Blood Gas Monitoring 87 / Venous Blood Gas Monitoring 92 / Pulse Oximetry 92 /	
Assessing Pulmonary Function 93	
Airway Management	94
Oropharyngeal Airway 94 / Nasopharyngeal Airway 95 / Laryngeal Mask Airway 96 /	
Combitube 96 / Artificial Airways 96 / Endotracheal Suctioning 100	
Oxygen Therapy	101
Complications 101 / Oxygen Delivery 102	
Basic Ventilatory Management	104
Indications 104 / General Principles 104 / Patient-Ventilator System 104 / Modes 108 /	
Complications of Mechanical Ventilation 110 / Weaning from Short-Term Mechanical	
Ventilation 112 / Weaning from Long-Term Mechanical Ventilation 114 / Respiratory Fatigue,	
Rest, and Conditioning 116 / Wean Trial Protocols 116 / Other Protocols for Use 117 / Critical	
Pathways 117 / Systematic Institutional Initiatives for the Management of the LTMV Patient	
Population 118 / Troubleshooting Ventilators 118 / Oral Feedings 118 / Communication 119 /	
Principles of Management 122	
6. Pain and Sedation Management	127
<i>Joan Michiko Ching and Suzanne M. Burns</i>	
Physiologic Mechanisms of Pain	127
Peripheral Mechanisms 127 / Spinal Cord Integration 129 / Central Processing 129	
Responses to Pain	129
Pain Assessment	130
A Multimodal Approach to Pain Management	130
Nonsteroidal Anti-Inflammatory Drugs	131
Side Effects 131 /	
Opioids	132
Side Effects 132 / Intravenous Opioids 133 / Patient-Controlled Analgesia 133 / Switching From IV	
to Oral Opioid Analgesia 134	
Epidural Analgesia	135
Epidural Opioids 135 / Epidural Local Anesthetics 136	
Cutaneous Stimulation	137
Distraction	137
Imagery	138
Relaxation and Sedation Techniques	138
Deep Breathing and Progressive Relaxation 138 / Presence 138	
Special Considerations for Pain Management in the Elderly	138
Assessment 138 / Interventions 139	
Sedation	139
Reasons for Sedation 139 / Drugs for Sedation 140 / Drugs for Delirium 140 / Goals of Sedation,	
Monitoring, and Management 140	
7. Pharmacology	145
<i>Ernest Alexander</i>	
Medication Safety	145
Medication Administration Methods	146
Intravenous 146 / Intramuscular or Subcutaneous 146 / Oral 146 / Sublingual 147 / Intranasal 147 /	
Transdermal 147	
Central Nervous System Pharmacology	147
Sedatives 147 / Analgesics 150 / Anticonvulsants 151	

Cardiovascular System Pharmacology	154
Miscellaneous Agents 154 / Parenteral Vasodilators 154 / Antiarrhythmics 157 / Vasodilators and Remodeling Agents 159 / Thrombolytic Agents 160 / Vasoconstricting Agents 161 / Inotropic Agents 162	
Anti-Infective Pharmacology	162
Aminoglycosides 162 / Vancomycin 163 / Other Antibiotics 163	
Pulmonary Pharmacology	164
Theophylline 164 / Albuterol 164 / Levalbuterol 165	
Gastrointestinal Pharmacology	165
Stress Ulcer Prophylaxis 165 / Acute Peptic Ulcer Bleeding 166 / Variceal Hemorrhage 166	
Renal Pharmacology	167
Diuretics 167	
Hematologic Pharmacology	168
Anticoagulants 168 / Direct Thrombin Inhibitors 170 / Glycoprotein IIb/IIIa Inhibitor 170	
Immunosuppressive Agents	170
Cyclosporine 170 / Tacrolimus (FK506) 171 / Sirolimus (Rapamycin) 171	
Special Dosing Considerations	172
Drug Disposition in the Elderly 172 / Therapeutic Drug Monitoring 172	
8. Ethical and Legal Considerations.....	175
<i>Sarah Delgado</i>	
The Foundation for Ethical Decision Making	175
Professional Codes and Standards 175 / Position Statements and Guidelines 176 / Institutional Policies 176 / Legal Standards 176 / Principles of Ethics 177 / Care 179 / Paternalism 179 / Patient Advocacy 179	
The Process of Ethical Analysis	180
Assessment 180 / Plan 180 / Implementation 180 / Evaluation 180	
Contemporary Ethical Issues	180
Informed Consent 180 / Determining Capacity 181 / Advance Directives 182 / End-of-Life Issues 183 / Resuscitation Decisions 185	
Building an Ethical Environment	185
Values Clarification 185 / Provide Information and Clarify Issues 185 / Recognize Moral Distress 186 / Engage in Collaborative Decision Making 186	
Section II. Pathologic Conditions.....	189
9. Cardiovascular System.....	191
<i>Barbara Leeper</i>	
Special Assessment Techniques, Diagnostic Tests, and Monitoring Systems	191
Assessment of Chest Pain 191 / Coronary Angiography 191 / Percutaneous Coronary Interventions 193 / Other Percutaneous Coronary Interventions 194	
Pathologic Conditions	194
Acute Ischemic Heart Disease 194 / Electrophysiology Studies 206 / Heart Failure 207 / Shock 213 / Hypertension 218	
10. Respiratory System.....	223
<i>Maureen Seckel</i>	
Special Assessment Techniques, Diagnostic Tests, and Monitoring Systems	223
Chest X-Rays 223 / Computed Tomography and Magnetic Resonance Imaging 228 / Pulmonary Angiograms 228 / Chest Tubes 228 / Thoracic Surgery and Procedures 229	
Pathologic Conditions	230
Acute Respiratory Failure 230 / Acute Respiratory Distress Syndrome 233 / Exacerbation Chronic Obstructive Pulmonary Disease 234 / Acute Asthma 237 / Interstitial Lung Disease 238 / Pulmonary Hypertension 239 / Pneumonia 240 / Pulmonary Embolism 242	

11. Multisystem Problems	247
<i>Ruth M. Kleinpell and Suzanne M. Burns</i>	
Pathologic Conditions 247	
Sepsis and Multiple Organ Dysfunction Syndrome 247	
Overdos 253	
Etiology, Risk Factors, and Pathophysiology 254	
12. Neurologic System	261
<i>Dea Mahanes</i>	
Special Assessment Techniques and Diagnostic Tests 261	
Level of Consciousness 261 / Glasgow Coma Scale 262 / Full Outline of UnResponsiveness (FOUR) Score 263 / Mental Status 263 / Motor Assessment 264 / Sensation 264 / Cranial Nerve Assessment and Assessment of Brain Stem Function 266 / Vital Sign Alterations in Neurologic Dysfunction 267 / Death by Neurologic Criteria 268	
Diagnostic Testing 268	
Lumbar Puncture 268 / Computed Tomography 269 / Magnetic Resonance Imaging 269 / Cerebral Angiography 270 / Transcranial Doppler Ultrasound 270 / Electroencephalography 270 / Electromyography 271	
Intracranial Pressure (ICP) 271	
Cerebral Blood Flow 271 / Causes of Increased Intracranial Pressure 272 / Clinical Presentation 272 / Management of Increased ICP 272	
Acute Ischemic Stroke 274	
Etiology, Risk Factors, and Pathophysiology 274 / Clinical Presentation 275 / Diagnostic Tests 275 / Principles of Management of Acute Ischemic Stroke 276	
Hemorrhagic Stroke 277	
Etiology, Risk Factors, and Pathophysiology 277 / Clinical Presentation 278 / Diagnostic Tests 278 / Principles of Management of Intracerebral Hemorrhage 278	
Seizures 278	
Etiology, Risk Factors, and Pathophysiology 278 / Clinical Presentation 278 / Diagnostic Testing 279 / Principles of Management of Seizures 279	
Infections of the Central Nervous System 280	
Meningitis 280 / Encephalitis 280 / Intracranial Abscess 280	
Neuromuscular Diseases 280	
Myasthenia Gravis 281 / Guillain-Barré Syndrome 281 / Amyotrophic Lateral Sclerosis 281	
13. Hematologic and Immune Systems	283
<i>Diane K. Dressler</i>	
Special Assessment Techniques, Diagnostic Tests, and Monitoring Systems 283	
Complete Blood Count 283 / Red Blood Cell Count 283 / Hemoglobin 284 / Hematocrit 284 / Red Blood Cell Indices 284 / Total White Blood Cell Count 284 / White Blood Cell Differential 284 / Platelet Count 285 / Erythrocyte Sedimentation Rate 285 / Coagulation Studies 285 / Additional Tests and Procedures 286	
Pathologic Conditions 286	
Anemia 286 / Immunocompromise 288 / Coagulopathies 290	
14. Gastrointestinal System	295
<i>Debrah Andris, Elizabeth Krzywda, Carol Parrish, Joe Krenitsky</i>	
Pathologic Conditions 295	
Acute Upper Gastrointestinal Bleeding 295 / Liver Failure 303 / Acute Pancreatitis 307 / Intestinal Ischemia 309 / Bowel Obstruction 310 / Bariatric (Weight Loss) Surgery 311 / Surgical Procedure 312	
Nutritional Support for Acutely Ill Patients 313	
Nutrition Requirements 313 / Nutritional Case: Special population 313 / Postgastrectomy Syndromes 314 / Gastric Residual Volume 315 / Aspiration 316 / Bowel Sounds 317 / Nausea and Vomiting 317 / Osmolality or Hypertonicity of Formula 318 / Diarrhea 318 / Flow Rates and Hours of Infusion 318 / Formula Selection 319	

15. Renal System.....	323
<i>Carol Hinkle</i>	
Special Assessment Techniques, Diagnostic Tests, and Monitoring Systems	323
Pathologic Conditions	323
Acute Renal Failure 323 / Life-Threatening Electrolyte Imbalances	327
Renal Replacement Therapy	332
Access 333 / Dialyzer/Hemofilters/Dialysate 333 / Procedures 333 / Indications for and Efficacy of	
Renal Replacement Therapy Modes 334 / General Renal Replacement Therapy Interventions	336
16. Endocrine System.....	337
<i>Christine Kessler</i>	
Special Assessment Techniques, Diagnostic Tests, and Monitoring Systems	337
Blood Glucose Monitoring	337
Pathologic conditions	338
Hyperglycemic States 338 / Hyperglycemic Emergencies 339 / Acute Hypoglycemia 347 /	
Syndrome of Inappropriate Antidiuretic Hormone Secretion 348 / Diabetes Insipidus	350
17. Trauma	353
<i>Allen Wolfe and Carol A. Rauen</i>	
Specialized Assessment Techniques, Diagnostic Tests, and Monitoring Systems	353
Primary and Secondary Trauma Survey Assessment 353 / Diagnostic Studies 356 / Mechanism of	
Injury 358 / Physiologic Consequences of Trauma	359
Common Injuries in the Trauma Patient	360
Thoracic Trauma 360 / Abdominal Trauma 362 / Musculoskeletal Trauma	364
Complications of Traumatic Injury in Severe Multisystem Trauma	365
Acute Respiratory Distress Syndrome 367 / Infection/Sepsis 368 / Systemic Inflammatory	
Response Syndrome	368
Psychological Consequences of Trauma	368
Section III. Advanced Concepts in Caring for the Acutely Ill Patient.....	371
18. Advanced ECG Concepts.....	373
<i>Carol Jacobson</i>	
The 12-Lead Electrocardiogram	373
Axis Determination 377 / Bundle Branch Block 378 / Acute Coronary Syndrome 380 /	
Preexcitation Syndromes	385
Advanced Arrhythmia Interpretation	390
Supraventricular Tachycardias 390 / Polymorphic Ventricular Tachycardias 395 / Differentiating	
Wide QRS Beats and Rhythms	396
ST-Segment Monitoring	399
Measuring the ST Segment 400 / Choosing the Best Leads for ST-Segment Monitoring	400
Cardiac Pacemakers	402
Evaluating Pacemaker Function 403 / VVI Pacemaker Evaluation 404 / DDD Pacemaker	
Evaluation	407
19. Advanced Cardiovascular Concepts.....	411
<i>Barbara Leeper</i>	
Pathologic Conditions	411
Cardiomyopathy 411 / Valvular Disease 416 / Pericarditis 421 / Aortic Aneurysm 423 / Cardiac	
Transplantation 426 / Ventricular Assist Devices	431
20. Advanced Neurologic Concepts.....	439
<i>Dea Mahanes</i>	
Subarachnoid Hemorrhage	439
Etiology, Risk Factors, and Pathophysiology 439 / Clinical Presentation 439 / Diagnostic Tests 440 /	
Principles of Management of Aneurysmal Subarachnoid Hemorrhage	441

Traumatic Brain Injury	442
Etiology, Risk Factors, and Pathophysiology	442 / Clinical Presentation 445 / Diagnostic Tests 445 / Principles of Management of Traumatic Brain Injury 445
Traumatic Spinal Cord Injury	447
Etiology, Risk Factors, and Pathophysiology	447 / Clinical Presentation 449 / Diagnostic Tests 450 / Principles of Management of Acute Spinal Cord Injury 450 / Future Spinal Cord Injury Treatment 456
Brain Tumors	456
Etiology, Risk Factors, and Pathophysiology	456 / Clinical Presentation 457 / Diagnostic Tests 457 / Principles of Management of Intracranial Tumors 457 / Special Considerations: Transsphenoidal Resection of Pituitary Tumors 458
Special Procedures: Invasive Monitoring of Intracranial Pressure (ICP)	459
ICP Waveforms	460
Special Procedures: Management of a Patient with a Lumbar Drain	460
Section IV. Key Reference Information	463
21. Normal Values Table	465
<i>Marianne Chulay</i>	
22. Pharmacology Tables	467
<i>Earnest Alexander</i>	
23. Advanced Cardiac Life Support Algorithms	481
<i>Marianne Chulay</i>	
24. Cardiac Rhythms, ECG Characteristics, and Treatment Guide	485
<i>Carol Jacobson</i>	
Index	495
