PART I

1 Leukemia

Sue Zupanec • Deborah Tomlinson

1.1 Introduction	2
1.2 Acute Lymphoblastic Leukemia	3
1.2.1 Epidemiology	3
1.2.2 Etiology	4
1.2.3 Molecular Genetics	6
1.2.4 Symptoms and Clinical Signs	7
1.2.5 Diagnostics	8
1.2.6 Staging and Classification	9
1.2.7 Treatment	12
1.2.8 Prognosis	16
1.2.9 Follow-Up	16
1.2.10 Future Perspectives	17
1.2.11 Relapsed ALL	17
1.3 Acute Myeloid Leukemia	19
1.3.1 Epidemiology	19
1.3.2 Etiology	19
1.3.3 Molecular Genetics	20
1.3.4 Symptoms and Clinical Signs	20
1.3.5 Diagnostics	21
1.3.6 Staging and Classification	21
1.3.7 Treatment	22
1.3.8 Prognosis	24
1.3.9 Follow-Up	24
1.3.10 Future Perspectives	24
1.4 Chronic Myeloid Leukemia	25
1.4.1 Epidemiology and Etiology	25
1.4.2 Molecular Genetics	25
1.4.3 Symptoms and Clinical Signs	25
1.4.4 Diagnostics	26
1.4.5 Treatment	26
1.4.6 Prognosis	26
1.4.7 Future Perspectives	26
1.5 Juvenile Myelomonocytic Leukemia	26
1.6 Langerhans Cell Histiocytosis	27
1.6.1 Epidemiology and Etiology	27
1.6.2 Diagnostics	28
1.6.3 Symptoms and Clinical Signs	28
1.6.4 Treatment	29
1.6.5 Prognosis	29
References	29

2 Lymphoma

Sue Zupanec

2.1 Lymphoma	33
2.2 Hodgkin Lymphoma	33
2.2.1 Epidemiology	34
2.2.2 Etiology	34
2.2.3 Molecular Genetics	34
2.2.4 Symptoms and Clinical Signs	34
2.2.5 Diagnostics	36
2.2.6 Staging and Classification	38
2.2.7 Treatment	39
2.2.8 Prognosis	42
2.2.9 Follow-Up	43
2.2.10 Relapsed/Refractory HL	43
2.2.11 Future Perspectives	44
2.3 Non-Hodgkin Lymphomas	44
2.3.1 Epidemiology	44
2.3.2 Etiology	45
2.3.3 Molecular Genetics	45
2.3.4 Symptoms and Clinical Signs	46
2.3.5 Diagnostics	48
2.3.6 Staging and Classification	50
2.3.7 Treatment	50
2.3.8 Prognosis	54
2.3.9 Follow-Up	54
2.3.10 Treatment of Relapsed/Refractory NHL	55
2.3.11 Future Perspectives	55
References	56

3 Solid Tumor

Eleanor Hendershot

3.1 Ewing's Sarcoma Family of Tumors	60
3.1.1 Epidemiology	60
3.1.2 Etiology	60
3.1.3 Molecular Genetics	60
3.1.4 Symptoms and Clinical Signs	61
3.1.5 Diagnosis	61
3.1.6 Staging and Classification	63
3.1.7 Treatment	63
3.1.8 Prognosis	64

3.1.9	Follow-Up	65
3.1.10	Future Perspectives	65
3.2	Osteosarcoma	65
3.2.1	Epidemiology	66
3.2.2	Etiology	66
3.2.3	Molecular Genetics	66
3.2.4	Signs and Symptoms	67
3.2.5	Diagnostics	67
3.2.6	Staging and Classification	68
3.2.7	Treatment	68
3.2.8	Prognosis	71
3.2.9	Follow-Up	71
3.2.10	Future Perspectives	71
3.3	Liver Tumors	72
3.3.1	Epidemiology	72
3.3.2	Etiology	72
3.3.3	Molecular Genetics	72
3.3.4	Symptoms and Clinical Signs	72
3.3.5	Diagnostics	73
3.3.6	Staging and Classification	74
3.3.7	Treatment	75
3.3.8	Prognosis	76
3.3.9	Follow-Up	76
3.3.10	Future Perspectives	77
3.4	Neuroblastoma	77
3.4.1	Epidemiology	77
3.4.2	Etiology	77
3.4.3	Molecular Genetics	77
3.4.4	Symptoms and Clinical Signs	79
3.4.5	Diagnostics	80
3.4.6	Staging and Classification	81
3.4.7	Treatment	82
3.4.8	Prognosis	85
3.4.9	Follow-Up	85
3.4.10	Future Perspectives	86
3.5	Renal Tumors	86
3.5.1	Epidemiology	86
3.5.2	Etiology	87
3.5.3	Molecular Genetics	87
3.5.4	Symptoms and Clinical Signs	87
3.5.5	Diagnostics	88
3.5.6	Staging and Classification	89
3.5.7	Treatment	89
3.5.8	Prognosis	92
3.5.9	Follow-Up	93
3.5.10	Future Perspectives	93
3.6	Retinoblastoma	93
3.6.1	Epidemiology	93
3.6.2	Etiology	94
3.6.3	Molecular Genetics	94
3.6.4	Signs and Symptoms	94
3.6.5	Diagnostics	95
3.6.6	Staging and Classification	96
3.6.7	Treatment	96
3.6.8	Prognosis	99
3.7	Rhabdomyosarcoma	100
3.7.1	Epidemiology	100
3.7.2	Etiology	101
3.7.3	Molecular Genetics	101
3.7.4	Symptoms and Clinical Signs	101
3.7.5	Diagnostics	101
3.7.6	Staging and Classification	103
3.7.7	Treatment	103
3.7.8	Prognosis	106
3.7.9	Follow-Up	106
3.7.10	Future Perspectives	106
3.8	Non-Rhabdomyosarcomatous Soft-Tissue Sarcomas	107
3.8.1	Alveolar Soft-Part Sarcoma	108
3.8.2	Desmoid Tumor (Aggressive Fibromatosis)	108
3.8.3	Desmoplastic Small Round Cell Tumor	108
3.8.4	Infantile Fibrosarcoma	109
3.8.5	Infantile Hemangiopericytoma	109
3.8.6	Infantile Myofibromatosis	109
3.8.7	Leiomyosarcoma	109
3.8.8	Liposarcoma	109
3.8.9	Malignant Peripheral Nerve Sheath Tumor	110
3.8.10	Synovial Sarcoma	110
3.9	Germ Cell Tumors	110
3.9.1	Epidemiology	111
3.9.2	Etiology	111
3.9.3	Molecular Genetics	112
3.9.4	Symptoms and Clinical Signs	112
3.9.5	Diagnostics	112
3.9.6	Staging and Classification	113
3.9.7	Treatment	113
3.9.8	Prognosis	115
3.9.9	Follow-Up	115
3.9.10	Future Perspectives	116
3.10	Rare Tumors	116
3.10.1	Adrenocortical Carcinoma	116
3.10.2	Melanoma	117
3.10.3	Nasopharyngeal Carcinoma	118
3.10.4	Pleuropulmonary Blastoma	118
3.10.5	Thyroid Carcinoma	119
References	119	

4 Central Nervous System Tumors

Nancy E. Kline • Joan O'Hanlon-Curry

4.1	Causes/Epidemiology	129
4.2	Distribution/Classification	129
4.3	Staging	130
4.4	Molecular Genetics of Brain Tumors	130

4.5 Diagnosis	130
4.6 Specialist Referral	130
4.7 Hydrocephalus	130
4.8 Treatment	131
4.8.1 Surgery	131
4.8.2 Radiotherapy	131
4.8.3 Chemotherapy	132
Prognosis	132
4.10 Specific Tumors	132
4.10.1 PNETs/Medulloblastomas	132
4.10.2 Astrocytomas/Gliial Tumors	133
4.10.3 Malignant Gliomas	134
4.10.4 Other High-Grade Gliomas	134
4.11 Follow-Up	138
4.11.1 The Late Effects and Rehabilitation of Survivors	138
4.11.2 Palliative Care	139
4.11.3 Future Perspectives/New Innovations	139
References	140

PART II

5 Anemias

Rosalind Bryant

5.1 Anemia	142
5.2 Iron-Deficiency Anemia	146
5.2.1 Epidemiology	146
5.2.2 Etiology	146
5.2.3 Molecular Genetics	146
5.2.4 Symptoms/Clinical Signs	146
5.2.5 Diagnostic Testing	147
5.2.6 Treatment	148
5.2.7 Transfusion	148
5.2.8 Erythropoietin (Epogen)	148
5.2.9 Prognosis	149
5.3 Sickle Cell Disease	149
5.3.1 Epidemiology	149
5.3.2 Etiology	149
5.3.3 Molecular Genetics	149
5.3.4 Symptoms/Clinical Signs	149
5.3.5 Diagnostic Testing	150
5.3.6 Complications of SCD	151
5.3.7 Prognosis	158
5.3.8 Future Perspectives	158
5.4 Thalassemia	158
5.4.1 Alpha (α)-Thalassemia	158
5.4.2 Beta Thalassemia (Cooley Anemia)	159
5.4.3 Diagnostic Testing	160
5.4.4 Treatment	160
5.4.5 Treatment of Hemosiderosis (Iron Overload)	160
5.4.6 Chelation Therapy	161

5.4.7 Clinical Advances (Hemosiderosis)	161
5.4.8 Prognosis	161
5.4.9 Follow-Up	162
5.4.10 Future Perspectives	162
5.5 Hemolytic Anemia	162
5.5.1 Hereditary Spherocytosis	162
5.5.2 Autoimmune Hemolytic Anemia	164
5.5.3 Glucose-6-Phosphate Dehydrogenase Deficiency	165
5.6 Bone Marrow Failure Syndromes	167
5.6.1 Aplastic Anemia	167
References	170

6 Neutropenia

Karyn Brundige

6.1 Epidemiology	173
6.2 Etiology	174
6.3 Symptoms and Clinical Signs	175
6.4 Diagnostic Testing	175
6.5 Treatment	176
6.6 Prognosis	177
6.7 Follow-Up	178
References	178

7 Thrombocytopenia

Karyn Brundige

7.1 Epidemiology	179
7.2 Etiology	180
7.3 Symptoms and Clinical Signs	180
7.4 Diagnostic Testing	182
7.5 Treatment	182
7.6 Prognosis	184
7.7 Follow-Up	184
7.8 Future Perspectives	184
References	184

8 Bleeding Disorders

Joan O'Brien-Shea

8.1 Hemophilia	187
8.1.1 Epidemiology	187
8.1.2 Etiology	187
8.1.3 Genetics	188
8.1.4 Symptoms and Clinical Signs	188
8.1.5 Diagnostic Testing	190
8.1.6 Treatment	191
8.1.7 Prognosis	194
8.1.8 Follow-Up	194

8.1.9 Future Perspectives	194
8.2 von Willebrand Disease	194
8.2.1 Epidemiology	194
8.2.2 Etiology	195
8.2.3 Genetics	195
8.2.4 Symptoms and Clinical Signs	195
8.2.5 Diagnostic Testing	196
8.2.6 Treatment	199
8.2.7 Prognosis	200
8.2.8 Follow-Up	200
References	201

PART III**9 Chemotherapy**

Christine Chordas • Kristen Graham

9.1 Introduction	204
9.2 Cancer Cell Characteristics	204
9.2.1 The Cell Cycle	204
9.2.2 Cell Cycle Control	205
9.3 Chemotherapy	206
9.3.1 Principles	206
9.3.2 Resistance	206
9.3.3 The Principles of Pharmacokinetics, Pharmacodynamics, and Pharmacogenomics	206
9.3.4 Chemotherapy Techniques	207
9.4 Clinical Trials	207
9.4.1 Phase I Clinical Trials	208
9.4.2 Phase II Clinical Trials	208
9.4.3 Phase III Clinical Trials	208
9.4.4 Phase IV Clinical Trials	208
9.5 Chemotherapy Agents	208
9.5.1 Antimetabolites	211
9.5.2 Alkylating Agents	216
9.5.3 Antitumor Antibiotics	217
9.5.4 Anthracycline Antibiotics	218
9.5.5 Plant Derivatives	218
9.5.6 Antiangiogenic Agents	219
9.5.7 Miscellaneous Agents	220
9.6 Chemotherapy Protectants	221
9.6.1 Allopurinol (Zyloprim)	221
9.6.2 Amifostine (Ethyol)	221
9.6.3 Dexrazoxane (Zinecard)	221
9.6.4 Leucovorin Calcium (LCV, Wellcovorin, Citovorum Factor, Folic Acid)	221
9.6.5 Mesna (Mesnex)	221
9.6.6 Palifermin	222
9.7 Administration of Chemotherapy Agents	222
9.7.1 Preparation	222
9.7.2 Administration and Practice Considerations	223

9.8 Professional Guidelines to Minimize the Risk of Medication Errors

9.8.1 Prescribing Errors	224
9.9 Safe Practice Considerations	224
9.9.1 Mixing Chemotherapeutic Agents	225
9.9.2 Transporting Cytotoxic Agents	225
9.9.3 Safe Handling After Chemotherapy	225
9.9.4 Disposal of Cytotoxic Materials	225
9.9.5 Spill Management	226
9.9.6 Procedures Following Accidental Exposure	226
9.9.7 Storage	226
9.9.8 Medical Management	226

9.10 Administration of Chemotherapy in the Home**9.11 Immediate Complications of Chemotherapy Administration**

9.11.1 Extravasation	227
9.11.2 Acute Hypersensitivity Reactions (HSRs) to Chemotherapy	230
9.11.3 Risk Factors for Hypersensitivity, Flare Reactions, or Anaphylaxis	230
9.11.4 Recommended Steps to Prevent HSRs	230
9.11.5 Emergency Management of HSR/Anaphylaxis	230

9.12 Summary**References****10 Radiotherapy**

Irene Loch • Jane Khorrami

10.1 Introduction	233
10.2 Radiation	233
10.3 Principles of Treatment	234
10.4 Treatment Planning	234
10.4.1 CT Simulation	234
10.4.2 Simulation	234
10.5 Treatment Methods	235
10.5.1 External Beam Radiotherapy (Teletherapy)	235
10.5.2 Fractionation	237
10.5.3 Total Body Irradiation (TBI)	237
10.5.4 Brachytherapy	237
10.5.5 Sealed Sources	237
10.5.6 Unsealed Sources	237
10.6 Side Effects of Radiotherapy	238
10.6.1 Acute Effects	238
10.7 Special Considerations	240
10.7.1 Preparation of Children and Young People	240
10.8 Future Perspectives	240
10.8.1 Image-Guided Radiotherapy	240

10.8.2 Intra-Operative Radiotherapy	240
10.8.3 Proton Radiotherapy (PRT)	240
References	241

11 Hematopoietic Stem Cell Transplantation

Robbie Norville • Deborah Tomlinson

11.1 Principles of Treatment	243
11.2 Stem Cell Collection (Harvest)	244
11.2.1 Bone Marrow Stem Cells	244
11.2.2 Peripheral Blood Stem Cells	246
11.2.3 Umbilical Cord Blood Stem Cells	246
11.3 Donor Stem Cell Typing/Tissue Typing	247
11.4 Donor Stem Cell Sources	248
11.5 Stem Cell Processing and Infusion	249
11.5.1 ABO Mismatch	249
11.5.2 Graft vs. Leukemia	251
11.6 Description of Treatment	251
11.7 Potential Side Effects	253
11.7.1 Early Side Effects	253
11.7.2 Intermediate Side Effects	257
11.7.3 Late Side Effects	261
11.8 Special Considerations	263
11.9 Future Perspectives	264
References	265

12 Surgical Approaches to Childhood Cancer

Carol L. Rossetto

12.1 Principles of Treatment	269
12.2 Method of Delivery	270
12.2.1 Preoperative Evaluation	270
12.2.2 Postoperative Nursing Care	271
12.3 Potential Side Effects	271
12.3.1 Complications of Medical Therapy Requiring Surgical Evaluation	271
12.3.2 Complications Arising from Surgical Management of Solid Tumors	272
12.4 Special Considerations	273
12.4.1 Vascular Access Devices	273
12.5 Future Perspectives	274
12.5.1 New Surgical Techniques and Directions for Future Research	274
References	275

13 Cell and Gene Therapy

Robbie Norville

13.1 Introduction	277
13.2 Principles of Treatment	278
13.2.1 Genetic Deficit Repair	278
13.2.2 Viral-Mediated Gene Transfer	278
13.2.3 Drug-Resistant Genes	278
13.2.4 Angiogenetics Inhibitors	279
13.2.5 Gene Marking	279
13.2.6 Cell Therapy	279
13.3 Method of Delivery	279
13.3.1 Viral Vectors	280
13.3.2 Plasmid Vectors	280
13.4 Potential Side Effects	280
13.5 Special Considerations	281
13.6 Future Perspectives	281
References	281

14 Biological and Targeted Therapies

Lindsay Gainer

14.1 Introduction	283
14.2 Principles of Treatment	284
14.3 Description of Treatment	285
14.3.1 Cytokines	285
14.3.2 Interferons	285
14.3.3 Interleukins	286
14.3.4 Colony-stimulating Factors	286
14.3.5 Fusion Proteins	286
14.3.6 Monoclonal Antibodies	287
14.4 Cancer Vaccines	288
14.5 Other Immunomodulating Agents	288
14.5.1 Nonspecific Immunomodulating Agents	288
14.5.2 Retinoids	289
14.5.3 Thalidomide	289
14.6 Adoptive Immunotherapy	289
14.7 Molecular Targeted Therapy	289
14.8 Method of Delivery	290
14.9 Potential Side Effects	291
14.10 Future Perspectives	292
References	293
