Membrane Gas Separation

 WILEY

Contents

<i>Preface</i>	xiii
<i>Contributors</i>	xvii
I. Novel Membrane Materials and Transport in Them	1
1 Synthesis and Gas Permeability of Hyperbranched and Cross-linked Polyimide Membranes	3
<i>Shinji Kanehashi, Shuichi Sato and Kazukiyo Nagai</i>	
1.1 Introduction	3
1.2 Molecular Designs for Membranes	6
1.3 Synthesis of Hyperbranched Polyimides	7
1.3.1 Amorphous Cross-linked Polyimides (Type II)	7
1.3.2 Hyperbranched Polyimides (Type III)	9
1.4 Gas Permeation Properties	13
1.4.1 Amorphous Cross-linked Polyimides (Type II)	13
1.4.2 Hyperbranched Polyimides (Type III)	17
1.4.3 Selectivity and Permeability	21
1.5 Concluding Remarks	21
References	23
2 Gas Permeation Parameters and Other Physicochemical Properties of a Polymer of Intrinsic Microporosity (PIM-1)	29
<i>Peter M. Budd, Neil B. McKeown, Detlev Fritsch, Yuri Yampolskii and Victor Shantarovich</i>	
2.1 Introduction	29
2.2 The PIM concept	30
2.3 Gas Adsorption	31
2.4 Gas Permeation	33
2.5 Inverse Gas Chromatography	35
2.6 Positron Annihilation Lifetime Spectroscopy	39
2.7 Conclusions	40
Acknowledgements	40
References	40

3	Addition-type Polynorbornene with Si(CH₃)₃ Side Groups: Detailed Study of Gas Permeation, Free Volume and Thermodynamic Properties	43
	<i>Yuri Yampolskii, Ludmila Starannikova, Nikolai Belov, Maria Gringolts, Eugene Finkelshtein and Victor Shantarovich</i>	
3.1	Introduction	43
3.2	Experimental	45
3.3	Results and Discussion	45
3.3.1	Physical Properties	45
3.3.2	Gas Permeability	45
3.3.3	Sorption and Diffusion	50
3.3.4	Free Volume	50
3.4	Conclusions	55
	References	56
4	Amorphous Glassy Perfluoropolymer Membranes of Hyflon AD®: Free Volume Distribution by Photochromic Probing and Vapour Transport Properties	59
	<i>Johannes Carolus Jansen, Karel Friess, Elena Tocci, Mariagrazia Macchione, Luana De Lorenzo, Matthias Heuchel, Yuri P. Yampolskii and Enrico Drioli</i>	
4.1	Introduction and Scope	59
4.1.1	Free Volume and Free Volume Probing Methods for Polymers	60
4.1.2	Details of the Photochromic Probe Method	62
4.1.3	Relevance of Free Volume for Mass Transport Properties	64
4.2	Membrane Preparation	64
4.2.1	Materials	64
4.2.2	Procedures	64
4.2.3	Membrane Properties	67
4.3	Free Volume Analysis	68
4.3.1	Photoisomerization Procedures and UV-Visible Characterization	68
4.3.2	Probes and Spectrophotometric Analysis	68
4.3.3	Free Volume Distribution	69
4.4	Molecular Dynamics Simulations	71
4.5	Transport Properties	73
4.5.1	Permeation Measurements	73
4.5.2	Data Elaboration: Determination of the Time Lag and Steady State Permeability	74
4.5.3	Vapour Permeation Measurements	76
4.6	Correlation of Transport and Free Volume	79
4.7	Conclusions	80
	References	81

5	Modelling Gas Separation in Porous Membranes	85
	<i>Aaron W. Thornton, James M. Hill and Anita J. Hill</i>	
5.1	Introduction	85
5.2	Background	86
5.3	Surface Diffusion	88
5.4	Knudsen Diffusion	89
5.5	Membranes: Porous Structures?	90
5.6	Transition State Theory (TST)	91
5.7	Transport Models for Ordered Pore Networks	94
	5.7.1 Parallel Transport Model	94
	5.7.2 Resistance in Series Transport Model	95
5.8	Pore Size, Shape and Composition	95
5.9	The New Model	98
	5.9.1 Enhanced Separation by Tailoring Pore Size	99
	5.9.2 Determining Diffusion Regime from Experimental Flux	101
	5.9.3 Predictions of Gas Separation	102
5.10	Conclusion	105
	List of Symbols	106
	References	107
II.	Nanocomposite (Mixed Matrix) Membranes	111
6	Glassy Perfluoropolymer–Zeolite Hybrid Membranes for Gas Separations	113
	<i>Giovanni Golemme, Johannes Carolus Jansen, Daniela Muoio, Andrea Bruno, Raffaella Manes, Maria Giovanna Buonomenna, Jungkyu Choi and Michael Tsapatsis</i>	
6.1	Introduction	113
6.2	Materials and Methods	114
6.3	Results and Discussion	116
6.4	Conclusions	122
	Acknowledgements	123
	References	123
7	Vapor Sorption and Diffusion in Mixed Matrices Based on Teflon® AF 2400	125
	<i>Maria Chiara Ferrari, Michele Galizia, Maria Grazia De Angelis and Giulio Cesare Sarti</i>	
7.1	Introduction	125
7.2	Theoretical Background	126
	7.2.1 NELF Model	127
	7.2.2 Modelling Gas Solubility Into Mixed Matrix Glassy Membranes	128
	7.2.3 Modelling Gas Diffusivity and Permeability in Mixed Matrix Glassy Membranes	130

7.3	Experimental	132
7.3.1	Materials	132
7.3.2	Vapor Sorption	133
7.4	Results and Discussion	134
7.4.1	Vapor Sorption in Mixed Matrices Based on AF 2400	134
7.4.2	Diffusivity	137
7.4.3	Correlations for Diffusivity	138
7.4.4	Permeability and Selectivity	138
7.5	Conclusions	140
	Acknowledgements	141
	References	141
8	Physical and Gas Transport Properties of Hyperbranched Polyimide–Silica Hybrid Membranes	143
	<i>Tomoyuki Suzuki, Yasuharu Yamada, Jun Sakai and Kumi Itahashi</i>	
8.1	Introduction	143
8.2	Experimental	145
8.2.1	Materials	145
8.2.2	Polymerization	145
8.2.3	Membrane Formation	145
8.2.4	Measurements	146
8.3	Results and Discussion	147
8.3.1	Polymer Characterization	147
8.3.2	Gas Transport Properties of HBPI–Silica Hybrid Membranes	151
8.3.3	O ₂ /N ₂ and CO ₂ /CH ₄ Selectivities of HBPI–Silica Hybrid Membranes	151
8.4	Conclusions	157
	References	157
9	Air Enrichment by Polymeric Magnetic Membranes	159
	<i>Zbigniew J. Grzywna, Aleksandra Rybak and Anna Strzelewicz</i>	
9.1	Introduction	159
9.2	Formulation of the Problem	160
9.2.1	One-component Permeation Process – Fick's and Smoluchowski Equation	161
9.2.2	Diffusion Equation for Two-component Gas Mixture (Without and With a Potential Field)	164
9.3	Experimental	165
9.3.1	Membrane Preparation	165
9.3.2	Experimental Setup	166
9.3.3	Time Lag Method and D1-D8 System	167
9.3.4	Permeation Data	170
9.4	Results and Discussion	172
9.5	Conclusions	175
