

# RETROFITTING DESIGN OF BUILDING STRUCTURES

EDITED BY  
**XILIN LU**

# Contents

Preface .....	vii
<b>Chapter 1 Introduction</b> .....	1
1.1 The Significance of Structural Retrofitting .....	1
1.2 The Retrofitting Procedure of Building Structures .....	1
1.3 The Principles of Retrofitting Design for Building Structures .....	2
<b>Chapter 2 Inspection and Evaluation of Building Structures</b> .....	5
2.1 Introduction .....	5
2.1.1 Basic Concepts for Reliability Assessment of Buildings .....	5
2.1.2 Methods of Evaluating Buildings .....	5
2.2 Inspection for Mechanical Performance of Structural Material .....	8
2.2.1 Concrete Material .....	8
2.2.2 Steel or Rebar .....	17
2.2.3 Material for Masonry Structures .....	20
2.3 Inspection for Reinforcement Disposition in Concrete Members .....	22
2.3.1 Destructive Inspection Method (Sampling Inspection) .....	23
2.3.2 Nondestructive Inspection Method .....	23
2.4 Deformation Inspection for Structures and Members .....	26
2.4.1 Deformation Measurement of Structure Members .....	26
2.4.2 Inclination Inspection of Buildings .....	27
2.4.3 Settlement Inspection of Buildings .....	28
2.4.4 Inspection of Masonry Cracks .....	30
2.5 Structural Reliability Assessment .....	30
2.5.1 Building Structure Reliability Assessment Method .....	30
2.5.2 Building Damage Degree Assessment Method .....	40
<b>Chapter 3 Retrofitting Design of RC Structures</b> .....	43
3.1 Introduction .....	43
3.2 Retrofitting of RC Beams and Slabs .....	43
3.2.1 Cause and Phenomenon of Capacity Insufficiency of RC Beams and Slabs .....	44
3.2.2 Section Enlarging Method .....	48
3.2.3 Retrofitting by Adding Tensile Reinforcement .....	55
3.2.4 Prestress Retrofitting Method .....	60
3.2.5 Sticking Steel Reinforcement Method .....	85
3.3 Concrete Column Retrofitting .....	92
3.3.1 Problems in Reinforced Concrete Columns and Analysis .....	92
3.3.2 Section-enlarging Method .....	95
3.3.3 Encased Steel Method .....	101
3.3.4 Replacing Method .....	105
3.4 Retrofitting of Concrete Roof Trusses .....	106
3.4.1 Analysis of Concrete Roof Trusses .....	106

3.4.2	Retrofit Method for Concrete Roof Trusses	110
3.4.3	Practical Examples of Retrofitting of Concrete Roof Trusses	116
<b>Chapter 4</b>	<b>Retrofitting Design of Masonry Structures</b>	<b>119</b>
4.1	Introduction	119
4.2	Repairing and Strengthening of Wall Cracks	119
4.3	Retrofitting of the Wall: Lack of Load-bearing Capacity	121
4.3.1	Retrofit of Brick Wall with Buttress Columns	121
4.3.2	Retrofitting Brick Wall by Adding Mortar or Concrete Layer with Mat Reinforcement	126
4.4	Retrofitting of Brick Columns for Bearing Capacity Deficiency	129
4.4.1	Augmenting Sections for Retrofitting Brick Columns	129
4.4.2	Outer Packing Rolled Angles Method for Retrofitting Brick Columns	130
4.5	Retrofitting of Wall between Windows	132
4.6	Methods for Strengthening the Integrity of Masonry Structures	133
4.6.1	Detailed Requirements of Additional Constructional Columns, Ring Beams, and Steel Tie Rods	133
4.6.2	Calculations of the Shear Strength of Walls Retrofitted by Additional Columns, Ring Beams, and Steel Tie Rods	139
4.7	Retrofitting Methods for Connections between Masonry Members	140
<b>Chapter 5</b>	<b>Retrofitting Design of Wood Structures</b>	<b>145</b>
5.1	Introduction	145
5.1.1	Reasons for Retrofitting of Wood Structures	145
5.1.2	Principles of Wood Structure Retrofitting	146
5.2	Retrofitting of Wooden Beams	149
5.3	Retrofitting of Wooden Roof Trusses	152
5.3.1	Strengthening with Wooden Clamp	152
5.3.2	Strengthening with Clamps and String Rods	153
5.3.3	Strengthening Vertical Wooden Rods with Steel Tendons	154
5.3.4	Rectification of Wood Frames	155
5.4	Retrofitting of Wooden Columns	157
5.5	Retrofitting of Other Wooden Components	158
5.5.1	Strengthening of Wooden Purlins	158
5.5.2	Strengthening of Wooden Stairs	159
5.5.3	Strengthening of Wooden Ceilings	160
5.6	Seismic Retrofitting of Wood Structure Buildings	160
5.6.1	Basic Principles of Seismic Strengthening	160
5.6.2	Scopes and Methods of Strengthening	160
