Contents

Preface.....	xvii
Authors	xix

1. Basic Considerations	1
1.1 Introduction	1
1.2 Early Combustor Developments	2
1.2.1 Britain	3
1.2.2 Germany.....	5
1.2.2.1 Jumo 004	5
1.2.2.2 BMW 003	6
1.2.3 The United States	6
1.3 Basic Design Features.....	8
1.4 Combustor Requirements.....	9
1.5 Combustor Types	10
1.5.1 Tubular	11
1.5.2 Tuboannular	11
1.5.3 Annular	12
1.6 Diffuser.....	14
1.7 Primary Zone.....	15
1.8 Intermediate Zone.....	16
1.9 Dilution Zone.....	17
1.10 Fuel Preparation	18
1.10.1 Pressure-Swirl Atomizers.....	18
1.10.2 Airblast Atomizer	19
1.10.3 Gas Injection	20
1.11 Wall Cooling	20
1.11.1 Wall-Cooling Techniques	22
1.12 Combustors for Low Emissions.....	23
1.13 Combustors for Small Engines.....	26
1.14 Industrial Chambers.....	28
1.14.1 Aeroderivative Engines	31
References	33
Bibliography.....	33
2. Combustion Fundamentals	35
2.1 Introduction	35
2.1.1 Deflagration	35
2.1.2 Detonation.....	35
2.2 Classification of Flames.....	36
2.3 Physics or Chemistry?	37

2.4	Flammability Limits	37
2.5	Global Reaction-Rate Theory	38
2.5.1	Weak Mixtures	39
2.5.2	Rich Mixtures	39
2.6	Laminar Premixed Flames	41
2.6.1	Factors Influencing Laminar Flame Speed	41
2.6.1.1	Equivalence Ratio	41
2.6.1.2	Initial Temperature	42
2.6.1.3	Pressure	42
2.7	Laminar Diffusion Flames	42
2.8	Turbulent Premixed Flames	43
2.9	Flame Propagation in Heterogeneous Mixtures of Fuel Drops, Fuel Vapor, and Air	45
2.10	Droplet and Spray Evaporation	49
2.10.1	Heat-Up Period	50
2.10.2	Evaporation Constant	51
2.10.3	Convective Effects	52
2.10.4	Effective Evaporation Constant	52
2.10.5	Spray Evaporation	54
2.10.6	Some Recent Developments	54
2.11	Ignition Theory	55
2.11.1	Gaseous Mixtures	55
2.11.2	Heterogeneous Mixtures	56
2.12	Spontaneous Ignition	64
2.13	Flashback	69
2.14	Stoichiometry	70
2.15	Adiabatic Flame Temperature	71
2.15.1	Factors Influencing the Adiabatic Flame Temperature	71
2.15.1.1	Fuel/Air Ratio	71
2.15.1.2	Initial Air Temperature	71
2.15.1.3	Pressure	72
2.15.1.4	Inlet-Air Vitiation	72
	Nomenclature	73
	References	74
	Bibliography	77
3.	Diffusers	79
3.1	Introduction	79
3.2	Diffuser Geometry	81
3.3	Flow Regimes	82
3.4	Performance Criteria	83
3.4.1	Pressure-Recovery Coefficient	84
3.4.2	Ideal Pressure-Recovery Coefficient	84

3.4.3	Overall Effectiveness.....	85
3.4.4	Loss Coefficient	85
3.4.5	Kinetic-Energy Coefficient	86
3.5	Performance	86
3.5.1	Conical Diffusers	87
3.5.2	Two-Dimensional Diffusers	88
3.5.3	Annular Diffusers.....	89
3.6	Effect of Inlet Flow Conditions	90
3.6.1	Reynolds Number.....	91
3.6.2	Mach Number	91
3.6.3	Turbulence	92
3.6.4	Swirl	93
3.7	Design Considerations	93
3.7.1	Faired Diffusers	93
3.7.2	Dump Diffusers	97
3.7.2.1	Influence of Liner Depth Ratio.....	98
3.7.3	Splitter Vanes.....	99
3.7.4	Vortex-Controlled Diffuser	100
3.7.5	Hybrid Diffuser.....	101
3.7.6	Diffusers for Tubular and Turboannular Combustors	104
3.7.7	Testing of Diffusers	105
3.8	Numerical Simulations.....	106
	Nomenclature.....	108
	References	109
4.	Aerodynamics.....	113
4.1	Introduction	113
4.2	Reference Quantities.....	114
4.3	Pressure-Loss Parameters.....	114
4.4	Relationship between Size and Pressure Loss.....	117
4.5	Flow in the Annulus.....	118
4.6	Flow through Liner Holes.....	120
4.6.1	Discharge Coefficient	120
4.6.2	Initial Jet Angle	123
4.7	Jet Trajectories.....	124
4.7.1	Experiments on Single Jets	124
4.7.2	Penetration of Multiple Jets	126
4.8	Jet Mixing	129
4.8.1	Cylindrical Ducts	129
4.8.2	Rectangular Ducts	131
4.8.2.1	Influence of Density Ratio.....	132
4.8.3	Annular Ducts.....	133

4.9	Temperature Traverse Quality	133
4.10	Dilution Zone Design	135
4.10.1	Cranfield Design Method	136
4.10.2	NASA Design Method	137
4.10.3	Comparison of Cranfield and NASA Design Methods	137
4.11	Correlation of Pattern Factor Data	138
4.12	Rig Testing for Pattern Factor	140
4.13	Swirler Aerodynamics	140
4.14	Axial Swirlers	142
4.14.1	Swirl Number	143
4.14.2	Size of Recirculation Zone	144
4.14.3	Flow Reversal	145
4.14.4	Influence of Swirler Exit Geometry	146
4.15	Radial Swirlers	146
4.16	Flat Vanes Versus Curved Vanes	147
	Nomenclature	147
	References	149
5.	Combustion Performance	153
5.1	Introduction	153
5.2	Combustion Efficiency	153
5.2.1	The Combustion Process	154
5.3	Reaction-Controlled Systems	154
5.3.1	Burning Velocity Model	155
5.3.2	Stirred Reactor Model	159
5.4	Mixing-Controlled Systems	160
5.5	Evaporation-Controlled Systems	161
5.6	Reaction- and Evaporation-Controlled Systems	165
5.7	Flame Stabilization	167
5.7.1	Definition of Stability Performance	167
5.7.2	Measurement of Stability Performance	168
5.7.3	Water Injection Technique	170
5.8	Bluff-Body Flameholders	173
5.8.1	Experimental Findings on Bluff-Body Flame Stabilization	173
5.8.1.1	Homogeneous Mixtures	173
5.8.1.2	Heterogeneous Mixtures	177
5.8.2	Summary of Experimental Findings	179
5.9	Mechanisms of Flame Stabilization	179
5.9.1	Homogeneous Mixtures	181
5.9.2	Heterogeneous Mixtures	182
5.10	Flame Stabilization in Combustion Chambers	183

5.10.1	Influence of Mode of Fuel Injection	184
5.10.2	Correlation of Experimental Data	185
5.11	Ignition	188
5.12	Assessment of Ignition Performance	189
5.13	Spark Ignition	190
5.13.1	The High-Energy Ignition Unit	190
5.13.2	The Surface Discharge Igniter	191
5.13.2.1	Igniter Performance	192
5.13.2.2	Igniter Design	193
5.13.2.3	Igniter Life	194
5.14	Other Forms of Ignition	195
5.14.1	Torch Igniter	195
5.14.2	Glow Plug	196
5.14.3	Hot-Surface Ignition	196
5.14.4	Plasma Jet	197
5.14.5	Laser Ignition	197
5.14.6	Chemical Ignition	198
5.14.7	Gas Addition	199
5.14.8	Oxygen Injection	199
5.15	Factors Influencing Ignition Performance	199
5.15.1	Ignition System	200
5.15.1.1	Spark Energy	200
5.15.1.2	Spark Duration	200
5.15.1.3	Sparking Rate	202
5.15.1.4	Igniter Location	202
5.15.2	Flow Variables	203
5.15.2.1	Air Pressure	203
5.15.2.2	Air Temperature	204
5.15.2.3	Air Velocity	205
5.15.2.4	Turbulence	206
5.15.3	Fuel Parameters	207
5.15.3.1	Fuel Type	207
5.15.3.2	Fuel/Air Ratio	207
5.15.3.3	Spray Characteristics	208
5.15.3.4	Fuel Temperature	209
5.16	The Ignition Process	209
5.16.1	Factors Influencing Phase 1	210
5.16.2	Factors Influencing Phase 2	210
5.16.3	Factors Influencing Phase 3	211
5.17	Methods of Improving Ignition Performance	211
5.17.1	Correlation of Experimental Data	212
	Nomenclature	214
	References	216

6. Fuel Injection	221
6.1 Basic Processes in Atomization	221
6.1.1 Introduction	221
6.1.2 Breakup of Drops	222
6.1.2.1 Drop Breakup in Turbulent Flow Fields	223
6.2 Classical Mechanism of Jet and Sheet Breakup	223
6.2.1 Breakup of Fuel Jets	224
6.2.2 Breakup of Fuel Sheets	226
6.3 Prompt Atomization	227
6.4 Classical or Prompt?	228
6.5 Drop-Size Distributions	228
6.5.1 Graphical Representation of Drop-Size Distributions	228
6.5.2 Mathematical Distribution Functions	230
6.5.3 Rosin–Rammler	231
6.5.4 Modified Rosin–Rammler	233
6.5.5 Mean Diameters	234
6.5.6 Representative Diameters	234
6.5.7 Prediction of Drop-Size Distributions	236
6.6 Atomizer Requirements	237
6.7 Pressure Atomizers	237
6.7.1 Plain Orifice	238
6.7.2 Simplex	238
6.7.3 Dual Orifice	239
6.7.4 Spill Return	240
6.8 Rotary Atomizers	241
6.9 Air-Assist Atomizers	242
6.10 Airblast Atomizers	243
6.10.1 Plain-Jet Airblast	243
6.10.2 Prefilming Airblast	244
6.10.3 Piloted Airblast	245
6.10.4 Airblast Simplex	246
6.11 Effervescent Atomizers	249
6.12 Vaporizers	251
6.13 Fuel Nozzle Coking	254
6.14 Gas Injection	256
6.15 Equations for Mean Drop Size	256
6.16 SMD Equations for Pressure Atomizers	258
6.16.1 Plain Orifice	258
6.16.2 Pressure Swirl	258
6.17 SMD Equations for Twin-Fluid Atomizers	261
6.18 SMD Equations for Prompt Atomization	264
6.18.1 Comments on SMD Equations	265
6.19 Internal Flow Characteristics	266

6.20	Flow Number.....	266
6.21	Discharge Coefficient	268
6.21.1	Plain-Orifice Atomizers.....	268
6.21.2	Pressure-Swirl Atomizers.....	270
6.21.3	Film Thickness.....	270
6.22	Spray Cone Angle	273
6.22.1	Plain-Orifice Atomizers.....	273
6.22.2	Pressure-Swirl Atomizers.....	274
6.22.2.1	Theoretical Aspects.....	274
6.23	Radial Fuel Distribution.....	276
6.24	Circumferential Fuel Distribution.....	280
6.24.1	Pressure-Swirl Atomizers.....	280
6.24.2	Airblast Atomizers	282
	Nomenclature.....	284
	References	285
7.	Combustion Noise.....	293
7.1	Introduction	293
7.2	Direct Combustion Noise	294
7.2.1	Theory.....	294
7.2.2	Core Noise Prediction Methods	296
7.3	Combustion Instabilities.....	297
7.3.1	Descriptions of Acoustic Oscillations.....	297
7.3.1.1	Growl.....	297
7.3.1.2	Howl.....	298
7.3.2	Characteristic Times.....	298
7.3.3	Influence of Fuel Type	299
7.3.4	Influence of Combustor Operating Conditions.....	299
7.3.5	Influence of Ambient Conditions	300
7.3.6	Aerodynamic Instabilities	300
7.3.7	Fuel-Injector Instabilities	302
7.3.8	Compressor-Induced Oscillations.....	303
7.3.9	LPM Combustor Noise.....	304
7.3.10	Test Rig Simulations	304
7.4	Control of Combustion Instabilities.....	305
7.4.1	Passive Control.....	305
7.4.2	Active Control	306
7.4.2.1	Open-Loop Systems.....	307
7.4.2.2	Closed-Loop Systems.....	307
7.4.3	Examples of Active Control.....	307
7.4.4	Influence of Control Signal Frequency	309
7.5	Modeling of Combustion Instabilities	309
	References	310
	Bibliography.....	313

8. Heat Transfer	315
8.1 Introduction	315
8.2 Heat-Transfer Processes	316
8.3 Internal Radiation	318
8.3.1 Radiation from Nonluminous Gases	318
8.3.2 Radiation from Luminous Gases.....	320
8.4 External Radiation	321
8.5 Internal Convection	322
8.6 External Convection	323
8.7 Calculation of Uncooled Liner Temperature	324
8.7.1 Method of Calculation	325
8.7.2 Significance of Calculated Uncooled Liner Temperatures.....	328
8.8 Film Cooling	329
8.8.1 Wiggletrips.....	329
8.8.2 Stacked Ring.....	330
8.8.3 Splash-Cooling Ring.....	331
8.8.4 Machined Ring.....	331
8.8.5 Rolled Ring	331
8.8.6 Z Ring	332
8.9 Correlation of Film-Cooling Data.....	333
8.9.1 Theories Based on Turbulent Boundary-Layer Model	334
8.9.2 Theories Based on Wall-Jet Model.....	335
8.9.3 Calculation of Film-Cooled Wall Temperature	337
8.9.4 Film Cooling with Augmented Convection.....	341
8.9.5 Impingement Cooling	342
8.9.6 Transpiration Cooling	343
8.10 Practical Applications of Transpiration Cooling.....	343
8.10.1 Transply.....	344
8.10.2 Lamilloy	345
8.10.3 Effusion Cooling	346
8.11 Advanced Wall-Cooling Methods.....	346
8.11.1 Angled Effusion Cooling.....	346
8.11.2 Tiles.....	347
8.12 Augmented Cold-Side Convection	349
8.13 Thermal Barrier Coatings	349
8.14 Materials.....	351
8.14.1 Metal Alloys	352
8.14.2 Ceramics.....	353
8.14.3 Mechanical Integrity	354
8.15 Liner Failure Modes.....	354
Nomenclature.....	355
References	356

9. Emissions	359
9.1 Introduction	359
9.2 Concerns	360
9.3 Regulations	362
9.3.1 Aircraft Engines	362
9.3.2 Stationary Gas Turbines	364
9.4 Mechanisms of Pollutant Formation	366
9.4.1 Carbon Monoxide	366
9.4.1.1 Influence of Equivalence Ratio	368
9.4.1.2 Influence of Pressure	369
9.4.1.3 Influence of Ambient Air Temperature	369
9.4.1.4 Influence of Wall-Cooling Air	369
9.4.1.5 Influence of Fuel Atomization	370
9.4.2 Unburned Hydrocarbons	370
9.4.3 Smoke	370
9.4.3.1 Influence of Pressure	371
9.4.3.2 Influence of Fuel Type	371
9.4.3.3 Influence of Fuel Atomization	372
9.4.4 Oxides of Nitrogen	374
9.4.4.1 Thermal Nitric Oxide	374
9.4.4.2 Nitrous Oxide Mechanism	378
9.4.4.3 Prompt Nitric Oxide	378
9.4.4.4 Fuel Nitric Oxide	378
9.4.5 Influence of Pressure on Oxides of Nitrogen Formation	379
9.4.6 Influence of Fuel Atomization on Oxides of Nitrogen Formation	381
9.5 Pollutants Reduction in Conventional Combustors	382
9.5.1 Carbon Monoxide and Unburned Hydrocarbons	383
9.5.2 Smoke	384
9.5.3 Oxides of Nitrogen	387
9.5.3.1 Water Injection	387
9.5.3.2 Selective Catalytic Reduction	390
9.5.3.3 Exhaust Gas Recirculation	390
9.6 Pollutants Reduction by Control of Flame Temperature	391
9.6.1 Variable Geometry	391
9.6.2 Staged Combustion	393
9.7 Dry Low-Oxides of Nitrogen Combustors	398
9.7.1 Solar Dry Low-Emissions Concepts	398
9.7.2 Siemens Hybrid Burner	400
9.7.3 General Electric DLN Combustor	401
9.7.3.1 Primary	402
9.7.3.2 Lean-Lean	403

9.7.3.3	Secondary	403
9.7.3.4	Premix	403
9.7.4	ABB EV Burner	403
9.7.5	Rolls Royce RB211 Industrial Burner	406
9.7.6	EGT DLN Combustor	407
9.7.7	General Electric LM6000 Combustor	409
9.7.8	Allison AGT100 Combustor	412
9.7.9	Developments in Japan	413
9.8	Lean Premix Prevaporize Combustion	415
9.8.1	Fuel-Air Premixing	416
9.9	Rich-Burn, Quick-Quench, Lean-Burn Combustor	418
9.10	Catalytic Combustion	421
9.10.1	Design Approaches	422
9.10.2	Design Constraints	423
9.10.3	Fuel Preparation	423
9.10.4	Catalyst Bed Construction	424
9.10.5	Postcatalyst Combustion	425
9.10.6	Design and Performance	425
9.10.7	Use of Variable Geometry	427
9.10.8	Future	428
9.11	Correlation and Modeling of Oxides of Nitrogen and Carbon Monoxide Emissions	428
9.11.1	Oxides of Nitrogen Correlations	429
9.11.1.1	Odgers and Kretschmer	429
9.11.1.2	Lewis	431
9.11.1.3	Rokke et al.	431
9.11.1.4	Rizk and Mongia	431
9.11.2	Carbon Monoxide Correlations	432
9.12	Concluding Remarks	434
	Nomenclature	435
