

Practical Atlas for Bacterial Identification

SECOND EDITION

D. Roy Cullimore

CRC Press
Taylor & Francis Group

Contents

List of Tables	xiii
List of Figures	xv
List of Plates	xxi
Preface	xxv
Acknowledgments.....	xxix
Author	xxxix

Chapter 1 Bacterial Communities by Location and Function 1

1.1	Introduction to Layering of Bacterial Communities	1
1.2	Factors Significantly Influencing Bacterial Activities and Nutrient Cycles	4
1.3	Bacteria: Human Perspectives	6

Chapter 2 Common Bacteriologically Initiated Events 11

2.1	Historical Overview	11
2.2	Challenges of Classifying “Unculturables”	13
2.3	Evolutionary Trends toward Bacterial Diversity	14
2.4	Two-Dimensional Grid Definition of Bacterial Communities	15
2.5	Establishment of Grid Location Points for Bacterial Atlas.....	20
2.6	Summary of Bacterial Community Grid Positioning Atlas Principles.....	21

Chapter 3 Bacteria Are Everywhere: *Classification of Alpha Groups of Bacterial Consorms* 23

3.1	Historical Overview	23
3.2	Definitions of Alpha-Based Bacterial Consortia.....	27
3.3	Alpha One: Bionucleating Dispersed Consorms [FPL (FMV:FCP) 22-04]	30
3.4	Alpha Two: Organic Bioconcreting Consorms [FPL (FMV:FCP) 22-16].....	31
3.5	Alpha Three: Inorganic Bioconcreting Consorms [FPL (FMV:FCP) 13-21].....	32
3.6	Alpha Four: Carbon-Reducing Consorms [FPL (FMV:FCP) 06-27]	33
3.7	Alpha Five: Carbon-Oxidizing Consorms [FPL (FMV:FCP) 13-07]	34

3.8	Alpha Six: Hyperbaric Dispersed Bionucleating Consorms [FPL (FMV:FCP) 01-03].....	34
3.9	Summary	35
Chapter 4	Preliminary Differentiation of Alpha Bacterial Consorms.....	37
4.1	Introduction	37
4.2	Alpha One: Bionucleating Dispersed Consorms (FPL 1, 22-04)	38
4.2.1	Principal Alpha One Consormial Activities.....	38
4.3	Alpha Two: Organic Bionucleating Consorms (FPL 2, 22-16).....	39
4.3.1	Principal Alpha Two Consormial Activities	40
4.4	Alpha Three: Inorganic Bionucleating Consorms (FPL 3, 13-21).....	44
4.4.1	Principal Alpha Three Consormial Activities	45
4.5	Alpha Four: Carbon-Reducing Consorms (FPL 4, 06-27).....	49
4.5.1	Principal Alpha Four Consormial Activities.....	50
4.6	Alpha Five: Carbon-Oxidizing Consorms (FPL 5, 13-07).....	52
4.6.1	Principal Alpha Five Consormial Activities	52
4.7	Alpha Six: Hyperbaric Dispersed Bionucleating Consorms (FPL 6, 01-03)	53
Chapter 5	Environmental Dynamics of Bacterial Consorms	55
5.1	Introduction	55
5.2	Defining Bacteriologically Dominated Consorms.....	56
5.3	Categorization of Consorms.....	57
5.3.1	Location within Environment	58
5.3.2	Generated Colors.....	59
5.3.3	Texture and Porosity.....	62
5.3.4	Inorganic and Organic Chemistry.....	64
5.3.5	Water Form and Content	66
5.3.6	Odors Emanating from Consorms	66
5.3.7	Identification of Recovered Bacterial Consorms	67
5.3.8	Time-Scaled Maturation	68
Chapter 6	Bacterial Consormial Challenges.....	71
6.1	Introduction	71
6.2	Identification of Consorms	72
6.3	Determining Probability of Consormial Activity	73
6.4	Symptoms of Consormial Intrusions.....	77
6.5	Quantification of Consormial Intrusions into Environment....	78
6.6	Causes and Effects of Consorm Intrusions in Impacted Environment.....	79
6.7	Consorm Sampling Protocols.....	83

Chapter 7	Detailed Identification of Bacterial Consorms.....	85
7.1	Introduction	85
7.2	Defining Bacterial Consorms by Form, Function, and Habitat	86
	1, 22-03 CLD (Clouds)	88
	1, 17-15 CMT (Comets)	88
	1, 19-06 FOM (Foam)	88
	1, 16-12 ICE (Ice)	89
	1, 16-03 LNG (Lightning)	89
	1, 19-12 SNO (Snow)	89
	2, 12-17 ABS (Abscesses)	90
	2, 13-10 BOL (Boils)	90
	2, 19-07 BCH (Bronchitis)	90
	2, 08-20 CBC (Carbuncles)	91
	2, 11-14 CCD (Carietic Condition)	91
	2, 15-07 CLS (Cloudiness)	91
	2, 11-18 CHR (Cholera)	92
	2, 16-13 CLB (Coliform Bacteria)	92
	2, 15-18 CLW (Colloidal Water)	92
	2, 18-13 DRR (Diarrhea)	93
	2, 10-12 FCB (Fecal Coliform Bacteria)	93
	2, 07-23 FEC (Feces)	93
	2, 10-08 KDS (Kidney Stones)	93
	2, 22-12 LMN (Luminescent Bacteria)	94
	2, 09-15 MIC (Microbiologically Influenced Corrosion)	94
	2, 18-16 NCR (Necrosis)	95
	2, 22-21 PMP (Pimples)	95
	2, 19-21 PLG (Plugging)	95
	2, 23-14 PEY (Pink Eye)	96
	2, 16-18 PUS (Pus)	96
	2, 06-18 ROE (Rotten Eggs)	96
	2, 14-15 ROT (Rotting)	97
	2, 16-21 RZZ (Rhizosphere)	97
	2, 22-07 SHN (Sheen)	97
	2, 23-21 SKN (Skin)	98
	2, 11-16 SLT (Silt)	98
	2, 21-22 SLM (Slime)	98
	2, 24-13 TCT (Thatch)	98
	2, 15-13 TBD (Turbidity)	99
	2, 07-20 ULC (Ulcers)	99
	2, 12-07 URN (Urinary Tract Infections)	100
	2, 12-13 WLT (Wilt)	100
	3, 10-21 BPL (Black Plug Layer)	100
	3, 10-27 BBR (Blueberries)	101
	3, 03-16 BWR (Black Water)	101
	3, 19-03 CRB (Carbonates)	101

3, 05-27 CGG (Clogging).....	102
3, 06-16 CRS (Corrosion).....	102
3, 18-25 CCR (Concretions).....	103
3 -20-28 FRD (Ferric-Rich Deposits).....	103
3, 22-18 IPN (Iron Pan).....	104
3, 18-14 LSL (Lateral Slime Layer).....	104
3, 15-28 MGN (Manganese Nodules)	104
3, 18-19 OCR (Ochres).....	105
3, 10-30 PGI (Pig Iron).....	105
3, 03-19 PFR (Perforation)	106
3, 06-24 PTG (Pitting).....	106
3, 19-21 PLG (Plugging)	106
3, 19-26 RST (Rusticles)	108
3, 10-10 SBL (Sand Boils)	108
3, 15-17 TCL (Tubercles).....	109
4, 05-25 BAP (Black Asphaltene-Rich Plugs).....	110
4, 04-20 CDR (Carbon Dioxide Reducers)	110
4, 05-17 COL (Coal)*.....	111
4, 06-22 BNG (Biogenic Natural Gas).....	111
4, 03-13 BSR (Black Smokers)	112
4 01-28 OIL (Oil)	112
4, 07-19 PET (Peat)	113
5, 15-10 GHY (Gas Hydrates).....	114

Chapter 8 Biochemical Methods for Identification of Consorms 115

8.1 Introduction	115
8.2 Determination of Consormial Activity by ATP Analysis	115
8.3 RASI Protocol for Determining Potential ATP Activity	117
8.3.1 Differentiation of RASI Procedures.....	119
8.3.2 RASI-MIDI Protocols for Identifying Bacterial Consorms.....	120

Chapter 9 Identifying Bacterial Consorms Using BART 123

9.1 Introduction	123
9.2 Development of BART to Determine Bacterial Activity	124
9.3 BART Setup.....	126
9.4 Red Cap: Iron-Related Bacteria (IRB BART)	128
9.4.1 Qualitative Interpretation of IRB Reaction Patterns.....	129
9.5 Black Cap: Sulfate-Reducing Bacteria (SRB BART)	131
9.6 Lime Green Cap: Slime-Forming Bacteria (SLYM BART) ...	133
9.7 Dark Blue Cap: Heterotrophic Bacteria (HAB BART).....	135
9.8 Grey Cap: Denitrifying Bacteria (DN BART)	136
9.9 White Cap: Nitrifying Bacteria (N BART).....	137

9.10	Purple Cap: Acid-Producing Bacteria (APB BART)	139
9.11	Yellow Cap: Fluorescent Pseudomonad Bacteria (FLOR BART)	140
9.12	Comparison of BART and Other Bacteriological Enumeration Methods	141
9.12.1	Comparison of BART, HPC, and ATP	141
9.12.2	Environmental Technology Verification (Canada)	142
9.12.3	Comparison of BART and Other Microbiological Tests	142
Chapter 10	Introduction to Grid-Formatted Bacteriological Atlas.....	145
10.1	Focal Point Locations for Bacterial Consorms	145
10.2	Differentiation of Grid Atlas into Six Major Consormial Groups	145
10.3	Alpha One: Bionucleating Dispersed Consorms	146
10.4	Alpha Two: Organic Bionucleating Consorms	149
10.5	Alpha Three: Inorganic Bioconcreting Consorms	153
10.6	Alpha Four: Carbon Reducing Consorms	155
10.7	Alpha Five: Carbon Oxidizing Consorms	158
10.8	Alpha Six: Hyperbaric Dispersed Bionucleating Consorms.....	160
10.9	Differentiation of Major Consorms by Grid Positions and BART Reactions	160
Chapter 11	Defining Bacterial Consorms in Gridded Atlas Format	175
11.1	Introduction	175
11.2	Basic fmv: fcP Grid	178
11.3	Limitations of Animal Habitats on Gridded Atlas.....	178
11.4	Limitations of Plant Habitats on Gridded Atlas	179
11.5	Dominant Prokaryotic Consormial Domains.....	181
11.6	Dominant Microbiological Eukaryotic Domains.....	181
11.7	Bacterial Consorms Associated with Plant Activities.....	183
11.8	Bacterial Consorms Associated with Non-Herbivoral Intestinal Streaming	185
11.9	Bacterial Consorms Involved in Spoilage of Foods	187
11.10	Mammalian Consormial Non-Enteric Pathogens on Gridded Atlas	189
11.11	Bacterial Consorms Associated with Water Quality Issues	190
11.12	Bacterial Consorms Involved in Oil, Gas, and Coal Production in Geological Media.....	191
11.13	Bacterial Consormial Interceptors in Upward Migration of Hydrocarbons	192
11.14	Bacterial Interception of Groundwater Flows in Porous and Fractured Media	193

Chapter 12	Natural Bacteriological Consorms	197
12.1	Introduction	197
12.2	1, 22-03 CLD (Clouds)	197
12.3	1, 16-12 ICE (Ice).....	199
12.4	3, 18-25 CCR (Concretions).....	200
12.5	3, 18-19 OCR (Ochres).....	201
12.6	3, 06-24 PTG (Pitting).....	206
12.7	3, 03-19 PFR (Perforation).....	209
12.8	2, 09-15 MIC (Microbiologically Influenced Corrosion)	211
12.9	3, 10-21 BPL (Black Plug Layers)	214
12.10	3, 10-27 BBR (“Blueberries”).....	216
12.11	3, 19-26 RST (Rusticles).....	217
12.12	1, 19-06 FOM (Foam).....	219
12.13	3, 15-17 TCL (Tubercles)	221
12.14	3, 18-14 LSL (Lateral Slime Layer).....	221
12.15	5. 15-10 GHY (Gas Hydrates).....	222
12.16	Culturing Bacterial Consorms.....	223
12.17	Rehabilitation	225
12.18	Monitoring Methodologies	229
Suggestions for Further Reading		235
Appendix	Alpha Two Traditional Atlas Concept	239
Index		289
